Model Shown overleaf: Honda e Special Edition at £38,120 On The Road (OTR). Economy & Emissions figures (WLTP) Range: Power consumption in kWh/100 km: combined 17.2-17.8; CO2-emission combined (g/km): 0. Efficiency: A+. The Honda e is a battery electric vehicle requiring mains electricity for charging. Zero emissions while driving. Electric range figures may not reflect real life driving results, which will depend upon a number of factors including the starting charge of the battery, accessories fitted (post-registration), variations in weather, driving styles and vehicle load. The electric range was determined according to a new test (WLTP). Only compare fuel consumption, CO2 and electric range figures with other cars tested to the same technical procedure. All figures are correct at time of publication but may be subject to change. Image shown is left-hand drive. Right-hand drive will be released in the UK.
