These specification details do not apply to any particular product which is supplied or offered for sale. The manufacturer reserves the right to vary their specification, including colours, with or without notice at such times in such manner as they think fit. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. Consult the Dealer with whom your order is placed for details of the specification of any particular product. This publication shall not constitute in any circumstances whatsoever an offer by the Company to any person. All sales are made by the Distributor or Dealer concerned subject to and with the benefit of the standard Conditions of Sale and Warranty given by the Distributor. While efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specific details with the supplying Dealer, especially if a selection is dependent upon one of the features advertised.

When we designed our range of gardening products we looked at your life from every angle.

Everything we learn from everything we do, goes into the development of our lawn and garden products, allowing us to create new technologies and new ways of solving problems. Not only making them the very best they can be, but making them a joy to use and own. So it's not just clever engineering, it's **ENGINEERING FOR** *Life*

## Which Honda is right for your garden?

We have created a range of products to keep your garden looking its best. They are designed to be easy to use and a joy to own. All you need to do is choose the right one for you.

# Honda Miimo Robotic Mowers

Miimo is our range of clever robotic lawnmowers that are completely autonomous and can look after your lawn without any assistance.

## Robotic mower features

### Flexible Docking System\*

Miimo's unique docking station can be installed in any location on your lawn, whether this is under a bush, down a narrow strip of grass or in a tight corner - allowing you to position it discretely in your garden.

\*Only available for HRM 3000.

### Bluetooth™ Smartphone App\*

An intuitive and easy to use interface, which allows you to modify your Miimo's set-up via Bluetooth™ on your smartphone.

\*Only available for HRM 3000.

### Waterproof

Miimo is fully waterproof and can tackle any weather, automatically mowing more often when grass is growing rapidly. The HRM 3000 can even be washed with a hose pipe.

## THE RANGE

HRM 310

HRM 520

HRM 3000

## MIIMO TECHNOLOGIES

### Rapid Reaction Bump and Lift Sensors

Miimo can sense contact, stopping the moment it touches an object or pet, turning and continuing in a different direction. It can also detect lifting or tilting, stopping the blades for absolute safety.

### Automatic Charging System

Miimo works for as long as you want. When needed, it heads off to recharge itself then gets straight back to work.

### Micro Mulching

Miimo cuts grass clippings into minute particles so they drop down through the grass and act as fertiliser. No more walking grass through the house.

### Zone Management

Zone management allows you to control when and where Miimo mows, to ensure complete coverage of your lawn, even in hard to reach areas.

### Flexible Docking\*

Flexible docking allows you to position the docking station in a variety of positions in your garden, including corners, narrow passages or on your patio.

### Advanced Waterproofing\*

Not only is Miimo safe to use in the rain (all models are weatherproof), the HRM 3000 can even be washed with a hose pipe.

### Smartphone App\*

A simple and intuitive interface that allows you to change Miimo's set-up via Bluetooth™ with your smartphone.

### Electric Cutting Height Adjuster\*

The cutting height can be adjusted electronically, directly from the smartphone app.

### Slope capacity and uneven ground

Miimo is capable of cutting slopes of up to 25° with its high level of traction and grip. And thanks to its rapid reaction lift sensors, Miimo never gets stuck in a hole or uneven ground.

### Anti Theft

Every Miimo can be protected with the use of a unique security code, which ensures it cannot be used by anyone else but you. It stops and sounds an alarm as soon as it is lifted and only restarts once your pin number has been accepted.

### Adjustable cutting height

You can easily adjust the cutting height to suit your lawn, from 20 mm to 60 mm. It can be adjusted electronically through the smartphone app with the HRM 3000 or manually with the HRM 310/520.

### Safety, our priority

Miimo is equipped with sensors which stop the blades instantly when it detects any lifting or tilting. The 360° bump sensors modify its direction if an obstacle is detected, so it is safe to use around children or pets.

\*Available on HRM 3000 only

## Trust Miimo to take care of your lawn

The Miimo HRM 310 and 520 robotic lawnmower range is the innovative and easy way for you to keep your lawn in perfect condition all-year round, with minimal effort.

Miimo follows the layout of your garden, navigating between obstacles and mulching as it works to create a healthy, perfectly manicured lawn. It's powered by lithium batteries which are quiet and reliable, allowing it to be set to cut your lawn at night without disturbing you or your neighbours.

Miimo is robust enough to work in any weather and safe to use around pets, thanks to sensors which detect any lifting motion and stop the blades instantly. In fact, Miimo is so clever it even knows when to recharge itself via its own docking station.

## The high tech solution for a beautiful lawn

The Honda HRM 3000 is our very latest robotic lawnmower. It brings a whole world of new innovation to your garden and takes away a lot of the effort keeping your lawn in perfect condition, giving you more time to do the things you love to do.

Miimo does all it can to make your life easier. It's waterproof, so it can cut your grass in any weather and you can clean it with a hose pipe. It can even look after itself should it encounter a problem, by sending a report via the app to a cloud support system which allows your dealer to check it remotely or update any software. Bluetooth™ connectivity comes as standard, with no additional components to be installed.

The app has been designed to allow you to change settings, cutting height, start / stop or even drive Miimo by remote control. You can also access its monthly timer to know when it needs recharging, returning automatically to its docking station.

HRM 3000

## HRM 3000 Software updates

We have enhanced the intelligence and capacity of Miimo, with a series of software updates that are pre-programmed and ready to go.

### Intelligent height adjustment

Miimo automatically reduces the cutting height gradually, until it reaches the 'Target cutting height' chosen by you. This reduces the time you would spend adjusting the cutter height and of course, it provides a superb finish to your lawn.

### Intelligent timer

Miimo can now automatically adjust its mowing timer to adapt to the growth rate of the grass. By optimising its working time, Miimo not only ensures your lawn is always kept in good condition, but it could also extend its lifespan.

## Miimo accessories

A range of accessories are available to ensure Miimo makes your life a little easier.

Miimo house

Miimo bag

### Introduce Miimo to your garden online

### Simulate Miimo cutting your lawn

Set Miimo to work in your garden with our clever Miimo lawn planner, which simulates Miimo navigating your own unique lawn.

It allows you to select the area you want Miimo to cut, customise its set-up and even suggest the model that is best suited to your garden.

Go to [www.honda.co.uk/lawnplanner](http://www.honda.co.uk/lawnplanner), click on Lawn planner and follow the easy steps.

### If you need a little bit of extra assistance

#### Your Honda dealer can help you

A Honda Authorised Dealer can help you decide which Miimo suits your garden and upon purchase can install the docking station and boundary wire. Our dealers are highly skilled and have followed specific training to ensure trouble free operation and installation, whatever the profile of your garden.

# Honda Lawnmowers

Whatever the size and shape of your garden, we have the perfect lawnmower for you. From our easy to use electric range to a wide variety of petrol driven models, perfect for domestic and professional use.

The HR21, Honda's first walk-behind lawn mower, was launched in August 1978. More than 300,000 units were sold across the world and the machine received rave reviews for its outstanding performance and ease of use.

## THE RANGE

## LAWNMOWER TECHNOLOGIES

- 
**Auto-Choke**  
 The intelligent auto-choke system automatically sets the choke to give optimum starting and running in all conditions.
- 
**Electric Start**  
 The electric key start ignition makes starting your lawnmower even easier and is fitted in addition to the standard recoil pull-start.
- 
**Roto-Stop® Blade Brake Clutch**  
 Stops the blades but leaves the engine running while you empty the grass bag or move across driveways with self-propelled models.
- 
**Rear Roller**  
 Models with a rear roller give your lawn that classic striped effect. A rear roller offers greater machine balance and control when cutting around the edge of your lawn.
- 
**SMART Drive®**  
 SMART Drive® is designed to give you fingertip control allowing you to adjust the speed control for greater accuracy.
- 
**Select Drive**  
 The all-new Select Drive additionally allows you to set a constant speed for relaxed mowing with increased comfort.
- 
**Hydrostatic Drive**  
 Hydrostatic Drive gives you greater accuracy and a smooth, stepless speed control.
- 
**Pro Engine Pro Spec**  
 Designed using steel and cast iron, these engines are built for more robust work.
- 
**Versamow™ Selective Mulching System**  
 With a single lever, Honda's Versamow™ system will either collect the grass cuttings into the bag or finely shred and blow them down into the lawn to create a natural fertiliser.
- 
**Versamow™ Variable Mulching System**  
 With a single lever, Honda's Versamow™ system will collect the grass cuttings into the bag or finely shred and blow them down into the lawn to create a natural fertiliser or the perfect mix of both.
- 
**Optiflow**  
 A fan improves air flow between the cutter deck and the high air flow grass bag. It significantly improves collecting performance of the lawnmower.  
Available on HRE 370 and HRE 410 only.

## Lawnmower features

### Roto-Stop® blade stop system

This feature enables you to release the blade engagement control which stops the blades, without turning off the engine. It allows you to move obstacles such as debris or toys from your mowing path, empty the grass bag or even cross over paths or driveways safely without the need to restart the engine.

## DECK MATERIALS

With three deck materials to choose from there is sure to be one to suit your needs.

### Pressed steel, powder coated decks

As featured on the HRG series, are built for durability and performance. They are lightweight for easy manoeuvrability whilst still being hard-wearing and resistant to deterioration from corrosion and UV rays.

### Polystrong & Xenoy decks

As featured on the HRX series, are both very strong, durable polymer materials which are highly resistant to UV, corrosion and dents.

### Cast aluminium decks

Featured on the HRH and HRD series, these offer exceptionally high strength to weight ratio and resistance to corrosion.

## TRANSMISSION TECHNOLOGY

Self-propelled lawnmowers make mowing the lawn easier, and Honda has three variable speed technologies: SMART Drive®, Select Drive and Hydrostatic drive.

### SMART Drive®

SMART Drive® is the latest self-propelled technology that provides subtle fingertip control, for accuracy around flowerbeds and borders.

### Select Drive

Select Drive is a clever feature that enables you to set a constant speed whilst mowing, giving you a more relaxed and comfortable experience.

### Hydrostatic Drive

Honda's innovative Hydrostatic Drive gives you greater accuracy by providing smooth, stepless speed control.

## HONDA MULCHING

### Micro cut twin blade system

Two stacked, offset blades cut grass into small clippings which decompose quicker, giving a better result when mulching. They also take up less room when collecting meaning less frequent emptying of the grass bag.

### Versamow™ selective

Switching between mulching, collecting or discharging is simply achieved by adjusting a lever. There is no need to insert a separate mulching plug when you wish to mulch, this capability is integrated and can be activated or deactivated quickly, easily and safely.

### Versamow™ variable

This system allows you to switch between mulching, collecting or discharging modes, via the easy to adjust lever. You can also control how much grass is collected or mulched. There are seven positions ranging from full collection to full mulching with five variable positions in-between, giving you any combination of the two. As the system is fully integrated, no additional tools or attachments are required.

Optiflow\*

\*Available on HRE 370 and HRE 410 only.

Model availability is dependent on country, do not hesitate to ask your local Honda dealer.

A convenient carrying handle makes the HRE very easy to move whilst the main handle can be folded to make the most of storage space

Cutter deck height adjustment lever

Perfect for smaller gardens, our HRE range is powerful enough to cut your lawn with ease and light enough to be handled just as easily. With a choice of three different blade sizes, you can find the right one to suit your garden.

Each model has an easy to operate, five position cutter deck height adjustment control, so that you can achieve a perfect cut every time by selecting the ideal height to suit your grass.

The HRE 370 and 410 models both feature our unique Optiflow system. This utilises a specially designed fan, fixed to the blade, creating a powerful, controlled airflow that maximises grass collection.

A magnetic blade brake clutch system is conveniently operated from the main handle, making it easy to engage and disengage the cutting blades. Whilst an integrated cable loop system keeps the cable out of harms way.

 Model availability is dependant on country, do not hesitate to ask your local Honda dealer.

The new HRX 476 and HRX 537 have been designed around you.

The new HRX has been designed to make your life easier and a little more enjoyable. It's the result of over 40 years experience and features a host of unique Honda technologies; such as Select Drive for precise control, Versamow™ for selective mulching and Roto-Stop® to safely disengage the cutting blades. Our new GCVx engines increase performance, maximise efficiency and benefit from reduced noise levels. All you need to do is choose the one that is right for your garden.

For smaller gardens, the HRX 426 models, fitted with the GCV 160 engine, can suit your needs with a smaller cutter deck size but similar levels of performance and reliability.

HRX 476 VYE

\*Available on HRS 536 VKEA model only.  
 \*\*Available on selected models only, please see table below for details.

## Professional lawnmowers Hard working mowers for hard working professionals

The HRD and HRH mowers, with our powerful Pro Spec engines and 53 cm wide heavy duty cast aluminium cutter decks, are robust, reliable and designed to meet the most demanding conditions. So if you require a mower that you can depend on, this is the professional choice.

Reinforced cutter deck handle

Cast iron drive shaft

Pro Spec GXV 160 engine

Whatever the task, we have a full professional range to get the job done. For instance, the HRS is designed to make short work of long grass, mulching clippings and blowing them back onto the lawn. It also has the ability to eject grass clippings from a side chute.

Our UM grass cutters are built for areas that are difficult to manage, like fields, orchards and roadsides. The free floating front wheels and hydrostatic transmission make work easy and safe.

Protected by a tough cast aluminium deck and a reinforced cutter deck handle, the HRD and HRH are built to take on the most demanding jobs time after time. Power comes from our Pro Spec GXV 160 engines (except HRD 536 TXEA), which have a durable cast iron cylinder sleeve and crankshaft, that runs on specially adapted bearings to extend its working life. They also feature dual air filters and an extra large 1.5 litre fuel tank for periods of extended use.

# Honda Ride-On Mower & Lawn Tractors

Our ride-on mower range is packed with innovative, robust features that maximise cutting and collecting performance, while ensuring they are enjoyable to use. From the compact HF 1211 to the premium HF 2622, you can find the right machine for you.

## Ride-on mower and lawn tractor features

### Optiflow

Our Research and Development team has developed Honda Optiflow, a system that combines powerful suction with controlled and low turbulence air flow that reduces power loss, noise and grass accumulation, from the air intake **1** through the cutter deck **2** to the grass ejection **3** into the basket **4**. The air flow is powerful and constant enough to completely fill the grass bag whilst minimising dust.

## THE RANGE

HF 1211

HF 2315

HF 2622

## RIDE-ON MOWER AND LAWN TRACTOR TECHNOLOGIES

**Hydrostatic Drive**  
Hydrostatic drive gives you greater accuracy and a smooth, stepless speed control.

**Versamow™ Selective Mulching System**

With a single lever, Honda's Versamow™ system will either collect the grass cuttings into the bag or finely shred and blow them down into the lawn to create a natural fertiliser.

**Pro Engine Pro Spec**  
Designed using steel and cast iron, these engines are built for more robust work.

**Optiflow**  
A fan improves air flow between the cutter deck and the high air flow grass bag. It significantly improves collecting performance of the lawnmower.

**Electric Grass Dump**  
The grass bag is opened with an electric motor at the touch of a switch.

**Synchronous Blade Cut**  
Both blades have an overlapping cutting area to create accurate mowing and avoid any uncut areas when turning.

### Versamow™ selective

With a single lever, Honda's Versamow™ selective mulching system will either collect the grass cuttings into the bag or finely shred and blow them down into the lawn to create a natural fertiliser. If your grass is long or rough, you can mow your garden and collect grass clippings in one passage.

### Synchronized blade belt system

Cutter decks with asynchronous blades use two independent unsynchronised blades that are slightly offset. Cutter decks with synchronous blades use two blades that are synchronised with a timing belt to keep a constant 90 degree angle. The benefit of a synchronous system, is constant cutting performance to avoid uncut areas, even when turning and better air flow under the cutter deck, resulting in optimised grass collecting and a lower risk of clogging.

### Honda engine

Reliability, performance and cleaner exhaust gas emissions are the hallmark of Honda V-twin engines. Each model includes a decompressor for an easy start (and easy restart), and is one of the most fuel efficient engines on the market. The cast iron cylinder sleeve and the high capacity air filter ensure a long lifetime on even the toughest of workloads.

\*Available on HF 1211 HE and HF 2315 HME models only.  
 \*\*Available on HF 2315 HME model only.

**HF** ride-on mowers and lawn tractors

## Manoeuvrability & ease of use

Hydrostatic transmission for an incomparable user experience

Optiflow offers an optimised collection capacity

**The HF 1211 ride-on mower and HF 2315 lawn tractors are designed for larger lawns. They make grass cutting effortless with excellent performance and light manoeuvrability.**

We have designed the HF 1211 and HF 2315 to be intuitive to use and easy to operate. From your comfortable seating position you'll find all the important controls within easy reach, so you can cut large areas of grass with the minimum of effort and time. The hydrostatic transmission gives you smooth, variable speed, and the ability to regulate your pace without affecting the blade speed. That way you get a perfect result, whether you're in a hurry or taking your time.

Powered by our 'Pro' spec engines which feature cast iron cylinder sleeves and crankshaft bearings for smooth running and longer engine life, they are easily controlled by a single pedal that controls the hydrostatic forward speed. They are also highly manoeuvrable, with a tight turning circle and excellent visibility which makes cutting around obstacles simple. To save time and effort whilst working, a single, easy to reach lever can empty the grass catcher box from the comfort of the driving seat.

**HF** premium lawn tractors  
 Premium comfort  
 and performance

Versamow™ selective mulching Control panel

Cast iron front axle and bumper

**The HF 2417 and HF 2622 series are robust, reliable, user friendly and deliver outstanding performance from their V-Twin engines. They have the ability to take on any lawn, no matter how large.**

Our lawn tractors feature a lot of clever technology that takes the effort out of keeping your lawn in perfect condition. The electromagnetic blade brake clutch for instance, makes it simple to switch between activating and deactivating the cutting blade and, with a maximum 350 litre capacity grass catcher, you can continue mowing for longer. Whilst our unique Versamow™ technology, which allows you to select whether you collect or mulch, can be operated by a single lever from your driving seat.

The powerful torque developed by the V-twin engine, combined with hydrostatic drive, will take you smoothly along at a pace you're happy with, without affecting the quality of the cut.

A unique airflow system created by Honda, provides the ultimate collecting performance, meaning there is no clogging in the collection chute. The cutting blades have an overlapping cutting area to create accurate mowing and avoid any uncut areas when turning.

With options such as the electric grass box emptying, these tractors provide the ultimate lawn care experience with superior driving comfort.

We have also thought of the little details, and these models are fitted with tyres, that feature lawn protecting tread, not only ensuring good traction, but that no unsightly damage is done to the lawn.

# Honda Handheld

Reliable, durable and created to work in the toughest environments, our range of brushcutters are easy to use and efficient to run. Designed around our legendary 4-stroke engine technology, they are compact, yet powerful enough to tackle any job.

## Handheld features

### Decompression system

The GX 25 and GX 35 are equipped with a mechanical decompression system combined with a super-lightweight flywheel which requires minimum effort on the recoil-rope to start the engine. Everyone can start the engine and this is part of the reputation of Honda's product.

### 360° lubrication

These engines feature a rotary slinger pumping lubrication system which provide a constant flow of lubrication whatever the position of the engine. This makes usage and storage very convenient.

## THE RANGE

BRUSHCUTTER

VERSATOOL™

LEAF BLOWER

HEDGETRIMMER

### High fuel efficiency

Whatever the application, these engines offer long running time between filling through their optimised fuel tank and low fuel consumption. Fuel consumption at maximum power:  
 Honda GX 25 0,54 litre/hour at 7,000 rpm  
 Honda GX 35 0,71 litre/hour at 7,000 rpm

### Compact design

The mini 4-stroke Honda engines have a belt-driven OHC design which is compact and lightweight. In addition, the 4-stroke engine design reduces unpleasant mechanical noise, making them quieter and more comfortable to use for longer periods.

### Honda 4-stroke engine

The mini Honda 4-stroke GX25 and GX35 engines offer the performance you expect from larger engines, with strong torque available across the entire rpm, but in a very compact package. These engines power the Honda handheld product range and have satisfied millions of customers around the globe. They are quiet and convenient to use, with minimal vibration levels and low emissions, with the added feature of not requiring a pre-mix of oil and fuel.

Handheld brushcutters

Access all areas

A range of brushcutters, powered by our GX 25 or GX 35 engines, are clean, quiet and easy to use. However hard or tricky the job - there's one for you.

The Honda 4-stroke engines are not only the most compact and reliable of their kind, but they help to reduce mechanical noise, vibration and emissions. They are extremely manoeuvrable and come with an adjustable harness for maximum comfort.

Choose from our complete range, including a backpack brushcutter which has been designed to be highly manoeuvrable and comfortable. Or there is our bent shaft brushcutter, which comes fitted with the tap and go nylon head and is designed to reach really tricky areas.

Pruner\*

Hedgetrimmer\*

3 tooth blade\*

4 tooth blade\*

\*Accessory only

The semi-automatic tap and go head feeds nylon line by simply tapping the head on the ground while using the brushcutter

**Handheld Versatool™**

Change your tools in one click

## The garden power tool that does it all

**The Versatool™ is designed to take on a huge range of garden tasks. With eight push-and-click attachment options and a 4-stroke engine at its heart, it's the ultimate power tool for gardening perfection.**

Our multipurpose Versatool™ features a comprehensive range of interchangeable attachments, from pruners, hedgetrimmers and linecutters to blowers, edgers and cultivators. All are easily attached via our innovative joint system: Simply push and click to lock in your preferred attachment. The Versatool™ is available with a GX 25 or GX 35 engine which will guarantee a very long product lifespan.

## Handheld hedgetrimmer & leaf blower

## Blow and cut with ease

**Both our handheld hedgetrimmer and blower have the benefit of the unrivalled Honda GX 25 engine, to make light work of the numerous jobs they can do in your garden.**

Honda hedgetrimmers are designed for accurate trimming in gardens and parks. The 60 or 75 cm length double blade ensures fast and efficient work through a high bending performance. The ergonomically comfortable controls, adjustable handle, low vibration frame, and reliable 4-stroke engine make Honda hedgetrimmers indispensable.

The compact Honda lightweight blower is ideal for keeping gardens, parks, stadiums, and streets neat and tidy all year round.

The airflow can reach 600 m³/h which allows it to blow heavy and wet debris. Its cruise control feature allows you to maintain the engine speed without having to hold the trigger – great for using it over long periods of time. The Honda micro engine is designed to run smoothly with very few vibrations and low noise, whilst its mechanical decompression design offers easy starting. A 360° lubrication system allows you to work and store the machine in any position.

# Honda Tillers

Our ground breaking tillers come in a variety of sizes to suit any space, so you can choose from a wide range that includes micro, compact and professional machines.

At their heart is our class leading advanced 4-stroke engines that make light work of turning any soil.

## Tiller features

### Keeping you in control

Because soil can vary in consistency from garden to garden and every task demands high levels of flexibility, we have created a number of technologies to make work as effortless as possible and to keep you in control. For example, our tiller range features models with up to 6 forward gears enabling you to work at a speed that the conditions require. Models with adjustable working width allow you to adapt the tiller to the specifics of your garden, whilst our Honda clutch control gives you precise direction control where and when you need it.

### Intuitive design

Our considerable experience in this sector has enabled us to design tillers that are easy, intuitive and a pleasure to use. They include features such as ergonomic controls and adjustable handles, that not only enable you to find your perfect working position, but on our Micro, Mini and Compact ranges, they fold for easier transport and storage.

## THE RANGE

### Multi-function capability

We offer a full range of attachments to make any Honda tiller, from our FG110 Micro to our impressive professional FR750, a truly multi-function machine. You can add a lawn de-thatcher, aerator, scarifier, ridger, plough, or potato lifter to your tiller, all of which have been specifically designed and built to perfectly compliment your Honda tiller and give you the very best performance.

## TILLER TECHNOLOGIES

**Side Clutch**  
The user-friendly side clutch stops the drive to either the right or the left tine, making changing direction easy.

**Side Discs**  
Side discs protect growing plants from flying debris or impact from slasher tines by keeping the tiller perfectly aligned when furrowing.

**Transport Wheel**  
For extra manoeuvrability, the transport wheel helps you move the tiller seamlessly between storage and work areas - even over curbs and up hills.

**Power Take Off (PTO)**  
PTO draws power from the engine and makes it easy to connect and disconnect powered attachments to your tiller to make heavy jobs like hulling, spraying and mowing quicker.

**Gear Box**  
More gears means greater flexibility and power. The gearbox transfers the ideal power and torque to work the machine, letting you pick the perfect speed to match your pace.

**Counter-Rotating Tines**  
By rotating the tines in the opposite direction to each other the tiller becomes very balanced and easy to control, effortlessly breaking up the hardest soil quicker and more efficiently.

**Foldable Handle**  
Designed with convenient inward-facing knobs, this neat handle folds away for simple storage and transport.

**Swing Handle**  
With a reassuring safety release feature, the swing handle can be adjusted to swing left or right which allows you to work without leaving footprints behind you, and avoids compressing already cultivated soil and plants.

### 4-stroke technology

The Honda tiller range is powered by our ultra reliable 4-stroke engines, which are not only environmentally friendly with lower emissions, but are neighbourhood friendly, thanks to their low engine noise. They also save time and money, offering low fuel consumption and high torque even at low rpm, making sure you can drive through even the toughest earth. Our decompression mechanism ensures they start and restart easily, time and time again.

\*Available on FG205 and F220 models only.  
\*\*Available on F220 model only.

Tiller micro and mini

# Small and tough

Our micro and mini tiller range is designed to be easily handled in smaller spaces and powerful enough to take care of flowerbeds, lawns and vegetable plots.

**FG205 / F220 high performance mini tillers**

Honda mini tillers come with a range of specialist tools as standard, from crop protection side discs, to a unique Honda tine that digs and cultivates at the same time. They are practical and easy to use, with a low centre of gravity that ensures the machines are well balanced and manoeuvrable, whilst their foldable handles make transportation and storage simple.

**Tiller** compact and versatile  
 Smooth power  
 and versatility

Our compact and versatile tiller range is powerful enough to tackle larger flowerbeds and vegetable patches. They are versatile too, with a wide selection of attachments designed for multiple tasks, soil types and desired finishes.

**F506 and F560 powerful and versatile range**

A powerful and flexible range of tillers that feature up to 6 forward and 2 reverse gears, transferring the ideal amount of torque and allowing you to pick the perfect rotation speed to match your pace and earth conditions.

All our versatile tillers come with a Power Take Off (PTO) shaft which can be used with specialist equipment for hulling, spraying, rear-rotary or box tines. For your comfort and control, the handle can be adjusted for height and width. Plus the F560 is also fitted with a side clutch control, allowing you to accurately and precisely control your machine positioning.

Model availability is dependent on country, do not hesitate to ask your local Honda dealer.

**FG320 and FJ500 compact tiller range**

Our compact tillers are light enough to be highly manoeuvrable, but heavy duty enough to cope with harder gardening tasks. Thanks to a powerful Honda engine and a manual gearbox, you can optimise both speed, power and comfortable use. The FJ500 is available in a choice of configurations, either with 1 forward and 1 reverse gear, or 2 forward and 1 reverse gear with a swing handle feature. Both models can be fitted with a long list of attachments including multiple tine, scarifier, ridger, potato lifter, plough or snow blade.

FJ500 DER

## Tiller counter-rotating Ultimate tilling power

The FF300/500/FR750 feature our unique counter rotating tines that are powerful enough to cut through the most compacted soil with ease. Ideal for any dedicated gardener or commercial user.

### FF300 and FF500 power and performance

Tough, reliable and powerful, these tillers have been designed to be easy to use and manoeuvre, with a low centre of gravity and a zero turn capability.

They are controlled by an ergonomic loop handlebar which allows the user to find a grip position that suits them, whilst still maintaining complete clutch control.

The FF300/500 models both have height selectable front wheels that can be adjusted to 5 different positions to specify a desired tilling depth. They are also comfortable to work with, thanks to the counter rotating tines which reduce bucking.

### FR750 the ultimate tiller

With a 600 mm tine width, 2 forward gears, 1 reverse and a deadman's clutch, the FR750 is built to make working safer and a lot easier. It also features our revolutionary Active Rotary System, a coaxial counter-rotating tine drive that dramatically improves stability, allowing smooth, easy operation.

# World of Honda Power Equipment

For years, we've built our Power Equipment range around our clean Honda 4-stroke engine technology. That's because we're committed to making our products as user-friendly, fuel-efficient and reliable as we can - all without compromising performance. Class-leading 4-stroke principles still drive many of our products, but we're always pushing.

## Power you rely on

Quiet, dependable and always ready to help, our comprehensive range of generators is trusted around the world. From equatorial jungles to research posts in the Arctic Circle, they provide versatile, powerful and reliable performance at a moment's notice. If you're looking for a backup power supply for your home or need assistance with outdoor activities, contact your local dealer and discover what our generators can do for you.

**HONDA**

**AUTHORISED DEALER**

**SALES SERVICE EXPERTISE**

You deserve complete confidence that you've made the right choice, long after you've made the purchase. That's why we appoint our Honda Authorised Dealers with as much care as we build into our products.

Look for the seal of quality when you buy your Honda, or call **0845 200 8000\*\*** and we'll find the closest to you.

**£ Sales**

Our Authorised Dealers not only feature a comprehensive display of Honda products to see and touch, but they know our product range inside-out. Every one follows an extensive Honda training programme with regular refresher courses – so you can trust in their valuable advice and experience to help you choose the product that's just right for you and your needs.

**Service**

As well as offering the highest levels of after-sales service, our Authorised Dealers' factory-trained technicians perform a full Pre-Delivery Inspection (PDI) on every machine, and are fully equipped to keep your product in peak condition with cost-effective servicing. Of course, you can also be assured that only high quality, genuine Honda parts are used, with access to our 24hr parts delivery service for fast and efficient turnaround.

**Expertise**

Our Authorised Dealers are true experts in their field, often with years of first-hand experience under their belt. In fact, their knowledge and experience plays an important role in making sure that our Research and Development team is given feedback from our customers, so we can ensure that new and improved models continue to meet your future needs too.

## Unrivalled quality, for peace of mind

There's a simple reason why you'll see so many old Honda products still in use. **Ours are built better, to last longer.**

That's not just an idle promise. It's fact. Our enviable reputation for durability and reliability is supported by our cast iron warranty, covering both parts and labour.

Our warranty maintains the same value throughout its lifetime too – meaning the last day of cover is exactly the same as the first: solid and dependable.
