Honda NXR 750 Paris-Dakar

The NXR750 dominated the Paris-Dakar Rally from 1986 to 1989, winning the trophy 4 years in a row. Back then the 22 day race started in Paris and ended in Dakar/Senegal crossing nearly 15.000km of african desert. Gilles Lalay won the 1989 Paris-Dakar Rally on this motorcycle with its distinct Rothmans design.

Africa Twin reaches new heights

In 2017, the Africa Twin broke the record for the highest altitude reached by a twin-cylinder motorcycle. After 5 days of acclimatisation, a team of 5 five riders piloted the Africa Twin onto the slopes of the world's highest active volcano, the Nevado Ojos del Salado - located between Argentina and Chile. Reaching 5,965 metres above sea level, the international team completed its ascent within 24 hours with Africa Twin specially equipped with Termignoni exhaust, revised final sprockets, new Metzeler MC360TM tyres and a range of Honda genuine accessories. Their route took them - in temperatures as low as minus 5 degrees Celsius - through broken asphalt, gravel, mud, sand and finally stretches of ice pockets known as 'penitentes', underlining once again the Africa Twin's credentials as the best-performing off-road motorcycle in its class.

What's not to love with the V4?

The love story between Honda and the V4 4-Stroke DOHC engines started 40 years ago. Designed to challenge the 2 strokes dominating the Road Racing World Championship, the NR500 started the lineage of Honda bikes sharing the DNA rooted in the Crossrunner: the unique flexibility, smoothness and purity of output provided by a V4 engine.

The first Honda V4 engine developed in 1978 for the Road Racing World Championship

Do you really need a left lever to enjoy riding?

The Dual Clutch Transmission made its worldwide debuts for motorbikes in 2010 with the Honda VFR 1200. Now entering its 3rd generation and downsized to suit mid-displacement bikes, the DCT is completely different from the belt-type transmissions used by most scooters: it is structurally a conventional 6-speed gear ratio transmission, yet electronically controlled when changing speeds. Keep the fun of a manual transmission; enjoy the comfort of an automatic one!

DREAMS REALLY DO COME TRUE

Soichiro Honda said,
‘We only have one future, and it will be made of
our dreams, if we have the courage to challenge
convention.’

Honda’s philosophy in dreaming of a better world for
people catalysed the invention of the ASIMO, HondaJet,
NSX and the legendary Africa Twin. Dreams can be
powerful, they push you to achieve more, to explore
new ideas, new technologies and uncover
new ways of solving problems.

It takes independent thinking and audacity to pursue
dreams. It also takes passion and innovation to never
allow the dream

to die and to shape them into a reality for the
modern day world.

An aerial photograph of a coastal landscape. A paved road runs horizontally across the middle of the frame, separating a dense forest of tall, thin trees on the left from a field of shorter, brownish vegetation on the right. In the background, a body of water is visible, with small islands or peninsulas extending into it. The lighting suggests a late afternoon or early morning scene, with long shadows and a warm, golden hue. The text "Wherever life takes you" is written in a white, cursive font in the lower-left quadrant, with a small horizontal line under the word "Wherever".

The Power of Dreams

The specific details of this brochure do not apply to any particular product supplied or offered for sale. Manufacturers reserve the right to vary specifications, including colours, with or without notice at such times in such manner as deemed appropriate. Major as well as minor changes may be involved. Every effort, however, is made to ensure the accuracy of the particulars contained in this brochure. Consult your Dealer for details regarding the specifications of any featured product. This publication shall not constitute - under any circumstances whatsoever - an offer by the Company to any individual. All sales are made by the Distributor or Dealer subject to and with the benefit of the standard Conditions of Sale and Warranty provided by the Distributor or Dealer, copies of which may be obtained upon request. While efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specific details with the supplying Dealer, especially if a selection is dependent upon one of the features advertised. Please contact your local dealer for information and specifications. Please note that the fuel consumption figures provided are results obtained by Honda under standardised testing conditions prescribed by WMTC. Tests are conducted on a rolling road using a standard version of the vehicle with only one rider and no additional optional equipment. Actual fuel consumption may vary depending on how you ride, how you maintain your vehicle, weather, road conditions, tyre pressure, installation of accessories, cargo, rider and passenger weight, and other factors. You accept that if you do go ahead and make a purchase or enter into any kind of transaction, whether for payment or not, you did so entirely in reliance on your own skill and judgement and not on that of anyone else.

RIDE WITH STYLE Read the owner's manual thoroughly. Get to know your machine and its capabilities. Concentration assists anticipation. Observe other road users' movements. Brake in plenty of time. Always wear a helmet and quality kit, ride fit and NEVER after drinking alcohol. Good roadcraft and courtesy identify the skilled and stylish rider. Honda endorse the law that all helmet visors must comply with BS 4110. Visors that transmit less than 50% of visible light cannot legally be used on the road.
