

Over 50 years of innovation, testing, refining and testing again makes our marine technology the very best it can be.

In fact, everything we learn from everything we do goes into our development, allowing us to create new technologies and new ways of solving problems.

So it's not just clever engineering, it's **ENGINEERING FOR** *Life*

These specification details do not apply to any particular product which is supplied or offered for sale. The manufacturer reserves the right to vary their specification, including colours, with or without notice at such times in such manner as they think fit. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. Consult the Dealer with whom your order is placed for details of the specification of any particular product. This publication shall not constitute in any circumstances whatsoever an offer by the Company to any person. All sales are made by the Distributor or Dealer concerned subject to and with the benefit of the standard Conditions of Sale and Warranty given by the Distributor. While efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specific details with the supplying Dealer, especially if a selection is dependent upon one of the features advertised.

Honda sources paper responsibly from manufacturers within the EU. Please don't bin me. Pass me on to a friend or recycle me.

A Watertight Warranty

Like our inflatables, a Honda warranty is the best you can get.

Every Honda Marine customer can expect the support of a domestic or professional warranty. It will maintain the same value throughout its warranty period. That means your last day of cover is as good as your first. We think that's pretty unbeatable too.

Domestic Use

Professional Use

THE NEW
honda *Wave*
RANGE

THE WATER IS WAITING

Ride the waves

Our stylish new range of Honwave inflatables are light, portable and easy to use. Built from the highest grade marine PVC, they are tough, durable and capable of taking on the harshest of environments.

The option of three deck designs gives you the flexibility to choose from a compact slatted deck, which is easily stored, an extra-rugged aluminium-deck, or our air V-floor, specifically created for stability and performance. All feature an extra wide tube diameter for a smooth ride and a smart new colour scheme; so wherever you go, the new Honwave will ensure you enjoy every adventure.

HONWAVE SLATTED DECK (FROM 2 M TO 2.5 M)

Compact and ultra light, Honwave's slatted-inflatables are perfect for tender excursions or simply cruising for pleasure. With a larger buoyancy tube diameter, they ensure superior flotation and stability. Folding and storing can be accomplished by a single person in just minutes.

Honwave Slatted-Deck Inflatables (SE)
2.0 m (T20-SE3)
2.5 m (T25-SE3)

HONWAVE AIR V-FLOOR (FROM 2.4 M TO 3.8 M)

Light and fast, these inflatables are packed with comfort and performance features. Their deep-V hull design significantly optimises keel performance and ensures maximum stability.

Honwave Air V-Floor Inflatables (IE)
2.4 m (T24-IE3)
2.7 m (T27-IE3)
3.2 m (T32-IE3)
3.8 m (T38-IE3)

HONWAVE ALUMINIUM DECK (FROM 2.5 M TO 4 M)

Honwave's aluminium-deck inflatables are ideal for just about any nautical activity. Rugged and ready to go, their extra-large buoyancy guarantees smooth and safe cruising every time. The floor slats are number coded for hassle-free assembly, and the smaller model can be stored in a single bag, so you can take them anywhere.

Honwave Aluminium Deck Inflatables (AE)
2.5 m (T25-AE3)
3.0 m (T30-AE3)
3.5 m (T35-AE3)
4.0 m (T40-AE3)

Portable easy to set up

Compact and portable, they are simple to set up and equally as easy to pack into a bag and store. They're also extremely practical by not requiring expensive moorings or a trailer. All come with a high pressure foot-pump to inflate.

New dynamic design

With a sleek and stylish design it has a smart new colour scheme that will look great wherever you go.

Durable high quality PVC body

Every Honwave is built to the same exacting standard, using extremely durable, high grade PVC, quite simply the best available.

GRP transom

The transom holds the engine, so it needs to be extremely tough and stable. That's why we've built ours from highly durable GRP (Glass Reinforced Plastic) instead of wood.

Oars inside the boat

The oars are stowed away safely inside the boat, freeing-up space on top of the tube for you and your passengers.

Honwave technologies

Bow roller

A small detail, but highly efficient. The bow roller protects the bow from rope damage when moored or at anchor.

Tough loop handles

These integral loop handles not only look great, but offer you and your passengers additional safety and comfort.

Wider tube diameter for smoother cruising

Our innovative large diameter tubes ensure remarkable flotation and stability, to smooth out even the roughest of rides.
