

SUPERSPORT 2021

LIFE'S A RACE THE WORLD IS OUR TRACK

These machines are designed to push us to the limits of speed and performance. They turn our knuckles white. They make our hair stand on end. And all the while they hold us on the tarmac, pinned by an unrelenting grip that gives us total confidence and control. That's what it means to ride a CBR.

DREAMS REALLY DO COME TRUE	16

THE GAME IS RAISED. HIGHER STILL.

The race-track is your playground. It's where you live and truly come alive. Performance is everything and you'll take any advantage to hunt out speed. We have built the CBR1000RR-R Fireblade SP for you. It starts out in the same Pit Lane as the CBR1000RR-R—which means MotoGP technology for the engine, chassis and aerodynamics, and the same 160kW @ 14,500rpm peak power output, with peak torque of 113Nm @ 12,500rpm. But then we step it up. For precise, targeted performance the CBR1000RR-R Fireblade SP is armed with second-generation semi-active Öhlins Electronic Control (S-EC).

The NPX front fork uses a pressurised damping system to minimise cavitation, resulting in more stable damping control and improved bump absorption at high speeds. Feel for front tyre grip is also enhanced. The rear shock is also an Öhlins unit. To match the hardware upgrade the Öhlins Objective Based Tuning interface (OBTi) now offers much finer suspension adjustment front and rear. Brembo's latest Stylema monobloc four-piston radial-mount front brake calipers are also standard. The CBR1000RR-R SP is not built with a road-rider's needs in mind; the race-track is where it belongs. And while it is fully road legal, with lights, indicators, full-colour TFT display and Honda Smart Key the CBR1000RR-R Fireblade SP is our ultimate statement of pure super sports aggression. Enjoy it to the full.

KEY FEATURES

- LIQUID-COOLED, 16V FOUR-CYLINDER ENGINE
- ADJUSTABLE RIDING MODES
- 9-LEVEL HONDA SELECTABLE TORQUE CONTROL
- AKRAPOVIČ® TITANIUM EXHAUST
- WHEELIE CONTROL
- LAUNCH CONTROL
- QUICKSHIFTER
- AERODYNAMIC WINGLETS
- COLOUR TFT SCREEN

BORN TO RACE

For you, there is no second best. For us it's the same. Which is why we started racing in the early 1960s and why we race today. Competition is always a challenge but it's what brings improvement. Raises the game. Yours. Ours.

Competition has produced the CBR1000RR-R Fireblade. We didn't just start from scratch. We used our ultimate expression of everything we know about two-wheeled speed, the RC213V MotoGP machine and its roadgoing RC213V-S sibling, as technological base points. The CBR1000RR-R Fireblade's engine—while still an inline four-cylinder—has much in common with the race bikes. The 1000cc, liquid-cooled DOHC design shares its bore and stroke with the RC213V-S and features a semi-cam gear train, finger-follower rocker arms, forged aluminium pistons and titanium con-rods. Output is stunning: 160kW @ 14,500rpm peak power, with peak torque of 113Nm delivered @ 12,500rpm.

It's also armed with fine control from an upgraded electronics package that includes a six-axis Inertial Measurement Unit (IMU), optimised HSTC, adjustable Start Mode, 2-level ABS, 5-inch TFT display and Honda Smart Key. The chassis employs an aluminium diamond-style frame and RC213V-S-derived swingarm, full Showa suspension, revised 3-level HESD and new Nissin brakes. And we've drawn heavily on our MotoGP experience to produce bodywork that defies drag while enhancing high-speed handling with winglets.

KEY FEATURES

- LIQUID-COOLED, 16V FOUR-CYLINDER ENGINE
- ADJUSTABLE RIDING MODES
- WHEELIE CONTROL
- SHOWA 43 MM BIG PISTON FORK (BPF)
- SHOWA BALANCE FREE REAR CUSHION LIGHT SHOCK (BFRC-LIGHT)
- NISSIN RADIAL-MOUNT FOUR-PISTON FRONT CALIPERS
- AERODYNAMIC WINGLETS
- COLOUR TFT SCREEN

PUTTING THE R INTO THE CBR

The CBR650R has honed its racetrack DNA for aggressive road performance. From the free-spinning inline four-cylinder, DOHC 16-valve engine there's an exhilarating 12,000rpm redline, 70kW peak power and 63Nm torque to enjoy. There's also an easy 35kW conversion available from Honda dealers, for A2 licence holders. An assist & slipper clutch eases upshifts and manages hard down changes, while Honda Selectable Torque Control (HSTC) maintains rear wheel traction. And, with no loss of performance, the engine is EURO5 compliant thanks to detail changes in the collector box and muffler.

This razor-sharp bike also lives for the corners. New, 41mm Showa Separate Fork Function Big Piston (SFF-BP) USD forks offer precise suspension control, with balanced spring-rate and damping for a direct connection to the beautifully weighted front tyre, while the 180-section rear has huge grip. Powerful braking is provided by dual, four-piston radial-mount front calipers and 310mm floating discs and 240mm disc at rear.

Styled by speed, dual LED headlights feature new reflectors and lead the uncompromising angles, mirrored by the minimal seat unit and slim side panels. Handlebars clip-on below the top-yoke and the LCD instruments are even easier to read. Emergency Stop Signal (ESS) technology activates the rear hazards hard stopping conditions.

KEY FEATURES

- LIQUID-COOLED, 16V FOUR-CYLINDER ENGINE
- A2 LICENCE CONVERSION AVAILABLE
- PGM FUEL INJECTION
- ASSIST & SLIPPER CLUTCH
- HONDA SELECTABLE TORQUE CONTROL (HSTC)
- 41 MM SHOWA SEPARATE FORK FUNCTION BIG-PISTON (SFF-BP) USD FORKS
- DUAL FRONT FOUR-PISTON RADIAL-MOUNT CALIPERS
- EMERGENCY STOP SIGNAL (ESS) TECHNOLOGY

MOVING UP

The CBR500R is every inch a CBR, which means it's one of the sharpest tools in our toolbox. Sharp, aggressive lines incorporate unique aerodynamic winglets, for high-speed stability. Its powerful, A2 licence-compliant twin-cylinder engine gives you elastic, enjoyable power, with strong mid-range torque between 3,000 and 7,000 rpm, making every corner exit a moment to savour. And, just like its larger CBR siblings, an assist and slipper clutch eases upshifts and prevents rear wheel lock-up on rapid downshifts.

To enhance rider feedback the steel diamond-tube frame has a tuned rigidity balance and the engine is close to the swingarm pivot point, for fast steering and easy handling. The 41mm telescopic forks are adjustable for spring preload, as is the Pro-Link rear monoshock. Lightweight, 17-inch cast aluminium wheels wear 120/70-ZR17 front and 160/60-ZR17 rear tyres, for a great balance between good grip and light, neutral steering.

The view forward is pure sports, with clip-on handlebars mounted below the top yoke and fuel tank carefully shaped to cut down on excess bulk; seat height is an easy-to-manage 785 mm. A sporty, negative-display LCD dash features Gear Position and Shift Up indicators. All lighting is premium LED and Emergency Stop Signal (ESS) technology activates the rear hazards under hard-stop conditions.

KEY FEATURES

- A2 LICENCE COMPLIANT
- LIQUID-COOLED, 8V TWIN-CYLINDER ENGINE
- PGM FUEL INJECTION
- ASSIST & SLIPPER CLUTCH
- ADJUSTABLE PRO-LINK REAR SUSPENSION
- 320 MM WAVY FRONT DISC & TWO-PISTON CALIPER
- FULL LED LIGHTING
- EMERGENCY STOP SIGNAL (ESS) TECHNOLOGY

HONDA TECHNOLOGY

Honda has developed and applied many innovative technologies for its motorcycle range, designed to have the greatest possible benefit for you and the world around you.

ANTI-LOCK BRAKING SYSTEM

Reduces braking pressure by monitoring the wheel speed, preventing the wheels from locking up.

EURO 5

Complies with EURO 5 emissions regulations.

HONDA ELECTRONIC STEERING DAMPER

Minimises sudden steering changes at high speeds for enhanced riding ease and comfort.

HONDA EVOLUTIONAL CATALYSING SYSTEM

Oxygen-sensing system maintains an optimal air/fuel mixture for the most effective catalytic reduction of exhaust emissions.

HONDA IGNITION SECURITY SYSTEM

Only allows the bike to be started by its original encoded keys to effectively protect against theft.

HONDA SELECTABLE TORQUE CONTROL

If the Honda Selectable Torque Control (HSTC) system senses an imminent loss of rear wheel traction it reduces torque to allow the tyre to grip.

LED LIGHTS

Brighter and more energy efficient than traditional bulbs, with no time delay and a longer life.

PROGRAMMED DUAL FUEL INJECTION

Map-type computerised system maintains strong power and responsive performance in all conditions.

PROGRAMMED FUEL INJECTION

Map-type computerised system maintains strong power and responsive performance in all conditions.

RADIAL MOUNT CALIPER

Offers better alignment to the disc and rigidity. Radial-mount calipers are secured and supported at both ends providing less caliper flex and better braking performance.

SMART KEY

This innovative technology improves both convenience and security. As long as your key is in your pocket or bag, you can release the seat and start the engine with the press of a button.

START MODE

Limits engine rpm based on rider preference, even with a wide-open throttle, letting the rider focus on clutch release (and lights) alone.

WHEELIE CONTROL

The IMU measures the pitch angle and, combined with front and rear wheel speed, manages the amount of height the front wheel gathers relative to the level of intervention selected. Level 1 is minimum Wheelie Control, level 2 medium and level 3 maximum. Wheelie Control can also be switched off completely.

HONDA
The Power of Dreams

DREAMS REALLY DO COME TRUE

Soichiro Honda said,

**“There are qualities which lead to success.
Courage, perseverance, the ability to dream
and to persevere.”**

Honda's philosophy in dreaming of a better world for people catalysed the invention of the ASIMO, HondaJet, NSX and the legendary Africa Twin. Dreams can be powerful, they push you to achieve more, to explore new ideas, new technologies and uncover new ways of solving problems. It takes independent thinking and audacity to pursue dreams. It also takes passion and innovation to never allow the dream to die and to shape them into a reality for the modern-day world.

The specific details of this brochure do not apply to any particular product supplied or offered for sale. Manufacturers reserve the right to vary specifications, including colours, with or without notice at such times in such manner as deemed appropriate. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. Consult your Dealer for details regarding the specifications of any featured product. This publication shall not constitute - under any circumstances whatsoever - an offer by the Company to any individual. All sales are made by the Distributor or Dealer subject to and with the benefit of the standard Conditions of Sale and Warranty provided by the Distributor or Dealer, copies of which may be obtained upon request. While efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specific details with the supplying Dealer, especially if a selection is dependent upon one of the features advertised. Please contact your local dealer for information and specifications. Please note that the fuel consumption figures provided are results obtained by Honda under standardised testing conditions prescribed by WMTC. Tests are conducted on a rolling road using a standard version of the vehicle with only one rider and no additional optional equipment. Actual fuel consumption may vary depending on how you ride, how you maintain your vehicle, weather, road conditions, tyre pressure, installation of accessories, cargo, rider and passenger weight, and other factors. You accept that if you do go ahead and make a purchase or enter into any kind of transaction, whether for payment or not, you did so entirely in reliance on your own skill and judgement and not on that of anyone else.

RIDE WITH STYLE Read the owner's manual thoroughly. Get to know your machine and its capabilities. Concentration assists anticipation. Observe other road users' movements. Brake in plenty of time. Always wear a helmet and quality kit, ride fit and NEVER after drinking alcohol. Good roadcraft and courtesy identify the skilled and stylish rider. Honda endorse the law that all helmet visors must comply with BS 4110. Visors that transmit less than 50% of visible light cannot legally be used on the road.
