INTEGRA

The Power to be different.

Leaner and sharper looking than previous models, the new 2016 Integra exudes individuality. A strong parallel twin cylinder engine provides smooth power and delivers it in a controllable and manageable way: power that will propel you through town traffic with ease, or take you touring effortlessly on the open road.

The comfortable riding position makes filtering through town traffic easy and with Honda's Dual Clutch Transmission (DCT), which has two automatic modes – Drive and Sport – you simply twist and go; just like a scooter. For a more exciting ride Sport mode now has three different settings to choose from. Changing to Manual couldn't be easier; gears shift with switches on the left handlebar.

The new Showa Dual-Bending-Valve (SDBV) front forks with improved damping up and down, combined with standard ABS brakes, provide controlled handling and sure, safe stopping. The rear shock's preload adjustment is easily modified to suit your weight, passenger weight and luggage. Brand new instruments use a negative LCD display and the rev-counter bar display can also be changed by the rider; a total of 9 options are available.

Another new feature is the secure and convenient 'Wave' ignition key – just click and go. Start up the Euro 4 compliant engine and you'll notice its deep, steady beat – pure motorcycle. Fill up the tank and the Integra will take you up to 250 miles* before you need make another fuel stop – pure tourer.

SPECIFICATION

Engine: Liquid-cooled 4-stroke 8-valve, SOHC parallel 2-cylinder
Displacement: 745 cm³
Max. Power Output: 40.3 kW / 6,250 rpm (95/1/EC)
Max. Torque: 68 Nm / 4,750 rpm (95/1/EC)
Kerb Weight: 238 kg

SILVER WING / High flyer.

With comfortable proportions and aerodynamic styling that create a smooth satisfying ride sensation, it's no wonder that the Silver Wing 600 is the luxury sedan of our scooter world. The Silver Wing 600's powerful parallel twin engine delivers the power to accelerate easily away from traffic queues and glide gracefully along country roads and motorways, while heavy-duty suspension and superior braking with Combined ABS contribute to balanced, confident handling.

Storage space is generous and, with a broad, comfortable passenger seat, it's an ideal way for you and a friend to escape from the city for the weekend. For those who enjoy the good things in life, the Silver Wing 600 offers striking sophistication and dynamic performance. Isn't it time you experienced the Silver Wing's first class freedom for yourself?

NSS300 FORZA

Designed to let you do more.

The NSS300 Forza is an easy to ride daily commuter that's just as much fun going to work, as it is for a long weekend trip. The liquid cooled 279cc SOHC 4 valve engine combines low fuel consumption with excellent torque and smooth power. It's extremely responsive too, offering strong acceleration when the rider needs it, even with a passenger. Secure 62 litre, under-seat storage, enough for two full face helmets or an overnight bag, adds to its versatility.

A slim front cowl with a windscreen offers improved aerodynamics, good weather protection and makes filtering through traffic and slotting into bike parking bays easy. Honda's Combined Anti-Lock Braking System (C-ABS) fitted as standard, ensures confident stopping power in all conditions. The simplified LCD digital meter displays information at a glance, while the comfortable seat and relaxed riding position make it the perfect weekend getaway bike. There are equally stylish accessories available to customise the NSS300 Forza to suit your own riding needs.

SPECIFICATION

Engine: Liquid-cooled 4-stroke 4-valve SOHC single	Fuel Tank Capacity: 11.6 litres
Displacement: 279 cm³	Fuel Consumption*: 87 mpg
Max. Power Output: 19 kW / 7,500 rpm (95/1/EC)	Seat Height: 716 mm
Max. Torque: 26 Nm / 5,000 rpm (95/1/EC)	Ground Clearance: 140 mm

SH300i / A Modern Classic.

Whether you want sophisticated style, the confidence to tackle cobbled city streets or the comfort and performance to cut through congested urban highways, at work or at leisure, the SH300i is made by Honda to deliver everything you need and more.

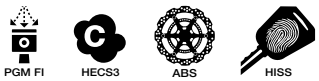

In such a fast paced world, the new Honda SH300i stands up to the challenge with an upgraded 279cc liquid cooled 4 valve single cylinder engine, providing increased torque and acceleration for swift off-the-line performance. Plus, with intelligent low friction technology and Euro 4 compliance, it delivers lower emissions and helps cut the cost of your commute.

But performance alone isn't enough. The compact bodywork with a flat floored, stepthrough design sits on large 16" wheels providing maximum performance and stability for both the city and the highway. The SH300i also features new LED headlight and taillight adding to the modern design and provides improved visibility at night. There's also enough under seat storage for a full face helmet and a waterproof or lock, giving you less to carry when you reach your destination.

New for 2016 is an innovative SMART Key system that improves convenience and security. When standing within 2 metres of your bike, the compact fob connects with a mode dial on the inner front cowl, allowing you to trigger the ignition and seat release at the touch of a button. Add to this ABS as standard and you've got a powerful, reliable scooter that's ready for anything the modern world throws its way.

SPECIFICATION

Engine: Liquid-cooled 4-stroke SOHC single; Euro 4 compliant	Fuel Consumption*: 94.1 mpg
Displacement: 279.1 cm ³	CO₂ Emissions: 70 g/km
Max. Power Output: 18.5 kW / 7,500 rpm (95/1/EC)	Seat Height: 805 mm
Max. Torque: 25.5 Nm / 5,000 rpm (95/1/EC)	Ground Clearance: 130 mm

FORZA125 / Experience more.

The Forza 125 gives you more. More performance. More style. More practicality. More technology. It gives you the confidence to take on anything the city throws at you, delivering class-leading acceleration and effortless speed to make every ride more than just a journey. It's wrapped tightly in sleek, dynamic bodywork, with elegant lines contrasted with a sporty edge. Style that's at home in a busy city environment and that transitions to functionality on winding country roads.

The 125cc enhanced Smart Power (eSP) 4 Valve PGM-FI engine, featuring low friction technology, creates strong torque to allow quick acceleration from a standing start. Smooth power through the mid-range for roll on performance, teamed with low friction and Idle Stop technologies, delivers impressive range from the 11.5 litre tank - over one week's full use without refuelling for the average commuter rider.

At just 162kg, the Forza 125 delivers traffic beating capability - quick to respond, with unrivalled agility and sharpness suited to city streets. Offering premium comfort levels with a relaxed integrated rider position, with commanding control, all round visibility and superior weather protection. The windscreen adjusts through 6 positions, over a range of 120mm, providing versatility to suit the riding environment.

It's the finer details that really complete the package, with storage space for two full face helmets, a 12V AC charging socket, full LED headlight and tail light, and a stereoscopic instrument display with reverse LCD and deep colour tone.

SPECIFICATION

Engine: Liquid-cooled 4-stroke 4-Valve SOHC single
Displacement: 124.9 cm³
Max. Power Output: 10.5 kW / 8,750 rpm (95/1/EC)

FORZA

SH125i / Take on the city in style.

The liquid cooled, four stroke engine powering the SH125i is Honda's eSP engine which features advanced low friction technology, giving a significant improvement in fuel efficiency and reduced emissions. It also features a sophisticated Programmed Fuel Injection System (PGM-FI) and selectable Idle Stop, delivering an incredible 25% more fuel efficiency in direct comparison to the previous model (133.9 mpg).

A tubular steel frame gives confident handling and dependable durability, whilst a flat floor and large under seat storage - enough for a full face helmet - provide the ultimate comfort and practicality. Anti-Lock Braking System (ABS) features as standard for the 240 mm front and rear hydraulic disc brakes. Lightweight 10 spoke wheels are matched to confidence inspiring 16" tubeless tyres, for excellent stability on rough roads.

The overwhelmingly popular SH125i offers unrivalled practicality, comfort and safety. With a low seat height, generous legroom and a colour matched top box fitted as standard, the SH125i is the ultimate feel good transport.

Tall windscreen and knuckle deflectors are optional accessories.

SPECIFICATION

Engine: Liquid-cooled 4-stroke SOHC single
Displacement: 125 cm³
Max. Power Output: 8.7 kW / 8,500 rpm (95/1/EC)
Max. Torque: 11 Nm / 6,500 rpm (95/1/EC)

SH MODE 125

Ready for real life.

The SH Mode 125, with its compact size and iconic design, is built to take on the world in real style. Honda's responsive, fuel injected eSP engine – featuring low friction technology – delivers excellent fuel efficiency, plus selectable Idle Stop as standard. Coupled with Honda's Combined Braking System (CBS), you can be sure that getting from A to B is enjoyed with confidence and control every time.

The sleek lines of the SH Mode 125, sculpted headlight design and classic SH detailing, create an instant impression while a low seat height of 765mm and spacious floor make riding effortlessly comfortable. Under seat storage with enough space for a full face helmet provides the finishing touch, giving the SH Mode 125 everything you need to get out there and rediscover the world.

SPECIFICATION

Engine: Single-cylinder, liquid cooled, SOHC 4-stroke 2-valve

Displacement: 125 cm³

Max. Power Output: 8.4 kW / 8,500 rpm (95/1/EC)

PCX125 / Bring the city closer.

The PCX125 shows off a sleek, contemporary style that's fit for any city, while its compact liquid cooled, SOHC two valve engine delivers incredible fuel efficiency.

The eSP engine – featuring low friction technology – powering the PCX125 offers long term reliability and excellent fuel efficiency of 133.9 mpg (without Idle Stop). Low draining LED lighting and indicators help further by saving 40W of electrical power. Special low rolling resistance tyres reduce drag at the same time as maintaining grip, and responsive suspension, coupled with Honda's Combined Braking System (CBS), absorb the worst of city challenges. Finally, the PCX125 comes with enough storage space for a full face helmet and a 12V DC socket for charging accessories on the go.

Built to look good and last, affordable to run and own, the PCX125 is a scooter that gives you everything for life on the move.

SPECIFICATION

Engine: Single-cylinder, liquid-cooled, SOHC 4-stroke 2-valve

WAVE 110i

Affordable, reliable and ready to take on life in the big city.

If you're looking for a cost effective commuter to get you through the cut and thrust of daily life then look no further than the Wave 110i. With a rugged and efficient 110cc four stroke engine, Programmed Fuel Injection System (PGM-FI) and electric start, you get low running costs and complete dependability. A four speed dual clutch transmission makes for an effortless ride, while the 3.7 litre fuel tank has a range of over 130 miles, so you spend less time filling up and more time enjoying getting from A to B.

Light and manageable handling gives superb rider confidence, whether you're taking on busy traffic or winding country roads. Should you encounter bumpy surfaces like cobbles, the 17" large-diameter spoked wheels mounted to 26mm telescopic front forks and a monoshock suspension at the rear, offer a secure yet nimble ride. When it's time to stop, the strong 220mm front disc brake and equally powerful 110mm rear drum brake provide secure and effective braking. And with plenty of seating space for two, coupled with 7.1 litres of secure storage, the Wave 110i is an affordable cub that makes life easy.

SPECIFICATION

Engine: Air-cooled 4-stroke, SOHC, 2-valve single-cylinder
Displacement: 109.1 cm³
Max. Power Output: 6.28 kW / 7,500 rpm (95/1/EC)

VISION 110

Reliable, affordable and stylish.
It's the smart way to beat the traffic
and enjoy your city.

Whether you're heading off to work or just riding into town, the Vision always offers a thrilling ride. The air cooled, four stroke 110 cm³ engine delivers a great balance of performance and fuel economy. It will do 31.2 miles on just one litre of petrol, which means on a full tank you'll be able to travel over 170 miles! That equates to an incredible 141.8 mpg.

The Vision's advanced fuel injection system offers responsive, usable power. Combined Braking System (CBS) links the front and rear brakes to provide swift, stable braking.

The Vision's generous storage compartment under the seat has enough space for your gym bag, backpack or even your shopping. With its compact design, two passengers can ride comfortably through the city with ease.

Reliable, affordable and stylish. It's the smart way to beat the traffic and enjoy the city.

SPECIFICATION

Engine: Air-cooled 4-stroke OHC 2v single
Displacement: 108 cm³
Max. Power Output: 6.2 kW/8,000 rpm (95/1/EC)

VISION 50

Who. What. Where. When.
You decide.

The Vision 50 isn't just your scooter, it's your independence. It's easy to ride, very reliable and won't cost much to run. The fuel injected 50 cm³ engine gives responsive power that's easy to control, and the 5.5 litre fuel tank has a range of over 177 miles, so you really can explore the city without having to worry about where the next petrol station is. When you're heading into town, it's good to know you're in safe hands. Honda's Combined Braking System (CBS) links the front and rear brakes. So even if you're a beginner and the rain has started, the Vision 50's CBS brakes will bring you to a quick and safe stop.

When it comes to storage there's plenty of space under the seat for your helmet, your shopping or any other essentials you need to take with you. Handy helmet holders are positioned on the sides and an aluminium rear rack takes an optional top box if you need more storage. Two more open storage compartments in the leg shield provide more convenience and are perfect for holding a drinks bottle on a hot day.

SPECIFICATION

Engine: Air-cooled 4-stroke, OHC, 2-valve single-cylinder

CBR125R / Develop your style.

Everything about the CBR125R is designed to give you the big bike feeling of a CBR600RR or a Fireblade, providing riders with the perfect opportunity to develop their own sports riding skills. Key to achieving this is the rider position. A low seat with a contoured fuel tank offers a sporty but easy-going position, promoting excellent manoeuvrability without restricting movement or tiring the rider. A free revving 125cc single cylinder engine is light and helps contribute to agility and good all round handling.

A lightweight, low centre of gravity and a 49:51 front/rear weight distribution gives you the control and handling you need to build your confidence and expand your riding abilities.

SPECIFICATION

CB125F / Easy handling. Economical performance. Instant fun.

The Honda CB125F sets you free, putting the power of independence in your hands. The latest member of the legendary Honda CB family features razor sharp lines that are styled to take on the street, with side shrouds that extend sharply to inject attitude to the broad shouldered fuel tank. Up front is the aggressive nose cowl surrounding the multi-reflector headlight and compact dash display – which includes rev counter and gearshift indicator.

Its tough OHC 2 valve, PGM-FI fuel injected, single cylinder engine is super efficient, delivering 151.1 mpg* and crisp acceleration from a standing start. All of this comes together to deliver an impressive range of 414 miles from the 13 litre tank, keeping you out of the filling stations and ahead of the traffic.

The integrated steel frame, 18 inch six spoke aluminium wheels, telescopic front forks and twin rear shocks provide a perfect balance between straight stability and cornering feedback. When things get really tight, the slim body, feather light 128kg kerb weight and wide handlebars – with 45° lock left and right – allow swift manoeuvring in and out of tight spaces.

SPECIFICATION

Engine: Air-cooled 4-stroke 2-valve OHC single with balancer shift

CB125F

MSX125 / Pocket performer.

Unique, unconventional, with an attitude all of its own, the MSX125 may be compact and incredibly nimble, but it rides and feels like a much bigger machine. Clutch, gear change and throttle control are all operated in the same way you would a full sized bike, while underneath its bold muscular body are a whole host of features that create a balanced, agile and comfortable ride. These include a mono-backbone steel frame, 31mm inverted front forks and 120 front/130 rear tyres on 12" wheels with "Y" shaped spokes.

The MSX125's PGM-FI engine ensure a responsive, economic and efficient ride. The MSX125 punches above its weight with hydraulic single disc brakes providing assured stopping in all conditions. A powerful projector headlight and LED tail light gives you added road presence.

If you're looking for serious fun, look no further than the MSX125.

SPECIFICATION

SAY HELLO

We'll show you even more

You deserve complete confidence that you've made the right choice, long after you've made the purchase. That's why we appoint our Honda Authorised Dealers with as much care as we build into our products.

Expertise. Sales. Service.

Our Authorised Dealers are true experts in their field, often with years of first-hand experience under their belt. They not only feature a comprehensive display of Honda products to see and touch, but through extensive Honda training, provide valuable advice you can trust.

As well as offering the highest levels of after-sales service, our Authorised Dealers' factory trained technicians perform a full Pre-Delivery Inspection (PDI) on every machine, and are fully equipped to keep your product in peak condition with cost-effective servicing.

Honda Warranty

For your peace of mind the Honda warranty will cover you for unlimited mileage to be free from material or manufacturing defects for two years and is standard on all new Honda motorcycles or scooters.

SKILL UP WITH HONDA

Honda School of Motorcycling

As a motorcyclist, you may come across all kinds of obstacles. Getting your licence shouldn't be one of them! Learn to ride or upgrade your licence at any one of Honda's training schools.

We'll give you everything you need to get you ready for the road or help you step up to the next level - quality training, together with a bike, clothing, safety equipment, and full insurance.

For more information or to talk about any of our courses, give us a call on **0845 490 0134** and we'll be happy to help.

GLOSSARY

Honda has developed many innovative technologies for its motorcycling range, designed to have the greatest possible benefit for you and the world around you.

Anti-Lock Braking System

Reduces braking pressure by monitoring the wheel speed, preventing the wheels from locking up.

Combined Anti-Lock Braking System

Optimises the balance of front and rear braking control while counteracting tyre slip when braking over variable road conditions.

Combined Brake System

Actuates both front and rear brakes when the rear brake pedal (or lever) is engaged, for a smooth and confident balance of braking control.

Dual Clutch Transmission

Combines the riding enjoyment of a manual transmission with the convenience of an automatic, delivering enhanced comfort and sporty performance.

EURO 4

Complies with EURO 4 emissions regulations.

EURO 3

Complies with EURO 3 emissions regulations.

Honda Evolutionary Catalysing System

Oxygen-sensing system maintains an optimal air/fuel mixture for the most effective catalytic reduction of exhaust emissions.

Honda Ignition Security System

Only allows the bike to be started by its original encoded keys to effectively protect against theft.

Idle Stop System

Automatically stops the engine running after three seconds at idle and restarts it instantly with a twist of the throttle, helping to reduce emissions and fuel consumption.

Programmed Fuel Injection

Map-type computerised system maintains strong power and responsive performance in all conditions.

V-matic Transmission

Belt-converter transmission with advanced three-stage operation provides seamless shifting throughout a wide range of speeds delivered with twist-and-go ease.

The power of dreams

The first product to bear the Honda name was an auxiliary engine for bicycles. Adding power to the bicycle made life a bit easier for people and made getting around more fun. Right from the beginning, Honda was about creating things that people truly need – things that had never before existed. This takes independent thinking, audacity and imagination to follow ideas wherever they lead. It also takes determination; the passion, tenacity and innovation to never allow the dream to die and to shape dreams into products for the world.

People are happier when they're with each other. Scooter riders know this. Social networking sometimes is not very social at all. You can't hug a Facebook friend or embrace a Twitter follower with passion. Texting a smiley can never replace a real life laugh with a close friend. Scooter riders want to make real world connections.

They get out there, find out what's going on and be part of it. Above all, scooter riding is about sociability. Nothing is more important than being with the people you love and sharing moments. A scooter can cost little more than a high-end laptop but yet it can bring you so much more. It brings you away from the digital space, giving you independence, freedom and above all, a chance to make real-life connections.

The specific details of this brochure do not apply to any particular product supplied or offered for sale. Manufacturers reserve the right to vary specifications, including colours, with or without notice at such times in such manner as deemed appropriate. Major as well as minor changes may be involved. While efforts are made to ensure specification accuracy, brochures are prepared and printed several months in advance of distribution and consequently cannot always immediately reflect either changes in specification or in some isolated cases the provision of a particular feature. Customers are always advised to discuss specific details with the supplying Dealer, especially if a selection is dependent upon one of the features advertised. Please note that the fuel consumption figures provided are results obtained by Honda under standardised testing conditions prescribed by WMTC. Tests are conducted on a rolling road using a standard version of the vehicle with only one rider and no additional optional equipment. Actual fuel consumption may vary depending on how you ride, how you maintain your vehicle, weather, road conditions, tyre pressure, installation of accessories, cargo, rider and passenger weight, and other factors. You accept that if you do go ahead and make a purchase or enter into any kind of transaction, whether for payment or not, you did so entirely in reliance on your own skill and judgement and not on that of anyone else.

RIDE WITH STYLE Read the owner's manual thoroughly. Get to know your machine and its capabilities. Concentration assists anticipation. Observe other road users' movements. Brake in plenty of time. Always wear a helmet and quality kit, ride fit and NEVER after drinking alcohol. Good roadcraft and courtesy identify the skilled and stylish rider. Honda endorse the law that all helmet visors must comply with BS 4110. Visors that transmit less than 50% of visible light cannot legally be used on the road.
