As you read this manual, you will find information that is preceded by a symbol **NOTICE**. This information is intended to help you avoid damage to your vehicle, other property, or the environment.

Symbols on labels attached to your vehicle are to remind you to read this owner’s manual for proper and safe operation of your vehicle.

is colour-coded to indicate “danger” (red), “warning” (orange), or “caution” (amber).

**Safety Labels** P. 89

---

**A Few Words About Safety**

Your safety, and the safety of others, is very important. And operating this vehicle safely is an important responsibility.

To help you make informed decisions about safety, we have provided operating procedures and other information on labels and in this manual. This information alerts you to potential hazards that could hurt you or others.

Of course, it is not practical or possible to warn you about all the hazards associated with operating or maintaining your vehicle. You must use your own good judgement.

You will find this important safety information in a variety of forms, including:

- **Safety Labels** - on the vehicle.
- **Safety Messages** - preceded by a safety alert symbol and one of three signal words: **DANGER**, **WARNING**, or **CAUTION**. These signal words mean:

  - **DANGER**: You WILL be KILLED or SERIOUSLY HURT if you don’t follow instructions.
  - **WARNING**: You CAN be KILLED or SERIOUSLY HURT if you don’t follow instructions.
  - **CAUTION**: You CAN be HURT if you don’t follow instructions.

- **Safety Headings** - such as Important Safety Precautions.
- **Safety Section** - such as Safe Driving.
- **Instructions** - how to use this vehicle correctly and safely.

This entire book is filled with important safety information - please read it carefully.
**Event Data Recorders**
Your vehicle is equipped with several devices commonly referred to as Event Data Recorders. They record various types of real time vehicle data such as SRS airbag deployment and SRS system components failure.
This data belongs to the vehicle owner and may not be accessed by anyone else except as legally required or with the permission of the vehicle owner.
However this data may be accessed by Honda, its authorised dealers and authorised repairers, employees, representatives and contractors only for the purpose of the technical diagnosis, research and development of the vehicle.

**Service Diagnostic Recorders**
Your vehicle is equipped with service-related devices that record information about powertrain performance and driving conditions. The data can be used to help technicians diagnose, repair and maintain the vehicle. This data may not be accessed by anyone else except as legally required or with the permission of the vehicle owner.
However this data may be accessed by Honda, its authorised dealers and authorised repairers, employees, representatives and contractors only for the purpose of the technical diagnosis, research and development of the vehicle.
This owner’s manual should be considered a permanent part of the vehicle and should remain with the vehicle when it is sold.

This owner’s manual covers all models of your vehicle. You may find descriptions of equipment and features that are not on your particular model.

Images throughout this owner’s manual represent features and equipment that are available on some, but not all, models. Your particular model may not have some of these features.

The information and specifications included in this publication were in effect at the time of approval for printing. Honda Motor Co., Ltd. reserves the right, however, to discontinue or change specifications or design at any time without notice and without incurring any obligation.

Although this manual is applicable to both right-hand and left-hand drive models, the illustrations contained in this manual mainly refer to the left-hand drive models.

Safe Driving P.35

Airbags P.53
- Your vehicle is fitted with airbags to help protect you and your passengers during a moderate-to-severe collision.

Child Safety P.66
- All children 12 and younger should be seated in the rear seat.
- Small children should be properly restrained in a front-facing child restraint system.
- Infants must be properly restrained in a rear-facing child restraint system on a rear seat.

Exhaust Gas Hazard P.88
- Your vehicle emits dangerous exhaust gases that contain carbon monoxide. Do not run the engine in confined spaces where carbon monoxide gas can accumulate.

Seat Belts P.41
- Fasten your seat belt and sit upright well back in the seat.
- Check that your passengers are wearing their seat belts correctly.

Before Driving Checklist P.40
- Before driving, check that the front seats, head restraints, steering wheel, and mirrors have been properly adjusted.

Controls  \( \rightarrow \text{P. 153} \)

Clock  \( \rightarrow \text{P. 154} \)

Models with navigation system
The navigation system receives signals from GPS satellites, updating the clock automatically. You should customize the time zone and daylight saving.

Customized Features  \( \rightarrow \text{P. 345} \)

All models
The clock in the multi-information display is automatically updated along with the audio system's clock display.

Models with colour audio system

1. Press and hold the MENU/CLOCK button.
2. Rotate \( \bigcirc \) to change hour, then press \( \bigcirc \).
3. Rotate \( \bigcirc \) to change minute, then press \( \bigcirc \).
4. Select Set, then press \( \bigcirc \).

Models with display audio system

1. Select the \( \bigcirc \) icon.
2. Select Settings.
3. Select Info.
4. Select the Clock tab.
5. Select Clock Adjustment.
6. Select \( \bigcirc \) or \( \bigcirc \) to change hour.
7. Select \( \bigcirc \) or \( \bigcirc \) to change minute, then select OK.

These indications are used to show how to operate the LIST/SELECT (List/Selector) knob.
- Rotate \( \bigcirc \) to select.
- Press \( \bigcirc \) to enter.
**ENGINE START/STOP Button**

Press the button to change the vehicle's power mode.

**Turn Signals**

**Wiper/Washer Control Lever**

- **MIST**
- **OFF**
- **AUTO**: Wiper speed varies automatically
- **INT**: Low speed with intermittent
- **LO**: Low speed wipe
- **HI**: High speed wipe

Pull towards you to spray washer fluid.

**Adjustment Ring**

- **(−)**: Low Sensitivity*1
- **(−)**: Lower speed, fewer sweeps*2
- **(+)**: High Sensitivity*1
- **(+)**: Higher speed, more sweeps*2

*1: Models with automatic intermittent operation
*2: Models with manual intermittent operation

**Models with automatic intermittent wipers**

**AUTO** should always be turned OFF before the following situations in order to prevent severe damage to the wiper system:

- Cleaning the windscreen
- Driving through a car wash
- No rain present

**Steering Wheel**

To adjust, pull the adjustment lever towards you, adjust to the desired position, then lock the lever back in place.

**Unlocking the Front Doors from the Inside**

Pull either front door inner handle to unlock and open it in one motion.
Tailgate  P. 169

**Models without keyless access system**
- With all the doors unlocked, press the tailgate release button and lift open the tailgate.

**Models with keyless access system**
- Press the tailgate release button to unlock and open the tailgate when you carry the keyless remote.

Power Door Mirrors  P. 204

- With the ignition switch in ON [II] *, move the selector switch to L or R.
- Push the appropriate edge of the adjustment switch to adjust the mirror.
- Press the folding button to fold in and out the door mirrors.

Power Windows  P. 175

- With the ignition switch in ON [II] *, open and close the power windows.
- If the power window lock button is in the off position, each passenger’s window can be opened and closed with its own switch.
- If the power window lock button is in the on position (indicator on), each passenger’s window switch is disabled.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Climate Control System  
P230

- Select the AUTO icon to activate the climate control system.
- Select the icon to turn the system on or off.
- Select the icon to defrost the windscreen.

Driving

**Manual Transmission**

- Shift to **P** and depress the brake pedal when starting the engine.

**Neutral**

Transmission is not locked.

**Drive (S)**

7-speed manual shift mode can be used.

**Models with paddle shifter**

- **P**
  - Turn off or start the engine. Transmission is locked.

- **R**
  - Reverse
  - Used when reversing.

- **N**
  - Neutral
  - Transmission is not locked.

- **D**
  - Normal driving.
  - On models with paddle shifter, 7-speed manual shift mode can be used temporarily.

**Models without paddle shifter**

- **S**
  - Used when going up or down hills
  - 7-speed manual shift mode can be used.

**Shift Indicator**

- **M** indicator
- Selected speed number

---

**Continuous Variable Transmission**

7-Speed Manual Shift Mode

- Allows you to manually shift the transmission up or down without removing your hands from the steering wheel.

**When the shift lever is in S**

- Pulling a paddle shifter changes the mode from continuously variable transmission to 7-speed manual shift mode.

- The **M** indicator and the selected speed number are displayed in the shift indicator.

**When the shift lever is in D**

- Pulling a paddle shifter temporarily changes the mode from continuously variable transmission to 7-speed manual shift mode. The selected speed number is displayed in the shift indicator.

---

**Shift Lever**

- Depress the brake pedal and press the release button to move out of **P**.
- Move the shift lever without pressing the release button.
- Press the release button to move the shift lever.

**Models with paddle shifter**

- **P**
  - Better acceleration
  - Used to increase engine braking
  - Used when going up or down hills

- **L**
  - Used to further increase engine braking
  - Used when going up or down hills

**Release Button**

- Models with paddle shifter

---

**Shift Indicator**

- **M** indicator
- Selected speed number

---

**Paddle Shifter**

- **Shift Down**
- **Shift Up**
VSA On and Off  P.471
- The Vehicle Stability Assist (VSA) system helps to stabilise the vehicle during cornering, and helps to maintain traction while accelerating on loose or slippery road surfaces.
- VSA comes on automatically every time you start the engine.
- To partially disable or fully restore VSA function, press and hold the button until you hear a beep.

Cruise Control  P.442
- Cruise control allows you to maintain a set speed without keeping your foot on the accelerator pedal.
- To use cruise control, press the MAIN button. Select cruise control by pressing the LIM button, then press -/SET once you have achieved the desired speed (above 30 km/h or 18 mph).

Adjustable Speed Limiter  P.445
- This system enables you to set a maximum speed that cannot be exceeded even if you are depressing the accelerator pedal.
- To use the adjustable speed limiter, press the MAIN button. Select the adjustable speed limiter by pressing the LIM button, then press the -/SET when your vehicle reaches the desired speed.
- The vehicle speed limit can be set from 30 km/h (18 mph) to 250 km/h (156 mph).

Deflation Warning System  P.474
- Detects a change in tyre conditions and overall dimensions due to decrease in tyre pressures.
- The deflation warning system is turned on automatically every time you start the engine.
- An initialisation procedure must be performed when certain conditions arise.

* Not available on all models
Refueling  P.499

Fuel recommendation: EN 228 standards petrol/gasohol fuel
Unleaded premium petrol/gasohol up to E10 (90% petrol and 10% ethanol),
research octane number 95 or higher

Fuel tank capacity: 50 L (11.0 Imp gal)

1. Pull the fuel fill door release handle.

2. Turn the fuel fill cap slowly to remove the cap.

3. Place the cap in the holder on the fuel fill door.

4. After refueling, screw the cap back on until it clicks at least once.
**Refueling** [P.500]

<table>
<thead>
<tr>
<th>Fuel recommendation:</th>
<th>EN 590 standard diesel fuel</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fuel tank capacity:</td>
<td>50 L (11.0 Imp gal)</td>
</tr>
</tbody>
</table>

1. Pull the fuel fill door release handle.

2. After refueling, wait for about 10 seconds before removing the filler nozzle.
Maintenance  \(\rightarrow\) P.507

Under the Bonnet  \(\rightarrow\) P.532

- Check engine oil, engine coolant, and windscreen washer fluid. Add when necessary.
- Check brake/clutch fluid.
- Check the battery condition monthly.

1. Pull the bonnet release handle under the corner of the dashboard.

2. Locate the bonnet latch lever, push it to the side, and then raise the bonnet. Once you have raised the bonnet slightly, you can release the lever.

3. When finished, close the bonnet and make sure it is firmly locked in place.

Wiper Blades  \(\rightarrow\) P.565

- Replace blades if they leave streaks across the windscreen.

Lights  \(\rightarrow\) P.557

- Inspect all lights regularly.

Tyres  \(\rightarrow\) P.569

- Inspect tyres and wheels regularly.
- Check tyre pressures regularly.
- Install winter tyres for winter driving.
Handling the Unexpected

Flat Tyre (P.596, 611)
- Park in a safe location and repair the flat tyre using the tyre repair kit.
- Park in a safe location and replace the flat tyre with the compact spare tyre in the luggage area.

Engine Won’t Start (P.621)
- If the battery is dead, jump start using a booster battery.

Overheating (P.629)
- Park in a safe location. If you do not see steam under the bonnet, open the bonnet, and let the engine cool down.

Indicators Come On (P.632)
- Identify the indicator and consult the owner’s manual.

Blown Fuse (P.638)
- Check for a blown fuse if an electrical device does not operate.

Emergency Towing (P.647)
- Call a professional towing service if you need to tow your vehicle.

* Not available on all models
What to Do If

**Q** Models without keyless access system
The ignition switch does not turn from 0 to 1.
Why?

Models with keyless access system
The power mode does not change from VEHICLE OFF (LOCK) to ACCESSORY. Why?

**A**
- The steering wheel may be locked.
- Models without keyless access system
  - Try to turn the steering wheel left and right while turning the ignition key.
- Models with keyless access system
  - Move the steering wheel left and right after pressing the ENGINE START/STOP button.

---

**Q** Models without keyless access system
The ignition switch does not turn from 1 to 0 and I cannot remove the key. Why?

Models with keyless access system
The power mode does not change from ACCESSORY to VEHICLE OFF (LOCK). Why?

**A**
The shift lever should be moved to P.
Why does the brake pedal pulsate slightly when applying the brakes?

**Q**

This can occur when the ABS activates and does not indicate a problem. Apply firm, steady pressure on the brake pedal. Never pump the brake pedal.

**A**

Anti-lock Brake System (ABS) ⇨ P.483

The rear door cannot be opened from inside the vehicle. Why?

**Q**

Check if the childproof lock is in the lock position. If so, open the rear door with the outside door handle. To cancel this function, slide the lever up to the unlock position.

**A**

Why do the doors lock after I unlocked the doors?

**Q**

If you do not open the doors within 30 seconds, the doors are relocked automatically for security.

**A**

Why does the beeper sound when I open the driver’s door?

**Q**

The beeper sounds when:
- The exterior lights are left on.
- Auto Idle Stop* is in operation.

**A**

Models with keyless access system
- The power mode is in ACCESSORY.

* Not available on all models
Why does the beeper sound when I start driving?  

The beeper sounds when the driver and/or front passenger are not wearing their seat belts.

Why do I hear a screeching sound when I apply the brake pedal?  

The brake pads may need to be replaced. Have your vehicle inspected by a dealer.

Pressing the electric parking brake switch does not release the parking brake. Why?  

Press the electric parking brake switch with the brake pedal depressed.

Depressing the accelerator pedal does not release the parking brake automatically. Why?  

- Fasten the driver’s seat belt.
- Check if the transmission is in P* or N. If so, select any other position.

I’m seeing an amber indicator of a tyre with an exclamation point. What is that?  

The Deflation Warning System needs attention. If you recently inflated or changed a tyre, you have to re initialise the system.

* Deflation Warning System P.474
Your vehicle is designed to operate on premium unleaded petrol with a research octane of 95 or higher. If this octane grade is unavailable, regular unleaded petrol with a research octane of 91 or higher may be used temporarily. The use of regular unleaded petrol can cause metallic knocking noises in the engine and will result in decreased engine performance. The long-term use of regular-grade petrol can lead to engine damage.
Safe Driving

You can find many safety recommendations throughout this chapter, and throughout this manual.

For Safe Driving

The following pages explain your vehicle’s safety features and how to use them properly. The safety precautions below are ones that we consider to be among the most important.

**Important Safety Precautions**

■ Always wear your seat belt
A seat belt is your best protection in all types of collisions. Airbags are designed to supplement seat belts, not replace them. So even though your vehicle is equipped with airbags, make sure you and your passengers always wear your seat belts, and wear them properly.

■ Restrain all children
Children aged 12 and under should ride properly restrained in a back seat, not the front seat. Infants and small children should be restrained in a child restraint system. Larger children should use a booster seat and a lap/shoulder seat belt until they can use the belt properly without a booster seat.

■ Be aware of airbag hazards
While airbags can save lives, they can cause serious or fatal injuries to occupants who sit too close to them, or are not properly restrained. Infants, young children, and short adults are at the greatest risk. Be sure to follow all instructions and warnings in this manual.

■ Don’t drink and drive
Alcohol and driving don’t mix. Even one drink can reduce your ability to respond to changing conditions, and your reaction time gets worse with every additional drink. So don’t drink and drive, and don’t let your friends drink and drive, either.
■ Pay appropriate attention to the task of driving safely
Engaging in mobile phone conversation or other activities that keep you from paying close attention to the road, other vehicles, and pedestrians could lead to a crash. Remember, situations can change quickly, and only you can decide when it is safe to divert some attention away from driving.

■ Control your speed
Excessive speed is a major factor in crash injuries and deaths. Generally, the higher the speed, the greater the risk, but serious injuries can also occur at lower speeds. Never drive faster than is safe for current conditions, regardless of the maximum speed posted.

■ Keep your vehicle in safe condition
Having a tyre blowout or a mechanical failure can be extremely hazardous. To reduce the possibility of such problems, check your tyre pressures and condition frequently, and perform all regularly scheduled maintenance.

■ Do not leave children unattended in the vehicle
Children, pets and people needing assistance left unattended in the vehicle may be injured if they activate one or more of the vehicle controls. They may also cause the vehicle to move, resulting in a crash in which they and/or another person(s) can be injured or killed. Also, depending on the ambient temperature, the temperature of the interior may reach extreme levels, which can result in harm or death. Even if the climate control system is on, never leave them in the vehicle unattended as the climate control system can shut off at any time.
Important Handling Information

Your vehicle has higher ground clearance than a passenger vehicle designed for use only on pavement. Higher ground clearance has many advantages for off-road driving. It allows you to travel over bumps, obstacles, and rough terrain. It also provides good visibility so you can anticipate problems earlier.

These advantages come at some cost. Because your vehicle is taller and rides higher off the ground, it has a higher centre gravity making it more susceptible to tipping or roll over if you make abrupt turns. Utility vehicles have a significantly higher rollover rate than other types of vehicles. In a rollover crash, an unbelted person is significantly more likely to die than a person wearing a seat belt. As a reminder, make sure you and your passengers always wear seat belts.

For information on how to reduce the risk of rollover, read:
- Driving Guidelines for Your Utility Vehicle
  P. 419
- Off-road Guidelines P. 411

Failure to operate your vehicle correctly might result in a crash or a rollover.

In many countries, the law prohibits off-road driving, e.g. driving in forests, trailblazing, etc. Please check your local laws and regulations before commencing any off-road driving activity.
Your Vehicle’s Safety Features

Your vehicle is equipped with many features that work together to help to protect you and your passengers during a crash.

Some features do not require any action on your part. These include a strong steel framework that forms a safety cage around the passenger compartment, front and rear crush zones, a collapsible steering column, and tensioners that tighten the front and rear outer seat belts in a sufficient crash.

However, you and your passengers cannot take full advantage of these features unless you remain seated in the correct position and always wear your seat belts. In fact, some safety features can contribute to injuries if they are not used properly.

The following checklist will help you take an active role in protecting yourself and your passengers.

1. Safety Cage
2. Crush Zones
3. Seats and Seat-Backs
4. Head Restraints
5. Collapsible Steering Column
6. Seat Belts
7. Front Airbags
8. Side Airbags
9. Side Curtain Airbags
10. Automatic Seat Belt Tensioners
Safety Checklist

For the safety of you and your passengers, make a habit of checking these items each time before you drive.

- Adjust your seat to a position suitable for driving. Be sure the front seats are adjusted as far to the rear as possible while allowing the driver to control the vehicle. Sitting too close to a front airbag can result in serious or fatal injury in a crash.
  📄 Adjusting the Seats P. 206

- Adjust head restraints to the proper position. Head restraints are most effective when the centre of the head restraint aligns with the centre of your head. Taller persons should adjust their head restraint to the highest position.
  📄 Adjusting the Front Head Restraint Positions P. 213

- Always wear your seat belt, and make sure you wear it properly. Confirm that any passengers are properly belted as well.
  📄 Fastening a Seat Belt P. 46

- Protect children by using seat belts or child restraint systems according to a child’s age, height and weight.
  📄 Child Safety P. 66
Seat Belts

About Your Seat Belts

Seat belts are the single most effective safety device because they keep you connected to the vehicle so that you can take advantage of many built-in safety features. They also help to keep you from being thrown against the inside of the vehicle, against any passengers, or out of the vehicle. When worn properly, seat belts also keep your body properly positioned in a crash so that you can take full advantage of the additional protection provided by the airbags.

In addition, seat belts help to protect you in almost every type of crash, including:
- frontal impacts
- side impacts
- rear impacts
- rollovers

WARNING:
Seat belts are designed to bear upon the bony structure of the body, and should be worn low across the front of the pelvis or the pelvis, chest and shoulders, as applicable; wearing the lap section of the belt across the abdominal area must be avoided.

WARNING:
Seat belts should be adjusted as firmly as possible, consistent with comfort, to provide the protection for which they have been designed. A slack belt will greatly reduce the protection afforded to the wearer.

WARNING:
Belts should not be worn with straps twisted.

WARNING:
Each belt assembly must only be used by one occupant; it is dangerous to put a belt around a child being carried on the occupant’s lap.

WARNING:
Not wearing a seat belt properly increases the chance of serious injury or death in a crash, even though your vehicle has airbags.

Be sure you and your passengers always wear seat belts and wear them properly.
About Your Seat Belts

Lap/shoulder seat belts
All five seating positions are equipped with lap/shoulder seat belts with emergency locking retractors. In normal driving the retractor lets you move freely while keeping some tension on the belt. During a collision or sudden stop the retractor locks to restrain your body.

The seat belt must be properly secured when using a front-facing child restraint system.

Installing a Child Restraint System with a Lap/Shoulder Seat Belt P. 81

Proper use of seat belts
Follow these guidelines for proper use:
• All occupants should sit upright, well back in the seat, and remain in that position for the duration of the trip. Slouching and leaning reduce the effectiveness of the belt and can increase the chance of serious injury in a crash.
• Never place the shoulder part of a lap/shoulder seat belt under your arm or behind your back. This could cause very serious injuries in a crash.
• Two people should never use the same seat belt. If they do, they could be very seriously injured in a crash.
• Do not put any accessories on the seat belts. Devices intended to improve comfort or reposition the shoulder part of a seat belt can reduce the protective capability and increase the chance of serious injury in a crash.

Seat belts cannot completely protect you in every crash. But in most cases, seat belts can reduce your risk of serious injury.

Most countries require you to wear seat belts. Take time to familiarise with the legal requirements of the countries in which you will drive.

If you extend the seat belt too quickly, it will lock in place. If this happens, slightly retract the seat belt, then extend it slowly.
About Your Seat Belts

Seat Belt Reminder

Front seats

The seat belt system includes an indicator on the instrument panel to remind the driver or a front passenger or both to fasten their seat belts. If the ignition switch is turned to ON [II]*1 and a seat belt is not fastened, the indicator will blink. After a few seconds, the indicator will come on and remain illuminated until the seat belt is fastened.

The beeper will periodically sound and the indicator will blink while the vehicle is moving until the seat belt is fastened.

Seat Belt Reminder

The indicator will also come on if a front passenger does not fasten their seat belt within six seconds after the ignition switch is turned to ON [II]*1.

When no one is sitting in the front passenger’s seat, the indicator will not come on and the beeper will not sound.

If the indicator comes on or the beeper sounds with no one sitting in the front passenger’s seat. Check if:
- There is nothing heavy placed on the front passenger seat.
- The driver’s seat belt is fastened.

If the indicator does not light when the passenger is seated and is not fastened, something may be interfering with the occupant detection sensor. Check if:
- A cushion is placed on the seat.
- The front passenger is not sitting properly.

If none of these conditions exist, have your vehicle checked by a dealer.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
About Your Seat Belts

■ Rear seats
Your vehicle monitors rear seat belt use. A multi-information display notifies you if any of the rear seat belts are used.

The display appears when:
• A rear door is opened or closed.
• Any of the rear passengers latches or unlatches their seat belt.

The beeper sounds if any rear passenger’s seat belt is unlatched while driving.

To see the display:
Press the ▲/▼ button repeatedly.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
About Your Seat Belts

The front and rear outer seats are equipped with automatic seat belt tensioners to enhance safety. The tensioners automatically tighten the front and rear outer seat belts during a moderate-to-severe frontal collision, sometimes even if the collision is not severe enough to inflate the front airbags.

■ Automatic Seat Belt Tensioners
The seat belt tensioners can only operate once. If a tensioner is activated, the SRS indicator will come on. Have a dealer replace the tensioner and thoroughly inspect the seat belt system as it may not offer protection in a subsequent crash.

During a moderate-to-severe side impact, the tensioner on that side of the vehicle also activates.
Fastening a Seat Belt

After adjusting a front seat to the proper position, and while sitting upright and well back in the seat:

1. Pull the seat belt out slowly.

2. Insert the latch plate into the buckle, then tug on the belt to make sure the buckle is secure.
   - Make sure that the belt is not twisted or caught on anything.

No one should sit in a seat with an inoperative seat belt or one that does not appear to be working correctly. Using a seat belt that is not working properly may not protect the occupant in a crash. Have a dealer check the belt as soon as possible.

Never insert any foreign objects into the buckle or retractor mechanism.
3. Position the lap part of the belt as low as possible across your hips, then pull up on the shoulder part of the belt so the lap part fits snugly. This lets your strong pelvic bones take the force of a crash and reduces the chance of internal injuries.

4. If necessary, pull up on the belt again to remove any slack, then check that the belt rests across the centre of your chest and over your shoulder. This spreads the forces of a crash over the strongest bones in your upper body.

### WARNING

Improperly positioning the seat belts can cause serious injury or death in a crash.

Make sure all seat belts are properly positioned before driving.

To release the belt, push the red PRESS button and then guide the belt by hand until it has retracted completely.

When exiting the vehicle, be sure the belt is properly stowed so that it will not get caught in the closing door.
Fastening a Seat Belt

The front seats have adjustable shoulder anchors to accommodate taller and shorter occupants.

1. Move the anchor up and down while pulling the shoulder anchor outward.
2. Position the anchor so that the belt rests across the centre of your chest and over your shoulder.

Adjusting the Shoulder Anchor

The shoulder anchor height can be adjusted to four levels. If the belt contacts your neck, lower the height one level at a time.

After an adjustment, make sure that the shoulder anchor position is secure.
Fastening a Seat Belt

1. Pull out the seat belt’s small latch plate and the latch plate from each holding slot in the ceiling.

2. Line up the triangle marks on the small latch plate and anchor buckle. Make sure the seat belt is not twisted. Attach the belt to the anchor buckle.

3. Insert the latch plate into the buckle. Properly fasten the seat belt the same way you fasten the lap/shoulder seat belt.

---

Seat Belt with Detachable Anchor

**WARNING**

Using the seat belt with the detachable anchor unlatched increases the chance of serious injury or death in a crash.

Before using the seat belt, make sure the detachable anchor is correctly latched.

To unlatch the detachable anchor, insert the latch plate into the slot on the side of the anchor buckle.
If you are pregnant, the best way to protect yourself and your unborn child when driving or riding in a vehicle is to always wear a seat belt and keep the lap part of the belt as low as possible across the hips.

### Advice for Pregnant Women

If you are pregnant, the best way to protect yourself and your unborn child when driving or riding in a vehicle is to always wear a seat belt and keep the lap part of the belt as low as possible across the hips.

- Wear the shoulder belt across the chest avoiding the abdomen.
- Wear the lap part of the belt as low as possible across the hips.

Each time you have a checkup, ask your doctor if it is okay for you to drive.

To reduce the risk of injuries to both you and your unborn child that can be caused by an inflating front airbag:

- When driving, sit upright and adjust the seat as far back as possible while allowing full control of the vehicle.
- When sitting in the front passenger’s seat, adjust the seat as far back as possible.
Seat Belt Inspection

Regularly check the condition of your seat belts as follows:

- Pull each belt out fully, and look for frays, cuts, burns, and wear.
- Check that the latch plates and buckles work smoothly and the belts retract easily.
  - If a belt does not retract easily, cleaning the belt may correct the problem. Only use a mild soap and warm water. Do not use bleach or cleaning solvents. Make sure the belt is completely dry before allowing it to retract.

Any belt that is not in good condition or working properly will not provide proper protection and should be replaced as soon as possible. A belt that has been worn during a crash may not provide the same level of protection in a subsequent crash. Have your seat belts inspected by a dealer after any collision.

WARNING: No modifications or additions should be made by the user which will either prevent the seat belt adjusting devices from operating to remove slack, or prevent the seat belt assembly from being adjusted to remove slack.

WARNING: It is essential to replace the entire assembly after it has been worn in a severe impact even if damage to the assembly is not obvious.

WARNING: Care should be taken to avoid contamination of the webbing with polishes, oils and chemicals, and particularly battery acid. Cleaning may safely be carried out using mild soap and water. The belt should be replaced if webbing becomes frayed, contaminated or damaged.
Anchorage Points

When replacing the seat belts, use the anchorage points shown in the images. The front seat has a lap/shoulder belt.

The rear seat has three lap/shoulder belts.
Airbags

Airbag System Components

The front, front side, and side curtain airbags are deployed according to the direction and severity of impact. The airbag system includes:

- Two SRS (Supplemental Restraint System) front airbags. The driver’s airbag is stored in the centre of the steering wheel; the front passenger’s airbag is stored in the dashboard. Both are marked SRS AIRBAG.

- Two side airbags, one for the driver and one for a front passenger. The airbags are stored in the outer edges of the seatbacks. Both are marked SIDE AIRBAG.

- Two side curtain airbags, one for each side of the vehicle. The airbags are stored in the ceiling, above the side windows. The front and rear pillars are marked SIDE CURTAIN AIRBAG.

- An electronic control unit that, when the ignition switch is in ON [1] and ignition key is inserted, continually monitors information about the various impact sensors, seat and buckle sensors, airbag activators, seat belt tensioners, and other vehicle information. During a crash event the unit can record such information.

- Automatic front and rear outer seat belt tensioners.

- Impact sensors that can detect a moderate-to-severe front or side impact.

- An indicator on the instrument panel that alerts you to a possible problem with your airbag system or seat belt tensioners.

- An indicator near the shift lever that alerts you that the passenger’s front airbag has been turned off.

- Safing Sensor

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Important Facts About Your Airbags

Airbags can pose serious hazards. To do their job, airbags must inflate with tremendous force. So, while airbags help to save lives, they can cause burns, bruises, and other minor injuries, sometimes even fatal ones if occupants are not wearing their seat belts properly and sitting correctly.

What you should do: Always wear your seat belt properly, and sit upright and as far back from the steering wheel as possible while allowing full control of the vehicle. A front passenger should move their seat as far back from the dashboard as possible.

Remember, however, that no safety system can prevent all injuries or deaths that can occur in a severe crash, even when seat belts are properly worn and the airbags deploy.

Do not place hard or sharp objects between yourself and a front airbag. Carrying hard or sharp objects on your lap, or driving with a pipe or other sharp object in your mouth, can result in injuries if your front airbag inflates.

Do not attach or place objects on the front airbag covers. Objects on the covers marked SRS AIRBAG could interfere with the proper operation of the airbags or be propelled inside the vehicle and hurt someone if the airbags inflate.

Do not attempt to deactivate your airbags. Together, airbags and seat belts provide the best protection.

When driving, keep hands and arms out of the deployment path of the front airbag by holding each side of the steering wheel. Do not cross an arm over the airbag cover.
Types of Airbags

Your vehicle is equipped with three types of airbags:
- **Front airbags**: Airbags in front of the driver’s and front passenger’s seats.
- **Side airbags**: Airbags in the driver’s and front passenger’s seat-backs.
- **Side curtain airbags**: Airbags above the side windows.
Each is discussed in the following pages.

**Front Airbags (SRS)**
The front SRS airbags inflate in a moderate-to-severe frontal collision to help to protect the head and chest of the driver and/or front passenger.

SRS (Supplemental Restraint System) indicates that the airbags are designed to supplement seat belts, not replace them. Seat belts are the occupant’s primary restraint system.

**Housing Locations**
The front airbags are housed in the centre of the steering wheel for the driver, and in the dashboard for the front passenger. Both airbags are marked SRS AIRBAG.

---

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

Continued
Airbags (SRS)

Operation

Front airbags are designed to inflate during moderate-to-severe frontal collisions. When the vehicle decelerates suddenly, the sensors send information to the control unit which signals one or both front airbags to inflate.

A frontal collision can be either head-on or angled between two vehicles, or when a vehicle crashes into a stationary object, such as a concrete wall.

How the Front Airbags Work

While your seat belt restrains your torso, the front airbag provides supplemental protection for your head and chest.

The front airbags deflate immediately so that they won't interfere with the driver's visibility or the ability to steer or operate other controls.

The total time for inflation and deflation is so fast that most occupants are not aware that the airbags deployed until they see them lying in front of them.
When front airbags should not deploy

Minor frontal crashes: Front airbags were designed to supplement seat belts and help to save lives, not to prevent minor scrapes, or even broken bones that might occur during a less than moderate-to-severe frontal crash.

Side impacts: Front airbags can provide protection when a sudden deceleration causes a driver or front passenger to move towards the front of the vehicle. Side airbags and side curtain airbags have been specifically designed to help to reduce the severity of injuries that can occur during a moderate-to-severe side impact which can cause the driver or passenger to move towards the side of the vehicle.

Rear impacts: Head restraints and seat belts are your best protection during a rear impact. Front airbags cannot provide any significant protection and are not designed to deploy in such collisions.

Rollovers: Seat belts and side curtain airbags offer the best protection in a rollover. Because front airbags could provide little if any protection, they are not designed to deploy during a rollover.

When front airbags deploy with little or no visible damage

Because the airbag system senses sudden deceleration, a strong impact to the vehicle framework or suspension might cause one or more of the airbags to deploy. Examples include running into a curb, the edge of a hole, or other low fixed object that causes a sudden deceleration in the vehicle chassis. Since the impact is underneath the vehicle, damage may not be readily apparent.

When front airbags may not deploy, even though exterior damage appears severe

Since crushable body parts absorb crash energy during an impact, the amount of visible damage does not always indicate proper airbag operation. In fact, some collisions can result in severe damage but no airbag deployment because the airbags would not have been needed or would not have provided protection even if they had deployed.
If it is unavoidable to install a rear-facing child restraint system in the front passenger seat, you must manually deactivate the passenger front airbag system, using the ignition key.

### Passenger Front Airbag ON/OFF switch

When the passenger front airbag ON/OFF switch is in:
- **OFF:** The passenger front airbag is deactivated. The passenger front airbag does not inflate during a frontal crash that inflates driver's front airbag. The passenger front airbag off indicator stays on as a reminder.
- **ON:** The passenger front airbag is activated. The passenger front airbag on indicator comes on and remains on for about 60 seconds.

### To deactivate the passenger front airbag system

1. Set the parking brake, and turn the ignition switch to LOCK [0]*1. Remove the key.
2. Open the front passenger’s door.
3. Insert the ignition key to the passenger front airbag ON/OFF switch.
4. Turn the key to OFF, and remove it from the switch.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
■ Passenger front airbag off indicator

When the passenger front airbag system is activated, the indicator goes off after a few seconds when you turn the ignition switch to ON [II]*1.

When the passenger front airbag system is deactivated, the indicator stays on, or goes off momentarily and comes back on.

■ Passenger front airbag off system label

The label is located at the side panel of the front passenger side instrument panel.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Side Airbags

The side airbags help to protect the torso and pelvis of the driver or a front passenger during a moderate-to-severe side impact.

Housing Locations

The side airbags are housed in the outside edge of the driver’s and passenger’s seatbacks.

Both are marked SIDE AIRBAG.

Do not attach accessories on or near the side airbags. They can interfere with the proper operation of the airbags, or hurt someone if an airbag inflates.

Do not let the front passenger lean sideways with their head in the deployment path of the side airbag. An inflating side airbag can strike with strong force and seriously injure the passenger.
When the sensors detect a moderate-to-severe side impact, the control unit signals the side airbag on the impact side to immediately inflate.

**When a side airbag deploys with little or no visible damage**
Because the airbag system senses sudden acceleration, a strong impact to the side of the vehicle’s framework can cause a side airbag to deploy. In such cases, there may be little or no damage, but the side impact sensors detected a severe enough impact to deploy the airbag.

**When a side airbag may not deploy, even though visible damage appears severe**
It is possible for a side airbag not to deploy during an impact that results in apparently severe damage. This can occur when the point of impact was towards the far front or rear of the vehicle, or when the vehicle’s crushable body parts absorbed most of the crash energy. In either case, the side airbag would not have been needed nor provided protection even if it had deployed.

Do not cover or replace the front seat-back covers without consulting a dealer. Improperly replacing or covering front seat-back covers can prevent your side airbags from properly deploying during a side impact.
Side Curtain Airbags

The side curtain airbags help to protect the heads of the driver and passengers in outer seating positions during a moderate-to-severe side impact.

■ Housing Locations

The side curtain airbags are located in the ceiling above the side windows on both sides of the vehicle.

■ Operation

The side curtain airbag is designed to deploy in a moderate-to-severe side impact.

■ When side curtain airbags deploy in a frontal collision

One or both side curtain airbags may also inflate in a moderate-to-severe angled frontal collision.
Airbag System Indicators

If a problem occurs in the airbag system, the SRS indicator will come on and a message appears on the multi-information display.

Supplemental Restraint System (SRS) Indicator

When the ignition switch is turned to ON [II] *1

The indicator comes on for a few seconds, then goes off. This tells you the system is working properly.

If the indicator comes on at any other time, or does not come on at all, have the system checked by a dealer as soon as possible. If you don’t, your airbags and seat belt tensioners may not work properly when they are needed.

WARNING

Ignoring the SRS indicator can result in serious injury or death if the airbag systems or tensioners do not work properly.

Have your vehicle checked by a dealer as soon as possible if the SRS indicator alerts you to a possible problem.

WARNING

Remove the rear-facing child restraint system immediately from the front passenger seat if the SRS indicator comes on. Even if the passenger front airbag has been deactivated, do not ignore the SRS indicator.

The SRS system may have a fault which could cause the passenger front airbag to be activated, causing serious injury or death.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

Continued
Airbag System Indicators

Passenger Front Airbag Off Indicator

- **When the passenger airbag off indicator comes on**
  The indicator stays on while the passenger’s front airbag system is deactivated.
  
  When a rear-facing child restraint system is not in use in the front passenger seat, manually turn the system back on. The indicator should go off.
Airbag Care

You do not need to, and should not, perform any maintenance on or replace any airbag system components yourself. However, you should have your vehicle inspected by a dealer in the following situations:

*When the airbags have deployed*
If an airbag has inflated, the control unit and other related parts must be replaced. Similarly, once an automatic seat belt tensioner has been activated, it must be replaced.

*When the vehicle has been in a moderate-to-severe collision*
Even if the airbags did not inflate, have your dealer inspect the following: front and rear outer seat belt tensioners, and each seat belt that was worn during the crash.

Airbag Care

The removal of airbag components from the vehicle is prohibited.

In case of malfunction, or shutdown, or after the airbag inflation/seat belt tensioner operation, ask a qualified personnel for handling.

We recommend against the use of salvaged airbag system components, including the airbag, tensioners, sensors, and control unit.
Protecting Child Passengers

Each year, many children are injured or killed in vehicle crashes because they are either unrestrained or not properly restrained. In fact, vehicle crashes are the number one cause of death of children aged 12 and under.

To reduce the number of child deaths and injuries, infants and children should be properly restrained when they ride in a vehicle.

WARNING

Children who are unrestrained or improperly restrained can be seriously injured or killed in a crash.

Any child too small for a seat belt should be properly restrained in an approved child restraint system. A larger child should be properly restrained with a seat belt, using a booster seat if necessary.

In many countries, the law requires all children aged 12 and under, and whose height are shorter than 150 cm (60 inches) be properly restrained in a rear seat.

In many countries, it is required to use an officially approved and suitable child restraint system for transporting a child on any passenger seat. Check your local legal requirements.

European models
Child restraint systems must meet UN Regulation No. 44 or No. 129, or the regulations of the subject countries.

Selecting a Child Restraint System P. 72

Except European models
We recommend that child restraint systems meet UN Regulation No. 44 or No. 129, or the regulations of the subject countries.
Children should sit properly restrained in a rear seat. This is because:

- An inflating front or side airbag can injure or kill a child sitting in the front seat.

- A child in the front seat is more likely to interfere with the driver’s ability to safely control the vehicle.

- Statistics show that children of all sizes and ages are safer when they are properly restrained in a rear seat.

- Any child who is too small to wear a seat belt must be properly restrained in an approved child restraint system that is properly secured to the vehicle using the seat belt or the child restraint anchorage system.

- Never hold a child on your lap because it is impossible to protect them in the event of a collision.

- Never put a seat belt over yourself and a child. During a crash, the belt would likely press deep into the child and cause serious or fatal injuries.

- Never let two children use the same seat belt. Both children could be very seriously injured in a crash.

**WARNING**

Allowing a child to play with a seat belt or wrap one around their neck can result in serious injury or death.

Instruct children not to play with any seat belt.

**WARNING**

NEVER use a rearward facing child restraint on a seat protected by an ACTIVE AIRBAG in front of it; DEATH or SERIOUS INJURY to the CHILD can occur.

To remind you of the passenger’s front airbag hazard and child safety, your vehicle has the warning label on the sun visor.

Please read and follow the instructions on the label.

**Safety Labels** P. 89
• Do not allow children to operate the doors, windows or seat adjustments.

• Do not leave children in the vehicle unattended, especially in hot weather when the inside of the vehicle can get hot enough to kill them. They could also activate vehicle controls causing it to move unexpectedly.

**WARNING:** Use the power window lock button to prevent children from opening the windows. Using this feature will prevent children from playing with the windows, which could expose them to hazards or distract the driver.

**Opening/Closing the Power Windows**

**WARNING:** Always take the ignition key with you whenever you leave the vehicle alone or with other occupants.
Safety of Infants and Small Children

Protecting Infants

An infant must be properly restrained in a rear-facing, reclining child restraint system until the infant reaches the child restraint system manufacturer’s weight or height limit for the seat, and the infant is at least one year old.

Positioning a rear-facing child restraint system
Child restraint system must be placed and secured in a rear seating position.

- If this occurs, we recommend that you install the child restraint system directly behind the front passenger’s seat, move the seat as far forward as needed, and leave it unoccupied.
- Or, you may wish to get a smaller rear-facing child restraint system.
- Make sure that there is no contact between the child restraint system and the seat in front of it.

Protecting Infants

WARNING

Placing a rear-facing child restraint system in the front seat can result in serious injury or death if the passenger’s front airbag inflates.

Always place a rear-facing child restraint system in the back seat, not the front.

As required by UN Regulation No. 94:

WARNING

NEVER use a rearward facing child restraint on a seat protected by an ACTIVE AIRBAG in front of it, DEATH or SERIOUS INJURY to the CHILD can occur.

Continued
When properly installed, a rear-facing child restraint system may prevent the driver or a front passenger from moving their seat all the way back, or from locking their seat-back in the desired position.

Protecting Infants

Many experts recommend use of a rear-facing child restraint system for a child up to two years old, if the child’s height and weight are appropriate for a rear-facing child restraint system.

If the passenger’s front airbag inflates, it can hit the rear-facing child restraint system with great force, which can dislodge or strike the system, and seriously injure the child.

Rear-facing child restraint systems should never be installed in a front-facing position.

Always refer to the child restraint system manufacturer’s instructions before installation.

If it is absolutely unavoidable to install a rear-facing child restraint system in the front passenger seat, manually turn off the passenger front airbag system.

Passenger Front Airbag Off System P. 58
If a child is at least one year old and has exceeded the weight and height limitations of a rear-facing child restraint system, the child should be properly restrained in a firmly secured front-facing child restraint system until they exceed the weight and height limitations for the front-facing child restraint system.

**Front-facing child restraint system placement**
We strongly recommend placing a front-facing child restraint system in a rear seating position.

Placing a front-facing child restraint system in the front seat can be hazardous. A rear seat is the safest place for a child.

**WARNING**
Placing a front-facing child restraint system in the front seat can result in serious injury or death if the front airbag inflates.

If you must place a front-facing child restraint system in front, move the vehicle seat as far back as possible, and properly restrain the child.

Educate yourself about the laws and regulations regarding child restraint system use where you are driving, and follow the child restraint system manufacturer's instructions.
Some child restraint systems are lower anchorage compatible. Some have a rigid-type connector while others have a flexible-type connector. Both are equally easy to use. Some existing and previously owned child restraint systems can only be installed using the seat belt. Whichever type you choose, follow the child restraint system manufacturer’s use and care instructions including recommended expiration dates as well as the instructions in this manual. Proper installation is key to maximising your child’s safety.

The flexible type may not be available in your country.

In seating positions and vehicles not equipped with lower anchorages, install a child restraint system using the seat belt and a top tether for added security. This is because all child restraint systems must be secured with the seat belt when the lower anchorage system is not in use. In addition, the child restraint system manufacturer may advise that a seat belt be used to attach an ISOFIX restraint system once a child reaches a specified weight. Please read the child restraint system owner’s manual for proper installation instructions.

**Important consideration when selecting a child restraint system**

Make sure the child restraint system meets the following three requirements:

- The child restraint system is the correct type and size for the child.
- The child restraint system is the correct type for the seating position.
- The child restraint system is compliant with safety standards. We recommend a child restraint system compliant with UN Regulation No. 44 or No. 129, or the regulations of the subject countries. Look for the approval mark on the system and the manufacturer’s statement of compliance on the box.
Child Safety

Safety of Infants and Small Children

Child Restraint Systems Standards

If a child restraint system (whether an i-Size/ISOFIX type or one that is fitted with a seat belt) meets the relevant UN Regulation, it will be affixed with an approval label as shown in the adjacent table. Before purchasing or using any child restraint system, make sure to check the approval label and ensure that it is compatible with your vehicle and the child, and that it complies with the relevant UN Regulation.

Selecting a Child Restraint System

Installing a Lower Anchorage-Compatible Child Restraint System

A lower anchorage-compatible child restraint system can be installed in either of the two outer rear seats. A child restraint system is attached to the lower anchorages with either the rigid or flexible type of connectors.

1. Locate the lower anchorages under the marks.
2. Make sure to lock the seat-back in the upright position.
3. Lower the head restraint to its lowest position.

WARNING

Never attach two child restraint system to the same anchor. In a collision, one anchor may not be strong enough to hold two child restraint system attachments and may break, causing serious injury or death.

Some child restraint systems come with optional guide-cups, which avoid possible damage to the seat surface. Follow the manufacturer’s instructions when using the guide-cups, and attach them to the lower anchorages as shown in the image.
4. Place the child restraint system on the vehicle seat then attach the child restraint system to the lower anchorages according to the instructions that came with the child restraint system.

When installing the child restraint system, make sure that the lower anchorages are not obstructed by the seat belt or any other object.

Installing a Lower Anchorage-Compatible Child Restraint System

For your child’s safety, when using a child restraint system installed using the lower anchorage system, make sure that the child restraint system is properly secured to the vehicle. A child restraint system that is not properly secured will not adequately protect a child in a crash and may cause injury to the child or other vehicle occupants.

The flexible type may not be available in your country.
Child Safety

Safety of Infants and Small Children

Installing a Lower Anchorage-Compatible Child Restraint System

**WARNING:** Never use a hook that does not come with a Top Tether anchor symbol when securing an installed child restraint system.

5. Open the tether anchorage cover.
6. Route the tether strap over the seat-back. Make sure the strap is not twisted.
7. Secure the tether strap hook to the anchorage.
8. Tighten the tether as instructed by the child restraint system manufacturer.
9. Make sure the child restraint system is firmly secured by rocking it forward and back, and side to side; little movement should be felt.
10. Make sure any unused seat belt that a child can reach is buckled.

---

**Child restraint system with tether strap**

- Open the tether anchorage cover.
- Route the tether strap over the seat-back. Make sure the strap is not twisted.
- Secure the tether strap hook to the anchorage.
- Tighten the tether as instructed by the child restraint system manufacturer.
- Make sure the child restraint system is firmly secured by rocking it forward and back, and side to side; little movement should be felt.
- Make sure any unused seat belt that a child can reach is buckled.
5. Extend the support leg until it touches the floor as instructed by the child restraint system manufacturer.

- Confirm that the section of the floor on which the support leg rests is level. If the section is not level, the support leg will not provide adequate support.

- Make sure that there is no contact between the child restraint system and the seat in front of it.
Installing a Child Restraint System with a Lap/Shoulder Seat Belt

1. Make sure to lock the seat-back in the upright position.
2. Lower the head restraint to its lowest position.
3. Place the child restraint system on the vehicle seat.
4. Route the seat belt through the child restraint system according to the child restraint system manufacturer’s instructions, and insert the latch plate into the buckle.
   ▶ Insert the latch plate fully until it clicks.

A child restraint system that is not properly secured will not adequately protect a child in a crash and may cause injury to the child or other vehicle occupants.
5. Push down the tab. Route the shoulder part of the belt into the slit at the side of the restraint.

6. Grab the shoulder part of the belt near the buckle, and pull up to remove any slack from the lap part of the belt.
   ► When doing this, place your weight on the child restraint system and push it into the vehicle seat.

7. Position the belt properly. Make sure the belt is not twisted.
   ► When pulling down the tab, pull up the upper shoulder part of the belt to remove any slack from the belt.

8. Make sure the child restraint system is firmly secured by rocking it forward and back, and side to side; little movement should be felt.

9. Make sure any unused seat belt that a child can reach is buckled.
If your child restraint system does not come with a mechanism that secures the belt, install a locking clip on the seat belt.

After going through the step 1 and 4, pull up the shoulder part of the belt and make sure there is no slack in the lap portion.

5. Tightly grasp the belt near the latch plate. Pinch both parts of the belt together so they do not slip through the latch plate. Unbuckle the seat belt.

6. Install the locking clip as shown in the image. Position the clip as close as possible to the latch plate.

7. Insert the latch plate into the buckle. Go to step 8 and 9.
Adding Security with a Tether

Two tether anchorage points are provided on the ceiling for rear outer seating positions. If you have a child restraint system that comes with a tether but can be installed with a seat belt, the tether may be used for additional security.

1. Locate the appropriate tether anchorage point and lift the cover.
2. Lower the head restraint to its lowest position.
3. Open the anchorage cover.
4. Route the tether strap over the seat-back. Make sure the strap is not twisted.
5. Secure the tether strap hook to the anchorage.
6. Tighten the tether strap as instructed by the child restraint system manufacturer.

WARNING: Child restraint anchorages are designed to withstand only those loads imposed by correctly fitted child restraints. Under no circumstances are they to be used for adult seat belts, harnesses or for attaching other items or equipment to the vehicle.

Always use a tether for front-facing child restraint systems when using the seat belt or lower anchorages.
Safety of Larger Children

Protecting Larger Children

The following pages give instructions on how to check proper seat belt fit, what kind of booster seat to use if one is needed, and important precautions for a child who must sit in front.

Checking Seat Belt Fit

When a child is too big for a child restraint system, secure the child in a rear seat using the lap/shoulder seat belt. Have the child sit upright and all the way back, then answer the following questions.

Checklist
- Do the child’s knees bend comfortably over the edge of the seat?
- Does the shoulder belt cross between the child’s neck and arm?
- Is the lap part of the seat belt as low as possible, touching the child’s thighs?
- Will the child be able to stay seated like this for the whole trip?

If you answer yes to all these questions, the child is ready to wear the lap/shoulder seat belt correctly. If you answer no to any question, the child needs to ride on a booster seat until the seat belt fits properly without a booster seat.

WARNING

Allowing a child aged 12 or under to sit in front can result in injury or death if the passenger’s front airbag inflates.

If a larger child must ride in front, move the vehicle seat as far to the rear as possible, have the child sit up properly and wear the seat belt properly, using a booster seat if needed.
Child Safety

Booster Seats

If a lap/shoulder seat belt cannot be used properly, position the child in a booster seat in the rear seat. For the child’s safety, check that the child meets the booster seat manufacturer’s recommendations.

A backrest is available for a specific booster seat. Install the backrest to the booster seat and adjust it to the vehicle seat according to the booster seat manufacturer’s instructions. Make sure the seat belt is properly routed through the guide at the shoulder of the backrest and the belt does not touch and cross the child’s neck.

Booster Seats

When installing a booster seat, make sure to read the instructions that came with it, and install the seat accordingly. There are high- and low-type booster seats. Choose a booster seat that allows the child to wear the seat belt correctly.

We recommend a booster seat with a backrest as it is easier to adjust the shoulder belt.
Your vehicle has a rear seat where children can be properly restrained. If you ever have to carry a group of children, and a child must ride in front:

- Make sure you read and fully understand the instructions and safety information in this manual.
- Move the front passenger seat as far back as possible.
- Have the child sit upright and well back in the seat.
- Check that the seat belt is properly positioned so that the child is secure in the seat.

■ Monitoring child passengers
We strongly recommend that you keep an eye on child passengers. Even older, more mature children sometimes need to be reminded to fasten their seat belts and sit up properly.
Carbon Monoxide Gas

The engine exhaust from this vehicle contains carbon monoxide, a colourless, odourless, and highly toxic gas. As long as you properly maintain your vehicle, carbon monoxide gas will not get into the interior.

■ Have the exhaust system inspected for leaks whenever
  • The exhaust system is making an unusual noise.
  • The exhaust system may have been damaged.
  • The vehicle is raised for an oil change.

When you operate a vehicle with the tailgate open, airflow can pull exhaust gas into the interior and create a hazardous condition. If you must drive with the tailgate open, open all the windows and set the climate control system as shown below.

1. Select the fresh air mode.
2. Select the mode.
3. Set the fan speed to high.
4. Set the temperature control to a comfortable setting.

Adjust the climate control system in the same manner if you sit in your parked vehicle with the engine running.
Safety Labels

Label Locations

These labels are in the locations shown. They warn you of potential hazards that can cause serious injury or death. Read these labels carefully.

If a label comes off or becomes hard to read, contact a dealer for a replacement.
Instrument Panel

This chapter describes the buttons, indicators, and gauges that are used while driving.

Lower displays
Press the SEL/RESET button to change the display.
Gauges and Multi-Information Display

- **Odometer**
  Shows the total number of kilometres or miles that your vehicle has accumulated.

- **Trip Meter**
  Shows the total number of kilometres or miles driven since the last reset. Trip A and B can be used to measure two separate trips.

  **Resetting a trip meter**
  To reset a trip meter, display it, then press and hold the SEL/RESET button. The trip meter is reset to 0.0.

- **Average Fuel Economy**
  Shows the estimated average fuel economy of each trip meter in l/100 km or mpg. The display is updated at set intervals. When a trip meter is reset, the average fuel economy is also reset.

- **Range**
  Shows the estimated distance you can travel on the remaining fuel. This distance is estimated from the fuel economy of your previous trips.

- **Elapsed Time**
  Shows the time elapsed since Trip A or B was reset.

  **Switch between Trip A and B**
  You can change when to reset the trip meter.

  **Customized Features** P. 144
Gauges and Multi-Information Display

140 Instrument Panel

Shows the average speed in km/h or mph since Trip A or B was reset.

**Average Speed**

Shows the instant fuel economy as a bar graph in l/100 km or mpg.

**Instant Fuel Economy**

Shows the outside temperature in Celsius.

If the outside temperature has been below 3°C at the time you turn the ignition switch to ON, the outside temperature indicator blinks for 10 seconds.

**Outside Temperature**

Adjust the temperature reading up to ±3°C if the temperature reading seems incorrect.

**Adjusting the outside temperature display**

Shows the rear seat belt use.

**Rear Seat Belt Use Monitor**

Displays the amount of fuel left in the fuel tank.

**Fuel Gauge**

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

NOTICE

You should refuel when the reading approaches 0. Running out of fuel can cause the engine to misfire, damaging the catalytic converter.

The actual amount of remaining fuel may differ from the fuel gauge reading.

**Speed Alarm Setting**

Sets the speed alarm on and changes the speed alarm setting.

**To set the speed alarm**

1. Press the **↑/↓** button until the speed alarm setting screen appears on the display, then press the **SEL/RESET** button.

2. Press the **↑/↓** button and select **(speed alarm 1)** or **(speed alarm 2)**, then press the **SEL/RESET** button.
   - **(off)** switches to **(on)**, then the display returns to the normal screen.
   - If the speed alarm is **(on)**, it switches to **(off)**.

The default settings for **(speed alarm 1)** and **(speed alarm 2)** are **(off)**.

You can also return to the normal screen by selecting **(exit)**.
To change the speed setting

1. Press the ▲/▼ button until the speed alarm setting menu appears on the display, then press the SEL/RESET button.
2. Press the ▲/▼ button and select the speed alarm 1 speed setting or speed alarm 2 speed setting, then press the SEL/RESET button.
3. Press the ▲/▼ button and select the speed, then press the SEL/RESET button.
   - The speed setting is set, then the display returns to the normal screen.
   - You can set the speed setting over 5 km/h (mph) with 1 km/h (mph) steps.

Speed Alarm Setting

You cannot change the speed setting while driving.
**Customized Features**

Use the multi-information display to customize certain features.

**How to customize**

Select the (customize settings) screen by pressing the ↑/↓ button while the ignition switch is in ON (w1, the vehicle is at a complete stop, and the shift lever is in P (continuously variable transmission), and the parking brake is set (manual transmission). Press the SEL/RESET button to enter the customizing mode.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
■ Customization flow

Example of customization settings
The steps for changing the “Trip A” Reset Timing setting to When Refueled are shown below. The default setting for “Trip A” Reset Timing is Manual Reset.

1. Press the ▲/▼ button until (customize settings) appears on the display, then press the SEL/RESET button.

2. Press the ▲/▼ button until Meter Setup appears on the display.
3. Press the SEL/RESET button.
4. Press the button until “Trip A” Reset Timing appears on the display, then press the SEL/RESET button. The display switches to the customization setup screen, where you can select When Refueled, When Ignition Is Turned Off, Manual Reset, or (exit).

5. Press the button and select When Refueled, then press the SEL/RESET button. The When Refueled Setup screen appears, then the display returns to the customization menu screen.

6. Press the button until (exit) appears on the display, then press the SEL/RESET button.

7. Repeat Step 6 until you return to the normal screen.

Clock

Adjusting the Clock

Models without navigation system
You can adjust the time in the clock display with the ignition switch in ON  

■ Using the MENU/CLOCK button
1. Press and hold the MENU/CLOCK button. Adjust clock is selected.
2. Rotate  to change hour, then press .
3. Rotate  to change minute, then press .
4. To enter the selection, rotate  and select Set, then press .

Models with navigation system
The clock is automatically updated through the navigation system, so the time does not need to be adjusted. You should customize the time zone and daylight saving.

Customized Features P. 345

■ Adjusting the Time

Models with colour audio system
These indications are used to show how to operate the LIST/SELECT (Selector) knob.

Rotate  to select.
Press  to enter.

You can customize the clock display to show the 12 hour clock or 24 hour clock.

Customized Features P. 335

You can also select Adjust clock by pressing the MENU/CLOCK button.
Rotate  to select Adjust clock, then press .

The clock in the multi-information display is automatically adjusted along with the audio system’s clock display.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Adjusting the Clock

Controls

Models with display audio system

Using the settings menu on the audio/information screen

1. Select the [ ] icon.
2. Select Settings.
3. Select Info.
4. Select the Clock tab.
5. Select Clock Adjustment.
6. Select ▲ or ▼ to change hour.
7. Select ▲ or ▼ to change minute, then select OK.

Adjusting the Time

Models with display audio system

The clock in the multi-information display is automatically adjusted along with the audio system’s clock display.

You can customize the clock display to show the 12 hour clock or 24 hour clock.

Customized Features P. 345

You can turn the clock display on and off.

Customized Features P. 345
Locking and Unlocking the Doors

Key Types and Functions

This vehicle comes with the following keys:

Use the keys to start and stop the engine, and to lock and unlock all the doors and tailgate. You can also use the remote transmitter or keyless access system* to lock and unlock all the doors and tailgate.

<table>
<thead>
<tr>
<th>Keyless Remote*</th>
<th>Retractable Key*</th>
<th>Ignition Key*</th>
</tr>
</thead>
</table>

Follow the advice below to prevent damage to the keys:

- Do not leave the keys in direct sunlight, or in locations with high temperature or high humidity.
- Do not drop the keys or set heavy objects on them.
- Keep the keys away from liquids, dust and sand.
- Do not take the keys apart except for replacing the battery.

If the circuits in the keys are damaged, the engine may not start, and the remote transmitter/keyless access system* may not work.

If the keys do not work properly, have them inspected by a dealer.

* Not available on all models
Locking and Unlocking the Doors

Key Types and Functions

Controls

The built-in key can be used to lock/unlock the doors and tailgate when the keyless remote battery becomes weak and the power door lock/unlock operation is disabled.

To remove the built-in key, slide the release knob and then pull out the key. To reinstall the built-in key, push the built-in key into the keyless remote until it clicks.

The key folds up inside the remote transmitter.

1. Press the release button to release the key out from the transmitter.
   - Make sure to fully extend the key.
2. To close the key, press the release button then push the key inside the transmitter until you hear a click.

* Not available on all models
Key Number Tag

Contains a number that you will need if you purchase a replacement key.
Low Keyless Remote Signal Strength*

The vehicle transmits radio waves to locate the keyless remote when locking/unlocking the doors and tailgate, or to start the engine.

In the following cases, locking/unlocking the doors and tailgate, or starting the engine may be inhibited or operation may be unstable:
• Strong radio waves are being transmitted by nearby equipment.
• You are carrying the keyless remote together with telecommunications equipment, laptop computers, mobile phones, or wireless devices.
• A metallic object is touching or covering the keyless remote.

Communication between the keyless remote and the vehicle consumes the keyless remote’s battery. Battery life is about two years, but this varies depending on regularity of use. The battery is consumed whenever the keyless remote is receiving strong radio waves. Avoid placing it near electrical appliances such as televisions and personal computers.

* Not available on all models
Locking/Unlocking the Doors from the Outside

Using the Keyless Access System*

When you carry the keyless remote, you can lock/unlock the doors and tailgate. You can lock/unlock the doors and the tailgate within a radius of about 80 cm (32 inches) of the outside door handle or tailgate release button.

Locking the doors and tailgate

Press the door lock button on the front door or the tailgate.

- Some exterior lights flash three times; all the doors and tailgate lock; and the security system sets.

Locking/Unlocking the Doors from the Outside

If the interior light switch is in the door activated position, the interior light comes on when you unlock the doors and tailgate.

No doors opened: The light fades out after 30 seconds.

Doors and tailgate relocked: The light goes off immediately.

Interior Lights P. 217

Using the Keyless Access System *

If you do not open a door or the tailgate within 30 seconds of unlocking the vehicle with the keyless access system, the doors and tailgate will automatically relock.

You can lock or unlock doors using the keyless access system only when the power mode is in VEHICLE OFF.

- Do not leave the keyless remote in the vehicle when you get out. Carry it with you.
- Even if you are not carrying the keyless remote, you can lock/unlock the doors and the tailgate while someone else with the remote is within range.
- The door may be unlocked if the door handle is covered with water in heavy rain or in a car wash if the keyless remote is within range.

* Not available on all models
Locking and Unlocking the Doors

Locking/Unlocking the Doors from the Outside

■ Unlocking the doors and tailgate
Grab the front door handle:
► All the doors and tailgate unlock.
► Some exterior lights flash once.

Press the tailgate release button:
► The tailgate and all doors unlock.
► Some exterior lights flash once.

Opening/Closing the Tailgate P. 170

Using the Keyless Access System *
• If you grip a front door handle wearing gloves, the door sensor may be slow to respond or may not respond by unlocking the doors.
• After locking the door, you have up to 2 seconds during which you can pull the door handle to confirm whether the door is locked. If you need to unlock the door immediately after locking it, wait at least 2 seconds before gripping the handle, otherwise the door will not unlock.
• The door may not open if you pull it immediately after gripping the door handle. Grip the handle again and confirm that the door is unlocked before pulling the handle.
• Even within the 80 cm (32 inches) radius, you may not be able to lock/unlock the doors and the tailgate with the keyless remote if it is above or below the outside handle.
• The keyless remote may not operate if it is too close to the door and door glass.

• Not available on all models

Continued
■ Using the Remote Transmitter

**Locking the doors and tailgate**
Press the lock button.
- Some exterior lights flash three times, all the doors and tailgate lock, and the security system* sets.

---

*Not available on all models*
Unlocking the doors and tailgate
Press the unlock button.
   • Some exterior lights flash once, and all doors and the tailgate unlock.

Using the Remote Transmitter
The remote transmitter uses low-power signals, so the operating range may vary depending on the surroundings.

Models without keyless access system
The remote transmitter will not work when the key is in the ignition switch.

Models with keyless access system
You can lock or unlock doors using the remote transmitter or keyless access system only when the power mode is in VEHICLE OFF.

The remote transmitter will not lock the vehicle when a door or the tailgate is open.

If the distance at which the remote transmitter works varies, the battery is probably low.
If the LED does not come on when you press a button, the battery is dead.

Replacing the Button Battery P. 580
Locking and Unlocking the Doors

Locking/Unlocking the Doors from the Outside

 Controls

If the lock or unlock button of the remote does not work, use the key instead. Fully insert the key and turn it.

Locking/Unlocking the Doors Using a Key

When you lock/unlock the driver’s door with the key, all the other doors and the tailgate lock/unlock at the same time.

Models with security system alarm
Unlocking the doors with the key causes the security system to alarm. Always unlock the doors with the remote transmitter.

Models with retractable key
If you are using the retractable key, make sure it is fully extended.
Locking and Unlocking the Doors

Locking/Unlocking the Doors from the Outside

Controls

If you do not have the key on you, or if for some reason you cannot lock a door using the key, you can lock the door without it.

■ Locking the driver's door
Push the lock tab forward 1 or push the master door lock switch in the lock direction 2, then pull and hold the outside door handle 3. Close the door, then release the handle.

■ Locking the passengers' doors
Push the lock tab forward and close the door.

■ Lockout prevention system

Models without keyless access system
The doors and the tailgate cannot be locked when the key is in the ignition switch.

Models with keyless access system
The doors and the tailgate cannot be locked when the keyless remote is inside the vehicle.
Locking/Unlocking the Doors from the Inside

■ Using the Lock Tab

- **Locking a door**
  Push the lock tab forward.

- **Unlocking a door**
  Pull the lock tab rearward.

■ Unlocking Using the Front Door Inner Handle

Pull the front door inner handle.
- The door unlocks and opens in one motion.

<table>
<thead>

</tr>
</tbody>
</table>

**Unlocking Using the Front Door Inner Handle**

The front door inner handles are designed to allow front seat occupants to open the door in one motion. However, this feature requires that front seat occupants never pull a front door inner handle while the vehicle is in motion.

Children should always ride in a rear seat where childproof door locks are provided.

**Childproof Door Locks P. 168**
Using the Master Door Lock Switch

Press the master door lock switch in as shown to lock or unlock all doors and the tailgate.

Using the Master Door Lock Switch

When you lock/unlock the driver's door using the master door lock switch, all the other doors and the tailgate lock/unlock at the same time.
Childproof Door Locks

The childproof door locks prevent the rear doors from being opened from the inside regardless of the position of the lock tab.

### Setting the Childproof Door Locks

Slide the lever in the rear door to the lock position, and close the door.

- **When opening the door**
  Open the door using the outside door handle.

- **When opening the door**
  Open the door using the outside door handle.
Tailgate

Precautions for Opening/Closing the Tailgate

Always make sure individuals and objects are clear of the tailgate before opening or closing it.
• Open the tailgate all the way.
  ▶ If it is not fully opened, the tailgate may begin to close under its own weight.
• Be careful when it is windy. The wind may cause the tailgate to close.

Keep the tailgate closed while driving to:
• Avoid possible damage.
• Prevent exhaust gas from leaking into the vehicle.
  Carbon Monoxide Gas P. 88

WARNING

Anyone caught in the path of a tailgate that is being opened or closed can be seriously injured.

Make sure that all people are clear of the tailgate before opening or closing it.

Be careful not to hit your head on the tailgate or to put your hands between the tailgate and the luggage area when closing the tailgate.

When you are storing or picking up luggage from the luggage area while the engine is idling, do not stand in front of the exhaust pipe. You may get burned.

Do not allow any passenger in the luggage space. They may get hurt during hard braking, a sudden acceleration, or a crash.
Opening/Closing the Tailgate

When all the doors are unlocked, the tailgate is unlocked. Press the tailgate release button and lift open the tailgate.

**Models with keyless access system**

If you are carrying the keyless remote, you do not have to unlock the tailgate before opening it.

**All models**

To close the tailgate, grab the inner handle, pull the tailgate down, and push it closed from outside.

- Do not leave the keyless remote in the vehicle when you get out. Carry it with you.
- Even if you are not carrying the keyless remote, you can unlock the tailgate while someone else with the keyless remote is within range.
Immobilizer System

The immobilizer system prevents a key that has not been pre-registered from starting the engine. Each key contains electronic transmitters that use electronic signals to verify the key.

Pay attention to the following when inserting the key into the ignition switch or pressing the ENGINE START/STOP button:
- Do not allow objects that emit strong radio waves near the ignition switch or the ENGINE START/STOP button.
- Make sure the key is not covered by or touching a metal object.
- Do not bring a key from another vehicle’s immobilizer system near the ignition switch or the ENGINE START/STOP button.
- Do not put the key near magnetic items. Electronic device, such as televisions and audio systems emit strong magnetic fields. Note that even a key chain can become magnetic.

Security System Alarm*

The security system alarm activates when the tailgate, bonnet, or doors are opened without the remote transmitter or keyless access system*. It also activates if you unlock the door with the key.

■ When the security system alarm activates
The horn sounds intermittently, and some exterior lights flash.

■ To deactivate the security system alarm
Unlock the vehicle using the remote transmitter or keyless access system*, or turn the ignition switch to ON [II]*1. The system, along with the horn and flashing lights, is deactivated.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
* Not available on all models

Continued
Setting the security system alarm
The security system alarm automatically sets when the following conditions have been met:
• The ignition switch is in LOCK [0]*1.
• The bonnet is closed.
• All doors and the tailgate are locked from outside with the key, remote transmitter, or keyless access system*.
• The key has been removed from the ignition switch.

When the security system alarm sets
The security system alarm indicator in the instrument panel blinks and the blinking interval changes after about 15 seconds.

To cancel the security system alarm
The security system alarm is cancelled when the vehicle is unlocked using the remote transmitter or keyless access system*, or when the ignition switch is turned to ON [Ⅱ]*1. The security system alarm indicator goes off at the same time.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

Security System Alarm*
Do not set the security system alarm when someone is in the vehicle or a window is open. The system can accidentally activate when:
• Unlocking the door with the lock tab.
• Opening the bonnet with the bonnet release handle.

If the battery goes dead after you have set the security system alarm, the security alarm may activate once the battery is recharged or replaced. If this occurs, deactivate the security system alarm by unlocking a door using the remote transmitter or keyless access system*.

If you unlock a door with the key while the security system is activated, the alarm will go off.

Models with ultrasonic sensors
The system may accidentally activate such as when:
• The vehicle is parked in an automated garage.
• The vehicle is being washed with highly pressurized water or being put through an automated car wash.
• The vehicle is being transported by train, ferry or trailer.
• The vehicle is subjected to heavy rain or stormy weather.
• Ice is being removed from the vehicle.
You can use ultrasonic sensor OFF button not to accidentally activate the security system alarm.

* Not available on all models
Ultrasonic Sensors*

The ultrasonic sensors activate only when the security system alarm sets. The sensors detect if someone intrudes into the passenger compartment through a window or moves in the compartment, and activate the alarm.

To set the security system alarm without activating the ultrasonic sensors

You can set the security system alarm without activating the ultrasonic sensor.

To turn off the ultrasonic sensor system, press the ultrasonic sensor OFF button after you remove the key from the ignition switch, or with the key in the ACCESSORY 1 or LOCK 0.*1

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

Ultrasonic Sensors *

Do not set the security system alarm while someone is in the vehicle, or if a window is open. The system may accidentally activate when the ultrasonic sensor detects vibrations or loud sounds.

Whether the ultrasonic sensor is activated, the security system can only be turned off by the remote transmitter or keyless access system*, not the key.

If you unlock a door with the key while the security system is activated, the alarm will go off.
Super Locking *

The super locking function disables the lock tabs on all doors.

■ To activate the super locking function
  • Turn the key in the driver’s door towards the vehicle front twice within five seconds.
  • Press the lock button on the remote transmitter twice within five seconds.

Models with keyless access system
  • Press the door lock button on the door handle or the tailgate twice within five seconds.

■ To cancel the super locking function
Unlock the driver’s door with the remote transmitter or keyless access system *.

WARNING

No one must be inside the vehicle with the super locking set. Persons locked in can get seriously sick or die from the heat built inside the vehicle if left in the sun.

Make sure there is no one inside the vehicle before setting the super locking.

If you unlock a door with the key while the security system is activated, the alarm will go off.

* Not available on all models
Opening and Closing the Windows

Opening/Closing the Power Windows

The power windows can be opened and closed when the ignition switch is in ON (II)*1, using the switches on the doors. The driver’s side switches can be used to open and close all the windows.

The power window lock button on the driver’s side must be switched off (not pushed in, indicator off) to open and close the windows from anywhere other than the driver’s seat.

When the power window lock button is pushed in, you can only operate the driver’s window. Turn the power window lock button on if a child is in the vehicle.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

**WARNING:**
Always take the ignition key with you whenever you leave the vehicle alone or with other occupants.

The power windows can be operated for up to 10 minutes after you turn the ignition switch off*1.

- **Auto-open/close function on front windows**
  Opening either front door cancels this function.
- **Auto-open/close function on all windows**
  Closing the driver’s door cancels this function.

**Auto Reverse**
If a power window senses resistance when closing automatically, it will stop closing and reverse direction.

The driver’s window auto reverse function is disabled when you continuously pull up the switch.

The auto reverse function stops sensing when the window is almost closed to ensure that it fully closes.
Opening and Closing the Windows

Controls

■ Manual operation
To open: Push the switch down lightly, and hold it until the desired position is reached.
To close: Pull the switch up lightly, and hold it until the desired position is reached.

■ Automatic operation
To open: Push the switch down firmly.
To close: Pull the switch up firmly.

The window opens or closes completely. To stop the window at any time, push or pull the switch briefly.
Opening/Closing the Power Windows

To open: Push the switch down.
To close: Pull the switch up.

Release the switch when the window reaches the desired position.

Opening/Closing the Windows without Auto-Open/Close Function*

* Not available on all models
Opening and Closing the Windows

Opening/Closing the Power Windows

To open:
Press the unlock button, and then within 10 seconds, press it again and hold it.
To close:
Press the lock button, and then within 10 seconds, press it again and hold it.

If the windows stop midway, repeat the procedure.

Opening/Closing the Windows with the Remote *

To open: Press the unlock button, and then within 10 seconds, press it again and hold it.
To close: Press the lock button, and then within 10 seconds, press it again and hold it.

If the windows stop midway, repeat the procedure.

Models with panoramic roof
If you open/close the windows with the remote, the panoramic roof will open/close automatically along with them.

Opening/Closing the Windows with the Key *

To open: Unlock the driver’s door with the key. Within 10 seconds of returning the key to the central position, turn the key in the unlock direction and hold it there.
To close: Lock the driver’s door with the key. Within 10 seconds of returning the key to the central position, turn the key in the lock direction and hold it there.

Release the key to stop the windows at the desired position. If you want further adjustment, repeat the same operation.

Models with panoramic roof
If you open/close the windows with the key, the panoramic roof will open/close automatically along with them.

* Not available on all models
Panoramic Roof*

Opening/Closing the Panoramic Roof
You can only operate the panoramic roof when the power mode is in ON. Use the switch in the front of the ceiling to open and close the panoramic roof.

**WARNING:** Always take the ignition key with you whenever you leave the vehicle alone or with other occupants.

**NOTICE**
Opening the panoramic roof in below freezing temperature or when it is covered with snow or ice can damage the panoramic roof panel or motor.

The panoramic roof and sunshade can be operated for up to 10 minutes after you set the power mode to VEHICLE OFF (LOCK). Closing the driver’s door cancels this function.

* Not available on all models

---

Continued
Opening/Closing the Panoramic Roof

Controls

■ Automatic operation
To open: Pull the switch back firmly.
To close: Push the switch forward firmly.

The sunshade automatically opens or closes all the way. To stop the sunshade midway, pull or push the switch briefly.

■ Manual operation
To open: Pull the switch back lightly, and hold it until the desired position is reached.
To close: Push the switch forward lightly, and hold it until the desired position is reached.

Using the Sunshade Switch

- The sunshade can be opened or closed to adjust the amount of light that enters the cabin.
- When you use the sunshade switch to open the sunshade, the panoramic roof does not move.
- The sunshade cannot be fully closed if the panoramic roof is open. When you close the sunshade with the panoramic roof open, the sunshade stops close to the panoramic roof glass. When you push the switch forward again, the sunshade and the panoramic roof close together.

Opening/Closing the Panoramic Roof

When resistance is detected, the auto reverse function causes the panoramic roof and sunshade to change directions, then stop. Auto reverse stops sensing when the panoramic roof and sunshade are almost closed to ensure that they fully close.

You can use the remote transmitter or the key to operate the panoramic roof:
- Opening/Closing the Windows with the Remote* P. 178
- Opening/Closing the Windows with the Key* P. 178

* Not available on all models
Using the Panoramic Roof Switch

Automatic operation
To open: Pull the switch back firmly.
To close: Push the switch forward firmly.

The panoramic roof automatically opens or closes all the way. To stop the panoramic roof midway, pull or push the switch briefly.

Manual operation
To open: Pull the switch back lightly, and hold it until the desired position is reached.
To close: Push the switch forward lightly, and hold it until the desired position is reached.

Tilting the panoramic roof up
To tilt: Push on the centre of the panoramic roof switch.
   - The sunshades will open automatically and the panoramic roof will start to tilt up.
To close: Push the switch forward firmly.

Using the Panoramic Roof Switch
Whenever the panoramic roof is opening, the sunshade moves along with it. However, when the panoramic roof is closing, the sunshade does not move.

When you tilt open the panoramic roof, the sunshade opens slightly to let in fresh air. When you close the panoramic roof from this position, the sunshade returns to its closed position.
Operating the Switches Around the Steering Wheel

Models without keyless access system

Ignition Switch

**LOCK** Insert and remove the key in this position.

**ACCESSORY** Operate the audio system and other accessories in this position.

**ON** This is the position when driving.

**START** This position is for starting the engine. The switch returns to **ON** when you let go of the key.

**WARNING**
Removing the key from the ignition switch while driving locks the steering. This can cause you to lose control of the vehicle.

Remove the key from the ignition switch only when parked.

- **Manual transmission models**
- **Continuously variable transmission models**

You cannot take the key out unless the shift lever is in **P**.

**All models**
If you open the driver’s door when the key is in LOCK or ACCESSORY, the following messages appear on the multi-information display:
- In **LOCK**
- In **ACCESSORY**

If the key won’t turn from LOCK to ACCESSORY, turn the key while moving the steering wheel left and right. The steering wheel will unlock, allowing the key to turn.
Models with keyless access system

ENGINE START/STOP Button

<td>The button blinks (in red). All electrical components can be used.</td>
</tr>
</tbody>
</table>

**Without pressing the brake pedal**

- Press the button without the transmission in **P**.
- Press the button with the transmission in **P**.

**Without pressing the clutch pedal**

- Press the button without the transmission in **P**.
- Press the button.

---

If the battery of the keyless remote is getting low, the engine may not start when you push the ENGINE START/STOP button. If the engine does not start, refer to the following link.

- **If the Keyless Remote Battery is Weak**
  - P. 623

The engine may also run if the keyless remote is close to the door or window, even if it is outside the vehicle.

**ON mode:**

The ENGINE START/STOP button is red when the engine is running.

---

Continued
Operating the Switches Around the Steering Wheel

ENGINE START/STOP Button

- **Automatic Power Off**
  If you leave the vehicle for 30 to 60 minutes with the shift lever in [P]*1 and the power mode in ACCESSORY, the vehicle automatically goes into the mode similar to VEHICLE OFF (LOCK) to avoid draining the battery.

  When in this mode:
  - The steering wheel does not lock.
  - You cannot lock or unlock doors with the remote transmitter or the keyless access system.
  - Press the ENGINE START/STOP button to switch the mode to VEHICLE OFF (LOCK).

*1: Continuously variable transmission models

ENGINE START/STOP Button

- Do not leave the power mode in ACCESSORY or ON when you get out.

If the power mode does not change from VEHICLE OFF (LOCK) to ACCESSORY, press the ENGINE START/STOP button while moving the steering wheel left and right. The steering wheel will unlock, allowing the mode to change.
**Operating the Switches Around the Steering Wheel**

**ENGINE START/STOP Button**

If you open the driver’s door when the power mode is in ACCESSORY, a warning beep sounds.

### Power Mode Reminder
If you open the driver’s door when the power mode is in ACCESSORY, a warning beep sounds.

### Keyless Remote Reminder
Warning buzzers may sound from inside and/or outside the vehicle to remind you that the keyless remote is out of the vehicle. If the buzzer continues even after the remote is put back inside, place it to be within its operational range.

- **When the power mode is in ON**
  If the keyless remote is taken out of the vehicle, and all the doors are closed, a warning buzzer sounds from both inside and outside the vehicle. A warning message on the multi-information display notifies the driver inside that the remote is outside of the vehicle.

- **When the power mode is in ACCESSORY**
  If the keyless remote is taken out of the vehicle, and all the doors are closed, a warning buzzer sounds from outside the vehicle.

**Keyless Remote Reminder**
When the keyless remote is within the system’s operational range, and all the doors are closed, the warning function cancels.

- If the keyless remote is taken out of the vehicle after the engine has been started, you can no longer change the ENGINE START/STOP button mode or restart the engine. Always make sure if the remote is in your vehicle when you operate the ENGINE START/STOP button.

- Removing the keyless remote from the vehicle through a window does not activate the warning buzzer.

- Do not put the keyless remote on the dashboard or in the glove box. It may cause the warning buzzer to activate. Under some other conditions that can prevent the vehicle from locating the remote, the warning buzzer may also activate even if the remote is within the system’s operational range.

**Turn Signals**

The turn signals can be used when the ignition switch is in ON \( \text{II}^{*1} \).

- **One-touch turn signal**
  When you lightly push up or down and release the turn signal lever, the exterior turn signals and turn signal indicator blink three times. This feature can be used when signalling for a lane change.

---

*1: Models with the keyless access system have an **ENGINE START/STOP** button instead of an ignition switch.
Operating the Switches Around the Steering Wheel

**Light Switches**

### Manual Operation

Rotating the light switch turns the lights on and off, regardless of the power mode setting or position of the ignition switch.

- **High beams**
  Push the lever forward until you hear a click.

- **Low beams**
  When in high beams, pull the lever back to return to low beams.

- **Flashing the high beams**
  Pull the lever back, and release it.

- **Lights off**
  Turn the lever to **OFF** either when:
  - The shift lever is in **P**.*
  - The parking brake is applied.
  To turn the lights on again, turn the lever to **OFF** to cancel the lights off mode. Even if you do not cancel the lights off mode, the lights come on automatically when:
  - The transmission is moved out of **P**.* and the parking brake is released.
  - The vehicle starts to move.

---

*1: Continuously variable transmission models
Operating the Switches Around the Steering Wheel

Light Switches

Automatic Operation (automatic lighting control)

Automatic lighting control can be used when the ignition switch is in ON "I". When the light switch is in AUTO, the headlights and other exterior lights will switch on and off automatically depending on the ambient brightness.

The headlights come on when you unlock a door in dark areas with the headlight switch in AUTO.

Once you lock the door, the headlights will go off.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Operating the Switches Around the Steering Wheel

Light Switches

190 Controls

The headlights automatically come on when the wipers are used several times within a certain number of intervals with the headlight switch in AUTO. The headlights automatically go off a few minutes later if the wipers are stopped.

Headlight Integration with Wipers

The headlights automatically come on when the wipers are used several times within a certain number of intervals with the headlight switch in AUTO. The headlights automatically go off a few minutes later if the wipers are stopped.

Automatic Lighting Off Feature

The headlights, all other exterior lights, and the instrument panel lights turn off 15 seconds after you remove the key or set the power mode to VEHICLE OFF (LOCK), take the remote with you, and close the driver’s door. However, when the switch is in AUTO, the position lights remain on.

If you turn the ignition switch to LOCK ① with the headlight switch on, but do not open the door, the lights turn off after 10 minutes (3 minutes, if the switch is in the AUTO position).

The lights turn on again when you unlock or open the driver’s door. If you unlock the door, but do not open it within 15 seconds, the lights go off. If you open the driver’s door, you will hear a lights on reminder chime.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Fog Lights

■ Front fog lights*
Can be used when the position lights or the headlights are on.

■ Rear fog light
Can be used when the headlights or the front fog lights* are on.

■ Front and Rear Fog Lights*

■ To turn the front fog lights on
Rotate the switch up from the OFF position to the position. The indicator comes on.

■ To turn the front and rear fog lights on
Rotate the switch one position up from the position. The and indicator comes on.

■ Rear Fog Light*

■ To turn the rear fog light on
Rotate the switch to . The indicator comes on.

* Not available on all models
Auto High-Beam (High Beam Support System)*

Using a camera mounted to the inside of the windscreen, this system detects light sources ahead of the vehicle. Depending on the light source, the system automatically switches the headlights to high beam for optimal visibility at night.

The headlight switch is in AUTO.
The lever is in the low beam position.
The low beams are on and the system recognises that you are driving at night.
The vehicle speed is above 40 km/h (25 mph).

How it works

When the camera detects lights coming from a preceding or oncoming vehicle, the headlights remain in low beam.

When the camera detects no lights coming from a preceding or oncoming vehicle, the headlights change to high beam.

The view angle or distance that the camera can detect lights ahead differs depending on conditions, such as the brightness of the lights and the weather.

The high beam support system determines when to change the headlight beams by responding to the brightness of the lights ahead of your vehicle. In the following cases, the system may not respond to the lights properly:

- The brightness of the lights from the preceding or oncoming vehicle is intense or poor.
- Visibility is poor due to the weather (rain, snow, fog, windscreen frost, etc.).
- Other light sources, such as streetlights and electric billboards are illuminating the road ahead.
- The brightness level of the road ahead constantly changes.
- The road is bumpy or with many curves.
- A vehicle cuts in front of you, or a vehicle in front of you is not in the preceding or oncoming direction.
- Your vehicle is tilted with a heavy load in the rear.

If you find the timing of beam changes inconvenient for driving, change the headlight beams manually.

If you do not want the system to be activated at any time when the headlight switch is in AUTO, consult a dealer.

* Not available on all models
Operating the Switches Around the Steering Wheel

Operating the System

To activate the system, the headlight switch is in AUTO and set the headlights to low beam. The auto high-beam indicator will come on. Light Switches P. 188

The high beams remain on unless:
- You have been driving below 24 km/h (15 mph) for an extended amount of time.
- The speed of the vehicle drops below 10 km/h (6 mph).
- The windscreen wipers have been running at a high speed for more than a few seconds.
- You enter a well-lit location.

The high beams come back on once the condition that caused them to turn off no longer exists.

If needed, you can temporarily turn the system off manually. Turn on the high beams by pushing the lever forward until you hear a click, or flash the high beams once by pulling the lever toward you. To turn the system back on, pull and hold the lever toward you for a few seconds.

Controls

Operating the System

For the high beam support system to work properly:
- Do not place an object that reflects light on the dashboard.
- Keep the windscreen around the camera clean.
- Do not attach an object, sticker or film to the area around the camera.

If the camera receives a strong impact, or repairing of the area near the camera is required, consult a dealer.

If the message appears:
- Use the climate control system to cool down the interior and, if necessary, also use demister mode with the airflow directed towards the camera.
- Start driving the vehicle to lower the windscreen temperature, which cools down the area around the camera.

If the message appears:
- Park your vehicle in a safe place, and clean the windscreen. If the message does not disappear after you have cleaned the windscreen and driven for a while, have your vehicle checked by a dealer.
Daytime Running Lights

The daytime running lights come on when the following conditions have been met:

- The ignition switch is in ON [i]"1.
- The headlight switch is in AUTO.

Turning off the ignition switch or setting the power mode to VEHICLE OFF will turn off the daytime running lights.

The daytime running lights are off once the headlight switch is turned on, or when the headlight switch is in AUTO and it is getting darker outside.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Wipers and Washers

The windscreen wipers and washers can be used when the ignition switch is in ON [II]*1.

**MIST**
The wipers run at high speed until you release the lever.

**Wiper switch (OFF, INT*2/AUTO*3, LO, HI)**
Move the lever up or down to change the wiper settings.

**Adjusting wiper operation**
Turn the adjustment ring to adjust the wiper operation.

- Lower speed, fewer sweeps
- Higher speed, more sweeps

**Washer**
Sprays while you pull the lever towards you. When you release the lever for more than one second, the spray stops, the wipers sweep two or three more times to clear the windscreen, then stop.

---

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
*2: Models with manual intermittent operation
*3: Models with automatic intermittent operation

* Not available on all models

---

**NOTICE**
Do not use the wipers when the windscreen is dry. The windscreen will get scratched, or the rubber blades will get damaged.

**NOTICE**
In cold weather, the blades may freeze to the windscreen. Operating the wipers in this condition may damage the wipers. Use the demister to warm the windscreen, then turn the wipers on.

**Models without automatic intermittent wipers**
If the vehicle speeds up while the wipers are operating intermittently, the length of the wipe interval shortens. When the vehicle speeds up, the wiper operation's shortest delay setting ( ) and the LO setting become the same.

**NOTICE**
Turn the washers off if no washer fluid comes out. The pump may get damaged.

The wiper motor may stop motor operation temporarily to prevent an overload. Wiper operation will return to normal within a few minutes, once the circuit has returned to normal.
When you push the lever down to AUTO, the windscreen wipers sweep once, and go into the automatic mode.

The wipers operate intermittently, at low speed, or at high speed and stops in accordance with the amount of rainfall the rainfall sensor detects.

**Auto sensitivity adjustment**
When in AUTO, you can also adjust the rainfall sensor sensitivity using the adjustment ring.

**Sensor sensitivity**
- Low sensitivity
- High sensitivity

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Rear Wiper/Washer

The rear wiper and washer can be used when the ignition switch is in ON \(^{1}\).

**Wiper switch (OFF, INT, ON)**
Change the wiper switch setting according to the amount of rain.

**Washer ( )**
Sprays while you rotate the switch to this position.
Hold it to activate the wiper and to spray the washer. Once released, it stops operating after a few more sweeps.

**Operating in reverse**
When you shift the transmission to \( R \) with the windscreen wipers activated, the rear wiper operates automatically as follows even if its switch is off.

<table>
<thead>
<tr>
<th>Front Wiper Position</th>
<th>Rear Wiper Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>INT (Intermittent)</td>
<td>Intermittent</td>
</tr>
<tr>
<td>AUTO (Intermittent)</td>
<td>Intermittent</td>
</tr>
<tr>
<td>LO (Low speed wipe)</td>
<td>Continuous</td>
</tr>
<tr>
<td>HI (High speed wipe)</td>
<td></td>
</tr>
</tbody>
</table>

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Rear Demister/Heated Door Mirror Icon

Touch the icon to demist the rear window and door mirrors when the ignition switch is in ON \(^{1}\).

The rear demister and heated door mirrors automatically switch off after 10-30 minutes depending on the outside temperature. However, if the outside temperature is 0°C or below, they do not automatically switch off.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Operating the Switches Around the Steering Wheel

Brightness Control

When the ignition switch is in ON \(^1\), you can use the \(\text{Select/Reset} \) knob to adjust instrument panel brightness.

- **Brightness**: Turn the knob to the right.
- **Dim**: Turn the knob to the left.

The multi-information display will return to its original state several seconds after you adjust the brightness.

- **Brightness level indicator**
  The brightness level is shown on the multi-information display while you are adjusting it.

*1: Models with the keyless access system have an \textbf{ENGINE START/STOP} button instead of an ignition switch.
You can store two driver’s seat positions with the driving position memory system.

When you unlock and open the driver’s door with a remote transmitter or the keyless access system, the seat adjusts automatically to one of the two preset positions.

- DRIVER 1 transmitter is linked to memory button 1.
- DRIVER 2 transmitter is linked to memory button 2.

The system will not operate if:

- Either seat position button is pressed while the seat is in motion.
- Either memory position button is pressed while the seat is in motion.
- The vehicle speed is above 3 km/h (2 mph).
- Overload to the seat motor.

* Not available on all models
Operating the Switches Around the Steering Wheel

Driving Position Memory System

**Storing a Position in Memory**

1. Set the power mode to ON. Adjust the driver’s seat to the desired position.
2. Press the **SET** button. You will hear a beep, and the memory button indicator light will blink.
3. Press and hold memory button 1 or 2 within five seconds of pressing the **SET** button.
   - Once the seat position has been memorized, you will hear the beeper twice, and the indicator light on the button you pressed stays on.

**Recalling the Stored Position**

- **Continuously variable transmission models**
  1. Put the transmission into **P**.
  2. Press a memory button (1 or 2).
     - You will hear a beep, and the indicator light will blink.

- **Manual transmission models**
  1. Apply the parking brake.
  2. Press a memory button (1 or 2).
     - You will hear a beep, and the indicator light will blink.

The seat will automatically move to the memorized position. When it has finished moving, you will hear the beeper twice, and the indicator light stays on.

**Storing a Position in Memory**

After you press the **SET** button, the storing operation will be cancelled when:
- You do not press the memory button within five seconds.
- You readjust the seat position before the double-beep.
- You set the power mode to any position except ON.

**Recalling the Stored Position**

The seat will stop moving if you:
- Press the **SET** button, or a memory button (1 or 2).
- Adjust the seat position.
- Put the transmission into a position other than **P** (continuously variable transmission).
- Release the parking brake (manual transmission).
Adjusting the Steering Wheel

The steering wheel height and distance from your body can be adjusted so that you can comfortably grip the steering wheel in an appropriate driving posture.

1. Pull the steering wheel adjustment lever up. ▶ The steering wheel adjustment lever is under the steering column.
2. Move the steering wheel up or down, and in or out. ▶ Make sure you can see the instrument panel gauges and indicators.
3. Push the steering wheel adjustment lever down to lock the steering wheel in position. ▶ After adjusting the position, make sure you have securely locked the steering wheel in place by trying to move it up, down, in, and out.

**WARNING**

Adjusting the steering wheel position while driving may cause you to lose control of the vehicle and be seriously injured in a crash.

Adjust the steering wheel only when the vehicle is stopped.
Adjusting the Mirrors

Interior Rearview Mirror
Adjust the angle of the rearview mirror when you are sitting in the correct driving position.

Rearview Mirror with Day and Night Positions*
Flip the tab to switch the position. The night position helps to reduce the glare from headlights behind you when driving after dark.

Automatic Dimming Rearview Mirror*
When you are driving after dark, the automatic dimming rearview mirror reduces the glare from headlights behind you. Press the auto button to turn this function on and off. When activated, the auto indicator comes on.

* Not available on all models
Power Door Mirrors

You can adjust the door mirrors when the ignition switch is in ON [II]*1.

- **Mirror position adjustment**
  - **L/R selector switch:** Select the left or right mirror. After adjusting the mirror, return the switch to the centre position.
  - **Mirror position adjustment switch:** Press the switch left, right, up, or down to move the mirror.

- **Folding door mirrors**
  Press the folding button to fold in and out the door mirrors.

- **Reverse Tilt Door Mirror***

  If activated, passenger side door mirror automatically tilts downward when you put the transmission into [R]; this improves close-in visibility on the passenger side of the vehicle when backing up. The mirror automatically returns to its original position when you take the transmission out of [R].

  To activate this feature, turn the ignition switch to ON [II]*1, and slide the selector switch to the passenger side.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Adjusting the Mirrors

Power Door Mirrors

Controls

■ Folding in the door mirrors
Press the lock button on the remote transmitter or keyless remote twice within 10 seconds, and hold it.
➤ You can release the button once the mirrors start folding in automatically.

Models with keyless access system
Press the door lock button on either front outside door handle or the tailgate twice within 10 seconds, and hold it.
➤ You can release the button once the mirrors start folding in automatically.

■ Folding out the door mirrors
Unlock all doors and the tailgate using the remote transmitter. Open the driver’s door.
➤ The mirrors start folding out automatically.

Models with keyless access system
Grab either front outside door handle or press the tailgate release button and unlock all doors and the tailgate. Open the driver’s door.
➤ The mirrors start folding out automatically.

Automatic Folding Door Mirror Function*

You cannot turn the automatic folding out automatically if they have been folded in using the folding button.

Door mirrors will not fold automatically when locking from inside the vehicle using lock tab or master door lock switch.

* Not available on all models
Adjusting the Seats

Front Seats

Adjust the driver’s seat as far back as possible while allowing you to maintain full control of the vehicle. You should be able to sit upright, well back in the seat and be able to adequately press the pedals without leaning forward, and grip the steering wheel comfortably. The passenger’s seat should be adjusted in a similar manner, so that it is as far back from the front airbag in the dashboard as possible.

WARNING
Sitting too close to a front airbag can result in serious injury or death if the front airbags inflate.

Always sit as far back from the front airbags as possible while maintaining control of the vehicle.

Adjusting the Seat Positions

■ Adjusting the front power seats*

* Not available on all models
Adjusting the front manual seats

- **Height Adjustment**: Pull up or push down the lever to raise or lower the seat.
- **Horizontal Position Adjustment**: Pull up on the bar to move the seat, then release the bar.
- **Seat-back Angle Adjustment**: Pull up the lever to change the angle.

Driver’s seat is shown.

---

*Not available on all models*
Adjusting the Seats

Adjust the driver’s seat-back to a comfortable, upright position, leaving ample space between your chest and the airbag cover in the centre of the steering wheel.

The front seat passenger should also adjust their seat-back to a comfortable, upright position.

Reclining a seat-back so that the shoulder part of the belt no longer rests against the occupant’s chest reduces the protective capability of the belt. It also increases the chance of sliding under the belt in a crash and being seriously injured. The farther a seat-back is reclined, the greater the risk of injury.

**WARNING**

Reclining the seat-back too far can result in serious injury or death in a crash.

Adjust the seat-back to an upright position, and sit well back in the seat.

Do not put a cushion, or other object, between the seat-back and your back.

Doing so may interfere with proper seat belt or airbag operation.

If you cannot get far enough away from the steering wheel and still reach the controls, we recommend that you investigate whether some type of adaptive equipment may help.
Rear Seats

- **Adjusting the Rear Seat-Backs**

Pull the lever on the right to change the angle of the right half of the seat-back, and left for the left half.

**WARNING**

Make sure the seat-backs are latched securely before driving.

*Continued*
Folding Down the Rear Seats

The rear seats can be folded down separately to allow for additional storage space.

1. Store the centre seat belt first. Insert the latch plate into the slot on the side of the anchor buckle. Retract the seat belt into the holder on the ceiling.

2. Lower the head restraint to its lowest position.

3. Pull the release lever and fold down the seat-back.

To return the seat to the original position, pull up the seat-back in the upright position.

Folding Down the Rear Seats

Make sure all items in the luggage area or items extending to the rear seats are properly secured. Loose items can fly forward if you have to brake hard.

Remove any items from the rear seat cushion and floor before you fold down the rear seat.

To lock a seat-back upright, push it backwards until it locks.

Make sure the seat-back, head restraints and seat cushion are securely latched back into place before driving. Also, make sure all rear shoulder belts are positioned in front of the seat-back, and the centre shoulder belt is re-positioned in the holding slot.
Folding the Rear Seat Up

Separately lift up the left and right halves of the rear seat cushions to make room for luggage area.

Lifting up the seat cushion

1. Make sure the seat belt buckles are in their loops on the seat.
2. Pull up the rear seat cushion.
3. Fold the seat leg down while pushing the seat cushion firmly against the seat-back to lock it.

Putting the seat in the original position

1. Hold the seat cushion in the upright position, and pull up the seat leg fully.
   - The seat cushion can abruptly fall down once you pull up the seat leg.
2. Slowly put down the seat cushion and set the seat leg in the floor guide.
   - A latch comes out when the leg is set properly.

Adjusting the Seats

Rear Seats Controls

- Loop
- Seat Leg
- Latch
- Floor Guide

Folding the Rear Seat Up

After you fold the seat up, or put it back in the original position, make sure the seat is firmly secured by rocking it forward and back.

Check if there are any items on the seat before you pull the seat cushion up. Check if there are any obstacles around the floor guide before you put the seat back in the original position.
Adjusting the Seats

Maintain a Proper Sitting Position

After all occupants have adjusted their seats and head restraints, and put on their seat belts, it is very important that they continue to sit upright, well back in their seats, with their feet on the floor until the vehicle is safely parked and the engine is off.

Sitting improperly can increase the chance of injury during a crash. For example, if an occupant slouches, lies down, turns sideways, sits forward, leans forward or sideways, or puts one or both feet up, the chance of injury during a crash is greatly increased.

In addition, an occupant who is out of position in the front seat can be seriously or fatally injured in a crash by striking interior parts of the vehicle or being struck by an inflating front airbag.

★ ★ WARNING ★ ★

Sitting improperly or out of position can result in serious injury or death in a crash.

Always sit upright, well back in the seat, with your feet on the floor.
Head Restraints

Your vehicle is equipped with head restraints in all seating positions.

Adjusting the Front Head Restraint Positions

Head restraints are most effective for protection against whiplash and other rear-impact crash injuries when the centre of the back of the occupant’s head rests against the centre of the restraint. The tops of the occupant’s ears should be level with the centre height of the restraint.

Position head in the centre of the head restraint.

WARNING

Improperly positioning head restraints reduces their effectiveness and increases the likelihood of serious injury in a crash.

Make sure head restraints are in place and positioned properly before driving.

In order for the head restraint system to work properly:

• Do not hang any items on the head restraints, or from the restraint legs.
• Do not place any objects between an occupant and the seat-back.
• Install each restraint in its proper location.
Adjusting the Seats ▶ Head Restraints

To raise the head restraint: Pull it upward.
To lower the head restraint: Push it down while pressing the release button.

To tilt the head restraint forward: Push the back of it forward.
To tilt the head restraint backward: Push it backward while pressing the release button on the side of the head restraint.
Adjusting the Seats

Head Restraints

Adjusting the Seats

A passenger sitting in the outer or centre back seating position should adjust the height of their head restraint to an appropriate position before the vehicle begins moving.

To raise the head restraint:
Pull it upward.

To lower the head restraint:
Push it down while pressing the release button.

Changing the Rear Seat Head Restraint Positions

Changing the Rear Seat Head Restraint Positions

When you use the head restraint in a rear seating position, pull up the head restraint to its highest position. Do not use it in any lower position.

Removing and Reinstalling the Head Restraints

Removing and Reinstalling the Head Restraints

Head restraints can be removed for cleaning or repair.

To remove a head restraint:
Pull the restraint up as far as it will go. Then push the release button, and pull the restraint up and out.

To reinstall a head restraint:
Insert the legs back in place, then adjust the head restraint to an appropriate height while pressing the release button. Pull up on the restraint to make sure it is locked in position.

WARNING

Failure to reinstall, or correctly reinstall, the head restraints can result in severe injury during a crash.

Always replace the head restraints before driving.

To remove and install the rear outer head restraint, recline the seat-back slightly forward as the space between the ceiling and the seat-back is limited.
Armrest

Using the Front Seat Armrest

The console lid can be used as an armrest.

To adjust:
Slide the armrest to a desired position.

Using the Rear Seat Armrest*

Pull down the armrest in the centre seat-back.

* Not available on all models
Interior Lights

Interior Light Switch

■ ON
The interior lights come on regardless of whether the doors are open or closed.

■ Door activated
The interior lights come on in the following situations:
• When any of the doors are opened.
• You unlock the driver’s door.
• You remove the key from the ignition switch.

Models without keyless access system
• You remove the key from the ignition switch.

Models with keyless access system
• When the power mode is set to VEHICLE OFF (LOCK).

■ OFF
The interior lights remain off regardless of whether the doors are open or closed.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Map Lights

The map lights can be turned on and off by pressing the (map light) button.

Interior Light Switch
If you leave any of the doors open in VEHICLE OFF (LOCK) mode, or without the key in the ignition switch, the interior lights go off after about 15 minutes.

Map Lights
When the interior light switch is in the door activated position and any door is open, the rear map light will not go off when you press the button on the rear map lights.
■ ON
The light comes on when you open the tailgate, and goes off when closed.

■ OFF
The light stays off with or without opening the tailgate.

Luggage Area Light
Interior Convenience Items

■ Glove Box

Pull the handle to open the glove box.

■ Console Compartment

Pull the handle to open the console compartment.

WARNING
An open glove box can cause serious injury to your passenger in a crash, even if the passenger is wearing the seat belt.

Always keep the glove box closed while driving.
**Beverage Holders**

**Front seat beverage holders**

To put a short-size beverage:
Pressing a button inside the console raises the bottom plate. Arms come out to hold a beverage.

To put a tall-size beverage:
Close the arms and push down the bottom plate.

---

**Centre console beverage holders**

**NOTICE**
Spilled liquids can damage the upholstery, carpeting, and electrical components in the interior.

Be careful when you are using the beverage holders. Hot liquid can scald you.
■ Rear seat beverage holders
Under-Floor Storage Area

Pull up the luggage area floor lid.

The shape of the luggage floor box varies by model.

Models with boot tray

The boot tray is equipped on the luggage area floor. Remove it if necessary.
The accessory power socket can be used when the ignition switch is in ACCESSORY [I] or ON [II]*1.

**Console panel**
Open the cover to use it.

---

**Notice**

Do not insert an automotive type cigarette lighter element. This can overheat the power socket.

The accessory power socket is designed to supply power for 12-volt DC accessories that are rated 180 watts (15 amps) or less.

When each socket is being used simultaneously, the combined power rating of the accessories should not exceed 180 watts (15 amps).

To prevent battery drain, only use the power socket with the engine running.

---

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
■ Rearward of the centre console*
Open the cover to use it.

■ Luggage area
Open the cover to use it.

* Not available on all models
Coat Hooks

There are coat hooks on the rear left and right grab handles. Pull them down to use them.

There are coat hooks on the left and right door pillars.

Tie-down Anchors

The tie-down anchors on the luggage area floor can be used to install a net for securing items.

Coat Hooks

The coat hooks are not designed for large or heavy items.

Tie-down Anchors

Do not let anyone access items in the luggage area while driving. Loose items can cause injury if you have to brake hard.
The tonneau cover can be used to conceal your items and protect them from direct sunlight.

**To remove:**
Pull out the tonneau cover rearwards and remove it.

**To fold:**
The tonneau cover is collapsible.
1. Take the opposite sides, fold the cover halfway, then twist into opposite ways.
2. Curl to narrow the cover as shown.

*Not available on all models*
The luggage area cover may be removed to give you more luggage room.

To remove the luggage area cover

1. Open the tailgate.
2. Remove the strap on each side of the tailgate.
3. Disengage the support rods, then remove the luggage area cover.

Reverse this procedure to install the luggage area cover.

After reinstalling the luggage area cover, make sure it is latched securely.

* Luggage Area Cover

Do not place items on the luggage area cover, or stack objects higher than the top of the back seat. They could block your view and be thrown about the vehicle during a crush or sudden stop.

Do not apply excessive pressure to the cover, such as leaning on it to retrieve an item.

*Not available on all models*
The ignition switch must be in ON \(\text{II}^1\) \(\times1\) to use the seat heaters.

Touch the seat heater icon.
- Once - The HI setting (two indicators on)
- Twice - The LO setting
- Three times - The OFF setting (no indicator on)

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

---

**WARNING**

Heat induced burns are possible when using seat heaters.

Persons with a diminished ability to sense temperature (e.g., persons with diabetes, lower-limb nerve damage, or paralysis) or with sensitive skin should not use seat heaters.

Do not use the seat heaters even in LO when the engine is off. Under such conditions, the battery may be weakened, making the engine difficult to start.

In the LO setting, the heater runs continuously and does not automatically turn off.
Climate Control System

Using Automatic Climate Control

The automatic climate control system maintains the interior temperature you select. The system also selects the proper mix of heated or cooled air that raises or lowers the interior temperature to your preference as quickly as possible.

1. Select the AUTO icon.
2. Adjust the interior temperature using the driver's side or passenger's side temperature control icons.
3. Select the icon to cancel.

Using Automatic Climate Control

If any icons are selected while using the climate control system in auto, the function of the icon that was selected will take priority. The AUTO indicator will go off, but functions unrelated to the icon that was selected will be controlled automatically.

To prevent cold air from blowing in from outside, the fan may not start immediately when the AUTO icon is selected.

If the interior is very warm, you can cool it down more rapidly by partially opening the windows, turning the system on auto, and setting the temperature to low. Change the fresh air mode to recirculation mode until the temperature cools down.

When you set the temperature to the lower or upper limit, Lo or Hi is displayed.

You can raise or lower the temperature or fan speed setting flicking either control icon.
Using Automatic Climate Control

Selecting the **AUTO** icon switches the climate control system between on and off. When turned on, the system returns to your last selection.

While ECON mode is active, the climate control system may have reduced cooling performance.

During idle-stops*, air-conditioning is suspended, and only the blower remains active. If you do not want air-conditioning suspended, press the Auto Idle Stop system **OFF** button to cancel idle-stop.

---

* Not available on all models

---

Models without SYNC icon

- **Dashboard vents**
- **Floor vents**
- **Mode Control Icon**
- **Temperature Control Icons**
  - **AUTO Icon**
  - **(On/Off) Icon**
  - **A/C (Air Conditioning) Icon**
  - **(Recirculation) Icon**
  - **(Fresh Air) Icon**
  - **(Windscreen Demister) Icon**

---

Use the system when the engine is running.

1. Select the **AUTO** icon.
2. Adjust the interior temperature using the temperature control icons.
3. Select the **(Off)** icon to cancel.
Switching between the recirculation and fresh air modes

Models with SYNC icon
Select the (recirculation) icon and switch the mode depending on environmental conditions.
Recirculation mode (indicator on): Recirculates air from the vehicle’s interior through the system.
Fresh air mode (indicator off): Maintains outside ventilation. Keep the system in fresh air mode in normal situations.

Models without SYNC icon
Select the (recirculation) or (fresh air) icon to switch the mode depending on environmental conditions.
Recirculation mode (indicator on): Recirculates air from the vehicle’s interior through the system.
Fresh air mode (indicator off): Maintains outside ventilation. Keep the system in fresh air mode in normal situations.
Defrosting the Windscreen and Windows

Select the icon to turn the air conditioning system on and automatically switch the system to fresh air mode.

Select the icon again to turn off, the system returns to the previous settings.

For your safety, make sure you have a clear view through all the windows before driving.

Do not set the temperature near the upper or lower limit.
When cold air hits the windscreen, the outside of the windscreen may fog up.

If the side windows fog up, adjust the vents so that the air hits the side windows.

**Continuously variable transmission models with auto idle stop**

Selecting the icon restarts the engine automatically during the Auto Idle Stop.

**Manual transmission models**

To defog during the Auto Idle Stop, restart the engine as follows.

1. Make sure the shift lever is in **N**.
2. Depress the clutch pedal fully.
3. Select the icon.
To rapidly defrost the windows

Models with SYNC icon
1. Select the icon.
2. Select the icon (indicator on).

Models without SYNC icon
1. Select the icon.
2. Select the icon.

To rapidly defrost the windows
After defrosting the windows, switch over to fresh air mode. If you keep the system in recirculation mode, the windows may fog up from humidity. This impedes visibility.
You hear the beep when operating the climate control system on the touch panel. This can be turned on and off.

**To turn off the beep:**
1. Turn the ignition switch to ON \( \text{II} \)\(^*1\).
2. Touch the \( \text{□} \) of the temperature control icon five times while pressing and holding the \( \text{□} \).
3. Release the \( \text{□} \) after \( -- \) blinks five times and \( \text{OF} \) is displayed.

\(^*1\): Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
To turn on the beep:
1. Turn the ignition switch to ON [Ⅱ]*1.
2. Touch the of the temperature control icon five times while pressing and holding the .
3. Release the after OF blinks five times and -- is displayed.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
You can set the level of sensitivity of the touch panel to high, normal, or low.

1. Turn the ignition switch to ON (\textit{Hi})\textsuperscript{*1}.
2. Press and hold the AUTO icon, then press any of the following icons five times to set the level.
   - $\Uparrow$: High (\textit{Hi})\textsuperscript{*2}.
     - Previous setting blinks five times and \textit{Hi} will be displayed in the temperature display area.
   - $\Downarrow$: Normal (\textit{--})
     - Previous setting blinks five times and \textit{--} will be displayed in the temperature display area.
   - $\checkmark$: Low (\textit{Lo})
     - Previous setting blinks five times and \textit{Lo} will be displayed in the temperature display area.
3. Release the AUTO icon.

\textsuperscript{*1}: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

\textsuperscript{*2}: Default setting
Climate Control System

Using Automatic Climate Control

**Synchronization Mode**

You can set the temperature synchronously for the driver’s side and the passenger’s side in synchronization mode.

1. Select the **SYNC** icon.
   - The system switches to synchronization mode.
2. Adjust the temperature using the driver’s side temperature control icon.

Select the **SYNC** icon or change the passenger’s side temperature setting to return to dual mode.

*Synchronization Mode*

When you select the **SYNC** icon, the system changes to synchronization mode.

When the system is in dual mode, the driver’s side temperature and the passenger’s side temperature can be set separately.

* Not available on all models
The automatic climate control system is equipped with sensors. Do not cover or spill any liquid on them.

Audio System

About Your Audio System

The audio system features AM/FM radio. It can also play audio CDs, WMA/MP3/AAC files, USB flash drives, and iPod, iPhone and Bluetooth devices.

You can operate the audio system from the buttons and switches on the panel, the remote controls on the steering wheel, or the icons on the touchscreen interface*.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

About Your Audio System

Video CDs, DVDs, and 8-cm (3-inch) mini CDs are not supported.

iPod, iPhone and iTunes are trademarks of Apple Inc.

Models with display audio system

After you turn the ignition switch to LOCK [0]*1, you can use the audio system for up to 30 minutes per driving cycle. However, whether you can continue using the audio system depends on the battery condition. Repeatedly using this feature may drain the battery.

* Not available on all models
USB Port(s)

1. Open the cover.
2. Install the iPod USB connector or the USB flash drive to the USB port.

- Do not leave the iPod or USB flash drive in the vehicle. Direct sunlight and high temperatures may damage it.
- Do not connect the iPod or USB flash drive using a hub.
- Do not use a device such as a card reader or hard disk drive, as the device or your files may be damaged.
- We recommend backing up your data before using the device in your vehicle.
- Displayed messages may vary depending on the device model and software version.

If the audio system does not recognise the iPod, try reconnecting it a few times or reboot the device. To reboot, follow the manufacturer’s instructions provided with the iPod or visit www.apple.com/ipod.
Audio System ▶ HDMI™ Port *

HDMI™ Port *

1. Open the cover.
2. Install the HDMI™ cable to the HDMI™ port.

* Not available on all models

**HDMI™ Port**

- Do not leave the HDMI™ connected device in the vehicle. Direct sunlight and high temperatures may damage it.
- We recommend backing up your data before using the device in your vehicle.
- Displayed messages may vary depending on the device model and software version.

The terms HDMI and HDMI High-Definition Multimedia Interface, and the HDMI Logo are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries.
Auxiliary Input Jack*

Use the jack to connect standard audio devices.

1. Open the AUX cover.
2. Connect a standard audio device to the input jack using a 3.5 mm (1/8 inch) stereo miniplug.
   ▶️ The audio system automatically switches to the AUX mode.

* Not available on all models
Audio System Theft Protection

The audio system is disabled when it is disconnected from the power source, such as when the battery is disconnected or goes dead. In certain conditions, the system may display a passcode input mode. If this occurs, reactivate the audio system.

■ Reactivating the audio system
1. Turn the ignition switch to ON [I]*1.
2. Turn on the audio system.
3. Press and hold the audio system power button for more than two seconds.
   ▶ The audio system is reactivated when the audio control unit establishes a connection with the vehicle control unit. If the control unit fails to recognise the audio unit, you must go to a dealer and have the audio unit checked.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Audio Remote Controls

Allow you to operate the audio system while driving.

SOURCE Button
Cycles through the audio modes as follows:

Audio Remote Controls P. 247
Audio/Information Screen
Displays the audio status and wallpaper. From this screen, you can go to various setup options.

- Switching the Display
■ Audio
Shows the current audio information.

■ Clock/Wallpaper
Shows a clock screen or an image you import.

■ Change display
1. Press the MENU/CLOCK button.
2. Rotate 📀 to select Settings, then press 🎯.
3. Rotate 📀 to select Display change, then press 🎯.
4. Rotate 📀 to select Wallpaper, then press 🎯.
   ▶ If you want to return to the audio display, select Audio.
Audio System Basic Operation
Audio/Information Screen

### Wallpaper Setup
You can change, store, and delete the wallpaper on the audio/information screen.

#### Import wallpaper
You can import up to three images, one at a time, for wallpaper from a USB flash drive.

1. Connect the USB flash drive to the USB port.  
   ![USB Port(s) P. 243](image)
2. Press the MENU/CLOCK button.
3. Rotate \(\odot\) to select Settings, then press \(\odot\).
4. Rotate \(\odot\) to select Wallpaper, then press \(\odot\).
5. Rotate \(\odot\) to select Import, then press \(\odot\).  
   \(\Rightarrow\) The picture name is displayed on the list.
6. Rotate \(\odot\) to select a desired picture, then press \(\odot\).  
   \(\Rightarrow\) The selected picture is displayed.
7. Press \(\odot\) to save the picture.
8. Press \(\odot\) to select OK.
9. Rotate \(\odot\) to select a location to save the picture, then press \(\odot\).  
   \(\Rightarrow\) The display will return to the wallpaper setting screen.

### Wallpaper Setup
- When importing wallpaper files, the image must be in the USB flash drive’s root directory. Images in a folder cannot be imported.
- The file name must be fewer than 64 characters.
- The file format of the image that can be imported is BMP (bmp) or JPEG (jpg).
- The individual file size limit is 2 MB.
- The maximum image size is 1,920 x 936 pixels. If the image size is less than 480 x 234 pixels, the image is displayed in the middle of the screen with the extra area appearing in black.
- Up to 255 files can be selected.
**Select wallpaper**

1. Press the **MENU/CLOCK** button.
2. Rotate   to select **Settings**, then press  .
3. Rotate   to select **Wallpaper**, then press  .
4. Rotate   to select **Select**, then press  . 
   - The screen changes to the wallpaper list.
5. Rotate   to select a desired wallpaper, then press  .

**Delete wallpaper**

1. Press the **MENU/CLOCK** button.
2. Rotate   to select **Settings**, then press  .
3. Rotate   to select **Wallpaper**, then press  .
4. Rotate   to select **Delete**, then press  . 
   - The screen changes to the wallpaper list.
5. Rotate   to select a wallpaper that you want to delete, then press  .
6. Rotate   to select **Yes**, then press  .
   - The display will return to the wallpaper setting screen.

**Wallpaper Setup**

To go back to the previous screen, press the ‌ (Back) button.

When the file size is large, it takes a while to be previewed.
Adjusting the Sound

1. Press the **MENU/CLOCK** button.
2. Rotate **LIST/SELECT (Selector) Knob** to select **Sound**, then press **LIST/SELECT (Selector) Knob**.
3. Rotate **LIST/SELECT (Selector) Knob** to scroll through the following choices:
   - **BAS**: Bass
   - **TRE**: Treble
   - **FAD**: Fader
   - **BAL**: Balance
   - **SVC**: Speed-sensitive Volume Compensation

   Rotate **LIST/SELECT (Selector) Knob** to adjust the sound setting, then press **LIST/SELECT (Selector) Knob**.

The SVC has four modes: **Off**, **Low**, **Mid**, and **High**. SVC adjusts the volume level based on the vehicle speed. As you go faster, audio volume increases. As you slow down, audio volume decreases.
Display Setup
You can change the brightness or colour theme of the audio/information screen.

### Changing the Screen Brightness

1. Press the MENU/CLOCK button.
2. Rotate 🔄 to select Settings, then press 🔄.
3. Rotate 🔄 to select Display adjustment, then press 🔄.
4. Rotate 🔄 to select Brightness, then press 🔄.
5. Rotate 🔄 to adjust the setting, then press 🔄.

### Changing the Screen's Colour Theme

1. Press the MENU/CLOCK button.
2. Rotate 🔄 to select Settings, then press 🔄.
3. Rotate 🔄 to select Colour theme, then press 🔄.
4. Rotate 🔄 to select the setting you want, then press 🔄.
Playing AM/FM Radio

- **RADIO Button**
  - Press to select a band.

- **VOL/ (Volume/Power) Knob**
  - Press to turn the audio system on and off.
  - Turn to adjust the volume.

- **(Seek/Skip) Buttons**
  - Press or to search up and down the selected band for a station with a strong signal.

- **Preset Buttons (1-6)**
  - To store a station:
    1. Tune to the selected station.
    2. Pick a preset button and hold it until you hear a beep.
  - To listen to a stored station, select a band, then press the preset button.

- **Audio/Information Screen**

- **LIST/SELECT (Selector) Knob**
  - Turn to tune the radio frequency.
  - Press, and then turn to select an item. After that, press again to make your selection.

- **MENU/CLOCK Button**
  - Press to display the menu items.

- **TA Button**
  - Press to activate the TA stand by function.

- **(Back) Button**
  - Press to go back to the previous display or cancel a setting.
Audio System Basic Operation

Playing AM/FM Radio

- Radio Data System (RDS)
  Provides convenient automated services related to your selected RDS-capable FM station.

- FM mode

■ Radio Data System (RDS)
  When you select an RDS capable FM station, the RDS automatically turns on, and the frequency display changes to the station name. However, when the signals of that station become weak, the display changes from the station name to the frequency.

Playing AM/FM Radio

- The ST indicator appears on the display indicating stereo FM broadcasts. Stereo reproduction in AM is not available.

- To switch the audio mode, press the SOURCE button on the steering wheel.

  Audio Remote Controls P. 247

- You can store 12 AM stations and 12 FM stations into the preset button memory. AM has two types of frequencies LW and MW, and each lets you store six stations. FM1 and FM2 let you store six stations each.
Audio System Basic Operation

Playing AM/FM Radio

■ To find an RDS station from Station list
1. Press 🎧 while listening to an FM station.
2. Rotate 🎧 to select the station, then press 🎧.

■ Manual update
Updates your available station list at any time.
1. Press 🎧 while listening to an FM station.
2. Rotate 🎧 to select Update list, then press 🎧.

■ Available RDS functions
Alternative Frequency (AF):
Automatically changes the frequency of the same programme as you enter different regions.

Regional Programme (REG):
Keeps the same frequency of the stations within that region even if the signal gets weak.

News Programme (News):
Automatically tunes to the news programme.

Radio Data System (RDS)
While listening to an FM station on Station list, pressing [←/→ (Seek/Skip)] button changes the station.

* Not available on all models
Audio System Basic Operation
Playing AM/FM Radio

Features

Selecting the RDS functions

1. Press the MENU/CLOCK button with the FM selected.
2. Rotate to select RDS settings and press .
3. Each RDS function is displayed every time you rotate .
4. Press to select a function.

Radio Data System (RDS)

Turning the Alternative Frequency (AF) function on and off turns the RDS on and off.

Pressing switches the function between on and off.
Traffic announcement (TA) button
TA standby function allows the system to stand by for traffic announcements in any mode. The last tuned station must be an RDS-capable traffic programme station.

To turn the function on: Press the TA button. When a traffic announcement begins on your last tuned station, the system automatically switches to the FM mode. TA-INFO appears on the display. The system returns to your last selected mode after the traffic announcement is finished.

If you want to go back to your last selected mode during the traffic announcement, press the TA button again.

To cancel the function: Press the TA button.
Features

**Programme type (PTY)/News interrupt function**

Allows the system to interrupt with a newscast in any mode. The last tuned station must be the NEWS PTY coded station.

**To activate the function:** Select **News** from **RDS settings** and display the NEWS PTY before changing to other modes. When a newscast begins on your last tuned station, the system automatically switches to the FM mode.

  - **Selecting the RDS functions** P. 259

The system returns to your last selected mode if changed to another programme, or signal gets weak.

**PTY alarm**

The PTY code, **ALARM** is used for emergency announcements, such as natural disasters. When this code is received, **ALARM** appears on the display and the system interrupts your audio operation.

Except AM/FM/DAB* mode

* Not available on all models
Radio text

1. Press the MENU/CLOCK button with the FM selected.
2. Rotate the knob to select Radio text and press the

The TEXT indicator appears on the display indicating radio text information.

Audio System Basic Operation

⇒⇒ Playing DAB (Digital Audio Broadcasting)*

■ DAB Settings

■ DAB-Link:
Automatically searches for the same station from Ensembles, and switches to it.

■ FM-Link:
If the system finds the same station from an FM band, it automatically switches the band.

■ Band select:
You can select specific bands. This can reduces the time to update the lists, and search for a station.

■ Radio Text

1. Press the MENU/CLOCK button with the DAB selected.
2. Rotate to select Radio text and press .

The TEXT indicator appears on the display indicating radio text information.
■ Scan

Samples each of the strongest stations on the selected band for 10 seconds.

1. Press the **MENU/CLOCK** button.
2. Rotate  to select **Scan**, then press  .

To turn off scan, press  .
Playing a CD

Your audio system supports audio CDs, CD-Rs, and CD-RWs in either MP3 or WMA, or AAC*1 format. With the CD loaded, press the CD/AUX button.

*1: Only AAC format files recorded with iTunes are playable on this unit.
How to Select a File from a Folder with the Selector Knob (MP3/WMA/AAC)

1. Press \( \Rightarrow \) to switch the display to a folder list.

2. Rotate \( \Rightarrow \) to select a folder.

3. Press \( \Rightarrow \) to display a list of tracks in that folder.

4. Rotate \( \Rightarrow \) to select a track, then press \( \Rightarrow \).

Playing a CD

**NOTICE**
Do not use CDs with adhesive labels. The label can cause the CD to jam in the unit.

WMA files protected by digital rights management (DRM) cannot be played. The audio system displays Unplayable file, then skips to the next file.

Text data appears on the display under the following circumstances:

- When you select a new folder, file, or track.
- When you change the audio mode to CD.
- When you insert a CD.

If you eject the CD but do not remove it from the slot, the system reloads the CD automatically after several seconds.
Audio System Basic Operation

Playing a CD

Features

You can select repeat, random, and scan modes when playing a track or file. Available mode icons appear above the play mode buttons. Press the button corresponding to the mode you want to select.

■ To turn off a play mode
Press the selected button.

How to Select a Play Mode

Play mode menu items

Repeat
- Repeat one folder (MP3/WMA/AAC): Repeats all files in the current folder.
- Repeat one track: Repeats the current track/file.

Random
- Random in folder (MP3/WMA/AAC): Plays all files in the current folder in random order.
- Random all: Plays all tracks/files in random order.

Scan
- Scan folders (MP3/WMA/AAC): Provides 10-second sampling of the first file in each of the main folders.
- Scan tracks: Provides 10-second sampling of all tracks on the CD (all files in the current folder in MP3, WMA, or AAC).

You can also select a play mode by pressing the MENU/CLOCK button.

Rotate to select Play mode, then press .

Rotate to select a mode, then press .

To turn it off, rotate to select Normal play, then press .
Playing an iPod

Connect the iPod using your dock connector to the USB port, then press the CD/AUX button.

USB Port(s) P. 243
How to Select a Song from the iPod Music List with the Selector Knob

1. Press to display the iPod music list.

2. Rotate to select a category.

3. Press to display a list of items in the category.

4. Rotate to select an item, then press.

   Press and rotate repeatedly until a desired item you want to listen is displayed.

- Random all: Plays all files in random order.

Scan

- Scan folders: Provides 10-second sampling of the first file in each of the main folders.
- Scan tracks: Provides 10-second sampling of all files in the current folder.

You can also select a play mode by pressing the MENU/CLOCK button. Rotate to select Play mode, then press . Rotate to select a mode, then press . To turn it off, rotate to select Normal play, then press .
Playing Bluetooth® Audio

Your audio system allows you to listen to music from your Bluetooth-compatible phone.
This function is available when the phone is paired and connected to the vehicle’s Hands-Free Telephone (HFT) system.

Phone Setup P. 367

Not all Bluetooth-enabled phones with streaming audio capabilities are compatible with the system. To check if your phone is compatible, ask a dealer.

It may be illegal to perform some data device functions while driving.

Only one phone can be used with HFT at a time. When there are more than two paired phones in the vehicle, the first paired phone the system finds is automatically connected.

If more than one phone is paired to the HFT system, there will be a delay before the system begins to play.

In some cases, the name of the artist, album, or track may not appear correctly.

Some functions may not be available on some devices.
Audio System Basic Operation

Playing Bluetooth® Audio

To Play Bluetooth® Audio Files

1. Make sure that your phone is paired and connected to the system.
2. Press the CD/AUX button until the Bluetooth Audio Source is selected.

If the phone is not recognized, another HFT-compatible phone, which is not compatible for Bluetooth® Audio, may already be connected.

■ To pause or resume a file
Press the play or pause button to select a mode.

To Play Bluetooth® Audio Files

To play the audio files, you may need to operate your phone. If so, follow the phone maker’s operating instructions.

The pause function may not be available on some phones.

If any audio device is connected to the auxiliary input jack or USB port, you may need to press the CD/AUX button repeatedly to select the Bluetooth® Audio system.

Switching to another mode pauses the music playing from your phone.
How to Select a Song from the Music Search List with the Selector Knob

1. Press 📌 to display the music search list.

2. Rotate 📌 to select a category.
3. Press 📌 to display a list of items in the category.
4. Rotate 📌 to select an item, then press 📌.

Press 📌 and rotate 📌 repeatedly until a desired item you want to listen is displayed.

Depending on the Bluetooth® device you connect, some or all of the categories may not be displayed.
Audio System Basic Operation

You can use the audio system for 30 minutes when the ignition switch is in LOCK (0) position, the system will then turn off automatically. If you want to keep using it, we recommend that you turn the ignition switch to ACCESSORY (q) or ON (w) position.

(Home) Icon: Select to go to the home screen.

(Back) Icon: Select to go back to the previous display when it is displayed.

Button:
Press to change the audio/information screen brightness. Press  once and select  or  to make an adjustment.
Each time you press , the mode switches among the daytime mode, nighttime mode and off mode.

1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Audio/Information Screen

Displays the audio status and wallpaper. From this display, you can go to various setup options.

Switching the Display

Select the icon to go to the home screen.

Select Phone, Info, Audio, Settings, or Navigation.

Phone
Displays the HFT information.

Displays the navigation screen.
### Changing the Home Screen Icon Layout

1. Select the [ ] icon.
2. Select Settings.
3. Select System.
4. Select the HOME tab.
5. Select Home icon position.
6. Select and hold the icon then, drag it to the desired position.
Audio System Basic Operation

Audio/Information Screen

You can change, store, and delete the wallpaper on the audio/information screen.

■ Import wallpaper
You can import up to five images, one at a time, for wallpaper from a USB flash drive.

1. Connect the USB flash drive to the USB port.
   ■ USB Port(s) P. 243
2. Select Settings.
3. Select Info.
4. Select Clock/Wallpaper Type, then open the Wallpaper tab.
5. Select Add New.
   ► The picture name is displayed on the list.
6. Select a desired picture.
   ► The preview is displayed on the left side on the screen.
7. Select Start Import to save the data.
   ► The display will return to the wallpaper list.

■ Wallpaper Setup

• When importing wallpaper files, the image must be in the USB flash drive's root directory.
• Images in a folder cannot be imported.
• The file name must be fewer than 64 characters.
• The file format of the image that can be imported is BMP (bmp) or JPEG (jpg).
• The individual file size limit is 5 MB.
• The maximum image size is 4,096 x 4,096 pixels. If the image size is less than 800 x 480 pixels, the image is displayed in the middle of the screen with the extra area appearing in black.
• If the USB flash drive does not have any pictures, the No files detected message appears.
■ Select wallpaper
1. Select Settings.
2. Select Info.
3. Select Clock/Wallpaper Type, then open the Wallpaper tab.
   - The screen changes to the wallpaper list.
4. Select a desired wallpaper.
   - The preview is displayed on the left side on the screen.
   - The pop-up menu appears on the screen.
5. Select Set.
   - The display will return to the wallpaper list.

■ Delete wallpaper
1. Select Settings.
2. Select Info.
3. Select Clock/Wallpaper Type, then open the Wallpaper tab.
   - The screen changes to the wallpaper list.
4. Select a wallpaper that you want to delete.
   - The preview is displayed on the left side on the screen.
   - The pop-up menu appears on the screen.
5. Select Delete.
   - A confirmation message appears on the screen.
6. Select Yes to delete completely.
   - The display will return to the wallpaper list.

Wallpaper Setup
From the pop-up menu, select Preview to see a preview at full-size screen.

To go back to the previous screen, select OK, or select the (Back) icon.

When the file size is large, it takes a while to be previewed.

To delete all wallpapers you add, select Delete All, then Yes.
■ To change to a next screen

Selecting  or , or swiping the screen left or right changes to the next screen.

Home Screen

The home screen has 5 pages (fixed). You cannot add any more pages.
To use apps or widgets

2. Select the app or widget you want to use.

Preinstall app list:
- **Aha Radio**: Starts up Aha Radio app.
- **Browser**: Displays the web browser utilized by smartphone and Wi-Fi connection.
- **Calculator**: Displays Calculator.
- **Calendar**: Displays Calendar.
- **Clock**: Displays Clock.
- **Downloads**: Displays the data downloaded from the web browser and so on.
- **Gallery**: Displays the image list stored in the audio system.
- **Garmin Navigator**: Starts up navigation app.
- **Honda App Center**: Displays Honda App Center.
- **Install App**: Installs and updates app stored in the USB flash drive. However, you can install and update app only through Honda App Center.
- **Music**: Displays the music list stored in the audio system.
- **Search**: Displays various retrieval screens.
- **Settings**: Displays the Android setting screen.

To use apps or widgets

Select and hold a selected app or widget to add that app’s or widget’s shortcut on the home screen.

If preinstall apps do not startup normally, try **Factory Data Reset**. In case those apps still do not startup normally even after **Factory Data Reset**, contact your dealer.

If you perform **Factory Data Reset**, it may reset all the settings to their factory default.

**Defaulting All the Settings** P. 360
To add app or widget icons on the home screen
App or widget icons can be added on the home screen.

1. Select and hold empty space on the home screen.
   - The pop-up menu appears on the screen.
2. Select Add App or Add Widget.
   - The Add App/Widget screen appears.
3. Select and hold an app or widget icon you want to add.
   - The screen switches to the customization screen.
4. Drag and drop the icon to where you want it to be.
5. Select OK.
   - The screen will return to the home screen.
To move icons on the home screen
You can change location on the home screen.

1. Select and hold an icon.
   ▶ The screen switches to the customization screen.
2. Drag and drop the icon to where you want it to be.
3. Select OK.
   ▶ The screen will return to the home screen.

You can also move the Phone, Info, Audio, Settings, and Navigation icons in the same manner.
■ To delete icons on the home screen
You can delete the icons on the home screen.

1. Select and hold an icon.
   ▶ The screen switches to the customization screen.
2. Drag and drop the icon you want to delete to the waste basket icon.
   ▶ The icon is deleted.
3. Select OK.
   ▶ The screen will return to the home screen.

You cannot delete the Phone, Info, Audio, Settings, and Navigation icons.

Apps or widgets will not be deleted by deleting the icon on the home screen.
To change a wallpaper of the home screen
You can change a wallpaper of the home screen.

1. Select and hold empty space on the home screen.
   ➤ The pop-up menu appears on the screen.
2. Select Select Wallpaper.
   ➤ The pop-up menu appears on the screen.
3. Select an app for selecting wallpapers.
4. Select the wallpaper you want to change.
5. Select Set wallpaper.
   ➤ The wallpaper is changed, then the screen will return to the home screen.
Status Area

Swipe the upper area of the screen.
► The status area appears.

Select an item to see the details.

Select  or swipe up the  icon to close the area.
Changing the Screen Interface

You can change the screen interface design.

1. Select the 🛠️ icon.
2. Select Settings.
3. Select System.
4. Select the Others tab.
5. Select Skin Change.
6. A confirmation message appears on the screen. Select Yes.

Changing the Screen Interface

You need to reboot the system after changing the interface design. Wait a few moments while the system is starting up.

You can change the wallpaper on the audio/information screen.

Wallpaper Setup P. 284

If you change the screen interface, some of the setting items will change.

Customized Features P. 345
## Closing Apps

You can close specific apps running in the background on the system.

1. Select and hold the icon.
2. Select the Active tab.
   - If you select the Active/History tab, you can close the apps that are currently running and delete the app activity history simultaneously.
3. Select an app you want to close.
4. Select Clear.
   - The display will return to the app list.

### Closing Apps

If you leave the apps used open in the background, some apps may stop operating properly next time using them. If this happens close unused apps.

To close all apps on the system, select Clear All, then Yes.

You cannot close Garmin Navigator.
Adjusting the Sound

1. Select the icon.
2. Select Settings.
3. Select Audio.
4. Select Sound.

Select a tab from the following choices: BASS, TREBLE, FADER, BALANCE, Speed Volume Compensation (SVC)

The SVC has four modes: Off, Low, Mid, and High. SVC adjusts the volume level based on the vehicle speed. As you go faster, audio volume increases. As you slow down, audio volume decreases.
Display Setup

You can change the brightness or colour theme of the audio/information screen.

### Changing the Screen Brightness

1. Select the icon.
2. Select Settings.
3. Select System.
4. Select the Display tab.
5. Select Display Settings.
6. Select the setting you want.
7. Select OK.

### Changing the Screen’s Colour Theme

1. Select the icon.
2. Select Settings.
3. Select System.
4. Select the Display tab.
5. Select Background Colour.
6. Select the setting you want and select it again.
   - A confirmation message appears on the screen. Select Yes to reboot the system.

Changing the Screen Brightness

You can change the Contrast and Black Level settings in the same manner.

Changing the Screen’s Colour Theme

Reboot may take a few minutes.
If you default the System settings when the colour theme is changed from its default colour, the system reboots.

Customized Features P. 345
Audio System Basic Operation
Display Setup

Selecting an Audio Source

Select the current source icon, then select an icon on the source list to switch the audio source.

Limitations for Manual Operation

Certain manual functions are disabled or inoperable while the vehicle is in motion. You cannot select a greyed-out option until the vehicle is stopped.

Selecting an Audio Source

If you startup preinstalled audio apps, is displayed on the upper left of the screen. These preinstalled apps cannot be displayed on the source select screen. You can startup those audio apps from App/Widget List.
Playing AM/FM Radio

- **(Power) Button**: Press to turn the audio system on and off.
- **VOL (Volume) Icons**: Select to adjust the volume.
- **(Menu) Icon**: Select to display the menu items.
- **(Back) Icon**: Select to go back to the previous display.
- **Tune Icons**: Select < or > to tune the radio frequency.
- **Audio/Information Screen**: Displays/hides the detailed information.
- **Seek Icons**: Select < or > to search up and down the selected band for a station with a strong signal.

*1: Some or all of the lists may not be displayed.
Audio System Basic Operation

Playing AM/FM Radio

■ Preset Memory

To store a station:
1. Tune to the selected station.
2. Select the icon.
3. Select Save Preset.
4. Select the preset number for the station you want to store.

■ Station List

Lists the strongest stations on the selected band.
1. Select the icon.
2. Select Station List.
3. Select the station.

■ Manual update
Updates your available station list at any time.
1. Select the icon.
2. Select Station List.
3. Select Update List.

Features

The ST indicator appears on the display indicating stereo FM broadcasts.
Stereo reproduction in AM is not available.

Switching the Audio Mode
Press the SOURCE button on the steering wheel or select SOURCE on the screen.

Audio Remote Controls P. 247
You can also switch the mode by selecting Change Source on the Audio menu screen.

You can store 12 AM stations and 12 FM stations into preset memory. AM has two types of frequencies LW and MW, and each lets you store six stations.
Scan

Samples each of the strongest stations on the selected band for 10 seconds.
1. Select the icon.
2. Select Scan.
   To turn off scan, select Cancel Scan.

Radio Data System (RDS)

Provides text data information related to your selected RDS-capable FM station.

To find an RDS station from Station List
1. Select the icon while listening to an FM station.
2. Select Station List.
3. Select the station.

Manual update

Updates your available station list at any time.
1. Select the icon while listening to an FM station.
2. Select Station List.
3. Select Update List.

Radio Data System (RDS)

When you select an RDS-capable FM station, the RDS automatically turns on, and the frequency display changes to the station name. However, when the signals of that station become weak, the display changes from the station name to the frequency.
Radio text
Displays the radio text information of the selected RDS station.
1. Select the icon.
2. Select Radio Text.

Scan
Samples each of the strongest stations on the selected band for 10 seconds.
1. Select the icon.
2. Select Scan.
To turn off scan, select Cancel Scan.
Playing DAB (Digital Audio Broadcasting)

- **(Power) Button**
  - Press to turn the audio system on and off.

- **(Menu) Icon**
  - Select to display the menu items.

- **(Back) Icon**
  - Select to go back to the previous display.

- **Ensemble Icons**
  - Select or to tune the frequency.

- **Open/Close Icon**
  - Displays/hides the detailed information.

- **Service Icons**
  - Select or to search up and down the selected band for a station with a strong signal.

- **VOL (Volume) Icons**
  - Select to adjust the volume.

- **Audio/Information Screen**
  - Displays the current DAB information.

*1: Some or all of the lists may not be displayed.
Preset Memory
Stores a station:
1. Tune to the selected station.
2. Select the icon.
3. Select **Save Preset**.
4. Select the preset number for the station you want to store.

Ensemble List
Lists the strongest stations.
1. Select the icon.
2. Select **Ensemble List**.
3. Select the station.

Manual update
Updates your available station list at any time.
1. Select the icon.
2. Select **Ensemble List**.
3. Select **Update List**.

Scan
Samples each of the strongest stations on the selected band for 10 seconds.
1. Select the icon.
2. Select **Scan**.
3. Select **Scan Ensemble** or **Scan Service**.
To turn off scan, select **Cancel Scan**.
■ Radio text
Displays the radio text information of the selected DAB station.
1. Select the icon.
2. Select Radio Text.
Playing a CD

Playing a CD

Your audio system supports audio CDs, CD-Rs, and CD-RWs in either MP3 or WMA, or AAC*1 format. With the CD loaded, select the CD mode.

*1: Only AAC format files recorded with iTunes are playable on this unit.

*2: Some or all of the lists may not be displayed.
How to Select a File from the Music Search List (MP3/WMA/AAC)

1. Select the [Music] icon and select **Music Search**.

2. Select a folder.

3. Select a track.

NOTICE
Do not use CDs with adhesive labels. The label can cause the CD to jam in the unit.

WMA files protected by digital rights management (DRM) cannot be played. The audio system displays **Unplayable File**, then skips to the next file.

Text data appears on the display under the following circumstances:
- When you select a new folder, file, or track.
- When you change the audio mode to CD.
- When you insert a CD.

If you eject the CD but do not remove it from the slot, the system reloads the CD automatically after several seconds.
How to Select a Play Mode

You can select scan, repeat, and random modes when playing a track or file.

1. Select the icon.
2. Select Scan or Random/Repeat.
3. Select a mode.

To turn off a play mode

1. Select the icon.
2. Select the mode you want to turn off.

Play Mode Menu Items

Scan
Scan Folders (MP3/WMA/AAC): Provides 10-second sampling of the first file in each of the main folders.
Scan Tracks: Provides 10-second sampling of all tracks on the CD (all files in the current folder in MP3, WMA, or AAC).

Random/Repeat
Repeat Folder (MP3/WMA/AAC): Repeats all files in the current folder.
Repeat Track: Repeats the current track/file.
Random in Folder (MP3/WMA/AAC): Plays all files in the current folder in random order.
Random All Tracks: Plays all tracks/files in random order.
Playing an iPod

Connect the iPod using your USB connector to the USB port, then select the iPod mode.

* USB Port(s) P. 243

- (Power) Button
  Press to turn the audio system on and off.

Playing Bluetooth® Audio

Your audio system allows you to listen to music from your Bluetooth-compatible phone. This function is available when the phone is paired and connected to the vehicle’s Hands-Free Telephone (HFT) System.

Phone Setup P. 388

- Press to turn the audio system on and off.
- Select to adjust the volume.
- Select to display the menu items.
- Select to go back to the previous display.
- Select to play.
- Select to pause.
- Select or to change group.
- Select or to change tracks.
- Displays/hides the detailed information.
- Appears when your phone is connected to HFT.

Not all Bluetooth-enabled phones with streaming audio capabilities are compatible. To check if your phone is compatible, ask a dealer.

It may be illegal to perform some data device functions while driving.

Only one phone can be used with HFT at a time. When there are more than two paired phones in the vehicle, the first paired phone the system finds is automatically connected.

If more than one phone is paired to the HFT system, there may be a delay before the system begins to play.

In some cases, the name of the artist, album, or track may not appear correctly.

Some functions may not be available on some devices.

*1: Depending on the Bluetooth® device you connect, some or all of the lists may not be displayed.
Audio System Basic Operation

To Play Bluetooth® Audio Files

1. Make sure that your phone is paired and connected to the system.
   - Phone Setup P. 388
2. Select the Bluetooth® Audio mode.

If the phone is not recognised, another HFT-compatible phone, which is not compatible for Bluetooth® Audio, may already be connected.

To pause or resume a file
Select the play icon or pause icon.

Searching for Music

1. Select the icon.
2. Select Music Search.
3. Select a search category (e.g., Albums).
4. Select an item.
   - The selection begins playing.

To play the audio files, you may need to operate your phone. If so, follow the phone maker’s operating instructions.

Switching to another mode pauses the music playing from your phone.

You can change the connected phone in the Bluetooth Device List on the Audio settings screen by the following procedure.
1. Select icon.
2. Select Settings

Depending on the Bluetooth® device you connect, some or all of the lists may not be displayed.
Playing a Video Using the HDMI™

Your audio system allows you to play videos from an HDMI-compatible device. Connect the device, using an HDMI™ cable, then select the HDMI™ mode.

* HDMI™ Port* P. 244

* *Not available on all models*
Audio System Basic Operation

Playing a Video Using the HDMI™

1. Select the icon.
2. Select Settings.
3. Select Audio.
4. Select Aspect Adjustment.
5. Select the setting you want.
6. Select OK.

This feature is limited while driving. To play videos, stop your vehicle and apply the parking brake.
On Board Apps

Honda Connect has the capability of On Board Apps which may be created by Honda or by 3rd parties. Apps may be already installed or can be downloaded through Honda App Center. Some apps require internet access which can be established by Wi-Fi connection.

   - Wait until an arrow appears on the home screen.
4. Select the arrow to display the available smartphone apps on the audio/information screen.
   - You may need to operate from the phone.
5. Select an app you want to operate from the audio/information screen.
   - To go back to the previous screen, select the icon.

Connecting Your iPhone

Make sure to plug in the digital AV adapter to the HDMI™ jack first. If not, smartphone connection may not work properly.

To recharge your phone, connect it to the USB jack, too.

Contact a dealer for the digital AV adapter or HDMI™ cable purchasing information.
Connecting Your Smartphone

1. Connect your phone to the audio system via Bluetooth®.
   - Phone Setup P. 388
2. Plug in your phone to the USB jack.
   - You may need to operate from the phone.
   - Wait until an arrow appears on the home screen.
3. Select the arrow to display the available smartphone apps on the audio/information screen.
4. Select an app you want to operate from the audio/information screen.
   - To go back to the previous screen, select the icon.

Connecting Your Smartphone

The phone is rechargeable while being connected to the USB jack. However, if the phone is overloaded with many operational tasks, the battery level may get lowered.
Wi-Fi Connection

You can connect the display audio system to the Internet using Wi-Fi and browse websites or use online services on the audio/information screen. If your phone has wireless hotspot capabilities, the system can be tethered to the phone. Use the following steps to setup.

1. Select the icon.
2. Select Settings.
3. Select Bluetooth / Wi-Fi.
4. Select the Wi-Fi tab.
5. Select Wi-Fi On/Off Status, then On.
6. Select Wi-Fi Device List.
   ▶ Make sure your phone’s Wi-Fi setting is in access point (tethering) mode.
   ▶ Select the phone you want to connect to the system.
   ▶ If you do not find the phone you want to connect in the list, select Scan.

Wi-Fi mode (setting for the first time)

You cannot go through the setting procedure while a vehicle is moving. Park in a safe place to set the audio system in Wi-Fi mode.

Some cell phone carriers charge for tethering and smartphone data use. Check your phone’s data subscription package.

Check your phone manual to find out if the phone has Wi-Fi connectivity.

You can confirm whether Wi-Fi connection is on or off with the icon on Wi-Fi Device list. Transmission speed and others will not be displayed on this screen.
7. Select **Connect**.
   - Enter a password for your phone, and select **Done**.
   - If you cannot enter the password on the displayed keyboard, change the keyboard to the one in which you can enter from the Android setting.
   - **Customized Features** P. 345
   - When the connection is successful, the **Wi-Fi** icon is displayed on the list.

8. Select the **Wi-Fi** icon to go back to the home screen.

**Wi-Fi mode (after the initial setting has been made)**

Make sure your phone's Wi-Fi setting is in access point (tethering) mode.

**Wi-Fi mode (setting for the first time)**

If you cannot enter the password on the displayed keyboard, change the keyboard to the one in which you can enter from the following order:

Settings → Android → Language & input → select **next to Android keyboard** → input language → uncheck the box next to **Use system language** → select the keyboard languages that you can enter.

**Wi-Fi mode (after the initial setting has been made)**

**iPhone users**

You may need to go through an initial setup for Wi-Fi connection again after you boot your phone.
Siri Eyes Free

You can talk to Siri using the (Talk) button on the steering wheel when your iPhone is paired to the Hands-Free Telephone (HFT) System.

Phone Setup P. 388

Using Siri Eyes Free

(Talk) Button
Press and hold until the display changes as shown.

(Hang-up/back) Button
Press to deactivate Siri.

Appears when Siri is activated in Siri Eyes Free

While in Siri Eyes Free:
The display remains the same. No feedback or commands appears.

Siri Eyes Free

Siri is a trademark of Apple Inc.

Check Apple Inc. website for features available for Siri.

We recommend against using Siri other than in Siri Eyes Free while operating a vehicle.

Using Siri Eyes Free

Some commands work only on specific phone features or apps.
## Audio Error Messages

*2: Display audio system

---

*Check that the disc is not damaged or deformed.

Protecting CDs P. 331

Do not try to force the disc out of the player.

---

*Press the (eject) button and remove the disc, and check that the error message is cleared.

Check that the disc is not damaged or deformed, and insert the disc again.

If the error message reappears, press the button, and pull out the disc.

If the new disc plays, there is a problem with the first disc.

If the error message repeats, or the disc cannot be removed, contact a dealer.

Do not try to force the disc out of the player.

---

*Pressing the button will remove the disc.

Do not try to force the disc out of the player.

---

*Check that the disc is not damaged or deformed.

Protecting CDs P. 331

Turn the audio system off and allow the player to cool down until the error message is cleared.
### iPod/USB Flash Drive

If an error occurs while playing an iPod or USB flash drive, you may see the following error messages. If you cannot clear the error message, contact a dealer.

<table>
<thead>
<tr>
<th>Error Message</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>USB error*1</td>
<td>Appears when there is a problem with the USB adapter unit. Check if the device is compatible with the USB adapter unit.</td>
</tr>
<tr>
<td>USB Error*2</td>
<td></td>
</tr>
<tr>
<td>Incompatible USB device*1</td>
<td>Appears when an incompatible device is connected. Disconnect the device. Then turn the audio system off, and turn it on again. Do not reconnect the device that caused the error.</td>
</tr>
<tr>
<td>Incompatible USB Device Please Check Owner's Manual*2</td>
<td></td>
</tr>
<tr>
<td>Unsupported version*1</td>
<td>Appears when an unsupported iPod is connected. If it appears when a supported iPod is connected, update the iPod software to the newer version.</td>
</tr>
<tr>
<td>Unsupported Version*2</td>
<td></td>
</tr>
<tr>
<td>Retry connection*1</td>
<td>Appears when the system does not acknowledge the iPod. Reconnect the iPod.</td>
</tr>
<tr>
<td>Connect Retry*2</td>
<td></td>
</tr>
<tr>
<td>Unplayable file*1</td>
<td>Appears when the files in the USB flash drive are DRM or an unsupported format. This error message appears for about three seconds, then plays the next song.</td>
</tr>
<tr>
<td>Unplayable File*2</td>

## Android/Apps

If an error occurs while using the audio system or apps, you may see the following error messages. If you cannot clear the error message, contact a dealer.

<table>
<thead>
<tr>
<th>Error Message</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unfortunately, **** has stopped.*1</td>
<td>Error has occurred within app, select <strong>OK</strong> on the screen to close the app. Unless it is a fatal error, it would return to normal if you startup the app. If it does not return to normal even after starting up the app, press and hold the [ power ] (power) button to perform the forced reset. If it still does not get back to normal, you need <strong>Factory Data Reset</strong>. [ Defaulting All the Settings P. 360 ]</td>
</tr>
<tr>
<td>**** is not responding. Would you like to close it?*1</td>
<td>App is in a busy state. Select <strong>Wait</strong> if you can wait for a response from app a little longer. If it does not respond even if you keep waiting, select <strong>OK</strong> to close the app and start it up. When it does not return to normal, press and hold the [ power ] (power) button to perform the forced reset. You also need <strong>Factory Data Reset</strong>. [ Defaulting All the Settings P. 360 ]</td>
</tr>
</tbody>
</table>
| Security warning                                   | Occurs if you open the browser when the system date is older than the certificate date information. It also occurs when you are in the area where GPS reception is unavailable or GPS setting of the Android setting is turned off.  
• Turn on GPS setting of the Android setting.  
• Move to the area where GPS reception is available. [ Customized Features P. 345 ] |

*1:**** part is variable characters, and will change depending upon where an error occurs.
General Information on the Audio System

Recommended CDs

- Use only high-quality CD-R or CD-RW discs labelled for audio use.
- Use only CD-R or CD-RW discs on which the recordings are closed.
- Play only standard round-shaped CDs.

The CD packages or jackets should have one of these marks.

<table>
<thead>

<td>Recordable</td>
</tr>
</tbody>
</table>

CDs with MP3, WMA, or AAC files

- Some software files may not allow for audio play or text data display.
- Some versions of MP3, WMA, or AAC formats may be unsupported.

A Dual-disc cannot play on this audio unit. If recorded under certain conditions, a CD-R or CD-RW may not play either.
### Protecting CDs

Follow these precautions when handling or storing CDs:
- Store a CD in its case when it is not being played.
- When wiping a CD, use a soft clean cloth from the centre to the outside edge.
- Handle a CD by its edge. Never touch either surface.
- Never insert foreign objects into the CD player.
- Keep CDs out of direct sunlight and extreme heat.
- Do not place stabilizer rings or labels on the CD.
- Avoid fingerprints, liquids, and felt-tip pens on the CD.

**NOTICE**

Do not insert a damaged CD. It may be stuck inside and damage the audio unit.

Examples:
- Bubbled, wrinkled, labelled, and excessively thick CDs
- Damaged CDs
- Poor quality CDs
- Small CDs
- Chipped, cracked CDs
- Warped CDs
- Burrs CDs
- 8-cm (3-inch) CDs
Compatible iPod, iPhone, and USB Flash Drives

Customized Features

Models with display audio system
Use the audio/information screen to customize certain features.

■ How to customize
With the ignition switch in ON [II]*1, select Settings, then select a setting item.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

When you customize settings:
• Make sure that the vehicle is at a complete stop.

Continuously variable transmission models
• Shift to [P].

Manual transmission models
• Set the parking brake.

To customize other features, select Settings.

List of customizable options P. 350

If you press and hold the [power] button when resetting the system, it may restore the customized value to its default value depending on the setting items.
### Customization flow

Select the icon.

Select Settings.

*1: Does not appear when you change the screen interface design.

*2: Appears only when you change the screen interface design.

Defaulting All the Settings

Reset all the menu and customized settings as the factory defaults.

1. Select the \[\text{\textbullet}\] icon.
2. Select \textit{Settings}.
3. Select \textit{System}.
4. Select the \textit{Others} tab.
5. Select \textit{Factory Data Reset}.
   - A confirmation message appears on the screen.
6. Select \textit{Yes} to reset the settings.
7. Select \textit{Yes} again to reset the settings.
   - A confirmation message appears on the screen. Select \textit{OK}.
   - After selecting \textit{OK}, the system will reboot.

When you transfer the vehicle to a third party, reset all settings to default and delete all personal data.

If you perform \textit{Factory Data Reset}, it will reset the preinstalled apps to their factory default.

- **(Hang-up) button**: Press to end a call.
- **(Phone) button**: Press to go directly to the Phone screen.
- **LIST/SELECT (Selector)**: Rotate to select an item on the screen, then press .

Models with colour audio system

The Hands-Free Telephone (HFT) System allows you to place and receive phone calls using your vehicle’s audio system, without handling your mobile phone.

To use HFT, you need a Bluetooth-compatible mobile phone. For a list of compatible phones, pairing procedures, and special feature capabilities, ask a dealer or your local Honda.

Voice control tips

- Aim the vents away from the ceiling and close the windows, as noise coming from them may interfere with the microphone.
- To change the volume level, use the audio system’s volume knob or the remote audio controls on the steering wheel.

If you receive a call while using the audio system, the system resumes its operation after ending the call.

Up to 20 speed dial entries can be stored. If there is no entry in the system, Speed Dial is disabled.

Speed Dial P. 374

Up to 20 call histories can be stored. If there is no call history, Call History is disabled.

Hands-Free Telephone System

Using HFT

HFT Status Display

The audio/information screen notifies you when there is an incoming call.

Limitations for Manual Operation

Certain manual functions are disabled or inoperative while the vehicle is in motion. You cannot select a greyed-out option until the vehicle is stopped.

Bluetooth® Wireless Technology

The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc., and any use of such marks by Honda Motor Co., Ltd., is under licence. Other trademarks and trade names are those of their respective owners.

HFT Limitations

An incoming call on HFT will interrupt the audio system when it is playing. It will resume when the call is ended.

See the following URLs for Declaration of conformity (DoC) of Hands Free Telephone:

http://www.ptc.panasonic.eu/

HFT Status Display

The information that appears on the audio/information screen varies between phone models.

You can change the system language.

HFT Menus

Features

To pair a mobile phone (No phone has been paired to the system)

1. Press the button or the button.
2. Rotate to select Yes, then press .
3. Make sure your phone is in search or discoverable mode, then press .
   - HFT automatically searches for a Bluetooth® device.
4. When your phone appears on the list, select it by pressing .
   - If your phone doesn’t appear, select Phone not found? and search for Bluetooth® devices using your phone.
   - From your phone, select Honda HFT.
5. The system gives you a pairing code on the audio/information screen.
   - Confirm if the pairing code on the screen and your phone match.
   - This may vary by phone.
6. A notification appears on the screen if pairing is successful.

Phone Setup

Your Bluetooth-compatible phone must be paired to the system before you can make and receive hands-free calls.

Phone Pairing Tips:
- You cannot pair your phone while the vehicle is moving.
- Up to six phones can be paired.
- Your phone’s battery may drain faster when it is connected to HFT.
- If your phone is not ready for pairing or not found by the system within three minutes, the system will time out and returns to idle.

Once you have paired a phone, you can see it displayed on the screen with one or two icons on the right side.

These icons indicate the following:
- : The phone can be used with HFT.
- : The phone is compatible with Bluetooth® Audio.
To Change the currently paired phone
1. Press the button or the button.
2. Rotate to select Phone setup, then press .
3. Rotate to select Bluetooth setup, then press .

4. Rotate to select Connect a phone, then press .
   - The screen changes to a device list.

5. Rotate to select a desired device name, then press .
   - The system disconnects the connected phone and starts searching for another paired phone.
To change the pairing code setting

1. Press the button or the button.
2. Rotate to select Phone setup, then press .
3. Rotate to select Bluetooth setup, then press .

4. Rotate to select Pass-key, then press .

5. Input a new pairing code, then press .

Continued
To delete a paired phone
1. Press the button or the button.
2. Rotate to select Phone setup, then press .
3. Rotate to select Bluetooth setup, then press .
4. Rotate to select Delete device, then press .
   - The screen changes to a device list.
5. Rotate to select a phone you want to delete, then press .
6. A confirmation message appears on the screen. Rotate to select Yes, then press .
### Ring Tone

You can change the ring tone setting.

1. Press the button or the button.
2. Rotate to select **Phone setup**, then press ⌘.
3. Rotate to select **Ringtone**, then press ⌘.
4. Rotate to select **Fixed** or **Mobile phone**, then press ⌘.

- **Ring Tone**
  - **Fixed**: The fixed ring tone sounds from the speakers.
  - **Mobile phone**: The ring tone stored in the connected mobile phone sounds from the speakers.

### Caller's ID Information

You can select a caller's information to be displayed when you have an incoming call.

1. Press the button or the button.
2. Rotate to select **Phone setup**, then press ⌘.
3. Rotate to select **Caller ID info**, then press ⌘.
4. Rotate to select a mode you want, then press ⌘.

- **Caller's ID Information**
  - **Name priority**: A caller's name is displayed if it is stored in the phonebook.
  - **Number priority**: A caller’s phone number is displayed.
To Clear the System

Pairing codes, paired phones, all speed dial entries, all call history data, and all imported phonebook data are erased.

1. Press the button or the button.
2. Rotate to select Phone setup, then press .
3. Rotate to select System clear, then press .
4. Rotate to select Yes, then press .
5. A confirmation message appears on the screen. Rotate to select Yes, then press .

■ Automatic Import of Mobile Phonebook and Call History

When your phone is paired, the contents of its phonebook and call history are automatically imported to the system.

When you select a person from the list in the mobile phonebook, you can see up to three category icons. The icons indicate what types of numbers are stored for that name.

If a name has four or more numbers, ... appears instead of category icons.

On some phones, it may not be possible to import the category icons to the system.

The phonebook is updated after every connection. Call history is updated after every connection or call.

### Speed Dial

Up to 20 speed dial numbers can be stored per phone.

To store a speed dial number:

1. Press the button or the button.
2. Rotate to select Speed dial, then press .
3. Rotate to select Add new, then press .
4. Rotate to select a place to choose a number from, then press .

From Call history:

- Select a number from the call history.

From Phonebook:

- Select a number from the connected mobile phone’s imported phonebook.

From Phone number:

- Input the number manually.

You can use the audio preset buttons during a call to store a speed dial number:

1. Press and hold the desired audio preset button during a call.
2. The contact information for the active call will be stored for the corresponding speed dial.
To edit a speed dial
1. Press the button or the button.
2. Rotate to select Phone setup, then press.
3. Rotate to select Speed dial, then press.
4. Select an existing speed dial entry.
5. Rotate to select Change speed dial, then press.
6. Select a new speed dial number, then press.

To delete a speed dial number
1. Press the button or the button.
2. Rotate to select Phone setup, then press.
3. Rotate to select Speed dial, then press.
4. Select an existing speed dial entry.
5. Rotate to select Delete speed dial, then press.

A confirmation message appears on the screen. Rotate to select Yes, then press.
Making a Call

You can make calls by inputting any phone number, or by using the imported phonebook, call history, speed dial entries, or redial.

Making a Call

The maximum range between your phone and vehicles is 10 metres (30 feet).

Once a call is connected, you can hear the voice of the person you are calling through the audio speakers.

Features

■ To make a call using the imported phonebook
When your phone is paired, the contents of its phonebook are automatically imported to the system.
1. Press the button or the button.
2. Rotate to select Phonebook, then press .
3. The phonebook is stored alphabetically. Rotate to select the initial, then press .
4. Rotate to select a name, then press .
5. Rotate to select a number, then press .
Dialing starts automatically.

■ To make a call using a phone number
1. Press the button or the button.
2. Rotate to select Dial, then press .
3. Rotate to select a number, then press .
4. Rotate to select then press .
Dialing starts automatically.

To make a call using the imported phonebook
This function is disabled while the vehicle is moving.

To make a call using a phone number
This function is disabled while the vehicle is moving.
To make a call using redial
1. Press the button or the button.
2. Rotate to select Redial, then press .
   ►Dialing starts automatically.

To make a call using the call history
Call history is stored by Dialed calls, Received calls, and Missed calls.
1. Press the button or the button.
2. Rotate to select Call history, then press .
3. Rotate to select Dialed calls, Received calls, or Missed calls, then press .
4. Rotate to select a number, then press .
   ►Dialing starts automatically.
To make a call using a speed dial entry

1. Press the ☑️ button or the ☑️ button.
2. Rotate ☑️ to select Speed dial, then press ☑️.
3. Rotate ☑️ to select a number, then press ☑️.
   ▶️ Dialing starts automatically.

On the Phone screen, the first six speed dials on the list can be directly selected by pressing the corresponding audio preset buttons (1-6).
When there is an incoming call, an audible notification sounds and the **Incoming call** screen appears.

Press the **Answer** button to answer the call. Press the **Ignore** button to decline or end the call.

---

**Call Waiting**

Press the **Answer** button to put the current call on hold to answer the incoming call. Press the **Answer** button again to return to the current call. Select **Ignore** to ignore the incoming call if you do not want to answer it. Press the **Hang Up** button if you want to hang up the current call.

You can select the icons on the audio/information screen instead of the **Answer** and **Ignore** buttons. Rotate **** to select the icon, then press ****.
Options During a Call

The following options are available during a call.

**Swap call:** Put the current call on hold to answer the incoming call.

**Mute:** Mute your voice.

**Transfer call:** Transfer a call from the system to your phone.

**Dial tones:** Send numbers during a call. This is useful when you call a menu-driven phone system.

1. To view the available options, press the button.
2. Rotate to select the option, then press.
   - The check box is checked when **Mute** is selected. Select **Mute** again to turn it off.

**Dial tones:** Available on some phones.
Hands-Free Telephone System

Features

Models with display audio system

The Hands-Free Telephone (HFT) System allows you to place and receive phone calls using your vehicle’s audio system, without handling your mobile phone.

Using HFT

HFT Buttons

- Hands-Free Telephone System
  Place your phone where you can get good reception.

  To use HFT, you need a Bluetooth-compatible mobile phone. For a list of compatible phones, pairing procedures, and special feature capabilities, ask a dealer or your local Honda.

  To use the system, the Bluetooth On/Off Status setting must be On.

  Customized Features
    P. 345

  Voice control tips
    • Aim the vents away from the ceiling and close the windows, as noise coming from them may interfere with the microphone.
    • Press the button when you want to call a number using a stored voice tag. Speak clearly and naturally after a beep.
    • If the microphone picks up voices other than yours, the command may be misinterpreted.
    • To change the volume level, select the audio system’s VOL (Volume) or use the remote audio controls on the steering wheel.

  Up to five speed dial entries can be displayed among a total of 20 that can be entered. If there is no entry in the system, Speed Dial is disabled.

  Speed Dial
    P. 394

  Up to five call histories can be displayed among a total of 20 that can be entered. If there is no call history, Call History is disabled.
Hands-Free Telephone System

**Using HFT**

**(Pick-up) button:** Press to go directly to the phone screen, or to answer an incoming call.

**(Hang-up/back) button:** Press to end a call, go back to the previous command, or cancel a command.

**(Talk) button:** Press to call a number with a stored voice tag.

**(Menu) button:** Press to display Speed Dial, Call History, or Redial on the phone screen.

**(Source) button:** Press to select an item displayed on the phone screen.

**SOURCE button:** Press to call a number listed in the selected item on the phone screen.

To go to the **Phone Menu** screen:

1. Select the icon.
2. Select **Phone** to switch the display to the phone screen.
3. Select the icon.

**Continued**
To pair a mobile phone (when there is no phone paired to the system)
1. Select Phone.
2. Select Yes.
3. Make sure your phone is search or discoverable mode, then select Continue. HFT automatically searches for a Bluetooth device.
4. Select your phone when it appears on the list.
   - If your phone does not appear, you can select Refresh to search again.
   - If your phone still does not appear, select Phone not Found and search for Bluetooth devices using your phone. From your phone, search for Honda HFT.
5. The system gives you a pairing code on the audio/information screen.
   - Confirm if the pairing code on the screen and your phone match. This may vary by phone.

Phone Setup

Phone Pairing Tips:
- You cannot pair your phone while the vehicle is moving.
- Up to six phones can be paired.
- Your phone's battery may drain faster when it is paired to the system.
- If your phone is not ready for pairing or not found by the system within three minutes, the system will time out and returns to idle.

Once you have paired a phone, you can see it displayed on the screen with one or two icons on the right side.
These icons indicate the following:
- The phone can be used with HFT.
- The phone is compatible with Bluetooth Audio.
Hands-Free Telephone System

HFT Menus

Features

To change the currently paired phone

1. Go to the phone settings screen.
   Phone settings screen P. 385
2. Select Connect Phone.
3. Select a phone to connect.
   HFT disconnects the connected phone and starts searching for another paired phone.

To change the pairing code setting

1. Select the icon.
2. Select Settings.
3. Select Bluetooth / Wi-Fi.
4. Select the Bluetooth tab.
5. Select Edit Pairing Code.
6. Select Random or Fixed.

If no other phones are found or paired when trying to switch to another phone, HFT will inform you that the original phone is connected again.

To pair other phones, select Add Bluetooth Device from the Connect Phone screen.

The default pairing code is 0000 until you change the setting.

To create your own, select Fixed, and delete the current code, then enter a new one.

For a randomly generated pairing code each time you pair a phone, select Random.

Continued
To edit an already-paired phone name
1. Go to the phone settings screen.
   - Phone settings screen P. 385
2. Select Bluetooth Device List.
3. Select a paired phone you want to edit.
4. Select Edit Device Name.
5. Edit the name and select OK.
To delete a paired phone
1. Go to the phone settings screen. 
   ![Phone settings screen](P. 385)
2. Select Bluetooth Device List.
3. Select a phone you want to delete.
4. Select Delete This Device.
5. A confirmation message appears on the screen. Select Yes.
Hands-Free Telephone System

HFT Menus

**Ring Tone**

You can change the ring tone setting.

1. Go to the phone settings screen. **Phone settings screen** P. 385
2. Select Ring Tone.
3. Select Fixed or Mobile phone.

- **Fixed**: The fixed ring tone sounds from the speakers.
- **Mobile phone**: For certain connected phones, the ring tone stored in the phone sounds from the speakers.

Speed Dial

Up to 20 speed dial numbers can be stored per phone.

To store a speed dial number:

1. Go to the Phone Menu screen.
   - Phone Menu screen P. 387
2. Select Speed Dial.
3. Select New Entry.
4. Select a place to choose a number.
   - From Import from Call History:
     - Select a number from the call history.
   - From Manual Input:
     - Input the number manually.
   - From Import from Phonebook:
     - Select a number from the connected mobile phone’s imported phonebook.
5. When the speed dial is successfully stored, you are asked to create a voice tag for the number. Select Yes or No.
6. Select Record to store a voice tag for the speed dial entry.
   - Using the button, follow the prompts to store a voice tag for the speed dial entry.

When a voice tag is stored, press the button to call the number using the voice tag. Say the voice tag name.
■ To add a voice tag to a stored speed dial number
1. Go to the phone settings screen.  
   ▶ Phone settings screen P. 385
2. Select Edit Speed Dial.
3. Select an existing speed dial entry.  
   ▶ From the pop-up menu, select Edit.
4. Select Voice Tag.  
   ▶ From the pop-up menu, select Record.
5. Select Record to store the voice tag.
6. Using the button, follow the prompts to complete the voice tag.

■ To delete a voice tag
1. Go to the phone settings screen.  
   ▶ Phone settings screen P. 385
2. Select Edit Speed Dial.
3. Select an existing speed dial entry.  
   ▶ From the pop-up menu, select Edit.
4. Select Voice Tag.  
   ▶ From the pop-up menu, select Clear.
5. A confirmation message appears on the screen. Select Yes.

Speed Dial
Avoid using duplicate voice tags.
Avoid using “home” as a voice tag.
It is easier for the system to recognise a longer name.
For example, use “John Smith” instead of “John.”

Avoid using duplicate voice tags.
Avoid using “home” as a voice tag.
It is easier for the system to recognise a longer name.

   - From the pop-up menu, select Delete.
4. A confirmation message appears on the screen. Select Yes.

Making a Call

You can make calls by inputting any phone number, or by using the imported phonebook, call history, speed dial entries, or redial.

Making a Call

Any voice-tagged speed dial entry can be dialed by voice from most screens.
Press the button and say the voice tag name.

Once a call is connected, you can hear the voice of the person you are calling through the audio speakers.
To make a call using the imported phonebook

1. Go to the Phone Menu screen.  
   Phone Menu screen P. 387
2. Select Phonebook.
3. Select a name.
   - You can also search by letter. Select Search.
   - Use the keyboard on the touch screen for entering letters.
4. Select a number.
   - Dialing starts automatically.

To make a call using a phone number

1. Go to the Phone Menu screen.  
   Phone Menu screen P. 387
2. Select Dial.
3. Select a number.
   - Use the keyboard on the touch screen for entering numbers.
4. Select Done.
   - Dialing starts automatically.
To make a call using redial
1. Go to the Phone Menu screen.
   - Phone Menu screen P. 387
2. Select Redial.
   ▶ Dialing starts automatically.

To make a call using the Call History
Call history is stored by All, Dialed, Received, and Missed.
1. Go to the Phone Menu screen.
   - Phone Menu screen P. 387
2. Select Call History.
3. Select All, Dialed, Received, or Missed.
4. Select a number.
   ▶ Dialing starts automatically.

To make a call using a Speed Dial entry
1. Go to the Phone Menu screen.
   - Phone Menu screen P. 387
2. Select Speed Dial.
3. Select a number.
   ▶ Dialing starts automatically.

To make a call using redial
Press and hold the button to redial the last number dialed.

To make a call using the Call History
The call history displays the last 20 all, dialed, received, or missed calls.
(Appears only when a phone is connected to the system.)

To make a call using a Speed Dial entry
When a voice tag is stored, press the button to call the number using the voice tag.
- Speed Dial P. 394

Any voice-tagged speed dial entry can be dialed by voice from any screen.
Press the button and follow the prompts.
Receiving a Call

When there is an incoming call, an audible notification sounds (if activated) and the Incoming call screen appears.

Press the button to answer the call. Press the button to decline or end the call.

Options During a Call

The following options are available during a call.

- **Mute**: Mute your voice.
- **Transfer**: Transfer a call from the system to your phone.
- **Touch Tones**: Send numbers during a call. This is useful when you call a menu-driven phone system.

The available options are shown on the lower half of the screen.

Select the option.

- The mute icon appears when Mute is selected. Select Mute again to turn it off.

Call Waiting

Press the button to put the current call on hold to answer the incoming call. Press the button again to return to the current call. Select Ignore to ignore the incoming call if you do not want to answer it. Press the button if you want to hang up the current call.

You can select the icons on the audio/information screen instead of the and buttons.

Touch Tones: Available on some phones.

You can select the icons on the audio/information screen.

Before Driving

Driving Preparation

Check the following items before you start driving.

- **Exterior Checks**
  - Make sure there are no obstructions on the windows, door mirrors, exterior lights, or other parts of the vehicle.
    - Remove any frost, snow, or ice.
    - Remove any snow on the roof, as this can slip down and obstruct your field of vision while driving. If frozen solid, remove ice once it has softened.
    - When removing ice from around the wheels, be sure not to damage the wheel or wheel components.
  - Make sure the bonnet is securely closed.
    - If the bonnet opens while driving, your front view will be blocked.
  - Make sure the tyres are in good condition.
    - Check air pressures, and check for damage and excessive wear.
  - Make sure there are no people or objects behind or around the vehicle.
    - There are blind spots from the inside.

**NOTICE**
When doors are frozen shut, use warm water around the door edges to melt any ice. Do not try to force them open, as this can damage the rubber trim around the doors. When done, wipe dry to avoid further freezing.

Do not pour warm water into the key cylinder. You will be unable to insert the key if the water freezes in the hole.

Heat from the engine and exhaust can ignite flammable materials left under the bonnet, causing a fire. If you've parked your vehicle for an extended period, inspect and remove any debris that may have collected, such as dried grass and leaves that have fallen or have been carried in for use as a nest by a small animal. Also check under the bonnet for leftover flammable materials after you or someone else has performed maintenance on your vehicle.
Before Driving
Driving Preparation

Interior Checks

- Store or secure all items on board properly.
  - Carrying too much luggage, or improperly storing it, can affect your vehicle’s handling, stability, stopping distance, and tyres, and make it unsafe.
  - **Load Limit** P. 405

- Do not pile items higher than the seat height.
  - They can block your view and may be thrown forward in the event of sudden braking.

- Do not place anything in the front seat footwells. Make sure to secure the floor mat*.
  - An object or unsecured floor mat can interfere with your brake and accelerator pedal operation while driving.

- If you have any animals on board, do not let them move around in the vehicle.
  - They may interfere with driving and a crash could occur.

- Securely close all doors and the tailgate.

- Adjust your seating position properly.
  - Adjust the head restraint, too.
  - **Adjusting the Seats** P. 206
  - **Adjusting the Front Head Restraint Positions** P. 213

- Adjust the mirrors and steering wheel properly for your driving.
  - Adjust them while sitting in the proper driving position.
  - **Adjusting the Mirrors** P. 203
  - **Adjusting the Steering Wheel** P. 202

* Not available on all models

Interior Checks

The headlight aim is set by the factory, and does not need to be adjusted. However, if you regularly carry heavy items in the luggage area or tow a trailer, have the aiming readjusted at a dealer or by a qualified technician.

Your vehicle is equipped with the automatic headlight adjusting system that automatically adjusts the vehicle angle of the headlights.
Before Driving

Driving Preparation

- Be sure items placed on the floor behind the front seats cannot roll under the seats.
  - They can interfere with the driver's ability to operate the pedals, or the operation of the seats.

- Everyone in the vehicle must fasten their seat belt.
  - Fastening a Seat Belt P. 46

- Make sure that the indicators in the instrument panel come on when you start the vehicle, and go off soon after.
  - Always have a dealer check the vehicle if a problem is indicated.
    - Indicators P. 92
Load Limit

When you load luggage, the total weight of the vehicle, all passengers, and luggage must not exceed the maximum permissible weight.

Specifications P. 654, 657, 660

The load for the front and rear axles also must not exceed the maximum permissible axle weight.

Specifications P. 654, 657, 660

WARNING

Overloading or improper loading can affect handling and stability and cause a crash in which you can be hurt or killed.

Follow all load limits and other loading guidelines in this manual.
Towing a Trailer

Towing Preparation

**Towing Load Limits**

Your vehicle can tow a trailer if you carefully observe the load limits, use the proper equipment, and follow the towing guidelines. Check the load limits before driving.

- **Total trailer weight**

  Do not exceed the maximum towing weight of the trailer and towbar (with/without brakes), luggage and everything in or on it.

  Towing loads in excess of the maximum towing weight can seriously affect vehicle handling and performance and can damage the engine and drivetrain.

**WARNING**

Exceeding any load limit or improperly loading your vehicle and trailer can cause a crash in which you can be seriously hurt or killed.

Check the loading of your vehicle and trailer carefully before starting to drive.

- Check if all loads are within limits at a public scale. If a public scale is not available, add the estimated weight of your luggage load to the weight of your trailer (as quoted by the manufacturer), and the trailer nose load.

  **Break-in Period**
  
  Avoid towing a trailer during your vehicle's first 1,000 km (625 miles).

  If you tow a trailer in mountainous conditions, remember to reduce 10% of the combined vehicle and trailer weights from the maximum towing weight for every 1,000 metres of elevation.

  Never exceed the maximum towing weight and specified load limit.

  **Specifications** P. 656, 659, 662
■ Trailer nose load

The trailer nose load should never exceed 70 kg (154 lbs). This is the amount of weight the trailer puts on the towbar when it is fully-loaded. As a rule of thumb for trailer weights of less than 700 kg (1,543 lbs), the trailer nose load should be 10 percent of the total trailer package.

- Excessive trailer nose load reduces front tyre traction and steering control. Too little trailer nose load can make the trailer unstable and cause it to sway.
- To achieve a proper trailer nose load, start by loading 60% of the load towards the front of the trailer and 40% towards the rear. Readjust the load as needed.
Towing Equipment and Accessories

Towing equipment varies by the size of your trailer, how much load you are towing, and where you are towing.

- **Towbars**
  The towbar must be of an approved type and properly bolted to the underbody.

- **Safety chains**
  Always use safety chains when you tow a trailer. Leave enough slack to allow the trailer to turn corners easily, but do not allow the chains to drag on the ground.

- **Trailer brakes**
  If you are thinking of getting a trailer that has brakes, be sure they are electronically actuated. Do not attempt to tap into your vehicle’s hydraulic system. No matter how successful it may seem, any attempt to attach trailer brakes to your vehicle’s hydraulic system will lower braking effectiveness and create a potential hazard.

- **Additional towing equipment**
  There may be laws requiring special outside mirrors when towing a trailer. Even if mirrors are not required in your locale, you should install special mirrors if visibility is restricted in any way.

- **Trailer light**
  Trailer lights and equipment must comply with the regulations of the country where you are driving. Check with your local trailer sales or rental agency for the requirements in the area where you plan to tow.
Driving Safely with a Trailer

Things You Need To Know Before Towing a Trailer

- Have the trailer properly serviced and keep it in good condition.
- Make sure that all the weights and load in the vehicle and trailer are within limits.
  - Towing Load Limits P. 406
- Securely attach the towbar, safety chains, and other necessary parts to the trailer.
- Securely store all the items in and on the trailer so that they do not shift while driving.
- Check if the lights and brakes on the trailer are working properly.
- Check the pressures of the trailer tyres, including the spare.
- Check regulations concerning the maximum speed or driving restrictions for vehicles towing trailers. If you are driving across several countries, check each country’s requirements before leaving home, because regulations may vary.

Models with Auto Idle Stop

- Turn off the Auto Idle Stop system using the Auto Idle Stop OFF button. The trailer weight can affect your vehicle’s brake effectiveness if Auto Idle Stop is activated on a hill while towing a trailer.

Towing Speeds and Gears

- Drive slower than normal.
- Obey posted speed limits for vehicles with trailers.

Continuous variable transmission models

- Use the D position when towing a trailer on level roads.
Towing a Trailer
Driving Safely with a Trailer

Turning and Braking
- Turn more slowly and with a wider turning arc than normal.
- Allow more time and distance for braking.
- Do not brake or turn suddenly.

Driving in Hilly Terrain
- Closely watch your high temperature indicator. If the indicator remains on, turn off the climate control system and reduce speed. Pull to the side of the road safely to cool down the engine if necessary.

Continuously variable transmission models
- Shift to the S position if the transmission shifts frequently.
Off-road Guidelines

General Information

Your vehicle has been designed primarily for use on pavement, however, its higher ground clearance allows you to occasionally travel on unpaved roads. It is not designed for trail-blazing, or other challenging off-road activities.

If you decide to drive on unpaved roads, you will find that it requires somewhat different driving skills and that your vehicle will handle somewhat differently than it does on pavement. Pay attention to the precautions and tips in this section, and get acquainted with your vehicle before leaving the pavement.

Important Safety Precautions

To avoid loss of control or rollover, be sure to follow all precautions and recommendations:

- Be sure to store luggage properly and do not exceed your luggage load limits. 
  
- Whenever you drive, make sure you and your passengers always wear seat belts.
- Keep your speed low, and never go faster than the conditions allow.
- It's up to you to continually assess the situation and drive within the limits.

**WARNING**

Improperly operating this vehicle on or off pavement can cause an accident or rollover in which you and your passengers could be seriously injured or killed.

- Follow all instructions and guidelines in this owner's manual.
- Keep your speed low, and don't drive faster than conditions permit.

Failure to operate your vehicle correctly might result in a crash or a rollover.

Precautions While Driving P. 419
Avoiding Trouble

- **Check Out Your Vehicle** before you leave the pavement and make sure that all scheduled maintenance has been completed. Pay special attention to the condition of the tyres, and check the tyre pressures.
- **Remember** the route you choose presents limits (too steep or bumpy), you have limits (driving skill and comfort), and your vehicle has limits (traction, stability, and power). Failing to recognize these limits will likely put you and your passengers in a hazardous situation.
- **Accelerating and Braking** should be done slowly and gradually. Trying to start or stop too fast can cause a loss of traction and you could lose control.
- **Avoiding Obstacles and Debris** in the road reduces the likelihood of a rollover or damage to your suspension or other components.
- **Driving on Slopes** increasing your risk of a rollover, particularly if you attempt to drive across a slope that is too steep. Going straight up or down a slope is usually the safest. If you can’t clearly see all conditions or obstacles on a slope, walk it before you drive it. If there is any doubt whether you can safely pass, don’t try it. Find another route. If you get stuck when climbing, do not try to turn around. Back down slowly following the same route you took up the hill.
- **Crossing a Stream** - Avoid driving through deep water. If you encounter water in your route (a small stream or large puddle, for example), evaluate it carefully before going ahead. Make sure it is shallow, flowing slowly, and has firm ground underneath. If you are not sure of the depth or the ground, turn around and find another route. Driving through deep water can also damage your vehicle. The water can get into the transmission and differential, diluting the lubricant and causing an eventual failure. It can also wash the grease out of the wheel bearings.
- **If You Get Stuck**, carefully go in the direction that you think will get you unstuck. Do not spin the tyres as this will only make things worse and could damage the transmission. If you are unable to free yourself, your vehicle will need to be towed. Front and rear tow hooks are provided for this purpose.
When Driving

Starting the Engine

1. Make sure the parking brake is applied.
   - The electric parking brake indicator comes on for 15 seconds when you pull up the electric parking brake switch.

   Electric Parking Brake Switch

2. Check that the transmission is in [P], then depress the brake pedal.
   - Although it is possible to start the vehicle in [N], it is safer to start it in [P].

   Contuously variable transmission models

2. Check that the shift lever is in [N]. Then depress the brake pedal with your right foot, and the clutch pedal with your left foot.
   - The clutch pedal must be fully depressed to start the engine.

   Manual transmission models

Starting the Engine

Keep your foot firmly on the brake pedal when starting the engine.

The engine is harder to start in cold weather and in thinner air found at altitudes above 2,400 metres (8,000 feet).

When starting the engine in cold weather, turn off all electrical accessories such as the lights, climate control system, and rear demister in order to reduce battery drain.

If the exhaust system sounds abnormal or you can smell exhaust gas inside the vehicle, have your vehicle checked by a dealer. There may be a problem with the engine or exhaust system.

The immobilizer system protects your vehicle from theft. If an improperly coded device is used, the engine’s fuel system is disabled.

Immobilizer System P. 171
When Driving

Starting the Engine

3. Turn the ignition switch to START (III) without depressing the accelerator pedal.

Diesel models

- If the glow plugs indicator comes on, keep the clutch pedal fully depressed and wait until the indicator goes off. The engine starts automatically.

All models

Do not hold the key in START (III) for more than 10 seconds.

- If the engine does not start right away, wait for at least 30 seconds before trying again.
- If the engine starts, but then immediately stops, wait at least 30 seconds before repeating step 3 while gently depressing the accelerator pedal. Release the accelerator pedal once the engine starts.

Diesel models

When the ambient temperature is extremely low, the engine peak power may be restricted at starting the engine. This is to help the fuel flow for the normal engine operation.

Diesel models

For proper lubrication, the engine must not be run above fast idle speed until the low oil pressure indicator goes off. Avoid harsh acceleration or labouring the engine before the normal operating temperature has been reached.
### When Driving

#### Starting the Engine

- **Diesel models**
  - When the engine malfunctions or stalls due to insufficient fuel, move the vehicle to a safe place immediately and refuel 10 Litres (2.2 Imp gal) or more. When fuel runs out, air enters the fuel system. This may cause slow starting of the engine. If the engine does not start on the first try, try again a few times. If the engine still does not start, ask a dealer.

- **Starting to Drive**
  - You can also release the parking brake by pressing the electric parking brake switch while depressing the brake pedal. When facing downhill, you can start your vehicle more smoothly by manually releasing it with the electric parking brake switch than by releasing it with the accelerator pedal.

#### Hill start assist system

- **Continuous variable transmission models**
  - Hill start assist keeps the brake engaged briefly to help to prevent the vehicle from rolling on inclines as you move your foot from the brake pedal to the accelerator.

- **Manual transmission models**
  - Depress the clutch pedal, and shift to one of the forward gears when facing uphill, or **R** when facing downhill, then release the brake pedal.

- **Continuous variable transmission models**
  - Put the transmission into **D**, **S**, or **L** * when facing uphill, or **R** when facing downhill, then release the brake pedal.

* Not available on all models
When Driving

Model with keyless access system

Starting the Engine

1. Make sure the parking brake is applied. ► The electric parking brake indicator comes on for 15 seconds when you pull up the electric parking brake switch.

Models with keyless access system

Start the Engine

Continuous variable transmission models

2. Check that the transmission is in [P], then depress the brake pedal. ► Although it is possible to start the vehicle in [N], it is safer to start it in [P].

Manual transmission models

2. Check that the shift lever is in [N]. Then depress the brake pedal with your right foot, and the clutch pedal with your left foot. ► The clutch pedal must be fully depressed to start the engine.

Keep your foot firmly on the brake pedal when starting the engine.

The engine is harder to start in cold weather and in thinner air found at altitudes above 2,400 metres (8,000 feet).

When starting the engine in cold weather, turn off all electrical accessories such as the lights, climate control system, and rear demister in order to reduce battery drain.

If the exhaust system sounds abnormal or you can smell exhaust gas inside the vehicle, have your vehicle checked by a dealer. There may be a problem with the engine or exhaust system.

The immobilizer system protects your vehicle from theft. If an improperly coded device is used, the engine’s fuel system is disabled. ► Immobilizer System P. 171
When Driving

Starting the Engine

1. Put the transmission into [P].
2. Press the ENGINE START/STOP button.
   • If the shift lever is in [N], press the ENGINE START/STOP button.
   • If the shift lever is in any gear other than [N], depress the clutch pedal, then press the ENGINE START/STOP button.

3. Press the ENGINE START/STOP button without depressing the accelerator pedal.

If the glow plugs indicator comes on, keep the clutch pedal fully depressed and wait until the indicator goes off. The engine starts automatically.

Stopping the Engine

You can turn the engine off when the vehicle is completely stopped.

All models

1. Put the transmission into [P].
2. Press the ENGINE START/STOP button.

Diesel models

If the keyless remote battery is weak.

P. 623

If the Keyless Remote Battery is Weak

The engine may not start if the keyless remote is subjected to strong radio waves.

Do not hold the ENGINE START/STOP button to start the engine.

If the engine does not start, wait at least 30 seconds before trying again.

Diesel models

When the ambient temperature is extremely low, the engine peak power may be restricted at starting the engine. This is to help the fuel flow for the normal engine operation.

Diesel models

For proper lubrication, the engine must not be run above fast idle speed until the low oil pressure indicator goes off. Avoid harsh acceleration or labouring the engine before the normal operating temperature has been reached.
Starting to Drive

Continuously variable transmission models
1. Keeping your right foot on the brake pedal, put the transmission into D. Select R when reversing.
2. With the parking brake applied, release the brake pedal and gently depress the accelerator pedal.
   ▶ Make sure the electric parking brake indicator goes off.
   📀 Parking Brake P. 477

Hill start assist system
Hill start assist keeps the brake engaged briefly to help to prevent the vehicle from rolling on inclines as you move your foot from the brake pedal to the accelerator.

Manual transmission models
Depress the clutch pedal, and shift to one of the forward gears when facing uphill, or R when facing downhill, then release the brake pedal.

Continuously variable transmission models
Put the transmission into D or S when facing uphill, or R when facing downhill, then release the brake pedal.

Starting to Drive

Diesel models
When the engine malfunctions or stalls due to insufficient fuel, move the vehicle to a safe place immediately and refuel 10 Litres (2.2 Imp gal) or more. When fuel runs out, air enters the fuel system. This may cause slow starting of the engine. If the engine does not start on the first try, try again a few times. If the engine still does not start, ask a dealer.

Starting the Engine

Roll over and press the electric parking brake switch while depressing the brake pedal.
When facing downhill, you can start your vehicle more smoothly by manually releasing it with the electric parking brake switch than by releasing it with the accelerator pedal.

Manual transmission models
If the engine stalls, fully depress the clutch pedal within three seconds. The engine may automatically restart under certain conditions. Otherwise, follow the standard procedure.

Hill start assist system
Hill start assist may not prevent the vehicle from rolling downhill on a very steep or slippery slope, and will not operate on small inclines.

Hill start assist will operate even when VSA is switched off.

Hill start assist is not a replacement for the parking brake.
Precautions While Driving

Driving Guidelines for Your Utility Vehicle

Utility vehicles have a significantly higher rollover rate than other types of vehicles. To prevent rollovers or loss of control:
- Take corners at slower speeds than you would with a passenger vehicle.
- Avoid sharp turns and abrupt manoeuvres whenever possible.
- Do not modify your vehicle in any way that you would raise the centre of gravity.
- Do not carry heavy luggage on the roof.

In a Fog

Visibility becomes low when it is foggy. When you drive, turn on the low beam headlights even during the daytime. Slow down, using the road line in the centre, guard rails, and the taillights of the vehicle ahead of you as your driving guide.

In a Strong Wind

If a strong side wind drifts your vehicle while driving, hold the steering wheel tight. Slowly decelerate your vehicle and keep your vehicle in the middle of the road. Be careful with wind gusts especially when your vehicle is exiting a tunnel, driving on a bridge or river bank, and driving through an open area like a quarry, and when a large lorry is passing by.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

CAUTION: Do not drive on the road where water is deep. Driving through deep water will cause damage to the engine and electrical equipment and the vehicle will break down.

NOTICE
- Do not operate the shift lever while pressing the accelerator pedal. You could damage the transmission.
- If you repeatedly turn the steering wheel at an extremely low speed, or hold the steering wheel in the full left or right position for a while, the electric power steering (EPS) system heats up. The system goes into a protective mode, and limits its performance. The steering wheel becomes harder and harder to operate. Once the system cools down, the EPS system is restored. Repeated operation under these conditions can eventually damage the system.
- If the ignition switch is turned to ACCESSORY [1]*1 while driving, the engine will shut down and all steering and brake power assist functions will stop, making it difficult to control the vehicle.
- Do not put the shift lever in [N], as you will lose engine braking (and acceleration) performance.
When Driving

Continuously Variable Transmission *

- **In Rain**
  The road is slippery when raining. Avoid hard braking, rapid acceleration, and abrupt steering and be more cautious when driving. It is likely to experience hydroplaning phenomenon if you are driving on a rutted road with puddles. Do not drive in deep water and on flooded roads. This can damage the engine or driveline, or cause electrical component failure.

- **Other Precautions**
  If there is a strong impact with something under the vehicle, stop in a safe location. Check the underside of the vehicle for damage or any fluid leaks.

- **Continuously Variable Transmission** *

  - **Creeping**
    The engine runs at a higher idle speed and creeping increases. Keep the brake pedal firmly depressed when stopped.

  - **Kickdown**
    Quickly depressing the accelerator pedal while driving uphill may cause the transmission to drop to a lower ratio, unexpectedly increasing vehicle speed. Depress the accelerator pedal carefully, especially on slippery roads and curves.

  * Not available on all models
Continuously variable transmission models without paddle shifters

Shifting

Change the shift position in accordance with your driving needs.

- **Shift lever positions**

  - **P** Park
    Used when parking or starting the engine
  - **R** Reverse
    Used when reversing
  - **N** Neutral
    Transmission is not locked
  - **D** Drive
    Used for normal driving
  - **S** Drive (S)
    Used:
    - For better acceleration
    - To increase engine braking
    - When going up or down hills
    - When towing a trailer in hilly terrain
  - **L** Low
    Used:
    - To further increase engine braking
    - When going up or down hills

Models without keyless access system

You cannot turn the ignition switch to LOCK [0] and remove the key unless the shift lever is in **P**.

Models with keyless access system

You cannot change the power mode from ON to VEHICLE OFF (LOCK) unless the shift lever is in **P**.

The vehicle may move forward very slightly even in **N** while the engine is cold.
Depress the brake pedal firmly and, when necessary, apply the parking brake.

When shifting positions in extremely low temperatures (-30°C), there may be a short delay before the shift position is displayed. Always confirm you are in the correct shift position before driving.
When you change the shift lever from (D) to (R) and vice versa, come to a complete stop and keep the brake pedal depressed. Operating the shift lever before the vehicle has come to a complete standstill can damage the transmission.

Use the shift lever position indicator to check the lever position before pulling away.

If the transmission system indicator blinks when driving, in any shift position, there is a problem with the transmission. Avoid sudden acceleration and have the transmission checked by a dealer as soon as possible.

The fuel supply may be cut off if you drive at engine speeds in or over the tachometer’s red zone (engine speed limit). If this happens, you may experience a slight jolt.

It may not be possible to operate the shift lever if the brake pedal is applied while the shift lever release button is held down. Depress the brake pedal first.
Continuously variable transmission models with paddle shifters

Shifting

Change the shift position in accordance with your driving needs.

When Driving

**Shifting**

**Models without keyless access system**
You cannot turn the ignition switch to LOCK [0] and remove the key unless the shift lever is in [P].

**Models with keyless access system**
You cannot change the power mode from ON to VEHICLE OFF (LOCK) unless the shift lever is in [P].

The vehicle may move forward very slightly even in [N] while the engine is cold. Depress the brake pedal firmly and, when necessary, apply the parking brake.

When shifting positions in extremely low temperatures (-30°C), there may be a short delay before the shift position is displayed. Always confirm you are in the correct shift position before driving.
When Driving

Shift Lever Operation

**NOTICE**
When you change the shift lever from D to R and vice versa, come to a complete stop and keep the brake pedal depressed.
Operating the shift lever before the vehicle has come to a complete standstill can damage the transmission.

Use the shift lever position indicator to check the lever position before pulling away.

If the transmission system indicator blinks when driving, in any shift position, there is a problem with the transmission.
Avoid sudden acceleration and have the transmission checked by a dealer as soon as possible.

The fuel supply may be cut off if you drive at engine speeds in or over the tachometer’s red zone (engine speed limit). If this happens, you may experience a slight jolt.

It may not be possible to operate the shift lever if the brake pedal is applied while the shift lever release button is held down.
Depress the brake pedal first.
When Driving Shifting

7-Speed Manual Shift Mode

Use the paddle shifters to change between 1st and 7th speeds without releasing your hands from the steering wheel. The transmission switches to the 7-speed manual shift mode when you pull a paddle shifter while driving. This mode is useful when engine braking is needed.

■ When the shift lever is in [D]:
The shift mode goes into the 7-speed manual shift mode temporarily, and the number is displayed in the shift indicator. The 7-speed manual shift mode is cancelled automatically if you drive at constant speed or accelerate, and the number in the shift indicator goes off. You can cancel this mode by pulling the + paddle shifter for a few seconds. The 7-speed manual shift mode is especially useful when reducing the vehicle speed temporarily before making a turn.

■ When the shift lever is in [S]:
The shift mode goes into the 7-speed manual shift mode. The M indicator and the speed number are displayed in the shift indicator. As the vehicle speed slows down, the transmission automatically shifts down accordingly. When the vehicle comes to a stop, it automatically shifts down into 1st.

If the vehicle speed increases and the engine speed reaches near the tachometer’s red zone, the transmission shifts up.

You can only pull away in 1st speed.

When cancelling the 7-speed manual shift mode, move the shift lever from [S] to [D]. When the 7-speed manual shift mode is cancelled, the M indicator and shift indicator go off.

Continued
7-Speed Manual Shift Mode Operation

Each paddle shift operation makes a single speed change.
To change continuously, release the paddle shifter before pulling it again for the next speed.

The shift indicator blinks when you cannot shift up or down. It indicates that your vehicle speed is not in its allowable shifting range.
Slightly accelerate to shift up and decelerate to shift down while the indicator is blinking.
When Driving

Shifting

Shift Up/Down* Indicators

Come on while the vehicle is in the 7-speed manual shift mode to indicate when a speed change is appropriate to maintain the most fuel efficient driving style.

The shift up indicator: Comes on when shifting up is recommended.

The shift down indicator: Comes on when shifting down is recommended.

Models without turbocharger

The shift down indicator will not prompt you to downshift to increase engine braking. It is up to you to downshift to increase engine braking when driving downhill.

Always shift down at the appropriate vehicle speed.

When the ECON mode is on, ambient meter colour may change if you do not change speed positions when a shift indicator illuminates. This can result in a change in fuel economy.

Road and traffic conditions may require you to shift at times other than those indicated.

WARNING

The shift indicator is only a guide to help you achieve better fuel economy. Never refer to the Shift Indicators when road and traffic conditions are unsuitable or when it may distract you.

Models without turbocharger

* Not available on all models
When Driving

Shifting

Manual transmission models

Shift Lever Operation

Fully depress the clutch pedal to operate the shift lever and change gears, then slowly release the pedal.

Depress the clutch pedal, and pause for a few seconds before shifting into R, or shift into one of the forward gears for a moment. This stops the gears so they do not “grind.”

When you are not shifting, do not rest your foot on the clutch pedal. This can cause your clutch to wear out faster.

NOTICE
Do not shift to R before the vehicle comes to a complete stop. Shifting to R before stopping can damage the transmission.

NOTICE
Before downshifting, make sure the engine will not go into the tachometer’s red zone. Should this occur, it can severely damage your engine.

If you exceed the maximum speed for the gear you are in, the engine speed will enter into the tachometer’s red zone. When this happens, you may experience a slight jolt.
When Driving

Shift Up/Down Indicators

Come on to indicate when a gear change is appropriate to maintain the most fuel efficient driving style.

The shift up indicator: Comes on when shifting up is recommended.

The shift down indicator: Comes on when shifting down is recommended.

WARNING

The shift indicator is only a guide to help you achieve better fuel economy. Never refer to the Shift Indicators when road and traffic conditions are unsuitable or when it may distract you.

The shift down indicator will not prompt you to downshift to increase engine braking. It is up to you to downshift to increase engine braking when driving downhill.

Always shift down at the appropriate vehicle speed.

The shift down indicator does not come on when downshifting from 2 to 1.

When the ECON mode is on, ambient meter colour may change if you do not change gears when a shift indicator illuminates. This can result in a change in fuel economy.

Road and traffic conditions may require you to shift at times other than those indicated.
When Driving

Shifting

Reverse Lockout

The manual transmission has a lockout mechanism that stops you from accidentally shifting into R from a forward gear while the vehicle is moving at a certain speed.

If you cannot shift to R when the vehicle is stopped, do the following:

1. Depress the clutch pedal, move the shift lever all the way to the left, and shift to R.
2. If you still cannot shift into R, apply the parking brake, and turn the ignition switch to ACCESSORY [i] or LOCK [0] *1.
3. Depress the clutch pedal and shift into R.
4. Keep depressing the clutch pedal and start the engine.

Have the vehicle checked by a dealer if you have to go through this procedure repeatedly.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
ECON Mode

The ECON button turns the ECON mode on and off.

**Petrol models**
The ECON mode helps you to improve your fuel economy by adjusting the performance of the climate control system, engine*, and cruise control*.

**Diesel models**
The ECON mode helps you to improve your fuel economy by adjusting the performance of the transmission, climate control system, and cruise control.

* Not available on all models
When Driving

Auto Idle Stop

To help to maximise fuel economy, the engine automatically stops when the vehicle comes to a stop, depending on environmental and vehicle operating conditions. The indicator (green) comes on at this time.

The engine then restarts once the vehicle is about to move again, and the indicator (green) goes off.

The environmental and vehicle conditions that impact Auto Idle Stop system operation are varied.

If the driver’s door is opened while the indicator (green) is on, a buzzer sounds to notify you that the Auto Idle Stop function is in operation.

A message associated with Auto Idle Stop appears on the multi-information display.

Continuous variable transmission models

Models without turbocharger

Auto Idle Stop

The 12-volt battery installed in this vehicle is specifically designed for a model with Auto Idle Stop. Using a 12-volt battery other than this specified type may shorten the 12-volt battery life, and prevent Auto Idle Stop from activating. If you need to replace the 12-volt battery, make sure to select the specified type. Ask a dealer for more details.

Specifications

The duration of the Auto Idle Stop operation:

- **Increase** in the ECON mode, compared to when the ECON mode is off, with climate control in use.
To turn the Auto Idle Stop system off, press this button. The Auto Idle Stop system stops.

- The Auto Idle Stop system will stop and the indicator (amber) will come on.

The Auto Idle Stop system is turned on every time you start the engine, even if you turned it off the last time you drove the vehicle.

Pressing the Auto Idle Stop system OFF button restarts the engine during the Auto Idle Stop activated.
When Driving ▶ Auto Idle Stop

Auto Idle Stop Activates When:
The vehicle stops with the shift lever in D and the brake pedal depressed.

Auto Idle Stop does not activate when:
• The Auto Idle Stop OFF button is pressed.
• The driver’s seat belt is not fastened.
• The engine coolant temperature is low or high.
• The engine is started with the bonnet open.
  ▶ Turn off the engine. Close the bonnet before you restart the engine to activate Auto Idle Stop.
• The battery charge is low.
• The internal temperature of the battery is -10°C or less.
• W is on (indicator on).
• The climate control system is in use, and the temperature is set to Hi or Lo.
• The climate control system is in use, and the outside temperature is below -20°C or over 40°C.
• The transmission fluid temperature is low or high.
• The transmission is in a position other than D.
• The vehicle comes to a stop again before the vehicle speed reaches 5 km/h (3 mph) after the engine starts.
• Stopped on a steep incline.

Auto Idle Stop Activates When:
Do not open the bonnet while the Auto Idle Stop function is activated. If the bonnet is opened, the engine will not restart automatically.

In this case, restart the engine with the ENGINE START/STOP button* or turn the ignition switch* to START [II].
▶ Starting the Engine P. 413, 416

Models with keyless access system
Pressing the ENGINE START/STOP button changes the power mode to ACCESSORY even while Auto Idle Stop is in operation. Once in ACCESSORY, the engine no longer restarts automatically. Follow the standard procedure to start the engine.
▶ Starting the Engine P. 416

Models without keyless access system
Even if you turn the ignition switch to START [III] during the Auto Idle Stop activated, the engine does not start.

* Not available on all models
When Driving

Auto Idle Stop may not activate when:

- The steering wheel is operated.
- Altitude is high.
- The vehicle is stopped by braking suddenly.
- The vehicle is repeatedly accelerated and decelerated at a low speed.
- The climate control system is in use, and there is a significant difference between the set temperature and the actual interior temperature.
- The climate control system is in use, and humidity in the interior is high.
- The fan speed is high.

Continued
When Driving

Auto Idle Stop

The Engine Automatically Restarts When:
- The brake pedal is released (without the automatic brake hold system activated).
- The accelerator pedal is depressed (with the automatic brake hold system activated).

Automatic Brake Hold P. 480

The engine restarts even if the brake pedal is depressed*1 when:
- The Auto Idle Stop system OFF button is pressed.
- A steering wheel is operated.
- The transmission is put into R, S, and L*, or when it is set from N and put into D.
- The pressure on the brake pedal is reduced and the vehicle starts moving while stopped on an incline.
- The pressure on the brake pedal is repeatedly applied and released slightly during a stop.
- The battery charge becomes low.
- The accelerator pedal is depressed.
- The driver’s seat belt is unlatched.
- W is on (indicator on).
- The climate control system is in use, and the difference between the set temperature and actual interior temperature becomes significant.
- The climate control system is being used to dehumidify the interior.

Starting Assist Brake Function
Briefly keeps the brake applied after releasing the brake pedal to restart the engine. This can keep your vehicle from unexpectedly moving while on an incline.

* Not available on all models
To help to maximise fuel economy, the engine automatically stops when the vehicle comes to a stop, depending on environmental and vehicle operating conditions. The indicator (green) comes on at this time.

The engine then restarts once the vehicle is about to move again when you depress the clutch pedal, and the indicator (green) goes off.

The environmental and vehicle conditions that impact Auto Idle Stop system operation are varied.

If the driver’s door is opened while the indicator (green) is on, a buzzer sounds to notify you that the Auto Idle Stop function is in operation.

- **Auto Idle Stop**

The 12-volt battery installed in this vehicle is specifically designed for a model with Auto Idle Stop. Using a 12-volt battery other than this specified type may shorten the 12-volt battery life, and prevent Auto Idle Stop from activating. If you need to replace the 12-volt battery, make sure to select the specified type. Ask a dealer for more details.

- **Specifications** P. 654, 657, 660

The duration of the Auto Idle Stop operation:

- **Increase** in the ECON mode, compared to when the ECON mode is off, with climate control in use.
When Driving

Auto Idle Stop System ON/OFF

To turn the Auto Idle Stop system off, press this button. The Auto Idle Stop system stops.

The Auto Idle Stop system is turned on every time you start the engine, even if you turned it off the last time you drove the vehicle.

Pressing the Auto Idle Stop system OFF button restarts the engine during the Auto Idle Stop activated.
When Driving

Auto Idle Stop

Auto Idle Stop Activates When:

After the vehicle moves forward, stopping with the brake, the clutch pedal fully depressed, the shift lever in [N], and then the clutch pedal is released.

- To restart the engine automatically, depress the clutch pedal.

Auto Idle Stop does not activate when:

- The Auto Idle Stop OFF button is pressed.
- The driver’s seat belt is not fastened.
- The engine coolant temperature is low or high.
- The engine is started with the bonnet open.
- Turn off the engine. Close the bonnet before you restart the engine to activate Auto Idle Stop.
- The battery charge is low.
- ![ is on (indicator on).
- The climate control system is in use, and the temperature is set to Hi or Lo.
- The climate control system is in use, and the outside temperature is below -20°C or over 40°C.
- The shift lever is in any position except [N].
- The engine restarts but the vehicle stops again before reaching 3 km/h (2 mph).

Petrol models with turbocharger

- The internal temperature of the battery is 5°C or less.

Except Petrol models with turbocharger

- The internal temperature of the battery is -10°C or less.

Auto Idle Stop may not activate when:

- The steering wheel is operated.
- Altitude is high.
- The climate control system is in use, and there is a significant difference between the set temperature and the actual interior temperature.
- The climate control system is in use, and humidity in the interior is high.
- The fan speed is high.

Auto Idle Stop Activates When:

Do not open the bonnet while the Auto Idle Stop function is activated. If the bonnet is opened, the engine will not restart automatically.

In this case, restart the engine with the ENGINE START/STOP button or turn the ignition switch to START [Ⅲ].

Starting the Engine P. 413, 416

Models with keyless access system

Pressing the ENGINE START/STOP button changes the power mode to VEHICLE OFF (LOCK) even while Auto Idle Stop is in operation. Once in VEHICLE OFF (LOCK), the engine no longer restarts automatically. Follow the standard procedure to start the engine.

Starting the Engine P. 416

Models without keyless access system

Even if you turn the ignition switch to START [Ⅲ] during the Auto Idle Stop activated, the engine does not start.
When Driving

**Auto Idle Stop**

- **The Engine Automatically Restarts When:**
  - The clutch pedal is depressed.
  - **The engine automatically restarts even if the clutch pedal is not depressed with the shift lever in N when:**
    - The Auto Idle Stop system OFF button is pressed.
    - Your vehicle is moved.
    - The pressure on the brake pedal is repeatedly applied and released slightly during a stop.
    - The battery charge becomes low.
    - The steering wheel is operated.

- **The Engine Automatically Restarts When:**
  - If you are using an electronic device during Auto Idle Stop, the device may temporarily be turned off when the engine restarts.
  - The engine does not restart automatically when there is a problem in the system. Follow the normal procedure to start the engine.
  - **Starting the Engine** P. 413, 416

- **Starting the Engine** P. 413, 416

When the system stops operating, follow the normal procedure to start the engine.

**Starting the Engine** P. 413, 416
When Driving
Auto Idle Stop

When the Auto Idle Stop Indicator (Green) Starts Blinking Rapidly

Fully depress the clutch pedal.
   ▶ The engine automatically restarts.

When the Auto Idle Stop Indicator (Green) Starts Blinking Rapidly

The indicator starts blinking rapidly under the following conditions:
• when the demister is touched.
• when the climate control system is in use and moisture builds up inside the vehicle.
• when the climate control system is in use and the difference between the set temperature and the actual temperature inside the vehicle becomes significant.
Cruise Control

Maintains a constant vehicle speed without having to keep your foot on the accelerator. Use cruise control on motorways or open roads where you can travel at a constant speed with little acceleration or deceleration.

### When to use

- **Vehicle speed for cruise control:** Desired speed in a range from about 30 km/h (18 mph) to about 200 km/h (125 mph)
- **Continuously variable transmission models:**
  - **Shift positions for cruise control:** In D or S

Always keep sufficient distance between you and the vehicle in front of you.

### How to use

- **The indicator is on in the instrument panel**
  - Cruise control is ready to use.

- **Press the MAIN button on the steering wheel**

If a different indicator comes on, press the LIM button to switch the cruise control.

### WARNING

Improper use of the cruise control can lead to a crash.

Use the cruise control only when travelling on open motorways in good weather.

- It may not be possible to maintain a constant speed when driving uphill or downhill.

- **Manual transmission models**
  - When the engine speed slows down, try to downshift. You can maintain the set speed if you change gear within five seconds.

- When not using cruise control:
  - Turn off cruise control by pressing the MAIN button.

  You cannot use the cruise control and adjustable speed limiter or intelligent speed limiter* at the same time.

* Not available on all models
When Driving
Cruise Control

To Set the Vehicle Speed

Take your foot off the accelerator pedal and press the -/SET button when you reach the desired speed.

The moment you release the -/SET button, the set speed is fixed, and cruise control begins. The set speed is displayed.
When Driving
Cruise Control

To Adjust the Vehicle Speed
Increase or decrease the vehicle speed using the RES/+ or −/SET buttons on the steering wheel.

- Each time you press the button, the vehicle speed is increased or decreased by about 1 km/h or 1 mph accordingly.
- If you keep the button pressed, the vehicle speed increases or decreases by about 10 km/h or 10 mph accordingly.

To Cancel
To cancel cruise control, do any of the following:
- Press the CANCEL button.
- Press the MAIN button.
- Press the LIM button.
- Depress the brake pedal.
- Depress the clutch pedal* for five seconds or more.

The displayed set speed goes off.

To Resume the prior set speed:
After cruise control has been cancelled, you can still resume the prior set speed by pressing the RES/+ button while driving at a speed of at least 30 km/h (18 mph) or more.

You cannot set or resume in the following situations:
- When vehicle speed is less than 30 km/h (18 mph)
- When the MAIN button is turned off

At vehicle speeds of 25 km/h (16 mph) or less, cruise control is cancelled automatically.

* Not available on all models
Adjustable Speed Limiter

This system enables you to set a maximum speed that cannot be exceeded even if you are depressing the accelerator pedal. The vehicle speed limit can be set from about 30 km/h (18 mph) to about 250 km/h (156 mph).

**How to use**

![Image of steering wheel with buttons labeled MAIN and LIM]

**The indicator is on in the instrument panel**
Adjustable speed limiter is ready to use.

**Press the MAIN button on the steering wheel**

If a different indicator comes on, press the LIM button to switch to the adjustable speed limiter.

* Not available on all models

**WARNING**

Adjustable Speed Limiter has limitations. It is always your responsibility to adjust the vehicle speed to obey the actual speed limit, and safely operate the vehicle.

**WARNING**

Do not depress the accelerator pedal more than necessary. Maintain an appropriate accelerator pedal position depending on the vehicle speed.

The adjustable speed limiter may not hold the set speed limit when driving downhill. If this occurs, slow down by depressing the brake pedal.

When not using the adjustable speed limiter:
Turn off the adjustable speed limiter by pressing the MAIN button.

You cannot use the adjustable speed limiter and cruise control or intelligent speed limiter* at the same time.

**Manual transmission models**
When the engine speed slows down, try to downshift.
When Driving
Adjustable Speed Limiter

To Set the Speed Limit

- Take your foot off the pedal and press the \(-/\text{SET}\) button when you reach the desired speed.
  The moment you release the \(-/\text{SET}\) button, the speed limit is fixed, and the adjustable speed limiter is set. The speed limit is displayed.
- You can set the previously set speed limit by pressing the \(\text{RES/+}\) button.

To Set the Speed Limit

If you set the speed limit while travelling at less than 30 km/h (18 mph), the speed limit is set to 30 km/h (18 mph).

The beeper sounds and the displayed speed limit blinks if the vehicle speed exceeds the limit by 3 km/h (2 mph) or more on a steep descent.

The adjustable speed limiter is set to the current speed if it is higher than the previously set speed limit when you press the \(\text{RES/+}\) button.
When Driving
Adjustable Speed Limiter

To Adjust the Speed Limit
Increase or decrease the speed limit by using the RES/+ or –/SET buttons on the steering wheel.

- Each time you press the button, the speed limit increases or decreases by 1 km/h or 1 mph accordingly.
- If you keep the button pressed, the speed limit increases or decreases in increments of 10 km/h or 10 mph every 0.5 second until system limit is reached.
- The vehicle may accelerate or decelerate until the set speed is reached.

Exceeding the Speed Limit Temporarily
The speed limit can be exceeded by depressing the accelerator pedal fully.
- The displayed speed limit blinks.
- The beeper sounds once the speed limit has been exceeded.

Exceeding the Speed Limit Temporarily
The beeper sounds when the vehicle speed goes higher than the set speed limit with the acceleration pedal depressed completely.

The adjustable speed limiter resumes working once the vehicle speed goes lower than the set speed limit.
To Cancel

To cancel the adjustable speed limiter, do any of the following:
- Press the CANCEL button.
- Press the MAIN button.
- Press the LIM button.

To Cancel

The adjustable speed limiter changes into cruise control if the LIM button is pressed.

Models with intelligent speed limiter

The adjustable speed limiter changes into intelligent speed limiter if the LIM button is pressed.

If there is a problem with the system when you are using the adjustable speed limiter, the beeper sounds and OFF comes on. The adjustable speed limiter will be turned off.
Models with traffic sign recognition system

**Intelligent Speed Limiter**

Automatically sets the speed limit that the traffic sign recognition system detects. And the speed limit cannot be exceeded even if you are depressing the accelerator pedal. If you fully depress the accelerator the speed limit can be exceeded.

* Traffic Sign Recognition System* P. 464

**WARNING**

Intelligent Speed Limiter has limitations. The Intelligent Speed Limiter may set itself to a speed above or below the actual speed limit, or may not work, particularly where the traffic sign recognition system does not operate correctly or where a road has no speed limit signs. It is always your responsibility to adjust the speed to obey the actual speed limit and to safely operate the vehicle.

Depending on the amount of depression of the accelerator pedal, the vehicle will accelerate until it reaches the speed identified by the traffic sign recognition system.

* Not available on all models

Continued
When Driving

Intelligent Speed Limiter

The system is designed to detect signs that follow the Vienna Convention standards. Not all signs may be detected, but any signs posted on roadsides should not be ignored. The system does not work on the designated traffic signs of all the countries you travel, nor in all situations.

Traffic Sign Recognition System* P. 464

If the intelligent speed limiter is set to the wrong speed limit, try one of the following:
To cancel
• Press the CANCEL button.
• Press the MAIN button.
• Press the LIM button.

To exceed the speed limit temporarily
• Depressing the accelerator pedal fully.

The intelligent speed limiter may not hold the set speed limit when driving downhill. If this occurs, slow down by depressing the brake pedal.

When not using the intelligent speed limiter, turn off the intelligent speed limiter by pressing the MAIN button.

You cannot use the intelligent speed limiter and cruise control or adjustable speed limiter at the same time.

How to use

The indicator is on in the instrument panel
Intelligent speed limiter is ready to use.

Press the MAIN button on the steering wheel

If a different indicator comes on, press the LIM button to change it to the intelligent speed limiter.

* Not available on all models
When Driving

Intelligent Speed Limiter

To Set the Speed Limit

1. Press and release the −/SET button or RES/+ button.

On when the intelligent speed limiter is set to the speed limit that the traffic sign recognition system detects.

- The moment you release the −/SET button or RES/+ button, the intelligent speed limiter is set to the speed limit that the traffic sign recognition system detects. The speed limit is displayed.

2. Customized Features
P. 144

Manual transmission models
When the engine speed slows down, try to downshift.

Do not use the intelligent speed limiter in areas of different units from the display unit of the intelligent speed limiter.

Right-hand drive type except Cyprus models
Change the displayed measurement of the set vehicle speed to the same units as the driving areas.

To Set the Speed Limit

If you set the intelligent speed limiter when the speed limit that the traffic sign recognition system detects is less than 30 km/h (20 mph), the speed limitation function and warning function may switch to pause.

If your vehicle speed is higher than the speed limit that the traffic sign recognition system detects, your vehicle decelerates slowly to the speed limit or less. If necessary, slow down by depressing the brake pedal. And the beeper sounds and the displayed speed limit blinks if the vehicle speed exceeds the limit by 3 km/h (2 mph) or more.
When Driving

When the traffic sign recognition system detects the new speed limit sign
The intelligent speed limiter is set to the new speed limit that the traffic sign recognition system detects.

- The speed limitation function and warning function may switch to pause if there is no speed limit sign in the screen of the traffic sign recognition system when:
  - The end of speed limit or other designated limit is detected.
  - Your vehicle enters/exits motorway or highway.
  - You make a turn with a turn signal to change direction at an intersection.

To Set the Speed Limit
The intelligent speed limiter may also switch to pause when the traffic sign recognition system detects only additional speed limit signs.
When the traffic sign recognition system detects the speed limit sign while the intelligent speed limiter is paused
The speed limitation function and warning function will be resumed automatically.

When the traffic sign recognition system does not detect the speed limit sign for a time while the intelligent speed limiter is activated
While driving, in addition to when the traffic sign recognition system detects no speed limit sign, the traffic sign recognition system may display no speed limit. But, intelligent speed limiter functions continue.
When Driving

Intelligent Speed Limiter

To Adjust the Speed Limit

Increase or decrease the speed limit by using the RES/+ or -/SET buttons on the steering wheel.

- Each time you press the button, the speed limit is increased or decreased by about 1 km/h or 1 mph accordingly.
- You can increase the speed limit until +10 km/h or +5 mph on the basis of the speed limit that the traffic sign recognition system detects.
- You can decrease the speed limit until -10 km/h or -5 mph on the basis of the speed limit that the traffic sign recognition system detects.
- You can accelerate until the set speed is reached. If your vehicle speed is higher than the speed limit that the traffic sign recognition system detects, your vehicle decelerates slowly to the speed limit.

Exceeding the Speed Limit Temporarily

The speed limit can be exceeded by depressing the accelerator pedal fully.

- The displayed speed limit blinks.

The beeper sounds once the speed limit has been exceeded.

Exceeding the Speed Limit Temporarily

The beeper sounds when the vehicle speed goes higher than the set speed limit with the acceleration pedal depressed completely.

The intelligent speed limiter resumes working once the vehicle speed goes lower than the set speed limit.
To cancel the intelligent speed limiter, do any of the following:
- Press the **CANCEL** button.
- Press the **MAIN** button.
- Press the **LIM** button.

If there is a problem with the system or traffic sign recognition system when you are using the intelligent speed limiter, the beeper sounds and **OFF** comes on. The intelligent speed limiter will be turned off.

* Not available on all models
When Driving

Forward Collision Warning*

Alerts you when it detects the possibility of your vehicle colliding with the vehicle in front of yours.

If the system determines a collision is possible, it gives both visual and audible alerts.

Take appropriate action to prevent a collision (apply the brakes, change lanes, etc.).

■ How the system works
The system may give warnings of potential collisions when your vehicle speed is above 15 km/h (9 mph).

You can set Far, Normal or Near for when warnings start:

Far
Normal
Near
Your Vehicle
Vehicle Ahead

* Not available on all models
When Driving

Forward Collision Warning

Never apply a film or attach any objects to the windscreen that could obstruct the Forward Collision Warning camera’s field of vision. Scratches, nicks, and other damage to the windscreen within the Forward Collision Warning camera’s field of vision can cause the system to operate abnormally. If this occurs, we recommend that you replace the windscreen with a genuine Honda replacement windscreen. Making even minor repairs within the camera’s field of vision or installing an aftermarket replacement windscreen may also cause the system to operate abnormally.

After replacing the windscreen, have a dealer recalibrate the camera. Proper calibration of the Forward Collision Warning camera is necessary for the system to operate properly.

* Not available on all models

Continued
When Driving

**Forward Collision Warning**

- The temperature inside the system is high.
- The windshield is blocked by dirt, mud, leaves, wet snow, etc.

Once the conditions that caused Forward Collision Warning to shut off improve or are addressed (e.g., cleaning), the system comes back on.

---

**Automatic shutoff**

Forward Collision Warning may automatically shut itself off and the indicator comes and stays on when:

- The temperature inside the system is high.
- The windshield is blocked by dirt, mud, leaves, wet snow, etc.

To help to reduce the likelihood that high interior temperatures will cause the camera system to shut off, when parking, find a shady area or face the front of the vehicle away from the sun.

If you use a reflective sun shade, do not allow it to cover the camera housing. Covering the camera can concentrate heat on the camera.

If the message appears:

- Use the climate control system to cool down the interior and, if necessary, the demister mode when windows are fogged.
- Start driving the vehicle to lower the windshield temperature, which cools down the area around the Forward Collision Warning camera.

If the message appears:

Park your vehicle in a safe place. Wipe away debris blocking the windshield, then start driving again. If the message remains on even after driving for a while with the clean windshield, have your vehicle checked by a dealer.
When Driving

Forward Collision Warning Limitations

Forward Collision Warning may not activate or may not detect a vehicle in front of your vehicle, and may activate even when you are aware of a vehicle ahead of you, or when there is no vehicle ahead, under the following conditions.

<table>
<thead>
<tr>
<th>Condition</th>
</tr>
</thead>
<tbody>
<tr>
<td>The distance between your vehicle and the vehicle ahead of you is too short.</td>
</tr>
<tr>
<td>A vehicle cuts in front of you at a slow speed, and it brakes suddenly.</td>
</tr>
<tr>
<td>A vehicle suddenly crosses in front of you.</td>
</tr>
<tr>
<td>When either your vehicle or the vehicle ahead of you accelerates rapidly.</td>
</tr>
<tr>
<td>The vehicle ahead of you is a motorcycle, a small vehicle, or a unique vehicle such as a tractor.</td>
</tr>
<tr>
<td>When you drive off-road or on a mountain road, or curved and winding road for an extended period that makes it difficult for the camera to properly detect a vehicle in front of you.</td>
</tr>
<tr>
<td>When there are pedestrians or animals in front of your vehicle.</td>
</tr>
<tr>
<td>When you drive in bad weather (rain, fog, etc.).</td>
</tr>
<tr>
<td>A heavy load in the rear or modifications to the suspension tilts your vehicle.</td>
</tr>
<tr>
<td>An abnormal tyre condition is detected (wrong tyre size, flat tyre, etc.).</td>
</tr>
<tr>
<td>When the windscreen is blocked by dirt, mud, leaves, wet snow, etc.</td>
</tr>
<tr>
<td>When the temperature inside the system is high.</td>
</tr>
<tr>
<td>A sudden change between light and dark such as an entrance or exit of a tunnel.</td>
</tr>
<tr>
<td>You drive into the sunlight (e.g. at dawn or dusk).</td>
</tr>
<tr>
<td>When the windscreen is dirty or cloudy.</td>
</tr>
<tr>
<td>When streetlights are perceived as the taillight of a vehicle in front of yours.</td>
</tr>
<tr>
<td>When driving at night, the vehicle ahead of you is running with either taillight bulb burned out.</td>
</tr>
<tr>
<td>When you drive in the shadows of trees, buildings, etc.</td>
</tr>
<tr>
<td>When your vehicle is towing a trailer.</td>
</tr>
</tbody>
</table>
**When Driving**

**Lane Departure Warning**

Alerts you when the system determines a possibility of your vehicle unintentionally crossing over detected lane markings.

### How the System Works

If your vehicle is getting too close to detected left or right side lane markings without a turn signal activated, Lane Departure Warning will give audible and visual alerts.

The beeper sounds and the message appears on the multi-information display, letting you know that you need to take appropriate action.

### How the System Activates

The system begins to search for lane markings when all the following conditions are met:

- The vehicle is travelling above about 72 km/h (45 mph).
- The vehicle is on a straight or slightly curved road.
- The turn signals are off.
- The brake pedal is not depressed.

*Not available on all models*
When Driving

Lane Departure Warning

The camera is located behind the rearview mirror.

Lane Departure Warning Camera

Press the Lane Departure Warning button to turn the system on and off.

The indicator in the button comes on when the system is on.

Lane Departure Warning On and Off

Never apply a film or attach any objects to the windscreen that could obstruct the Lane Departure Warning camera’s field of vision. Scratches, nicks, and other damage to the windscreen within the Lane Departure Warning camera’s field of vision can cause the system to operate abnormally. If this occurs, we recommend that you replace the windscreen with a genuine Honda replacement windscreen. Making even minor repairs within the camera’s field of vision or installing an aftermarket replacement windscreen may also cause the system to operate abnormally.

After replacing the windscreen, have a dealer recalibrate the camera. Proper calibration of the Lane Departure Warning camera is necessary for the system to operate properly.

Do not place an object on the top of the instrument panel. It may reflect onto the windscreen and prevent the system from detecting lane lines properly.

To help to reduce the likelihood that high interior temperatures will cause the camera system to shut off, when parking, find a shady area or face the front of the vehicle away from the sun.

If you use a reflective sun shade, do not allow it to cover the camera housing. Covering the camera can concentrate heat on the camera.

Continued
Lane Departure Warning Conditions and Limitations

The system may not properly detect lane markings and the position of your vehicle under certain conditions. Some examples of these conditions are listed below.

- Environmental conditions
  - Driving in bad weather (rain, fog, snow, etc.).
  - Sudden changes between light and dark, such as an entrance or exit of a tunnel.
  - There is little contrast between lane lines and the roadway surface.
  - Driving into low sunlight (e.g., at dawn or dusk).
  - Strong light is reflected onto the roadway.
  - Driving in the shadows of trees, buildings, etc.
  - Shadows of adjacent objects are parallel to lane markings.
  - Roadway objects or structures are misinterpreted as lane markers.
  - Reflections on the interior of the front windshield.

Lane Departure Warning Camera

If the message appears:
- Use the climate control system to cool down the interior and, if necessary, the demister mode when windows are fogged.
- Start driving the vehicle to lower the windscreen temperature, which cools down the area around the Lane Departure Warning camera.

If the message appears:
Park your vehicle in a safe place. Wipe away debris blocking the windscreen, then start driving again. If the message remains on even after driving for a while with the clean windscreen, have your vehicle checked by a dealer.
When Driving

Lane Departure Warning

Roadway conditions
- Driving on a snowy or wet roadway (obscured lane marking, vehicle tracks, reflected lights, road spray, high contrast).
- Driving on a road with temporary lane markings.
- Faint, multiple, or varied lane markings are visible on the roadway due to road repairs or old lane markings.
- The roadway has merging, split, or crossing lines (e.g., such as at an intersection or crosswalk).
- The lane markings are extremely narrow, wide, or changing.
- The vehicle in front of you is driving near the lane lines.
- The road is hilly or the vehicle is approaching the crest of a hill.
- Driving on rough or unpaved roads, or over bumpy surfaces.
- When objects on the road (curb, guard rail, pylons, etc.) are recognised as white lines (or yellow lines).
- When driving on roads with double lines.

Vehicle conditions
- Headlight lenses are dirty or the headlights are not properly adjusted.
- The outside of the windscreen is streaked or blocked by dirt, mud, leaves, wet snow, etc.
- The inside of the windscreen is fogged.
- The camera temperature gets too hot.
- An abnormal tyre or wheel condition (wrong sized, varied size or construction, improperly inflated, compact spare tyre*, etc.).
- The vehicle is tilted due to a heavy load or suspension modifications.
- When tyre chains are installed.

* Not available on all models
When Driving

Traffic Sign Recognition System

Traffic Sign Recognition System

Reminds you of road sign information, such as the current speed limit and that overtaking is prohibited, your vehicle has just passed through, showing it on the multi-information display.

How the System Works

When the camera located behind the rearview mirror captures traffic signs while driving, the system displays the ones that are recognised as designated for your vehicle. The sign icon will be displayed until the vehicle reaches a predetermined time and distance.

The sign icon also may switch to another one, or disappear when:

- The end of speed limit or other designated limit is detected.
- Your vehicle enters/exits motorway or highway.
- You make a turn with a turn signal at an intersection.

How the System Works

Traffic Sign Recognition System

The system is designed to detect signs that follow the Vienna Convention standards. Not all signs may be displayed, but any signs posted on roadsides should not be ignored. The system does not work on the designated traffic signs of all the countries you travel, nor in all situations. Do not rely too much on the system. Always drive at speeds appropriate for the road conditions.

Never apply a film or attach any objects to the windscreen that could obstruct the camera's field of vision and cause the system to operate abnormally. Scratches, nicks, and other damage to the windscreen within the camera's field of vision can cause the system to operate abnormally. If this occurs, we recommend that you replace the windscreen with a genuine Honda replacement windscreen. Making even minor repairs within the camera's field of vision or installing an aftermarket replacement windscreen may also cause the system to operate abnormally. After replacing the windscreen, have a dealer recalibrate the camera. Proper calibration of the camera is necessary for the system to operate properly.

* Not available on all models
If the system does not detect any traffic signs while you are driving, the image below may appear.

If  appears, the traffic sign recognition system does not work, and  will be displayed.

- Use the climate control system to cool down the interior and, if necessary, also use demister mode with the air flow directed towards the camera.
- Start driving the vehicle to lower the windscreen temperature, which cools down the area around the camera.

If  appears, the traffic sign recognition system does not work, and  will be displayed.

Park your vehicle in a safe place, and clean the windscreen. If the message does not disappear after you have cleaned the windscreen and driven for a while, have your vehicle checked by a dealer.

* Not available on all models
When Driving

Traffic Sign Recognition System* 

Traffic Sign Recognition System Conditions and Limitations

The traffic sign recognition system may not be able to recognize the traffic sign in the following cases.

Vehicle conditions

- Headlight lenses are dirty or the headlights are not properly adjusted.
- The outside of the windscreen is blocked by dirt, mud, leaves, wet snow, etc.
- The inside of the windscreen is fogged.
- There are portions remaining to be wiped.
- An abnormal tyre or wheel condition (wrong sized, varied size or construction, improperly inflated, compact spare tyre*, etc.).
- The vehicle is tilted due to a heavy load or suspension modifications.

Environmental conditions

- Driving into low sunlight (e.g., at dawn or dusk).
- Strong light is reflected onto the roadway.
- Sudden changes between light and dark, such as an entrance or exit of a tunnel.
- When you drive in the shadows of trees, buildings, etc.
- Driving at night, in dark areas such as long tunnels.
- Driving in bad weather (rain, fog, snow, etc.).
- A vehicle in front of you is travelling flying up spray or snow.

Traffic Sign Recognition System Conditions and Limitations

When the traffic sign recognition system malfunctions, appears on the multi-information display. If this message does not disappear, have your vehicle checked by a dealer.

* Not available on all models
The position or the condition of the traffic sign
- A sign is hard to be found since it is in a complicated area.
- A sign is located far away from your vehicle.
- A sign is located where the beam of the headlight is hard to reach.
- A sign is on a corner or bend in the road.
- Faded or bent signs.
- Rotated or damaged signs.
- A sign is covered with mud, snow, or frost.
- A part of the sign is hidden by the trees, or the sign itself is hidden by a vehicle and others.
- Light (a streetlight) or a shadow is reflected on the surface of the sign.
- A sign is too bright or too dark (an electric sign).
- A sign of a small size.

Other conditions
- When you are driving at a high speed.
When Driving

The traffic sign recognition system may not operate correctly, such as displaying a sign that does not follow the actual regulation for the roadway or does not exist at all in the following cases.

- A speed limit sign may display at a higher or lower speed than the actual speed limit.
- There is a supplementary sign with further information such as weather, time, vehicle type, etc.
- Figures on the sign are hard to read (electric sign, numbers on the sign are blurred, etc.).
- A sign is in the vicinity of the lane you are driving even though it is not for the lane (speed limit sign situated at the junction between the side road and the main road, etc.).
- There are things that look similar to the colour or shape of the recognition object (similar sign, electric sign, signboard, structure, etc.).
- A lorry or another larger vehicle with a sticker of the speed limit sign on the back are travelling in front of you.
**Signs Displayed on the Multi-Information Display**

Two traffic signs can be simultaneously displayed next to each other when detected. The speed limit sign icon is displayed on the right half of the screen. The overtaking prohibition sign icon appears on the left. Any additional sign that indicates speed limit based on weather (rain, snow, etc.) or specific period of time can appear on either side.

- **When main mode is selected**
  - Overtaking Prohibition Sign*1
  - Speed Limit Sign
  - Additional Speed Limit Sign Based on Conditions*2

- **When main mode is not selected**
  - Overtaking Prohibition Sign*1
  - Speed Limit Sign

Depending on situation, *1 can be replaced with *2, or *2 can appear on the right side.

*Continued*
Selecting to display traffic signs when main mode is off
You can continue displaying reduced-size traffic sign icon on the multi-information display even while the main mode is not selected.

Customized Features P. 144
Vehicle Stability Assist (VSA) System

VSA helps to stabilise the vehicle during cornering if the vehicle turns more or less than what was intended. It also assists in maintaining traction on slippery surfaces. It does so by regulating engine output and selectively applying the brakes.

■ VSA Operation

When VSA activates, you may notice that the engine does not respond to the accelerator. You may also notice some noise from the hydraulic system. You will also see the indicator blink.

VSA Operation

VSA may not function properly if tyre types and sizes are mixed. Make sure to use the same size and type of tyre, and the air pressures are as specified.

When the VSA system indicator comes on and stays on while driving, there may be a problem with the system. While this may not interfere with normal driving, have your vehicle checked by a dealer immediately.

VSA cannot enhance stability in all driving situations and does not control the entire braking system. You still need to drive and corner at speeds appropriate for the conditions and always leave a sufficient margin of safety.

The main function of the VSA system is generally known as Electronic Stability Control (ESC). The system also includes a traction control function.
When Driving

Vehicle Stability Assist (VSA) System

VSA On and OFF

This button is on the driver side control panel. To partially disable VSA functionality/features, press and hold it until you hear a beep.

Your vehicle will have normal braking and cornering ability, but traction control function will be less effective.

To restore VSA functionality/features, press the (VSA OFF) button until you hear a beep.

VSA is turned on every time you start the engine, even if you turned it off the last time you drove the vehicle.

Vehicle Stability Assist (VSA) System

In certain unusual conditions when your vehicle gets stuck in shallow mud or fresh snow, it may be easier to free it with the VSA temporarily switched off.

When the VSA button is pressed, the traction control function becomes less effective. This allows for the wheels to spin more freely at low speed. You should only attempt to free your vehicle with the VSA off if you are not able to free it when the VSA is on.

Immediately after freeing your vehicle, be sure to switch VSA on again. We do not recommend driving your vehicle with the VSA system switched off.

You may hear a motor sound coming from the engine compartment while system checks are being performed immediately after starting the engine or while driving. This is normal.
Agile Handling Assist*

Lightly brakes each of the front and rear wheels, as needed, when you turn the steering wheel, and helps to support the vehicle's stability and performance during cornering.

* Not available on all models
When Driving

Deflation Warning System

Instead of directly measuring the pressure in each tyre, the deflation warning system on this vehicle monitors and compares the rolling radius and rotational characteristics of each wheel and tyre while you are driving to determine if one or more tyres are significantly under-inflated. This will cause the low tyre pressure/deflation warning system indicator to come on and a message to appear on the multi-information display.

Deflation Warning System Initialisation

You must start deflation warning system initialisation every time you:
- Adjust the pressure in one or more tyres.
- Rotate the tyres.
- Replace one or more tyres.

Before initialising the deflation warning system:
- Set the cold tyre pressure in all four tyres.

Make sure:
- The vehicle is at a complete stop.

Manual transmission models
- The parking brake is applied.

Continuously variable transmission models
- The shift lever is in [P].

All models
- The ignition switch is in ON [II]*1.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

Deflation Warning System

The system does not monitor the tyres when driving at low speed.

Conditions such as low ambient temperature and altitude change directly affect tyre pressure and can trigger the low tyre pressure/deflation warning system indicator to come on.

Tyre pressure checked and inflated in:
- Warm weather can become under-inflated in colder weather.
- Cold weather can become over-inflated in warmer weather.

The low tyre pressure indicator will not come on as a result of over inflation.

The deflation warning system may not function properly if tyre types and sizes are mixed. Make sure to use the same size and type of tyre.

Checking and Maintaining Tyres P. 569

The low tyre pressure/deflation warning system indicator may come on with a delay or may not come on at all when:
- You rapidly accelerate, decelerate, or turn the steering wheel.
- You drive on snowy or slippery roads.
- Snow chains are used.

The low tyre pressure/deflation warning system indicator may come on under the following conditions:
- A compact spare tyre* is used.
- There is a heavier and uneven load on the tyres, such as when towing a trailer, than the condition at initialisation.
- Snow chains are used.
You can initialise the system from the customized features on the multi-information display.

1. Press the \(\uparrow/\downarrow\) button until Customise appears on the display, then press the SEL/RESET button.

2. Press the \(\uparrow/\downarrow\) button until Deflation Warning System appears on the display.

3. Press the SEL/RESET button.
   - The display switches to the customization setup screen, where you can select Cancel or Initialise.

4. Press the \(\uparrow/\downarrow\) button and select Initialise, then press the SEL/RESET button.
   - Completed screen appears, then the display returns to the customization menu screen.
   - The initialisation process finishes automatically.

---

**Deflation Warning System Initialisation**

- Deflation Warning System cannot be initialised if a compact spare tyre* is installed.
- The initialisation process requires approximately 30 minutes of cumulative driving at speeds between 40–100 km/h (25–62 mph).
- During this period, if the ignition is turned on and the vehicle is not moved within 45 seconds, you may notice the low tyre pressure indicator comes on briefly. This is normal and indicates that the initialisation process is not yet complete.

If the snow chains are installed, remove them before initialising the deflation warning system.

If the low tyre pressure/deflation warning system indicator comes on even when the properly inflated specified regular tyres are installed, have your vehicle checked by a dealer.

We recommend that the tyres be replaced with the same brand, model, and size as the originals. Ask a dealer for details.

---

* Not available on all models
When Driving

Adjusting Headlight Distribution

Driving the right-hand type vehicle in right-hand traffic, or the left-hand type vehicle in left-hand traffic causes headlight glare to oncoming vehicles. You need to alter the headlight beam distribution using masking tape.

1. Prepare for two pieces of masking tape as shown.
   ▶️ Use masking tape that can shut out light, such as seal type waterproof vinyl.
2. Affix the tape to the lens as shown.

Be careful not to adhere the tape to an incorrect location. If the headlight beam is distributed incorrectly, it may not comply with your country’s legal requirements. Ask a dealer for details.
Driving

Braking

Brake System

- **Parking Brake**

Use the parking brake to keep the vehicle stationary when parked. When the parking brake is applied, you can manually or automatically release it.

**To apply**
The electric parking brake can be applied any time the vehicle has battery, no matter which position the ignition switch*1 is in.

Pull the electric parking brake switch up gently and securely.
- The electric parking brake indicator comes on.

**To release**
The ignition switch must be in ON (II)*1 in order to release the electric parking brake.

1. Depress the brake pedal.
2. Press the electric parking brake switch.
- The electric parking brake indicator goes off.

Manually releasing the parking brake using the switch helps your vehicle start slowly and smoothly when facing down hill on steep hills.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

---

Parking Brake

You may hear the electric parking brake system motor operating from the rear wheel area when you apply or release the parking brake. This is normal.

The brake pedal may slightly move due to the electric parking brake system operation when you apply or release the parking brake. This is normal.

You cannot apply or release the parking brake if the battery goes dead.

Jump Starting P. 625

If you pull up and hold the electric parking brake switch while driving, the brakes on all four wheels are applied by the VSA system until the vehicle comes to a stop. The electric parking brake then applies, and the switch should be released.

In the following situations, the parking brake automatically operates.

- When the vehicle stops with the automatic brake hold system activated for more than 10 minutes.
- When the driver’s seat belt is unfastened while your vehicle is stopped and automatic brake hold is applied.
- When the engine is turned off, except by Auto Idle Stop system*, while the brake hold system is applied.
- When there is a problem with automatic brake hold system while the brake hold is applied.

---

* Not available on all models
To release automatically
Use the accelerator pedal to release the parking brake when you are starting the vehicle facing uphill, or in a traffic jam.

Continuous variable transmission models
Depressing the accelerator pedal releases the parking brake.

Manual transmission models
Depressing the accelerator pedal while releasing the clutch pedal releases the parking brake.

Gently depress the accelerator pedal. When on a hill, it may require more accelerator input to release.

The electric parking brake indicator goes off.

The parking brake automatically releases as you depress the accelerator pedal when:
• You are wearing the driver’s seat belt.
• The engine is running.
• The transmission is not in P or N.

If the parking brake cannot be released automatically, release it manually.

When the vehicle is travelling uphill, the accelerator pedal may need to be pressed farther to automatically release the electric parking brake.

The parking brake cannot be released automatically while the following indicators are on:
• Malfunction indicator lamp
• Transmission system indicator

The parking brake may not be released automatically while the following indicators are on:
• Electric parking brake system indicator
• VSA system indicator
• ABS indicator
• Supplemental restraint system indicator
Braking

Gently depress the accelerator pedal and release the clutch pedal.

• The electric parking brake indicator goes off.

The parking brake automatically releases as you depress the accelerator pedal when:
• You are wearing the driver’s seat belt.
• The engine is running.
• The transmission is not in N.

Foot Brake

Your vehicle is equipped with disc brakes at all four wheels. A vacuum power assist helps to reduce the effort needed on the brake pedal. The brake assist system increases the stopping force when you depress the brake pedal hard in an emergency situation. The anti-lock brake system (ABS) helps you to retain steering control when braking very hard.

Brake Assist System P. 484
Anti-lock Brake System (ABS) P. 483

Parking Brake

The clutch pedal is fully depressed, and the clutch pedal is released after the accelerator pedal is gently depressed.

Foot Brake

Check the brakes after driving through deep water, or if there is a buildup of road surface water. If necessary, dry the brakes by lightly depressing the pedal several times.

If you hear a continuous metallic friction sound when applying the brakes, the brake pads need to be replaced. Have your vehicle checked by a dealer.

Constantly using the brake pedal while going down a long hill builds up heat, which reduces the brake effectiveness. Apply engine braking by taking your foot off the accelerator pedal and downshifting to a lower gear/speed position. With manual transmission use a lower gear for greater engine braking.

Do not rest your foot on the brake pedal while driving, as it will lightly apply the brakes and cause them to lose effectiveness over time and reduce pad life. It will also confuse drivers behind you.
Braking

Brake System

Automatic Brake Hold

Continuously variable transmission models

Keeps the brake applied after releasing the brake pedal until the accelerator pedal is pressed. You can use this system while the vehicle is temporarily stopped, like at traffic lights and in heavy traffic.

Turning on the system

Fasten your seat belt properly, then start the engine. Press the automatic brake hold button.
- The automatic brake hold system indicator comes on. The system is turned on.

Activating the system

Depress the brake pedal to come to a complete stop. The shift lever must be in other than P or R.
- The automatic brake hold indicator comes on. Braking is kept for up to 10 minutes.
- Release the brake pedal after the automatic brake hold indicator comes on.

 Cancelling the system

Depress the accelerator pedal while the shift lever is in other than P or N. The system is cancelled and the vehicle starts to move.
- The automatic brake hold indicator goes off. The system continues to be on.

WARNING

Activating the automatic brake hold system on steep hills or slippery roads may still allow the vehicle to move if you remove your foot from the brake pedal.

If a vehicle unexpectedly moves, it may cause a crash resulting in serious injury or death.

Never activate the automatic brake hold system or rely on it to keep a vehicle from moving when stopped on a steep hill or slippery roads.

WARNING

Using the automatic brake hold system to park the vehicle may result in the vehicle unexpectedly moving.

If a vehicle moves unexpectedly, it may cause a crash, resulting in serious injury or death.

Never leave the vehicle when braking is temporarily kept by automatic brake hold and always park the vehicle by putting the transmission in P and applying the parking brake.
Manual transmission models

Keeps the brake applied after releasing the brake pedal until you shift into one of the gears other than [N] and:
- Release the clutch pedal on a level road or when facing downhill.
- Release the clutch pedal and depress the accelerator pedal when facing uphill.

You can use this system while the vehicle is temporarily stopped, such as when you stop at a traffic light.

**Turning on the system**

- Fasten your seat belt properly, then start the engine. Press the automatic brake hold button.
- The automatic brake hold system indicator comes on. The system is turned on.

**Activating the system**

- Depress the brake pedal to come to a complete stop.
- The automatic brake hold indicator comes on. Braking is kept for up to 10 minutes.
- Release the brake pedal after the automatic brake hold indicator comes on.

**Cancelling the system**

- Shift into one of the gears other than [N] and:
  - Release the clutch pedal on a level road or when facing downhill.
  - Release the clutch pedal and depress the accelerator pedal when facing uphill.

The system is cancelled and the vehicle starts to move.
- The automatic brake hold indicator goes off.
- The system continues to be on.

Continued
Braking

Brake System

- The system automatically cancels when:
  - You engage the parking brake.

Continuously variable transmission models
- You depress the brake pedal and move the shift lever to P or R.

- The system automatically cancels and the parking brake is applied when:
  - Braking is kept for more than 10 minutes.
  - The driver’s seat belt is unfastened.
  - The engine is turned off.
  - There is a problem with automatic brake hold system.

Manual transmission models
- The engine stalls while the automatic brake hold is active except during the Auto Idle Stop is in operation.

Turning off the automatic brake hold system

While the system is on, press the automatic brake hold button again.
- The automatic brake hold system indicator goes off.

If you want to turn off automatic brake hold while the system is in operation, press the automatic brake hold button with the brake pedal depressed.

Automatic Brake Hold

While the system is activated, you can turn off the engine or park the vehicle through the same procedure as you normally do.

When Stopped P. 491

Whether the system is on, or the system is activated, the automatic brake hold turns off once the engine is off.

Manual transmission models
- The system turns off if the engine stalls while automatic brake hold is active or the system is on.
- The system turns on again once the engine automatically restarts.

Starting to Drive P. 415, 418

Turning off the automatic brake hold system

Make sure to turn off the automatic brake hold system before using an automated car wash.

You may hear an operating noise if the vehicle moves while the automatic brake hold system is in operation.
Anti-lock Brake System (ABS)

ABS

Helps to prevent the wheels from locking up, and helps you to retain steering control by pumping the brakes rapidly, much faster than you.

The electronic brake distribution (EBD) system, which is part of the ABS, also balances the front-to-rear braking distribution according to vehicle loading.

You should never pump the brake pedal. Let the ABS work for you by always keeping firm, steady pressure on the brake pedal. This is sometimes referred to as “stomp and steer.”

ABS operation

The brake pedal may pulsate slightly when the ABS is working. Depress the brake pedal and keep holding the pedal firmly down. On dry pavement, you will need to press on the brake pedal very hard before the ABS activates. However, you may feel the ABS activate immediately if you are trying to stop on snow or ice.

ABS may activate when you depress the brake pedal when driving on:
- Wet or snow covered roads.
- Roads paved with stone.
- Roads with uneven surfaces, such as potholes, cracks, manholes, etc.

When the vehicle speed goes under 10 km/h (6 mph), the ABS stops.

ANTI-lock Brake System (ABS)

NOTICE

The ABS may not function correctly if you use an incorrect tyre type and size.

If the ABS indicator comes on while driving, there may be a problem with the system. While normal braking will not be affected, there is a possibility that the ABS will not be operating. Have your vehicle checked by a dealer immediately.

The ABS is not designed for the purpose of reducing the time or distance it takes for a vehicle to stop: It is designed to limit brake lockup which can lead to skidding and loss of steering control.

In the following cases, your vehicle may need more distance to stop than a vehicle without the ABS:
- You are driving on rough or uneven road surfaces, such as gravel or snow.
- The tyres are equipped with tyre chains.

The following may be observed with the ABS system:
- Motor sounds coming from the engine compartment when the brakes are applied, or when system checks are being performed after the engine has been started and while the vehicle accelerates.
- Brake pedal and/or the vehicle body vibration when ABS activates.

These vibrations and sounds are normal to ABS systems and are no cause for concern.
Brake Assist System

Is designed to assist the driver by generating greater braking force when you depress the brake pedal hard during emergency braking.

■ Brake assist system operation
Depress the brake pedal firmly for more powerful braking.

When brake assist operates, the pedal may wiggle slightly and an operating noise may be heard. This is normal. Keep holding the brake pedal firmly down.
City-Brake Active system

Can assist you when driving at a low speed, and there is a possibility of your vehicle colliding with a vehicle detected right in front of yours. The City-Brake Active system is designed to alert you when a potential collision is determined, as well as to reduce your vehicle speed when a collision is deemed unavoidable to help to minimise collision severity.

How the System Works

A laser sensor starts to monitor if there is a vehicle in front of you when your vehicle speed is between about 5 km/h (3 mph) and about 32 km/h (20 mph).

The laser sensor is behind the rearview mirror.

The system activates when the speed difference between your vehicle and a vehicle detected in front of you is about 5 km/h (3 mph) to 32 km/h (20 mph) with a high chance of collision.

The system doesn’t activate when shift position is R.

WARNING

Do not rely on the city-brake active system to avoid every possible frontal collision.

Failure to pay close attention to a vehicle ahead of you, and to operate the brake pedal appropriately according to the situation can cause serious injury or death.

For the system to work properly:
• Always keep the upper part of the windscreen clean. Wipe away any dirt, ice, frost, etc.
• Do not impact the area around the laser sensor when cleaning the windscreen.
• Do not remove the laser sensor from the unit.

Manual transmission models

When the vehicle comes to a stop with the system’s automatic braking, the engine may stop.
To start the engine again, follow the standard procedure.

Starting the Engine P. 413, 416
Braking

City-Brake Active system

Collision Alert Stages

The beeper sounds, and a  blinks on the multi-information display, and hard braking is applied when a possible collision becomes likely unavoidable.

This automatic braking with the system activated is cancelled after the vehicle comes to a complete stop.

Apply the brakes accordingly.

A message indicating that the system has activated appears on the multi-information display after the vehicle is stopped.

Multi-Information Display Warning and Information Messages P. 116

The system may be cancelled if you operate the brake pedal, the accelerator pedal, or the steering wheel to avoid the collision.

City-Brake Active system

The system may not activate or may not detect a vehicle in front of your vehicle under the following conditions:

• A vehicle in front of you is diagonally, horizontally, or frontally positioned.
• The distance between your vehicle and the vehicle ahead of you is too short.
• The speed difference between your vehicle and a vehicle ahead of you is large.
• A vehicle cuts in front of you, and brakes suddenly.
• You rapidly accelerate your vehicle, getting closer to a vehicle ahead.
• An oncoming vehicle suddenly drifts in front of you.
• Your vehicle suddenly drifts into the oncoming lane.
• A vehicle suddenly crosses in front of you at intersections.
• When driving in bad weather (heavy rain, fog, snow, etc.).
• When driving on a curved or winding road.
• A vehicle in front of you is extremely dirty, making it difficult to reflect radio waves well.
• You depress the brake pedal or turn the steering wheel to avoid a collision.
• A vehicle ahead of you is a motorcycle or other small vehicle the sensor cannot detect properly.
• The upper part of the windscreen around the laser sensor is covered with dirt, ice frost, etc.

The system may not activate while you are fully depressing the accelerator pedal.
The System On and Off

You can turn the system on and off using the multi-information display.

Customized Features P. 144

When the system is off, the CTBA indicator in the instrument panel comes on.

City-Brake Active system is turned on every time you turn the ignition switch to ON \(^{1}\), even if you turned it off the last time you drove the vehicle.

City-Brake Active system

The system may automatically shut off, and the CTBA indicator can come on and the message can appear on the multi-information display when:

- The temperature around the laser sensor on the upper part of the windscreen becomes high.
- The area around the laser sensor, which is located in the upper part of the windscreen, is covered with obstacles, such as dirt, ice and frost.
- The bonnet is covered with obstacles such as snow.

Stop your vehicle in a safe place, and

- Use the air conditioning system to cool down the interior if the laser sensor temperature is high.
- Remove any obstacles such as dirt and snow from the windscreen and bonnet.

Indicators P. 114

Once the conditions that caused the system to shut off improve, the system comes back on.

Turn off the system when:

- You use a dynamometer or put the wheels on a roller.
- Driving off road or on a mountainous road obstructed with branches and leaves.

\(^{1}\): Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Braking

City-Brake Active system

With Little Chance of a Collision
The system may activate even when you are aware of a vehicle ahead of you, or when there is no vehicle ahead. Some examples of this are:

When passing
Your vehicle approaches another vehicle ahead of you and you change lanes to pass.

At an intersection
Your vehicle approaches or passes another vehicle that is making a left or right turn.

Through a low bridge
You drive under a low or narrow bridge.

Speed bumps, road work sites, train tracks, roadside objects, etc.
You drive over speed bumps, steel road plates, etc., or your vehicle approaches train tracks or roadside objects, such as a traffic sign and guard rail, on a curve.

When parking
Your vehicle approaches a stationary vehicle or wall.

City-Brake Active system
Take your vehicle to a dealer if you need the laser sensor or area around it to be repaired, or removed, or the area around the laser sensor is strongly impacted.

Do not alter your vehicle’s suspension. Changing the vehicle height prevents the system to work properly.

Make sure to use the same size and type of tyre for all four wheels. Use the tyres that are all in about the same condition with adequate tread. If not, the system may operate abnormally.

The system may not work properly if:
• Your vehicle has heavy load in the rear.
• Tyres are over- or underinflated.

Driving
### About the Laser Equipped in the System

The City-Brake Active system unit, including the laser sensor, is located behind the rearview mirror.

Following lists the classified specifications of the laser used in this system according to the IEC requirements. The same information can be found in the IEC60825-1 standard labels.

<table>
<thead>
<tr>
<th>Laser classification</th>
<th></th>

</tr>
</tbody>
</table>

#### Laser Classification Label

-INVISIBLE LASER RADIATION DO NOT VIEW DIRECTLY WITH OPTICAL INSTRUMENTS (MAGNIFIERS) CLASS 1M LASER PRODUCT-

#### Laser Explanation Label

Max average power: 45 mW  
Pulse duration: 33 ns  
Wavelength: 905 nm  
IEC 60825-1:2007  

---

**WARNING**

Handling the laser sensor improperly can lead to eye injury.

To avoid eye injury, keep the following:
- Do not take the sensor apart from the unit.
- Never look at the sensor within a 100 mm distance using an optical device, such as a magnified glass, microscopes, and an object lens.
Emergency Stop Signal

Activates when you brake hard while driving at 60 km/h (37 mph) or above to alert drivers behind you about sudden braking by rapidly flashing hazard warning lights. This may help to alert drivers behind you to take appropriate means to avoid a possible collision with your vehicle.

■ When the system activates:

1. Hard Braking
2. Brake Lights Come On
3. Hazard Warning Lights Flash
4. Hazard Warning Indicators Blink

The hazard warning lights stop flashing when:
- You release the brake pedal.
- The ABS is deactivated.
- Your vehicle's decelerating speed becomes moderate.
- You press the hazard warning button.

Emergency Stop Signal

The emergency stop signal is not a system that can prevent a possible rear-end collision caused by your hard braking. It flashes the hazard warning lights at the time you are braking hard. It is always recommended to avoid hard braking unless it is absolutely necessary.

The emergency stop signal does not activate with the hazard warning button pressed in.

If the ABS stops working for a certain period of the during braking, the emergency stop signal may not activate at all.
Parking Your Vehicle

When Stopped

1. Depress the brake pedal firmly.
2. With the brake pedal depressed, pull up the electric parking brake switch slowly, but fully.

Continuously variable transmission models
3. Change the shift position to P.

Manual transmission models
3. Move the shift lever to R or 1.

Diesel models
4. Keep idling the engine for about 10 seconds.

All models
5. Turn off the engine.
   - The electric parking brake indicator goes off in about 15 seconds.

Always confirm the electric parking brake is set, in particular if you are parked on an incline.

PARKING

Do not park your vehicle near flammable objects, such as dry grass, oil, or timber. Heat from the exhaust can cause a fire.

When Stopped

Continuously variable transmission models

The vehicle can roll away if left unattended without confirming that Park is engaged.

A vehicle that rolls away could cause a crash resulting in serious injury or death.

Always keep your foot on the brake pedal until you have confirmed that P is shown on the shift position indicator.

NOTICE

Continuously variable transmission models

The following can damage the transmission:
- Depressing the accelerator and brake pedals simultaneously.
- Holding the vehicle in place when facing uphill by depressing the accelerator pedal.
- Moving the shift lever into P before the vehicle stops completely.

Continued
Parking Your Vehicle

When Stopped

In extremely cold temperatures, the parking brake may freeze up if applied. If such temperatures are expected, do not apply the parking brake but, if parking on a slope, either turn the front wheels so they will contact the curb if the vehicle rolls down the slope or block the wheels to keep the vehicle from moving. If you do not take either precaution, the vehicle may roll unexpectedly, leading to a crash.

**Diesel models**

Keep idling the engine for a few minutes if your vehicle has towed a trailer.

The engine idling may be prohibited in some countries. Check and follow your local legal requirements.
Parking Sensor System*

The corner and centre sensors monitor obstacles near your vehicle, and the beeper, audio/information screen and multi-information display let you know the approximate distance between your vehicle and the obstacle.

■ The sensor location and range

<table>
<thead>
<tr>
<th>Front Corner Sensors</th>
<th>Front Centre Sensors</th>

- Front: Within about 100 cm (39 in) or less
- Rear: Within about 110 cm (43 in) or less
- Within about 60 cm (24 in) or less

*Not available on all models

Even when the system is on, always confirm if there is no obstacle near your vehicle before parking.

The system may not work properly when:
- The sensors are covered with snow, ice, mud, or dirt.
- The vehicle is on uneven surface, such as grass, bumps, or a hill.
- The vehicle has been out in hot or cold weather.
- The system is affected by devices that emit ultrasonic waves.
- Driving in bad weather.

The system may not sense:
- Thin or low objects.
- Sonic-absorptive materials, such as snow, cotton, or sponge.
- Objects directly under the bumper.

Do not put any accessories on or around the sensors.
Parking sensor system on and off

With the ignition switch in ON [II]*1, press the parking sensor system button to turn on or off the system. The indicator in the button comes on when the system is on.

The front corner and front centre sensors start to detect an obstacle when the shift lever is in any position other than [P] or [R], and the vehicle speed is less than 8 km/h (5 mph).

The front corner, rear corner and rear centre sensors start to detect an obstacle when the shift lever is in [R], and the vehicle speed is less than less than 8 km/h (5 mph).

**Manual transmission models**
You also need to release the parking brake.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
### When the distance between your vehicle and obstacles behind becomes shorter

*1: At this stage, only the centre sensors detect obstacles.
Parking Your Vehicle

Parking Sensor System

Turning off All Rear Sensors

1. Make sure that the parking sensor system is not activated. Turn the ignition switch to LOCK ①.
2. Press and hold the parking sensor system button, and turn the ignition switch to ON ②.
3. Keep pressing the button for 10 seconds. Release the button when the indicator in the button blinks.
4. Press the button again. The indicator in the button goes off.

The beeper sounds twice. The rear sensors are now turned off.

To turn the rear sensors on again, follow the above procedure. The beeper sounds three times when the rear sensors come back on.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Multi-View Rear Camera*

About Your Multi-View Rear Camera

The audio/information screen can display your vehicle’s rear view. The display automatically changes to the rear view when the transmission is put into R. 

Multi-View Rear Camera Display Area

- Approx. 3 m (9.8 ft)
- Approx. 2 m (6.6 ft)
- Approx. 1 m (3.3 ft)
- Tailgate Open Range
- Camera

Guidelines

Bumper

Wide View Mode

Normal View Mode

Top Down View Mode

* Not available on all models

About Your Multi-View Rear Camera

The rear camera view is restricted. You cannot see the corner ends of the bumper or what is underneath the bumper. Its unique lens also makes objects appear closer or farther than they actually are.

Visually confirm that it is safe to drive before backing up. Certain conditions (such as weather, lighting, and high temperatures) may also restrict the rear view. Do not rely on the rearview display which does not give you all information about conditions at the back of your vehicle.

If the camera lens is covered with dirt or moisture, use a soft, moist cloth to keep the lens clean and free of debris.
You can view three different camera modes on the audio/information screen. Touch the appropriate icon to switch the mode.

- Wide view mode
- Normal view mode
- Top down view mode

- If the last used viewing mode was Wide or Normal view mode, the same mode is selected the next time you put the transmission into R.
- If Top down view mode was last used before you turned off the engine, Wide view mode is selected next time you turn the ignition switch to ON and put the transmission into R.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Refueling

Petrol models

Fuel Information

■ Fuel recommendation

EN 228 standards petrol/gasohol fuel
Unleaded premium petrol/gasohol up to E10 (90% petrol and 10% ethanol), research octane number 95 or higher

Your vehicle is designed to operate on premium unleaded petrol with a research octane of 95 or higher. If this octane grade is unavailable, regular unleaded petrol with a research octane of 91 or higher may be used temporarily. Use of regular unleaded petrol can cause metallic knocking noises in the engine and will result in decreased engine performance. The long-term use of regular-grade petrol can lead to engine damage.

■ Fuel tank capacity: 50 L (11.0 Imp gal)

NOTICE
Use of petrol that contains lead presents the following risks:
• Damage to the exhaust system including the catalytic converter
• Damage to the engine and fuel system
• Detrimental effects on the engine and other systems

Oxygenated Fuels
Oxygenated fuels are blended with petrol and ethanol or ether compound. Your vehicle is also designed to operate on oxygenated fuels containing up to 10% ethanol by volume and up to 22% ETBE by volume, based on the EN 228 standards. For more information, ask your dealer.
Fuel Information

**Diesel models**

**Fuel Information**

- **Fuel recommendation**
  
  **EN 590 standard diesel fuel**

  Select the proper fuel of clean and good quality according to the regional and climate condition. Use of improper fuel can reduce engine power.

- **Fuel tank capacity: 50 L (11.0 Imp gal)**

  **Notice**

  Serious damage may occur if petrol is used in diesel engine.

  Your vehicle is not designed to use Biodiesel (pure or high concentration more than specified by EN590). Consult a dealer for more information.

  Never use the heating oil and marine diesel fuel.

  We recommend to replace the fuel filter before starting to drive if you have parked your vehicle for an extended period. The fuel filter may become clogged earlier than usual.
How to Refuel

1. Stop your vehicle with the service station pump on the left side of the vehicle in the rear.
2. Turn off the engine.
3. Pull on the fuel fill door release handle under the driver’s side lower outside corner of the dashboard.
   - The fuel fill door opens.
4. Remove the fuel fill cap slowly. If you hear a release of air, wait until this stops, then turn the knob slowly to open the fuel fill cap.
5. Place the fuel fill cap in the holder.
6. Insert the filler nozzle fully.
   - When the tank is full, the fuel nozzle will click off automatically. This leaves space in the fuel tank in case the fuel expands with a change in the temperature.
7. After filling, replace the fuel fill cap, tightening it until you hear it click at least once.
   - Shut the fuel fill door by hand.

Petrol models

How to Refuel

1. Stop your vehicle with the service station pump on the left side of the vehicle in the rear.
2. Turn off the engine.
3. Pull on the fuel fill door release handle under the driver’s side lower outside corner of the dashboard.
   - The fuel fill door opens.
4. Remove the fuel fill cap slowly. If you hear a release of air, wait until this stops, then turn the knob slowly to open the fuel fill cap.
5. Place the fuel fill cap in the holder.
6. Insert the filler nozzle fully.
   - When the tank is full, the fuel nozzle will click off automatically. This leaves space in the fuel tank in case the fuel expands with a change in the temperature.
7. After filling, replace the fuel fill cap, tightening it until you hear it click at least once.
   - Shut the fuel fill door by hand.

2. Turn off the engine.
3. Pull on the fuel fill door release handle under the driver’s side lower outside corner of the dashboard.
   - The fuel fill door opens.
4. Remove the fuel fill cap slowly. If you hear a release of air, wait until this stops, then turn the knob slowly to open the fuel fill cap.
5. Place the fuel fill cap in the holder.
6. Insert the filler nozzle fully.
   - When the tank is full, the fuel nozzle will click off automatically. This leaves space in the fuel tank in case the fuel expands with a change in the temperature.
7. After filling, replace the fuel fill cap, tightening it until you hear it click at least once.
   - Shut the fuel fill door by hand.

Petrol is highly flammable and explosive. You can be burned or seriously injured when handling fuel.

- Stop the engine, and keep heat, sparks, and flame away.
- Handle fuel only outdoors.
- Wipe up spills immediately.

The filler nozzle automatically stops to leave space in the fuel tank so that fuel does not overflow as a result of changes in air temperature.

Do not continue to add fuel after the filler nozzle has automatically stopped. Additional fuel can exceed the full tank capacity.
Refueling How to Refuel

Your fuel tank is not equipped with a fuel filler cap. You can insert the diesel fuel filler nozzle directly into the fuel filler neck. The tank seals itself again when you pull out the filler nozzle.

1. Stop your vehicle with the service station pump on the left side of the vehicle in the rear.
2. Turn off the engine.
3. Pull on the fuel fill door release handle under the driver’s side lower outside corner of the dashboard.
   ▶ The fuel fill door opens.

Diesel models How to Refuel

Fuel is highly flammable and explosive. You can be burned or seriously injured when handling fuel.

- Stop the engine, and keep heat, sparks, and flame away.
- Handle fuel only outdoors.
- Wipe up spills immediately.

The fuel filler opening is designed to accept only service station filler nozzles for refueling. Use of smaller diameter tubes (e.g., those used to siphon fuel for other uses) or other non-service station devices can damage the area in and around the filler opening.

The filler nozzle automatically stops to leave space in the fuel tank so that fuel does not overflow as a result of changes in air temperature.
4. Place the end of the filler nozzle on the lower part of filler opening, then insert it slowly and fully.
   ▶ Make sure that the end of the filler nozzle goes down along with the filler pipe.
   ▶ Keep the filler nozzle level.
   ▶ When the tank is full, the filler nozzle will click off automatically.
   ▶ After filling, wait about 10 seconds before removing the filler nozzle.

5. Shut the fuel fill door by hand.

How to Refuel

Do not continue to add fuel after the filler nozzle has automatically stopped. Additional fuel can exceed the full tank capacity.

If you have to refuel your vehicle from a portable container, use the funnel provided with your vehicle.

Refueling From a Portable Fuel Container
P. 652

Check if you have picked up the right nozzle. When you cannot insert the filler nozzle even though it is for diesel fuel, use the funnel provided with your vehicle.
Improving Fuel Economy and Reducing CO₂ Emissions

Achieving fuel economy and reducing CO₂ emissions is dependent on several factors, including driving conditions, load weight, idling time, driving habits, and vehicle condition. Depending on these and other factors, you may not achieve the rated fuel economy of this vehicle.

Maintenance and Fuel Economy

You can optimize your fuel economy with proper maintenance of your vehicle. Follow the maintenance schedule and, if necessary, consult your warranty booklet. On vehicles without service reminder system, follow the Maintenance schedule.

- Use engine oil with the viscosity recommended.
- Maintain the specified tyre pressure.
- Do not load the vehicle with excess luggage.
- Keep your vehicle clean. A buildup of snow or mud on your vehicle’s underside adds weight and increases wind resistance.

Direct calculation is the recommended method to determine actual fuel consumed while driving.

\[
\text{L per 100 km} = \frac{\text{100 Litres of fuel}}{\text{Kilometres driven}} = \frac{\text{Miles driven}}{\text{Gallons of fuel}} \times \frac{100 \text{ Litres of fuel}}{\text{Gallons of fuel}}
\]

* Not available on all models
Handling Precautions

The turbocharger is a high-precision device to obtain greater horsepower by delivering a large volume of compressed air into the engine using a turbine driven by the engine’s exhaust gas pressure.

- When the engine is cold just after starting, avoid revving the engine or sudden acceleration.

- Always replace the engine oil and engine oil filter according to the maintenance schedule. The turbine rotates at very high speeds over 100,000 rpm and its temperature reaches over 700°C. It is lubricated and cooled by engine oil. If you fail to replace the engine oil and filter at the scheduled distance or interval, deteriorated engine oil may cause failure such as sticking and abnormal noise of the turbine bearing.

* Not available on all models
Maintenance

This chapter discusses basic maintenance.

Before Performing Maintenance

Inspection and Maintenance

For your safety, perform all listed inspections and maintenance to keep your vehicle in good condition. If you become aware of any abnormality (noise, smell, insufficient brake fluid, oil residue on the ground, etc.), have your vehicle inspected by a dealer. Refer to the Service Book that came with your vehicle/maintenance schedule in this owner’s manual for detailed maintenance and inspection information.

♀ Maintenance Schedule* P. 521

 обязательство первоочередной маркировки

- Types of Inspection and Maintenance

- Daily inspections
Perform inspections before long distance trips, when washing the vehicle, or when refueling.

- Periodic inspections
  - Check the brake/clutch* fluid level monthly.
    ♀ Brake/Clutch* Fluid P. 552
  - Check the tyre pressure monthly. Examine the tread for wear and foreign objects.
    ♀ Checking and Maintaining Tyres P. 569
  - Check the operation of the exterior lights monthly.
    ♀ Replacing Light Bulbs P. 557
  - Check the condition of the wiper blades at least every six months.
    ♀ Checking and Maintaining Wiper Blades P. 565

* Not available on all models
Safety When Performing Maintenance

Some of the most important safety precautions are given here. However, we cannot warn you of every conceivable hazard that can arise in performing maintenance. Only you can decide whether you should perform a given task.

### Maintenance Safety
- To reduce the possibility of fire or explosion, keep cigarettes, sparks, and flames away from the battery and all fuel related parts.
- Never leave rags, towels, or other flammable objects under the bonnet. Heat from the engine and exhaust can ignite them, causing a fire.
- To clean parts, use a commercially available degreaser or parts cleaner, not petrol.
- Wear eye protection and protective clothing when working with the battery or compressed air.
- Engine exhaust contains carbon monoxide, which is poisonous and can kill you. Only operate the engine if there is sufficient ventilation.

### Vehicle Safety
- The vehicle must be in a stationary condition. Make sure your vehicle is parked on level ground, the parking brake is set, and the engine is off.
- Be aware that hot parts can burn you. Make sure to let the engine and exhaust system cool thoroughly before touching vehicle parts.
- Be aware that moving parts can injure you. Do not start the engine unless instructed, and keep your hands and limbs away from moving parts.
- Do not open the bonnet while the Auto Idle Stop function* is activated.

* Not available on all models
Before Performing Maintenance

Parts and Fluids Used in Maintenance Service

The use of Honda genuine parts and fluids is recommended when maintaining and servicing your vehicle. Honda genuine parts are manufactured according to the same high quality standards used in Honda vehicles.

About Your Maintenance Service

If the service reminder system is available in your vehicle, you are informed by the multi-information display when your vehicle’s maintenance services are due. Refer to the service book that came with your vehicle for an explanation of the service item codes that appear on the display.

NOTICE
Do not press the engine cover forcibly. This may damage the engine cover and component parts.

If the service reminder system is not available, follow the maintenance schedules in the service book that came with your vehicle.

If your vehicle is without the service book, follow the maintenance schedule in this owner’s manual.

Pets and Fluids Used in Maintenance Service

Petrol models with turbocharger
Diesel models

Models with service reminder system
If you are planning to take your vehicle outside the service reminder system applied countries, consult a dealer for how to record your service reminder information and schedule your maintenance service under the conditions of that country.

* Not available on all models
Service Reminder System*

Provides information of which service items are to be performed. Service items are represented by a code and icon. The system tells you when to take your vehicle to a dealer by days remaining.

When the next maintenance service timing is near, coming or passed, a warning icon will also appear on the multi-information display every time you turn the ignition switch to ON [II] *1.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

Continued
Displaying the Service Reminder Information

1. Turn the ignition switch to ON [II]*1.
2. Press the ▲▼ (information) button repeatedly until the maintenance item(s) appears on the multi-information display.

The system message indicator (①) comes on along with the service reminder information.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
### Warning Icons and Service Reminder Information on the Multi-Information Display

<th>Explanation</th>
<th>Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>SERVICE DUE SOON</td>
<td><img src="image1" alt="Icon" /></td>
<td>One or more of the service items are required in less than 30 days. The remaining days are estimated based on your driving conditions.</td>
<td>The remaining days will be counted down per day.</td>
</tr>
<tr>
<td>SERVICE DUE NOW</td>
<td><img src="image2" alt="Icon" /></td>
<td>One or more of the service items are required in less than 10 days. The remaining days are estimated based on your driving conditions.</td>
<td>Have the indicated service performed as soon as possible.</td>
</tr>
<tr>
<td>SERVICE OVER DUE</td>
<td><img src="image3" alt="Icon" /></td>
<td>The indicated maintenance service is still not done after the remaining days reach 0.</td>
<td>Your vehicle has passed the service required point. Immediately have the service performed and make sure to reset the service reminder.</td>
</tr>
</tbody>
</table>
Service Reminder Items

Service items displayed on the multi-information display are in code and icon. For an explanation of the service reminder codes and icons, refer to the service book that came with your vehicle.

Availability of the Service Reminder System

Even if the service reminder information appears on the multi-information display while pressing the \( \text{INFO} \) (information) button, this system is not available in some countries. Refer to the service book that came with your vehicle, or ask a dealer if you can use the service reminder system.

Availability of the Service Reminder System

If you are planning to take your vehicle outside the service reminder system applied countries, consult a dealer on how to record your service reminder information and schedule your maintenance service under the conditions of that country.
Resetting the Display

Reset the service reminder information display if you have performed the maintenance service.

1. Turn the ignition switch to ON *1.
2. Go to the Maintenance info. screen.
3. Press the SEL/RESET button.
   - The service reminder information reset mode is displayed on the multi-information display.
4. Select a service code you want to reset with the ▲/▼ button, then press the SEL/RESET button.
   - The service code will disappear.

To cancel the service reminder information reset mode, select Cancel, then press the SEL/RESET button.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

NOTICE

Failure to reset the service reminder information after a maintenance service results in the system showing incorrect maintenance intervals, which can lead to serious mechanical problems.

The dealer will reset the service reminder information display after completing the required maintenance service. If someone other than a dealer performs maintenance service, reset the service reminder information display yourself.
Oil Monitor System*

Models without service reminder system
Petrol models with turbocharger
The oil monitor system indicator notifies you when to change the engine oil, or when to bring your vehicle to a dealer for indicated maintenance services.

* Not available on all models
Displaying the Oil Monitor System Information

Certain maintenance items due soon, along with the estimated remaining oil life, appear on the multi-information display.

You can view them on the oil monitor system information screen at any time.

1. Turn the ignition switch to ON \( \text{II} \)^{1}.
2. Press the \( \uparrow / \downarrow \) (information) button repeatedly until the maintenance item(s) appears on the multi-information display.

The system message indicator (\( \text{I} \)) stays on in the instrument panel after the maintenance period reached. Have the indicated maintenance done by a dealer immediately.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

<tbody>
<tr>
<td>SERVICE DUE SOON</td>
<td>![400km A]</td>
<td>The engine oil, or the oil filter and engine oil are approaching the end of their life.</td>
</tr>
<tr>
<td>SERVICE DUE NOW</td>
<td>![0km A]</td>
<td>The engine oil, or the engine oil and oil filter have almost reached the end of their service life, and the maintenance service item(s) must be inspected and serviced as soon as possible.</td>
</tr>
<tr>
<td>SERVICE OVER DUE</td>
<td>![10km A]</td>
<td>The engine oil, or the oil filter and engine oil have passed their service life. The maintenance service item(s) must be inspected and serviced immediately.</td>
</tr>
</tbody>
</table>
Resetting the Display

Reset the engine oil monitor system information if you have performed the maintenance service.

1. Turn the ignition switch to ON「1」.
2. Go to Vehicle Settings, then go to the Maintenance Info. screen.
3. Press the SEL/RESET button.
   - The reset mode is displayed on the multi-information display.
4. Select Reset with the ▲/▼ button, then press the SEL/RESET button.
   - The service code will disappear.
To cancel the reset mode, select Cancel, then press the SEL/RESET button.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

NOTICE

Failure to reset the engine oil life after a maintenance service results in the system showing incorrect maintenance intervals, which can lead to serious mechanical problems.

The dealer will reset the engine oil life display after completing the required maintenance service. If someone other than a dealer performs maintenance service, reset the engine oil life display yourself.
Maintenance Schedule*  

If your vehicle comes with the service book, the maintenance schedule for your vehicle is available in the book. For vehicles without the service book, refer to the following maintenance schedules.

The maintenance schedule outlines the minimum required maintenance that you should perform to ensure the troublefree operation of your vehicle. Due to regional and climatic differences, some additional servicing may be required. Please consult your warranty booklet for a more detailed description.

Maintenance work should be performed by properly trained and equipped technicians. Your authorised dealer meets all of these requirements.

* Not available on all models

### Replace engine coolant

At 200,000 km (125,000 miles) or 10 years, thereafter every 100,000 km (62,500 miles) or 5 years

---

*1: Only severe schedule is required in some countries: refer to the local warranty booklet.
*2: Regular use of injector cleaner may be required for models designated for the following countries, it will depend on the quality of the fuel used. Consult your dealer for details: Reunion and Canary Islands.
*3: Sensory Method
   Adjust the valves during service 120,000 km (75,000 miles) if they are noisy.
*4: It is recommended to replace the fuel filter if the fuel you are using is suspected to be contaminated with dust, etc. because the filter may be clogged sooner.

*1:Sensory method
Adjust the valves during services 120,000 km if they are noisy.

*2:It is recommended to replace the fuel filter if the fuel you are using is suspected to be contaminated with dust, etc. because the filter may be clogged sooner.
### Maintenance Schedule

*1: Except Ukrainian models

Petrol models
Except European models

The condition is considered as severe when you drive:
A. Less than 8 km (5 miles), or less than 16 km (10 miles) in freezing temperatures per trip.
B. In extremely hot temperature above 35°C.
C. With extensive idling or long periods of stop-and-go.
D. With a trailer towing, or loaded roof rack, or in mountains.
E. On muddy, dusty or de-iced roads.

* Not available on all models

- Brake Fluid (Black Cap)
- Clutch Fluid (Light Grey Cap)
Opening the Bonnet

1. Park the vehicle on a level surface, and set the parking brake.
2. Pull the bonnet release handle under the driver’s side lower outside corner of the dashboard. The bonnet will pop up slightly.
3. Push the bonnet latch lever (located under the front edge of the bonnet to the centre) to the side and raise the bonnet. Once you have raised the bonnet slightly, you can release the lever.
4. Remove the support rod from the clamp using the grip. Mount the support rod in the bonnet.

When closing, remove the support rod, and stow it in the clamp, then gently lower the bonnet. Remove your hand at a height of approximately 30 cm (12 inches) and let the bonnet close.

NOTICE
- Do not open the bonnet when the wiper arms are raised. The bonnet will strike the wipers, resulting in possible damage to the bonnet and/or the wipers.
- Do not press the engine cover forcibly. This may damage the engine cover and component parts.
- When closing the bonnet, check that the bonnet is securely latched.
- If the bonnet latch lever moves stiffly, or if you can open the bonnet without lifting the lever, the latch mechanism should be cleaned and lubricated.
- Do not open the bonnet while the Auto Idle Stop function is activated.

NOTICE
- Do not open the bonnet when the wiper arms are raised. The bonnet will strike the wipers, resulting in possible damage to the bonnet and/or the wipers.
- Do not press the engine cover forcibly. This may damage the engine cover and component parts.
- When closing the bonnet, check that the bonnet is securely latched.
- If the bonnet latch lever moves stiffly, or if you can open the bonnet without lifting the lever, the latch mechanism should be cleaned and lubricated.
- Do not open the bonnet while the Auto Idle Stop function is activated.
## Recommended Engine Oil

Use a genuine engine oil or another commercial engine oil of suitable type and viscosity (for the ambient temperature) as shown in the image that follows.

Oil is a major contributor to your engine's performance and longevity. If you drive the vehicle with insufficient or deteriorated oil, the engine may fail or be damaged.

Except European models
Oil Check

We recommend that you check the engine oil level every time you refuel. Park the vehicle on level ground. Wait approximately three minutes after turning the engine off before you check the oil.

1. Remove the dipstick (orange).
2. Wipe the dipstick with a clean cloth or paper towel.
3. Insert the dipstick back all the way into its hole.

If the oil level is near or below the lower mark, slowly add oil, being careful not to overfill.

The amount of oil consumed depends on how the vehicle is driven and the climatic and road conditions encountered. The rate of oil consumption can be up to 1 litre per 1,000 km/625 miles. Consumption is likely to be higher when the engine is new.
4. Remove the dipstick again, and check the level. It should be between the upper and lower marks. Add oil if necessary.
Adding Engine Oil

1. Unscrew and remove the engine oil fill cap.
2. Add oil slowly.
3. Reinstall the engine oil fill cap, and tighten it securely.
4. Wait for three minutes and recheck the engine oil dipstick.

**NOTICE**

Do not fill the engine oil above the upper mark. Overfilling the engine oil may result in leaks and engine damage.

If any oil spills, wipe it away immediately. Spilled oil may damage the engine compartment components.
**Engine Coolant**

**Specified coolant: Honda All Season Antifreeze/Coolant Type 2**

This coolant is premixed with 50% antifreeze and 50% water. Do not add any straight antifreeze or water.

We recommend you check the engine coolant level every time you refuel. Check the reserve tank first. If it is completely empty, also check the coolant level in the radiator. Add the engine coolant accordingly.

**Reserve Tank**

1. Make sure the engine and radiator are cool.
2. Check the amount of coolant in the reserve tank.
   - If the coolant level is below the **MIN** mark, add the specified coolant until it reaches the **MAX** mark.
3. Inspect the cooling system for leaks.

**WARNING**

Removing the radiator cap while the engine is hot can cause the coolant to spray out, seriously scalding you.

Always let the engine and radiator cool down before removing the radiator cap.

**NOTICE**

If temperatures consistently below -30°C are expected, the coolant mixture should be changed to a higher concentration. Consult your Honda dealer for details about a suitable coolant mixture.

If Honda antifreeze/coolant is not available, you may use another major brand of non-silicate coolant as a temporary replacement. Check that it is a high quality coolant recommended for aluminium engines. Continued use of any non-Honda coolant can result in corrosion, causing the cooling system to malfunction or fail. Have the cooling system flushed and refilled with Honda antifreeze/coolant as soon as possible.

Do not add rust inhibitors or other additives to your vehicle’s cooling system. They may not be compatible with the coolant or with the engine components.

Continued
1. Make sure the engine and radiator are cool.
2. Turn the radiator cap 1/8 turn anti-clockwise and relieve any pressure in the cooling system.
3. Push down and turn the radiator cap anti-clockwise to remove it.
4. The coolant level should be up to the base of the filler neck. Add coolant if it is low.
5. Put the radiator cap back on, and tighten it fully.

- Never open when hot.
- Hot coolant will scald you.
- Relief pressure valve begins to open at 108 kPa.

NOTICE
Pour the fluid slowly and carefully so you do not spill any. Clean up any spills immediately; they can damage components in the engine compartment.
Maintenance Under the Bonnet

Engine Coolant

Specified coolant: Honda All Season Antifreeze/Coolant Type 2

This coolant is premixed with 50% antifreeze and 50% water. Do not add any straight antifreeze or water.

We recommend you check the engine coolant level every time you refuel. Check the reserve tank. Add the engine coolant accordingly.

Checking the Coolant

1. Make sure the engine and radiator are cool.
2. Check the amount of coolant in the reserve tank.
   - If the coolant level is below the MIN mark, add the specified coolant until it reaches the MAX mark.
3. Inspect the cooling system for leaks.

4. The coolant level should be up to the base of the filler neck. Add coolant if it is low.
5. Put the radiator cap back on, and tighten it fully.
6. Pour coolant into the reserve tank until it reaches the MAX mark. Put the cap back on the reserve tank.

**NOTICE**

Pour the fluid slowly and carefully so you do not spill any. Clean up any spills immediately; they can damage components in the engine compartment.

- Never open when hot.
- Hot coolant will scald you.
- Relief pressure valve begins to open at 108 kPa.
Transmission Fluid

**Continuously variable transmission models**

■ Continuously Variable Transmission (CVT) Fluid

**Specified fluid: Honda HCF-2**

Have a dealer check the fluid level and replace if necessary. Follow your vehicle’s maintenance service timing of when to change continuously variable transmission fluid.

[ Maintenance Schedule * P. 521 ]

Do not attempt to check or change the continuously variable transmission fluid yourself.

**Manual transmission models**

■ Manual Transmission Fluid

**Specified fluid: Honda MTF**

Have a dealer check the fluid level and replace if necessary. Follow your vehicle’s maintenance service timing of when to change manual transmission fluid.

[ Maintenance Schedule * P. 521 ]

Do not attempt to check or change the manual transmission fluid yourself.

**NOTICE**

**Continuously Variable Transmission (CVT) Fluid**

Do not mix Honda HCF-2 with other transmission fluids. Using a transmission fluid other than Honda HCF-2 may adversely affect the operation and durability of your vehicle’s transmission, and damage the transmission. Any damage caused by using a transmission fluid that is not equivalent to Honda HCF-2 is not covered by Honda’s new vehicle limited warranty.

**Manual Transmission Fluid**

If Honda MTF is not available, you may use the API certificated SAE 0W-20 or 5W-20 viscosity motor oil as a temporary measure. Replace with MTF as soon as possible. Motor oil does not contain the proper additives for the transmission and continued use can cause decreased shifting performance and lead to transmission damage.

* Not available on all models
Brake/Clutch Fluid

Specified fluid: Brake Fluid with DOT 3 or DOT 4

Use the same fluid for both the brakes and clutch.

Checking the Brake Fluid

The fluid level should be between the MIN and MAX marks on the side of the reserve tank.

Left-hand drive type

Manual transmission models

The brake fluid reserve tank is also used for your vehicle’s clutch fluid. As long as you keep the brake fluid level as instructed above, there is no need for checking the clutch fluid level.

Checking the Clutch Fluid

The fluid level should be between the MIN and MAX marks on the side of the reserve tank.

Brake fluid marked DOT 5 is not compatible with your vehicle’s braking system and can cause extensive damage.

We recommend using a genuine product.

If the brake fluid level is at or below the MIN mark, have a dealer inspect the vehicle for leaks or worn brake pads as soon as possible.

If the clutch fluid level is at or below the MIN mark, have a dealer inspect the vehicle for leaks or an excessively worn clutch plate as soon as possible.

* Not available on all models
Refilling Window Washer Fluid

Petrol models without turbocharger

Check the amount of window washer fluid by looking at the reservoir.

If the level is low, fill the washer reservoir.

Petrol models with turbocharger

Check the amount of window washer fluid using the washer fluid level gauge on the cap.

If the level is low, fill the washer reservoir.

All models

Pour the washer fluid carefully. Do not overflow the reservoir.

NOTICE
Do not use engine antifreeze or a vinegar/water solution in the windscreen washer reservoir. Antifreeze can damage your vehicle’s paint. A vinegar/water solution can damage the windscreen washer pump. Use only commercially available windscreen washer fluid. Avoid prolonged use of hard water to prevent lime scale build up.
Fuel Filter

Replace fuel filter according to the time and distance recommendations in the maintenance schedule.

Have a qualified technician change the fuel filter. Fuel in the system can spray out and create a hazard if all fuel line connections are not handled correctly.
Diesel Particulate Filter (DPF) Regeneration*

Diesel Particulate Filter (DPF)
Collects PM (particulate matter) from the exhaust gas. The DPF is installed in the catalytic converter.

How the DPF Works
The DPF periodically burns off the collected PM while driving at a high temperature of catalytic converter.
When PM is burned off, you may notice white smoke in the exhaust gas, and the increase in the average fuel consumption. This is temporary, and normal.

* Not available on all models
If you see *** on the multi-information display, you need to regenerate the DPF:

- Drive your vehicle at a speed of 60 km/h (37 mph) or over until the symbol disappears.
- It takes about 20 minutes to increase the catalytic converter temperature to burn out and remove PM.

If you ignore the symbol and do not regenerate the DPF, the multi-information display changes to the DPF warning symbol. If this happens, take your vehicle to a dealer as soon as possible. Continuously ignoring the multi-information display warning symbol causes the DPF to be clogged with PM, seriously damaging the DPF and emission control systems.

To minimize the accumulation of PM, always use the recommended diesel fuel.

**Fuel recommendation** P. 500

PM is accumulated in the catalytic converter when you drive at a low speed for a long period of time or by frequent short journeys.
Replacing Light Bulbs

Headlights
Headlights are LED type. Have an authorised Honda dealer inspect and replace the light assembly.

Front Turn Signal Lights
Front turn signal lights are LED type. Have an authorised Honda dealer inspect and replace the light assembly.

Position/Daytime Running Lights
Position/daytime running lights are LED type. Have an authorised Honda dealer inspect and replace the light assembly.

Side Turn Signal/Emergency Indicator Lights
Door mirror side turn lights are LED type. Have an authorised Honda dealer inspect and replace the light assembly.

Headlights
The headlight aim is set by the factory, and does not need to be adjusted. However, if you regularly carry heavy items in the luggage area, have the aiming readjusted at a dealer or by a qualified technician.
Replacing Light Bulbs

Front Fog Light Bulbs

When replacing, use the following bulbs.

Front Fog Light: 35 W (H8 for halogen bulb type)*
Front Fog Light: LED type*

Models with halogen front fog lights

1. Remove the clips using a flat-tip screwdriver, and push up the under cover.

Models with LED front fog lights

Front fog lights are LED type. Have an authorised Honda dealer inspect and replace the light assembly.

Models with halogen front fog lights

Insert a flat-tip screwdriver, lift and remove the centre pin to remove the clip.

Insert the clip with the centre pin raised, and push until it is flat.

* Not available on all models
Replacing Light Bulbs

Front Fog Light Bulbs *

2. Push the tab to remove the coupler.
3. Rotate the old bulb to the left on left side and to the right on right side to remove.
4. Insert a new bulb into the fog light assembly and turn it to the right on left side and to the left on right side.
5. Insert the coupler into the connector of the bulb.

* Not available on all models

Halter bulbs get very hot when lit. Oil, perspiration, or a scratch on the glass can cause the bulb to overheat and shatter.

When replacing a halogen bulb, handle it by its plastic case, and protect the glass from contact with your skin or hard objects. If you touch the glass, clean it with denatured alcohol and a clean cloth.
Replacing Light Bulbs

Rear Turn Signal Light Bulbs

When replacing, use the following bulbs.

**Rear Turn Signal Light: 21 W (Amber)**

1. Use a Phillips-head screwdriver to remove the bolts.
2. Pull the light assembly out of the rear pillar.
3. Turn the socket to the left and remove it.
   Remove the old bulb.
4. Insert a new bulb.
5. Slide the light assembly onto the guide on the body.
Replacing Light Bulbs

Brake Lights*, Taillights* and Brake/Taillights*

Brake lights, taillights and brake/taillights are LED type. Have an authorised Honda dealer inspect and replace the light assembly.

Taillights* and Back-Up Light Bulbs

When replacing, use the following bulbs.

- **Taillight***: LED
- **Back-Up Light**: 16 W

1. Remove the cover by prying on the edge of the cover using a flat-tip screwdriver.
   - Wrap the flat-tip screwdriver with a cloth to prevent scratches.

2. Turn the socket to the left and remove it.
3. Remove the old bulb and insert a new bulb.

* Not available on all models

Taillights* and Back-Up Light Bulbs

Taillights are LED type. Have an authorised Honda dealer inspect and replace the light assembly.
Replacing Light Bulbs

High-Mount Brake Light

High-mount brake light is LED type. Have an authorised Honda dealer inspect and replace the light assembly.

Rear Licence Plate Lights

Rear licence plate lights are LED type. Have an authorised Honda dealer inspect and replace the light assembly.
Rear Fog Light Bulb

When replacing, use the following bulb.

Rear Fog Light: 21 W

1. Remove the screws using a Phillips-head screwdriver, then push up the under cover.

2. Turn the socket to the left and remove it.

3. Remove the old bulb and insert a new bulb.
Replacing Light Bulbs

Other Light Bulbs

- **Vanity Mirror Light Bulbs**

  When replacing, use the following bulbs.

  **Vanity Mirror Light: 2 W**

  1. Pry on the edge of the cover using a flat-tip screwdriver to remove the cover.
     - Wrap the flat-tip screwdriver with a cloth to prevent scratches.

  2. Remove the old bulb and insert a new bulb.

- **Luggage Area Light Bulb**

  When replacing, use the following bulb.

  **Luggage Area Light: 5 W**

  1. Pry on the edge of the light using a flat-tip screwdriver to remove the light assembly.
     - Wrap the flat-tip screwdriver with a cloth to prevent scratches.

  2. Remove the old bulb and insert a new bulb.
Checking and Maintaining Wiper Blades

Checking Wiper Blades
If the wiper blade rubber has deteriorated, it will leave streaks and the hard surfaces of the blade may scratch the window glass.

Changing the Front Wiper Blade Rubber

1. Lift the driver side wiper arm first, then the passenger side.

2. Press up on and hold the tab, then slide the holder off the wiper arm.

NOTICE
Avoid dropping the wiper arm onto the windscreen, it may damage the wiper arm and/or the windscreen.
3. Slide the wiper blade out of the holder by pulling the tabbed end out.

4. Slide the new wiper blade onto the holder from the bottom end.
   - The tab on the holder should fit in the indent of the wiper blade.

5. Slide the holder onto the wiper arm securely.

6. Lower the passenger side wiper arm first, then the driver side.
Checking and Maintaining Wiper Blades

Changing the Rear Wiper Blade Rubber

1. Raise the wiper arm off.
2. Pivot the bottom end of the wiper blade up until it comes off from the wiper arm.
3. Slide the blade out of the wiper.

**NOTICE**
Avoid dropping the wiper arm; it may damage the rear window.

Continued
Checking and Maintaining Wiper Blades
Changing the Rear Wiper Blade Rubber

4. Remove the retainers from the wiper blade and mount to a new rubber blade.

5. Slide the new wiper blade onto the holder. Make sure it is engaged correctly, then install the wiper blade assembly onto the wiper arm.
Checking and Maintaining Tyres

Checking Tyres

To safely operate your vehicle, your tyres must be of the proper type and size, in good condition with adequate tread, and properly inflated.

■ Inflation guidelines

Properly inflated tyres provide the best combination of handling, tread life, and comfort. Refer to the driver’s doorjamb label for the specified pressure.

Underinflated tyres wear unevenly, adversely affect handling and fuel economy, and are more likely to fail from overheating.

Overinflated tyres make your vehicle ride harshly, are more prone to road hazards, and wear unevenly.

Every day before you drive, look at each of the tyres. If one looks lower than the others, check the pressure with a tyre gauge.

At least once a month or before long trips, use a gauge to measure the pressure in all tyres, including the spare*. Even tyres in good condition can lose 10-20 kPa (0.1-0.2 bar, 1-2 psi) per month.

■ Inspection guidelines

Every time you check inflation, also examine the tyres and valve stems. Look for:

- Bumps or bulges on the side or in the tread. Replace the tyre if you find any cuts, splits, or cracks in the side of the tyre. Replace it if you see fabric or cord.
- Remove any foreign objects and inspect for air leaks.
- Uneven tread wear. Have a dealer check the wheel alignment.
- Excessive tread wear.
- Cracks or other damage around valve stem.

* Not available on all models

**WARNING**

Using tyres that are excessively worn or improperly inflated can cause a crash in which you can be seriously hurt or killed.

Follow all instructions in this owner’s manual regarding tyre inflation and maintenance.

Measure the air pressure when tyres are cold. This means the vehicle has been parked for at least three hours, or driven less than 1.6 km (1 mile). If necessary, add or release air until the specified pressure is reached.

If checked when hot, tyre pressure can be as much as 30-40 kPa (0.3-0.4 bar, 4-6 psi) higher than if checked when cold.

Whenever tyre pressure is adjusted, you must initialise the deflation warning system.

Deflation Warning System Initialisation

P. 474

Have a dealer check the tyres if you feel a consistent vibration while driving. New tyres and any that have been removed and reinstalled should be properly balanced.
Wear Indicators

The groove where the wear indicator is located is 1.6 mm (1/16 inch) shallower than elsewhere on the tyre. If the tread has worn so that the indicator is exposed, replace the tyre. **Worn out tyres have poor traction on wet roads.**

Tyre Service Life

The life of your tyres is dependent on many factors, including driving habits, road conditions, vehicle loading, inflation pressure, maintenance history, speed, and environmental conditions (even when the tyres are not in use).

In addition to regular inspections and inflation pressure maintenance, it is recommended that you have annual inspections performed once the tyres reach five years old. All tyres, including the spare*, should be removed from service after 10 years from the date of manufacture, regardless of their condition or state of wear.

* Not available on all models
**Tyre and Wheel Replacement**

Replace your tyres with radials of the same size, load range, speed rating, and maximum cold tyre pressure rating (as shown on the tyre’s sidewall). Using tyres of a different size or construction can cause certain vehicle systems such as the ABS and Vehicle Stability Assist (VSA) system to work incorrectly.

It is best to replace all four tyres at the same time. If that isn’t possible, replace the front or rear tyres in pairs.

Make sure that the wheel’s specifications match those of the original wheels.

---

**WARNING**

Installing improper tyres on your vehicle can affect handling and stability. This can cause a crash in which you can be seriously hurt or killed.

Always use the size and type of tyres recommended in the tyre information label on your vehicle.
Checking and Maintaining Tyres

Tyre Rotation

Rotating tyres according to the maintenance schedule helps to distribute wear more evenly and increase tyre life.

- **Tyres without rotation marks**
  Rotate the tyres as shown here.

- **Tyres with rotation marks**
  Rotate the tyres as shown here.

- **Tyres with directional tread patterns**
  Tyres with directional tread patterns should only be rotated front to back (not from one side to the other). Directional tyres should be mounted with the rotation indication mark facing forward, as shown below.

  When the tyres are rotated, make sure the air pressures are checked.

  Whenever tyres are rotated, you must initialise the deflation warning system.

  Deflation Warning System Initialisation
  P. 474
Snow Traction Devices

If driving on snowy or frozen roads, mount winter tyres, or tyre chains; reduce speed; and maintain sufficient distance between vehicles when driving.

Be particularly careful when operating the steering wheel or brakes to prevent skidding.

Use tyre chains, winter tyres, or all season tyres when necessary or according to the law.

When mounting, refer to the following points.

For winter tyres:
• Select the size and load ranges that are the same as the original tyres.
• Mount the tyres to all four wheels.

WARNING
Using the wrong chains, or not properly installing chains, can damage the brake lines and cause a crash in which you can be seriously injured or killed.

Follow all instructions in this owner’s manual regarding the selection and use of tyre chains.

NOTICE
Traction devices that are the wrong size or improperly installed can damage your vehicle’s brake lines, suspension, body, and wheels. Stop driving if they are hitting any part of the vehicle.

According to the EEC Directive for tyres, when winter tyres are used, it is necessary to affix a sticker with the allowable max. speed of the winter tyres clearly in the field of view of the driver, if the designed max. speed of vehicle is higher than the allowed max. speed of winter tyre. A sticker is obtainable from your tyre dealer. If you have any question, consult a dealer.

Continued
Checking and Maintaining Tyres

For tyre chains:
- Consult a dealer before purchasing any type of chains for your vehicle.
- Install them on the front tyres only.
- Because your vehicle has limited tyre clearance, we strongly recommend using the chains listed below:

<table>
<thead>
<tr>
<th>Original Tyre Size*1</th>
<th>Chain Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>215/60R16</td>
<td>RUD-matic classic 48492</td>
</tr>
<tr>
<td>215/55R17</td>
<td>RUD-matic classic 48493</td>
</tr>
<tr>
<td>225/50R18*2</td>
<td>(Not available)</td>
</tr>
</tbody>
</table>

*1: Original tyre size is mentioned on the tyre information label on the driver’s doorjamb.
*2: You cannot mount chains on this tyre. If you have to use tyre chains, replace the tyres with the optional 215/55R17 size tyres.

- Follow the chain manufacturer’s instruction when installing. Mount them as tightly as you can.
- Check that the chains do not touch the brake lines or suspension.
- Drive slowly.

Snow Traction Devices

When tyre chains are mounted, follow the chain manufacturer’s instructions regarding vehicle operational limits.

Use tyre chains only in an emergency or when they are legally required for driving through a certain area.

Use greater caution when driving with tyre chains on snow or ice. They may have less-predictable handling than good winter tyres without chains.

If your vehicle is equipped with summer tyres, be aware that these tyres are not designed for winter driving conditions. For more information, contact a dealer.
**Battery**

**Checking the Battery**

The condition of the battery is monitored by a sensor located on the negative terminal of the battery. If there is a problem with this sensor, the multi-information display will display a warning message. If this happens, have your vehicle inspected by a dealer.

Check the battery terminals for corrosion monthly.

If your vehicle’s battery is disconnected or goes dead:

- The audio system is disabled.  
  - Reactivating the audio system P. 246
- The clock resets.  
  - Clock P. 154

**WARNING**

The battery gives off explosive hydrogen gas during normal operation.

A spark or open flame can cause the battery to explode with enough force to kill or seriously hurt you.

Keep all sparks, open flames, and smoking materials away from the battery.

Wear protective clothing and a face shield, or have a skilled technician do any battery maintenance.

**WARNING**

The battery contains sulfuric acid (electrolyte) which is highly corrosive and poisonous.

Getting electrolyte in your eyes or on your skin can cause serious burns. Wear protective clothing and eye protection when working on or near the battery.

Swallowing electrolyte can cause fatal poisoning if immediate action is not taken.

KEEP OUT OF THE REACH OF CHILDREN

**WARNING**

The battery contains sulfuric acid (electrolyte) which is highly corrosive and poisonous.

Getting electrolyte in your eyes or on your skin can cause serious burns. Wear protective clothing and eye protection when working on or near the battery.

Swallowing electrolyte can cause fatal poisoning if immediate action is not taken.

KEEP OUT OF THE REACH OF CHILDREN
Charging the Battery

Disconnect both battery cables to prevent damaging your vehicle’s electrical system. Always disconnect the negative (–) cable first, and reconnect it last.

Emergency Procedures

Eyes: Flush with water from a cup or other container for at least 15 minutes. (Water under pressure can damage the eye.) Call a physician immediately.

Skin: Remove contaminated clothing. Flush the skin with large quantities of water. Call a physician immediately.

Swallowing: Drink water or milk. Call a physician immediately.

When you find corrosion, clean the battery terminals by applying a baking powder and water solution. Clean the terminals with a damp towel. Cloth/towel dry the battery. Coat the terminals with grease to help prevent future corrosion.

When replacing the battery, the replacement must be of the same specifications. Consult a dealer for more information.

Models with Auto Idle Stop

The battery installed in this vehicle is specifically designed for a model with Auto Idle Stop. Using a battery other than this specified type may shorten the battery life, and prevent Auto Idle Stop from activating. If you need to replace the battery, make sure to select the specified type. Ask a dealer for more details.

Specifications P. 654
Replacing the Battery

When you remove and replace the battery, always follow the maintenance safety and the warnings for when checking the battery to prevent potential hazards.

- **Maintenance Safety** P. 509
- **Checking the Battery** P. 575

1. Turn the ignition switch to LOCK [0]*1. Open the bonnet.
2. Loosen the nut on the negative battery cable, then disconnect the cable from the negative terminal.
3. Open the positive battery terminal cover. Loosen the nut on the positive battery cable, then disconnect the cable from the positive terminal.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

---

**Notices**

**Replacing the Battery**

**NOTICE**

An improperly disposed of battery can be harmful to the environment and human health. Always confirm local regulations for battery disposal.

This symbol on the battery means that this product must not be treated as household waste.

To install a new battery, reverse this procedure.

Always disconnect the negative cable first, and reconnect it last.
4. Loosen the nut on each side of the battery bracket with a wrench.
5. Pull the bottom end of each battery stay out of the hole on the battery base, and remove the combination of the battery bracket and the stays.
6. Remove the battery cover.

7. Take out the battery carefully.
Battery Label

DANGER

• Keep flames and sparks away from the battery. The battery produces explosive gas that can cause an explosion.
• Wear eye protection and rubber gloves when handling the battery to avoid risk of burns or loss of eyesight if exposed to battery electrolyte.
• Do not allow children to handle the battery, under any circumstance. Ensure that anyone handling the battery has a proper understanding of the hazards and correct handling procedures involved.
• Handle battery electrolyte with extreme care, as it contains dilute sulfuric acid. Exposure to eyes or skin can cause burns or loss of eyesight.
• Read this manual carefully, and understand it before handling the battery. Failure to do so can cause personal injury and damage to the vehicle.
• Do not use the battery if the level of electrolyte is at or below the recommended level. Using the battery with low electrolyte can cause it to explode, causing serious injury.
Remote Transmitter Care

Replacing the Button Battery

If the indicator does not come on when the button is pressed, replace the battery.

1. Remove the upper half of the cover by carefully prying on the edge with a coin. Wrap a coin with a cloth to prevent scratching the retractable key.

2. Remove the button battery with the small flat-tip screwdriver.

3. Make sure to replace the battery with the correct polarity.

■ Retractable Key*

Battery type: CR2032

A warning mark is located adjacent to the button battery.

WARNING

CHEMICAL BURN HAZARD

The battery that powers the remote transmitter can cause severe internal burns and can even lead to death if swallowed. Keep new and used batteries away from children. If you suspect that a child has swallowed the battery, seek medical attention immediately.

A warning mark is located adjacent to the button battery.

NOTICE

An improperly disposed of battery can damage the environment. Always confirm local regulations for battery disposal.

This symbol on the battery means that this product must not be treated as household waste.

Replacement batteries are commercially available or at a dealer.

* Not available on all models

Climate Control System Maintenance

Air Conditioning

For proper and safe operation of the climate control system, the refrigerant system should only be served by a qualified technician.

Never repair or replace the air conditioning evaporator (cooling coil) with one removed from a used or salvaged vehicle.

NOTICE

Vented refrigerant is harmful to the environment. To avoid refrigerant from venting, never replace the evaporator with one removed from a used or salvaged vehicle.

Refrigerant in your vehicle’s air conditioning system is flammable and can be ignited during servicing if proper procedures are not followed.

The air conditioner label is found under the bonnet:

- : Caution
- : Flammable Refrigerant
- : Requires a qualified technician to service
- : Air Conditioning System
Dust and Pollen Filter

When to Replace the Dust and Pollen Filter

Replace the dust and pollen filter according to your vehicle’s recommended maintenance schedule. It is recommended to replace the filter even sooner if the vehicle has been driven in a dusty environment.

Maintenance Schedule* P. 521

How to Replace the Dust and Pollen Filter

1. Open the glove box.
2. Push the stopper on the driver’s side of the glove box to detach it from the glove box.
3. Disengage the two tabs by pushing on each side panel.
4. Pivot the glove box out of the way.

* Not available on all models
5. Push in the tabs on the corners of the filter case cover, and remove it.
6. Remove the filter from the case.
7. Install a new filter in the case.
   ▶ Put the **AIR FLOW** arrow directed side down.

If you are not sure how to replace the dust and pollen filter, have it replaced by a dealer.
Interior Care

Use a vacuum cleaner to remove dust before using a cloth. 
Use a damp cloth with a mixture of mild detergent and warm water to remove dirt. 
Use a clean cloth to remove detergent residue.

Cleaning Seat Belts

Use a soft brush with a mixture of mild soap and warm water to clean the seat belts. 
Let the belts air dry. Wipe the loop of the seat belt anchors using a clean cloth.

Cleaning the Window

Wipe using a glass cleaner.
To properly clean leather:

1. Use a vacuum or soft dry cloth first to remove any dirt or dust.
2. Clean the leather with a soft cloth dampened with a solution comprised of 90% water and 10% neutral soap.
3. Wipe away any soap residue with a clean damp cloth.
4. Wipe away residual water and allow leather to air dry in the shade.

* Maintaining Genuine Leather*

It is important to clean or wipe away dirt or dust as soon as possible. Spills can soak into leather resulting in stains. Dirt or dust can cause abrasions in the leather. In addition, please note that some dark coloured clothing can rub onto the leather seats resulting in discolouration or stains.
Exterior Care

Dust off the vehicle body after you drive. Regularly inspect your vehicle for scratches on painted surfaces. A scratch on a painted surface can result in body rust. If you find a scratch, promptly repair it.

### Washing the Vehicle

Wash the vehicle regularly. Wash more frequently when driving in the following conditions:
- If driving on roads with road salt.
- If driving in coastal areas.
- If tar, soot, bird droppings, insects, or tree sap are stuck to painted surfaces.

### Using an Automated Car Wash

- Make sure to follow the instructions indicated on the automated car wash.
- Fold in the door mirrors.
- For models equipped with automatic intermittent wipers, turn the wipers off.

### Using High Pressure Cleaners

- Keep sufficient distance between the cleaning nozzle and the vehicle body.
- Take particular care around the windows. Standing too close may cause water to enter the vehicle interior.
- Do not spray high pressure water directly into the engine compartment. Instead, use low pressure water and a mild detergent.

Continued...
Cleaning
Exterior Care

- **Applying Wax**
  A good coat of automotive body wax helps to protect your vehicle's paint from the elements. Wax will wear off over time and expose your vehicle's paint to the elements, so reapply as necessary.

- **Maintaining the Bumpers and Other Resin Coated Parts**
  If you get petrol, oil, engine coolant, or battery fluid on resin coated parts, they may be stained or the coating may peel. Promptly wipe it away using a soft cloth and clean water.

- **Cleaning the Window**
  Wipe using a glass cleaner.

- **Maintaining Aluminium Wheels**
  Aluminium is susceptible to deterioration caused by salt and other road contaminants. When necessary, as early as possible use a sponge and mild detergent to wipe away these contaminants. Do not use a stiff brush or harsh chemicals (including some commercial wheel cleaners). These can damage the protective finish on aluminium alloy wheels, resulting in corrosion. Depending on the type of finish, the wheels also may lose their lustre or appear burnished. To avoid water stains, wipe the wheels dry with a cloth while they are still wet.
Fogged Exterior Light Lenses

The inside lenses of exterior lights (headlights, brake lights, etc.) may fog temporarily if you have driven in the rain, or after the vehicle has been run through a car wash. Dew condensation also may build up inside the lenses when there is a significant enough difference between the ambient and inside lens temperatures (similar to vehicle windows fogging up in rainy conditions). These conditions are natural processes, not structural design problems in the exterior lights.

Lens design characteristics may result in moisture developing on the light lens frame surfaces. This also is not a malfunction.

However, if you see large amounts of water accumulation, or large water drops building up inside the lenses, have your vehicle inspected by a dealer.
Accessories and Modifications

Accessories

When installing accessories, check the following:

• Do not install accessories on the windscreen. They can obstruct your view and delay your reaction to driving conditions.

• Do not install any accessories over areas marked SRS Airbag, on the sides or backs of the front seats, on front or side pillars, or near the side windows. Accessories installed in these areas may interfere with proper operation of the vehicle’s airbags or may be propelled into you or another occupant if the airbags deploy.

• Be sure electronic accessories do not overload electrical circuits or interfere with proper operation of your vehicle.

• Before installing any electronic accessory, have the installer contact a dealer for assistance. If possible, have a dealer inspect the final installation.

WARNING

Improper accessories or modifications can affect your vehicle’s handling, stability, and performance, and cause a crash in which you can be seriously hurt or killed.

Follow all instructions in this owner’s manual regarding accessories and modifications.

When properly installed, mobile phones, alarms, two-way radios, radio antennas, and low-powered audio systems should not interfere with your vehicle’s computer controlled systems, such as your airbags and anti-lock brakes.

Honda Genuine accessories are recommended to ensure proper operation on your vehicle.
Modifications
Do not modify your vehicle in a manner that may affect its handling, stability, or reliability, or install non-genuine Honda parts or accessories that may have a similar effect.

Even minor modifications to vehicle systems can affect overall vehicle performance. Always make sure all equipment is properly installed and maintained, and do not make any modification to your vehicle or its systems that might cause your vehicle to no longer meet your country’s and local regulations.

The on-board diagnostic port (OBD-II/SAE J1962 connector) installed on this vehicle is intended to be used with automobile system diagnostic devices or with other devices that Honda has approved. Use of any other type of device may adversely affect the vehicle’s electronic systems or allow them to be compromised, possibly resulting in a system malfunction, drained battery, or other unexpected problems.

Do not modify or attempt to repair any of the electrical components.
Handling the Unexpected

Handling the Unexpected

If a Tyre Goes Flat

Temporarily Repairing a Flat Tyre*

If the tyre has a large cut or is otherwise severely damaged, you will need to have the vehicle towed. If the tyre only has a small puncture, from a nail for instance, you can use the temporary tyre repair kit so that you can drive to the nearest service station for a more permanent repair.

If a tire goes flat while driving, grasp the steering wheel firmly, and brake gradually to reduce speed. Then stop in a safe place.

1. Park the vehicle on a firm, level, non-slippery surface and apply the parking brake.

2. Put the transmission into 
P.

3. Turn on the hazard warning lights and turn the ignition switch to LOCK 0*
   - When towing a trailer, unhitch the trailer.

   *1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

   * Not available on all models

The kit should not be used in the following situations.
Instead, contact a dealer or a roadside assistant to have the vehicle towed.
- The tyre sealant has expired.
- More than one tyre is punctured.
- The puncture or cut is larger than 4 mm (3/16 inch).
- The tyne side wall is damaged or the puncture is outside the contact area.

<table>
<thead>
<tr>
<th>When the puncture is:</th>
<th>Kit Use</th>
</tr>
</thead>
<tbody>
<tr>
<td>Smaller than 4 mm (3/16 inch)</td>
<td>Yes</td>
</tr>
<tr>
<td>Larger than 4 mm (3/16 inch)</td>
<td>No</td>
</tr>
</tbody>
</table>

- Damage has been caused by driving with the tyres extremely under inflated.
- The tyre bead is no longer seated.
- A rim is damaged.

Do not remove a nail or screw that punctured the tyre. If you remove it from the tyre, you may not be able to repair the puncture using the kit.
Getting Ready to Temporarily Repair the Flat Tyre

When making a temporary repair, carefully read the instruction manual provided with the kit.
If a Tyre Goes Flat ➤ Temporarily Repairing a Flat Tyre

1. Open the tailgate.

Petrol models without turbocharger with front fog lights

Petrol models with turbocharger

Diesel models

2. Pull the tab to open the compartment cover located on the right side of the luggage area.

3. Take the kit out of the compartment.

4. Place the kit face up, on flat ground near the flat tyre, and away from traffic. Do not place the kit on its side.

Getting Ready to Temporarily Repair the Flat Tyre

Models with boot tray

The boot tray is equipped on the luggage area floor. Remove it as necessary.

Models without boot tray

The boot is equipped on the luggage area floor. Remove it as necessary.

Models with tubeless tyres

Models with conventional tyres
## Injecting Sealant and Air

1. Remove the valve cap from the tyre valve stem.

2. Shake the sealant bottle.

3. Attach the air compressor hose onto the bottle tyre valve. Screw it until it is tight.

4. Upside down the sealant bottle, then attach the bottle into the cutout of the air compressor.

5. Attach the sealant/air hose onto the tyre valve stem. Screw it until it is tight.

### WARNING

Tyre sealant contains substances that are harmful and can be fatal if swallowed.

If accidentally swallowed, do not induce vomiting. Drink plenty of water and get medical attention immediately.

For skin or eye contact, flush with cool water and get medical attention if necessary.

Keep the sealant bottle out of the reach of children.

In cold temperatures, the sealant may not flow easily. In this situation, warm it up for five minutes before using.

The sealant is latex based and can permanently stain clothing and other materials. Be careful during handling and wipe up any spills immediately.

---

Continued
If a Tyre Goes Flat

Temporarily Repairing a Flat Tyre

6. Plug in the compressor to the accessory power socket.
   ▶ Be careful not to pinch the cord in a door or window.
   - Accessory Power Sockets P. 224

7. Turn the ignition switch to START [Ⅲ]** without depressing the accelerator pedal, then start the engine.
   - Carbon Monoxide Gas P. 88

8. Turn the air compressor on to inflate the tyre.
   ▶ The compressor starts injecting sealant and air into the tyre.

9. After the air pressure reaches to specified pressure, turn off the kit.
   ▶ Check the air pressure gauge on the air compressor.
   ▶ Refer to the driver’s doorjamb label for the specified pressure.

**WARNING**

Running the engine with the vehicle in an enclosed or even partly enclosed area can cause a rapid build-up of toxic carbon monoxide.

Breathing this colourless, odourless gas can cause unconsciousness and even death. Only run the engine to power the air compressor with the vehicle outdoors.

**NOTICE**

Do not operate the temporary tyre repair kit compressor for more than 15 minutes. The compressor can overheat and become permanently damaged.

Until the sealant injection is complete, the pressure shown on the pressure gauge will appear higher than actual. After the sealant injection is complete the pressure will drop and then begin to rise again as the tyre is inflated with air. This is normal. To accurately measure the air pressure using the gauge, turn the air compressor off only after the sealant injection is complete.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
10. Unplug the power plug from the accessory power socket.
11. Unscrew the sealant/air hose from the tyre valve stem. Reinstall the valve cap.
12. Apply the wheel label to the flat surface of the wheel.
   ▶ The wheel surface must be clean to ensure the label adheres properly.

### Injecting Sealant and Air

If the required air pressure is not reached within 10 minutes, the tyre may be too severely damaged for the kit to provide the necessary seal and your vehicle will need to be towed.

See a Honda dealer for a replacement sealant bottle and proper disposal of an empty bottle.
Distributing the Sealant in the Tyre

1. Apply the speed limit label to the location as shown.
2. Drive the vehicle for about 10 minutes.
   ►Do not exceed 80 km/h (50 mph).
3. Stop the vehicle in a safe place.
4. Recheck the air pressure using the gauge on the air compressor.
   Do not turn the air compressor on to check the pressure.

5. If the air pressure is:
   • Less than 130 kPa (1.3 bar, 19 psi):
     Do not add air or continue driving. The leak is too severe. Call for help and have your vehicle towed.
      Emergency Towing P. 647
   • Front: 210 kPa (2.1 bar, 30 psi)/rear: 200 kPa (2.0 bar, 29 psi) or more:
   • Front: 220 kPa (2.2 bar, 32 psi)/rear: 210 kPa (2.1 bar, 30 psi) or more:
     Continue driving for another 10 minutes or until you reach the nearest service station. Do not exceed 80 km/h (50 mph).
      If the air pressure does not go down after the 10 minute driving, you do not need to check the pressure any more.
If a Tyre Goes Flat

Temporarily Repairing a Flat Tyre

• Greater than 130 kPa (1.3 bar, 19 psi), but less than front: 210 kPa (2.1 bar, 30 psi)/rear: 200 kPa (2.0 bar, 29 psi):
  Turn the air compressor on to inflate the tyre until the tyre pressure reaches front: 210 kPa (2.1 bar, 30 psi)/rear: 200 kPa (2.0 bar, 29 psi).

• Greater than 130 kPa (1.3 bar, 19 psi), but less than front: 220 kPa (2.2 bar, 32 psi)/rear: 210 kPa (2.1 bar, 30 psi):
  Turn the air compressor on to inflate the tyre until the tyre pressure reaches front: 220 kPa (2.2 bar, 32 psi)/rear: 210 kPa (2.1 bar, 30 psi).

Models with 215/60R16 95H tyres
Models with 215/55R17 94V tyres
Models with 225/50R18 95V tyres

Injecting Sealant and Air P. 599
Then drive carefully for 10 more minutes or until you reach the nearest service station.
Do not exceed 80 km/h (50 mph).
You should repeat this procedure as long as the air pressure is within this range.

6. Unplug the kit from the accessory power socket.
7. Unscrew the sealant/air hose from the tyre valve stem. Reinstall the valve cap.
8. Press the deflate button until the gauge returns to 0 kPa (0 bar, 0 psi).
9. Repackage and properly stow the kit.

Distributing the Sealant in the Tyre

WARNING
Running the engine with the vehicle in an enclosed or even partly enclosed area can cause a rapid build-up of toxic carbon monoxide.

Breathing this colourless, odourless gas can cause unconsciousness and even death.
Only run the engine to power the air compressor with the vehicle outdoors.
**Inflating an Under-inflated Tyre**

You can use the kit to inflate a non-punctured under-inflated tyre.

1. Take the kit out of the luggage area.
2. Place the kit, face up, on flat ground near the flat tyre, away from traffic. Do not place the kit on its side.
3. Remove the air hose from the kit.
4. Remove the valve cap from the tyre valve stem.
5. Attach the air hose onto the tyre valve stem. Screw it until it is tight.

---

**WARNING**

Running the engine with the vehicle in an enclosed or even partly enclosed area can cause a rapid build-up of toxic carbon monoxide.

Breathing this colourless, odourless gas can cause unconsciousness and even death. Only run the engine to power the air compressor with the vehicle outdoors.

---

**NOTICE**

Do not operate the temporary tyre repair kit compressor for more than 15 minutes. The compressor can overheat and become permanently damaged.
If a Tyre Goes Flat

Temporarily Repairing a Flat Tyre*

6. Plug in the compressor to the accessory power socket.
   ► Be careful not to pinch the cord in a door or window.
   ➞ Accessory Power Sockets P. 224
7. Turn the ignition switch to ACCESSORY "I".*
   ► In freezing temperatures, start the engine and leave it running while the flat tyre is being serviced.
   ➞ Carbon Monoxide Gas P. 88

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
If a Tyre Goes Flat

Temporarily Repairing a Flat Tyre

8. Turn the air compressor switch on to inflate the tyre.
   - The compressor starts to inject air into the tyre.
   - If you have started the engine, leave it running while injecting air.

9. Inflate the tyre to the specified air pressure.

10. Turn off the kit.
    - Check the pressure gauge on the air compressor.
    - If overinflated, press the deflate button.

11. Unplug the power plug from the accessory power socket.

12. Unscrew the air hose from the tyre valve stem. Reinstall the valve cap.

13. Repackage and properly stow the kit.
If a Tyre Goes Flat

2. Park the vehicle on firm, level, non-slippery surface and apply the parking brake.

4. Pull the handle to open the compartment cover located on the right side of the luggage area.

All models

5. Take the jack and the tool bag out of the compartment.

6. Take the wheel nut wrench and jack handle bar out of the tool bag.

How to Set Up the Jack

**WARNING**
The vehicle can easily roll off the jack, seriously injuring anyone underneath.

Follow the directions for changing a tyre exactly, and no person should place any portion of their body under a vehicle that is supported by a jack.

**WARNING:** The jack shall be placed on a flat and stable surface on the same level as the vehicle is parked.

The jack that came with your vehicle has the following label.

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>![Symbol]</td>
<td>![Symbol]</td>
<td>![Symbol]</td>

</tbody>
</table>

2. Never get under vehicle when supported by jack.
3. Place jack underneath reinforced area.

*1: Models with the keyless access system have an **ENGINE START/STOP** button instead of an ignition switch.
7. Place a wheel block or rock in front and rear of the wheel diagonal to the flat tyre.

8. Place the jack under the jacking point closest to the tyre to be changed.

9. Turn the end bracket clockwise as shown in image until the top of the jack contacts the jacking point. 
   - Make sure that the jacking point tab is resting in the jack notch.

10. Raise the vehicle, using the jack handle bar and the jack handle, until the tyre is off the ground.

How to Set Up the Jack

The position to use a jack as follows:

Do not use the jack with people or luggage in the vehicle.

Use the jack provided in your vehicle. Other jacks may not support the weight ("load") or may not fit the jacking point.

The following instructions must be followed to use the jack safely:

- Do not use while the engine is running.
- Use only where the ground is firm and level.
- Use only at the jacking points.
- Do not get in the vehicle while using the jack.
- Do not put anything on top of or underneath the jack.

Continued
If a Tyre Goes Flat

Handling of the Jack

Your vehicle has jacking points as shown. When replacing your tyres, consult a dealer.
Changing a Flat Tyre*

If a tyre goes flat while driving, grasp the steering wheel firmly, and brake gradually to reduce speed. Then, stop in a safe place. Replace the flat tyre with a compact spare tyre. Go to a dealer as soon as possible to have the full-size tyre repaired or replaced.

1. Park the vehicle on firm, level, non-slippery surface and apply the parking brake.
2. Put the transmission into (P).
3. Turn on the hazard warning lights and turn the ignition switch to LOCK (0) *1.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

---

Continuous variable transmission models

Manual transmission models

All models

Follow compact spare precautions:
Periodically check the tyre pressure of the compact spare. It should be set to the specified pressure. Specified Pressure: 420 kPa (4.2 bar, 60 psi)

When driving with the compact spare tyre, keep the vehicle speed under 80 km/h (50 mph). Replace with a full-size tyre as soon as possible.

The compact spare tyre and wheel in your vehicle are specifically for this model. Do not use them with another vehicle. Do not use another type of compact spare tyre or wheel with your vehicle.

Do not mount tyre chains on a compact spare tyre. If a chain-mounted front tyre goes flat, remove one of the full-size rear tyres and replace it with the compact spare tyre. Remove the flat front tyre and replace it with the full-size tyre that was removed from the rear. Mount the tyre chains on the front tyre.

A compact spare tyre gives a harsher ride and less traction on some road surfaces. Use greater caution while driving.

Do not use more than one compact spare tyre at the same time.

The compact spare tyre is smaller than the regular tyre. Your vehicle’s ground clearance reduces when the compact spare tyre is installed. Driving over road debris or bumps could possibly damage the underside of your vehicle.
Handling the Unexpected

<td>Multi-Information Display Warning and Information Messages P. 135</td>
</tr>
<tr>
<td>Have the fuel filter checked by a dealer to drain off water.</td>
<td><img src="https://example.com" alt="Multi-Information Display Warning and Information Messages" /> appears on the multi-information display.</td>
</tr>
<tr>
<td>Diesel models</td>
<td>Multi-Information Display Warning and Information Messages P. 134</td>
</tr>
</tbody>
</table>
If the Keyless Remote Battery is Weak

If the beeper sounds, [ ø ] appears on the multi-information display; and the ENGINE START/STOP button flashes, and the engine will not start. Start the engine as follows:

1. Touch the centre of the ENGINE START/STOP button with the H logo on the keyless remote while the ENGINE START/STOP button is flashing. The buttons on the keyless remote should be facing you.
   ▶ The ENGINE START/STOP button flashes for about 30 seconds.

2. Depress the brake pedal (continuously variable transmission) or clutch pedal (manual transmission) and press the ENGINE START/STOP button within 10 seconds after the beeper sounds and the ENGINE START/STOP button changes from flashing to on.
   ▶ If you do not depress the pedal, the mode will change to ACCESSORY.
Engine Does Not Start

Emergency Engine Stop

The ENGINE START/STOP button may be used to stop the engine due to an emergency situation even while driving. If you must stop the engine, do either of the following operations:

- Press and hold the ENGINE START/STOP button for about two seconds.
- Firmly press the ENGINE START/STOP button three times.

The steering wheel will not lock.

Models with keyless access system

Emergency Engine Stop

Do not press the ENGINE START/STOP button while driving unless it is absolutely necessary for the engine to be turned off.

If you press the ENGINE START/STOP button while driving, the beeper sounds.

Continuously variable transmission models

The power mode is in ACCESSORY when the engine is stopped. To change the mode to VEHICLE OFF, put the transmission into [P] after the vehicle comes to a complete stop. Then press the ENGINE START/STOP button twice without depressing the brake pedal.

Manual transmission models

The power mode changes to VEHICLE OFF.
Jump Starting

Jump Starting Procedure

Turn off the power to electric devices, such as audio and lights. Turn off the engine, then open the bonnet.

1. Connect the first jumper cable to your vehicle’s battery + terminal.
   - Remove the cover from the under-bonnet fuse box.
   - [Engine Compartment Fuse Box] P. 640

2. Connect the other end of the first jumper cable to the booster battery + terminal.
   - Use a 12-volt booster battery only.
   - When using the automotive battery charger to boost your 12-volt battery, select a lower charging voltage than 15-volt. Check the charger manual for the proper setting.

3. Connect the second jumper cable to the booster battery − terminal.

▲ WARNING

A battery can explode if you do not follow the correct procedure, seriously injuring anyone nearby.

Keep all sparks, open flames, and smoking materials away from the battery.

NOTICE

If a battery sits in extreme cold, the electrolyte inside can freeze. Attempting to jump start with a frozen battery can cause it to rupture.

Securely attach the jumper cables clips so that they do not come off when the engine vibrates. Also be careful not to tangle the jumper cables or allow the cable ends to touch each other while attaching or detaching the jumper cables.

Continued
4. Connect the other end of the second jumper cable to the stud bolt as shown. Do not connect this jumper cable to any other part.

5. If the jumper cable is connected to another vehicle, start the assisting vehicle's engine and increase engine's revolution slightly.

6. Attempt to start your vehicle's engine. If it turns over slowly, check that the jumper cables have good metal-to-metal contact.

Battery performance degrades in cold conditions and may prevent the engine from starting.
■ What to Do After the Engine Starts

Once your vehicle's engine has started, remove the jumper cables in the following order.

1. Disconnect the jumper cable from your vehicle's stud bolt.
2. Disconnect the other end of the jumper cable from the booster battery terminal.
3. Disconnect the jumper cable from your vehicle's battery terminal.
4. Disconnect the other end of the jumper cable from the booster battery terminal.

Have your vehicle inspected by a nearby service station or a dealer.
Handling the Unexpected

Shift Lever Does Not Move

**Continuously variable transmission models**
Follow the procedure below if you cannot move the shift lever out of the P position.

### Releasing the Lock

1. Set the parking brake.

2. Remove the key from the ignition switch.

3. Wrap a cloth around the tip of a small flat-tip screwdriver. Put it into the shift lock release slot as shown in the image, and remove the cover.

4. Insert the key into the shift lock release slot.

5. While pushing the key down, press the shift lever release button and place the shift lever into N.

   The lock is now released. Have the shift lever checked by a dealer as soon as possible.

*2: Right-hand drive type

Models without keyless access system

Models with keyless access system

All models
How to Handle Overheating

Overheating symptoms are as follows:
- The high temperature indicator (red) comes on or the engine suddenly loses power.
- Steam or spray comes out of the engine compartment.

First thing to do
1. Immediately park the vehicle in a safe place.
2. Turn off all accessories and turn on the hazard warning lights.

- **No steam or spray present:** Keep the engine running and open the bonnet.
- **Steam or spray is present:** Turn off the engine and wait until it subsides. Then open the bonnet.

**WARNING**
Steam and spray from an overheated engine can seriously scald you.
Do not open the bonnet if steam is coming out.

**NOTICE**
Continuing to drive with the high temperature indicator on may damage the engine.
How to Handle Overheating

Next thing to do

1. Check that the cooling fan is operating and stop the engine once the high temperature indicator goes off.
   - If the cooling fan is not operating, immediately stop the engine.
2. Once the engine has cooled down, inspect the coolant level and check the cooling system components for leaks.
   - If the coolant level in the reserve tank is low, add coolant until it reaches the MAX mark.
   - If there is no coolant in the reserve tank, check that the radiator is cool. Cover the radiator cap with a heavy cloth and open the cap. If necessary, add coolant up to the base of the filler neck, and put the cap back on.

WARNING

Removing the radiator cap while the engine is hot can cause the coolant to spray out, seriously scalding you.

Always let the engine and radiator cool down before removing the radiator cap.
How to Handle Overheating

**Petrol models with turbocharger**

1. Check that the cooling fan is operating and stop the engine once the high temperature indicator goes off.
   - If the cooling fan is not operating, immediately stop the engine.
2. Once the engine has cooled down, inspect the coolant level, and check the cooling system components for leaks.
   - If the coolant level in the reserve tank is low, or no coolant in the tank, check that the radiator is cool. Cover the reserve tank cap with a heavy cloth and open the cap. Add coolant until it reaches the **MAX** mark and put the cap back on.

**Last thing to do**

Once the engine has cooled sufficiently, restart it and check the high temperature indicator.
If the high temperature indicator is off, resume driving. If it stays on, contact a dealer for repairs.

**WARNING**

Removing the reserve tank cap while the engine is hot can cause the coolant to spray out, seriously scalding you.

Always let the engine and radiator cool down before removing the reserve tank cap.

**All models**

If the coolant is leaking, contact a dealer for repairs.

Use water as an emergency/temporary measure only. Have a dealer flush the system with proper antifreeze as soon as possible.
Indicator, Coming On/Blinking

If the Low Oil Pressure Indicator Comes On

■ Reasons for the indicator to come on
Comes on when the engine oil pressure is low.
■ What to do as soon as the indicator comes on
1. Immediately park the vehicle on level ground in a safe place.
2. If necessary, turn the hazard warning lights on.
■ What to do after parking the vehicle
1. Stop the engine and let it sit for about three minutes.
2. Open the bonnet and check the oil level.
   - Oil Check P. 542
3. Start the engine and check the low oil pressure indicator.
   - The indicator goes off: Start driving again.
   - The indicator does not go off within 10 seconds: Immediately stop the engine and contact a dealer for repairs.

If the Charging System Indicator Comes On

■ Reasons for the indicator to come on
Comes on when the battery is not being charged.
■ What to do when the indicator comes on
Turn off the climate control system, rear demister, and other electrical systems, and immediately contact a dealer for repairs.

NOTICE
Running the engine with low oil pressure can cause serious mechanical damage almost immediately.
If the Malfunction Indicator Lamp Comes On or Blinks

■ Reasons for the indicator lamp to come on or blink
  • Comes on if there is a problem with the engine emissions control system.
    - **Petrol models**
      • Blinks when engine misfiring is detected.
    - **Diesel models**
      • Comes on when air may have entered the fuel system.

■ What to do when the indicator lamp comes on
Avoid high speeds and immediately get your vehicle inspected at a dealer.

■ What to do when the indicator lamp blinks
Park the vehicle in a safe place with no flammable items and wait at least 10 minutes or more with the engine stopped until it cools.

If the Brake System Indicator (Red) Comes On

■ Reasons for the indicator to come on
  • The brake fluid is low.
  • There is a malfunction in the brake system.

■ What to do when the indicator comes on while driving
Depress the brake pedal lightly to check pedal pressure.
  • If normal, check the brake fluid level the next time you stop.
  • If abnormal, take immediate action. If necessary, downshift the transmission to slow the vehicle using engine braking.

Have your vehicle repaired immediately. It is dangerous to drive with low brake fluid. If there is no resistance from the brake pedal, stop immediately in a safe place. If necessary, downshift the gears.

If the brake system indicator and **ABS** indicator come on simultaneously, the electronic brake distribution system is not working. This can result in vehicle instability under sudden braking. Have your vehicle inspected by a dealer immediately.
If the Electric Power Steering (EPS) System Indicator Comes On

■ Reasons for the indicator to come on
- Comes on if there is a problem with the EPS system.
- If you depress the accelerator pedal repeatedly to increase the engine speed while the engine is idling, the indicator comes on, and sometimes the steering wheel becomes harder to operate.

■ What to do when the indicator comes on
Stop the vehicle in a safe place and restart the engine.
If the indicator comes on and stays on, immediately have your vehicle inspected by a dealer.
If the Electric Parking Brake System Indicator Comes On

- **Reasons for the indicator to come on**
  Comes on when there is a problem with the electric parking brake system.

- **What to do when the indicator comes on**
  Avoid using the parking brake and immediately get your vehicle inspected at a dealer.

- **What to do when the electric parking brake indicator comes on or blinks at the same time**
  Release the parking brake.

  - **Parking Brake** P. 477
  - If the electric parking brake indicator remains on or blinks even after releasing the parking brake, immediately stop the vehicle in a safe place and call a dealer.
    - Prevents your vehicle does move,
      - **Continuously variable transmission models**
        put the transmission into P.
      - **Manual transmission models**
        put the transmission into 1 or R.
  - If only the electric parking brake indicator goes off, immediately get your vehicle inspected at a dealer.
If the Low Tyre Pressure/Deflation Warning System Indicator Comes On or Blinks

**Reasons for the indicator to come on/blink**
A tyre pressure is significantly low, or the deflation warning system has not been initialised. If there is a problem with the deflation warning system or the compact spare tyre* is installed, the indicator blinks for about one minute, and then stays on.

**What to do when the indicator comes on**
Drive carefully and avoid abrupt cornering and hard braking.
Stop your vehicle in a safe place. Check the tyre pressure and adjust the pressure to the specified level. The specified tyre pressure is on a label on the driver side doorjamb.
- Initialise the deflation warning system after the tyre pressure is adjusted.
- [Deflation Warning System Initialisation](P. 474)

**What to do when the indicator blinks, then remains on**
Have the tyre inspected by a dealer as soon as possible. If the compact spare tyre* causes the indicator to blink, change the tyre to a full-size tyre.
The indicator goes off after driving for a few kilometres (miles).
- Initialise the deflation warning system after a full-size tyre is reinstalled.
- [Deflation Warning System Initialisation](P. 474)

---

**NOTICE**
Driving on an extremely underinflated tyre can cause it to overheat. An overheated tyre can fail. Always inflate your tyres to the prescribed level.

* Not available on all models
If the Low Oil Level Symbol Appears

■ Reasons for the symbol to appear
Appears when the engine oil level is low.

■ What to do as soon as the symbol appears
1. Immediately park the vehicle on level ground in a safe place.
2. If necessary, turn the hazard warning lights on.

■ What to do after parking the vehicle
1. Stop the engine and let it sit for about three minutes.
2. Open the bonnet and check the oil level.
olie Check P. 542

Diesel models
If the PGM-FI Symbol Appears

■ Reasons for the symbol to appear while the engine is running
There is a problem with the engine control system.

■ What to do when the symbol appears repeatedly
Avoid full-throttle acceleration and high speed driving. Have your vehicle checked by a dealer.

NOTICE
Running the engine with low oil level can cause serious mechanical damage almost immediately.

This system activates after the engine warms up. If the outside temperature is extremely low, you may have to drive for a long time until the system senses the engine oil level.

If the symbol appears again, stop the engine and contact a dealer for repairs immediately.

Diesel models
If the PGM-FI Symbol Appears

NOTICE
Continuously driving with this symbol on can damage the emissions controls and engine. Those repairs may not be covered by your vehicle’s warranties.
Fuses

Fuse Locations

If any electrical devices are not working, turn the ignition switch to LOCK [0]† and check to see if any applicable fuse is blown.

Engine Compartment Fuse Box

Fuse box A

Located near the battery. Push the tabs to open the box.

Fuse locations are shown on the image below.

Locate the fuse in question by the fuse number in the image and chart.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

Inspecting and Changing Fuses

1. Turn the ignition switch to LOCK [0]*1. Turn headlights and all accessories off.
2. Check the fuses on the battery in the engine compartment.
   ▶ If the fuse is blown, have it replaced by a dealer.
3. Remove the fuse box cover.
4. Check the large fuse in the engine compartment.
   ▶ If the fuse is blown, use a Phillips-head screwdriver to remove the screw and replace it with a new one.
5. Inspect the small fuses in the engine compartment and the vehicle interior.
   ▶ If there is a blown fuse, remove it and replace it with a new one.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

NOTICE
Replacing a fuse with one that has a higher rating greatly increases the chances of damaging the electrical system.

Replace fuse with a new one of the same specified amperage.
Use the charts to locate the fuse in question and confirm the specified amperage.

Fuse Locations P. 638
Emergency Towing

Call a professional towing service if you need to tow your vehicle.

■ Flat bed equipment
The operator loads your vehicle on the back of a truck. This is the best way to transport your vehicle.

■ Wheel lift equipment
The tow truck uses two pivoting arms that go under the front tyres and lift them off the ground. The rear tyres remain on the ground. This is an acceptable way to tow your vehicle.

NOTICE
Trying to lift or tow your vehicle by the bumpers will cause serious damage. The bumpers are not designed to support the vehicle’s weight.

Never tow your vehicle with just a rope or chain. It is very dangerous since ropes or chains may shift from side to side or break.

Make sure the parking brake is released. If you cannot release the parking brake, your vehicle must be transported by the flat bed equipment.

Parking Brake P. 477
Emergency Towing

If your vehicle must be towed with the front wheels on the ground:

1. Check the ground underneath the vehicle around where the transmission housing is for a fluid leak.
   · If you find a leak, call a professional towing service and have your vehicle inspected by a dealer.

2. Push the left side of the cover to remove it.
   · The detachable towing hook mounts on the anchor in the front bumper.

If your vehicle must be towed with the front wheels on the ground:

Towing a vehicle is prohibited by law in some countries. Check and follow the legal requirements of the country you are driving before towing your vehicle.

If you cannot follow the exact procedure, do not tow your vehicle with the front wheels on the ground.

If you cannot turn on the engine, you may experience the following while your vehicle is being towed.

- **Models with keyless access system**
  - Check that the steering wheel is not locked.

- **All models**
  - Braking may become difficult since the brake system’s power assist is disabled.
  - Steering wheel becomes heavy as the power steering system is disabled.

- **Manual transmission models**
  - Turning the ignition switch to LOCK [1] locks the steering wheel.

With the front wheels on the ground, it is best to tow the vehicle no farther than 80 km (50 miles), and keep the speed below 55 km/h (34 mph).

Going down a long slope heats up the brakes. This may prevent the brakes from working properly. If your vehicle needs to be towed on an incline, call a professional towing service.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
3. Take the towing hook and the wheel nut wrench out of the luggage area.
4. Screw the towing hook into the hole, and tighten it with the wheel nut wrench securely.
5. Hook the towing device to the towing hook.
6. Start the engine.
   ► If it is difficult to turn on the engine, put the ignition switch in ACCESSORY [I] or ON [II]¹.

**Manual transmission models**
7. Shift to [N].

**Continuously variable transmission models**
7. Depress the brake pedal.
8. Shift to [D] and hold for five seconds, then to [N].

**All models**
9. Release the parking brake.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

If your vehicle must be towed with the front wheels on the ground:

**NOTICE**

*Continuously variable transmission models*
If you cannot shift the transmission or turn on the engine, will damage the transmission. Your vehicle must be transported with the front wheels off the ground.

Make sure to use the properly-designed and attached towing equipment.

If your vehicle must be towed with the front wheels on the ground:
When You Cannot Open the Tailgate

**What to Do When Unable to Open the Tailgate**

If you cannot open the tailgate, use the following procedure.

1. Wrap a cloth around the flat-tip screwdriver. Put it into the cover as shown in the image, and open it.

2. Wrap a cloth around the flat-tip screwdriver. Put it into the lid as shown in the image, and open the lid.

**Following up:**

After taking these steps, contact a dealer to have your vehicle checked.

When you open the tailgate from inside, make sure there is enough space around the tailgate, and it does not hit anyone or any object.
3. To open the tailgate, push the tailgate while sliding the lever to the right.
Refueling From a Portable Fuel Container

If you have run out of fuel and need to refuel your vehicle from a portable fuel container, use the funnel provided with your vehicle.

1. Turn off the engine.
2. Pull on the fuel fill door release handle under the driver’s side lower outside corner of the dashboard.
   ▶ The fuel fill door opens.
3. Take the funnel out of the luggage area.
4. Remove the funnel from the case.
5. Insert the funnel into the filler neck fully and slowly.
6. Fill the tank with fuel from the portable fuel container.
   ▶ Pour fuel carefully so you do not spill any.
7. Remove the funnel from the filler neck.
   ▶ Wipe up any fuel from the funnel before storing it.
8. Shut the fuel fill door by hand.

Notice
Do not insert the nozzle of a portable fuel container or any funnel other than the one provided with your vehicle. Doing so can damage the fuel system. Do not try to pry open or push open the sealed fuel tank with foreign objects. This can damage the fuel system and its seal.

Make sure the fuel in the portable fuel container is diesel fuel before you refuel.
This chapter includes your vehicle’s specifications, locations of identification numbers, and other information required by regulation.

### Specifications

**Air Conditioning**

- **Refrigerant Type**: HFO-1234yf (R-1234yf)
- **Charge Quantity**: 395 - 445 g

**Brake/Clutch* Fluid**

- **Specified**: Brake Fluid with DOT 3 or DOT 4

**Continuously Variable Transmission Fluid** *

- **Specified**: Honda HCF-2
- **Capacity Change**: 3.4 L (3.0 Imp qt)

**Manual Transmission Fluid** *

- **Specified**: Honda MTF
- **Capacity**: 1.9 L (1.7 Imp qt)

**Engine Oil**

- **European models**
  - Honda Engine Oil #1.0
  - Honda Green Oil
  - Honda Engine Oil Type 2.0
  - Honda Genuine Motor Oil 0W-20
  - ACEA C2/C3 0W-30, 5W-30
- **Except European models**
  - Honda Engine Oil #1.0
  - Honda Green Oil
  - Honda Genuine Motor Oil 0W-20
  - ACEA C2/C3 0W-30, 5W-30

- **Recommended**
  - Honda Engine Oil #1.0
  - Honda Green Oil
  - Honda Genuine Motor Oil 0W-20
  - ACEA C2/C3 0W-30, 5W-30

- **Change**
  - **Capacity**: 3.4 L (3.0 Imp qt)
  - **Change including filter**: 3.6 L (3.2 Imp qt)

**Engine Coolant**

- **Specified**: Honda All Season Antifreeze/Coolant Type2
- **Ratio**: 50/50 with distilled water
- **Capacity**
  - 3.42 L (0.752 Imp gal)
  - 3.56 L (0.783 Imp gal)
  - (change including the remaining 0.475 L (0.1045 Imp gal) in the reserve tank)

**Tyre**

- **Regular Size**
  - 215/60R16 95H
  - 215/55R17 94V
  - 225/50R18 95V
- **Pressure**
  - See the label on driver’s doorjamb.

- **Compact Size**
  - T135/90D16 102M
  - 16 x 7 1/2J

- **Wheel Size**

The maximum permissible vertical load on the coupling device: 70 kg (154 lbs)

**NOTE:**
1. ○ marks show towbar fixing points.
2. ▼ mark shows towbar coupling point.
Vehicle Identification Numbers

Vehicle Identification Number (VIN), Engine Number and Transmission Number

Your vehicle has a 17-digit vehicle identification number (VIN) used to register your vehicle for warranty purposes, and for licensing and insuring your vehicle. The locations of your vehicle’s VIN, engine number and transmission number are shown as follows.

Petrol models

- Engine Number
- Continuously Variable Transmission Number
- Certification Label/ Vehicle Identification Number
- Vehicle Identification Number
- Manual Transmission Number
- Vehicle Identification Number

Diesel models

- Engine Number
- Vehicle Identification Number
- Manual Transmission Number
- Vehicle Identification Number
- Certification Label/ Vehicle Identification Number

EC Declaration of Conformity

1. The undersigned, Mr. Ryoichi Hiraki, representing the manufacturer, hereby declares that the machinery depicted below fulfills all the relevant provisions of the CE-marking Directive 2006/42/EC on machinery.

2. Description of the machinery:
   a. General classification: Pneumatic jack
   b. Function: Filling motor vehicle
   c. Model: R-5

3. Manufacturer:
   Honda Type A/B/D/E/G/H/K
   RENKAVI CO., LTD.
   5-12 Shibuya Saisibashi
   Sumida-ku, 101-8714
   JAPAN

4. Manufacturer:
   Honda Type D/U
   CHUNGZHOU RENKAVI MACHINERY CO., LTD.
   No. 5 Xinxi Road, Changzhou, Jiangsu, China

5. Legal person authorized to complete the technical file:
   Honda Motor Europe Ltd., Birmingham Branch
   via Honda Motor Europe Ltd., Aukland Office
   Wilrijk 50, 2800 Mechelen

6. Standards:
   a. EN 954-1
   b. EN 954-2

7. Other standards or specifications:
   a. ISO 9001:2000

8. Serial number:
   123456789

9. Date:
   1 December 2009

Note this declaration becomes invalid if technical or operating modifications are introduced without the manufacturer’s consent.

* Not available on all models
EC Declaration of Conformity Content Outline

Italian (Italian)
Dichiarazione CE di Conformità
1. Il costruttore, Sig. Ryochi Hiraki, rappresentante delle fabbriche, dichiara che il veicolo sottoposto è conforme alle disposizioni pertinenti alla:
   Direttiva 2004/42/CE relativa agli autoveicoli
2. Descrizione della vettura
   a) Denominazione genérica: Martindale a pantografo
   b) Funzione: salvaspazio veicolato a motore
   c) Modello: (d) Tipo:
   3. Fabbrica (1)
   4. Fabbrica (2)
   5. Legale autorizzato a costituire il fascicolo tecnico
   6. Referenza norma standard
   7. Altre norme e specifiche
   8. Eseguito a: 9. Data

Greek (Greek)
Δήλωση Συμμόρφωσης ΕΚ
1. Ο αντιπρόσωπος, κ. Ryochi Hiraki, αυτοδιοίκημα της κατασκευαστικής εταιρείας, δηλώνει ότι το προϊόν του περιλαμβάνει τα παρακάτω προς την εφαρμογή της σχετικής διατύπωσης:
   Κοινοτική Οδηγία 2004/42/ΕΚ σχετικά με τη μηχανή
   2. Σημειώσεις του προϊόντος:
   a) Μαζί με τον κατασκευαστή: Τιμόνι αυτοκινήτου
   b) Λαμπαδάρι: Λαμπαδικά μηχανών ειδικότητας
   c) Μοντέλο:
   3. Κατασκευαστής (1)
   4. Κατασκευαστής (2)
   5. Νομικό πρόωφο σχετικά με την εγγυήση της τεχνικής τέχνης
   6. Ελαιοσκεύασμα: Τιμόνι αυτοκινήτου
   7. Διαφάνεια από: Παραγωγή
   8. Εξελίξεωση από: Παραγωγή

Portuguese (Portuguese)
Declaração de Conformidade CE
1. O abaixo assinado, Ryochi Hiraki, representando as fabricantes abaixo de, declara que a máquina descrita abaixo cumprindo todas as disposições referentes a:
   Diretiva 2004/42/CE sobre máquinas.
2. Descrição da máquina
   a) Denominação genérica: Máquina de lavar
   b) Função: Elevação de veículo motor
   c) Modelo: (d) Tipo:
   3. Fabricante (1)
   4. Fabricante (2)
   5. Prazos jurídicos autorizados a compilar o processo técnico
   6. Referências às normas harmonizadas
   7. Outras normas ou especificações

Swedish (Swedish)
Svensk förklaring av överensstämmelse
1. Utöverträdare och representant för tillverkaren, Mr. Ryochi Hiraki, försöker med vilken förklarar att delad fabrikationsuppgifterna uppfyller alla relevanta direktiv:
   EU:s direktiv 2004/42/EG
   2. Beskrivning av delad fabrikationsuppgifter:
   a) Genomförande beskrivning: Sandvik
   b) Funktion: Lyft av motorfordon
   c) Modell:
   d) Typ:
   3. Tillverkare (1):
   6. Förvärvningar till harmoniserade normer
   7. Övriga normer eller specifikationer

Slovenčina (Slovak)
Slovenská ohlasovačka
1. Podpísaný Ryochi Hiraki, zástupca výrobcu, týmto vyhlasuje, že nízkeho podložky zdroje a odpoveď na príslušné ustanovenie tejto americkej smernice 2004/42/ES o strojových zariadeniach:
   a) Generečné určenie - pantografský zdroj
   b) Funkcia: zdvihanie motorových vozidiel
   c) Model:
   d) Typ:
   3. Výroba (1):
   4. Výroba (2):
   5. Autorizovaný zástupca obdobne preto že technické dokumentačné zdroje
