- Stop diagram  
- Start-up diagram
Safe Driving (P. 31)

**Airbags (P. 48)**
- Your vehicle is fitted with airbags to help to protect you and your passengers during a moderate-to-severe collision.

**Child Safety (P. 61)**
- All children 12 and younger should be seated in the rear seat.
- Small children should be properly restrained in a front-facing child restraint system.
- Infants must be properly restrained in a rear-facing child restraint system on a rear seat.

**Exhaust Gas Hazard (P. 79)**
- Your vehicle emits dangerous exhaust gases that contain carbon monoxide. Do not run the engine in confined spaces where carbon monoxide gas can accumulate.

**Seat Belts (P. 36)**
- Fasten your seat belt and sit upright well back in the seat.
- Check that your passengers are wearing their seat belts correctly.

**Before Driving Checklist (P. 35)**
- Before driving, check that the front seats, head restraints, steering wheel, and mirrors have been properly adjusted.

Guide to System Indicators and Lights Indicators
Quick Reference Guide
Controls
Clock (P148)

Models with one display

Adjust clock

1 Press the MENU button.
2 Select Adjust clock with the (+ / -) button, then press the SOURCE button.
3 Press the (+ / -) button to change the setting between 12 h and 24 h.
4 Select hours or minutes with the (+ / -) button.
5 Press the (+ / -) button to adjust the numbers up or down.
6 Select with the (↑ / ↓) button, then press the SOURCE button to enter your selection.

Models with navigation system

The navigation system receives signals from GPS satellites, updating the clock automatically.

Using the Settings menu on the audio/information screen

1 Press the (↑ / ↓) button.
2 Select Settings.
3 Select Info.
4 Select the Clock tab.
5 Select Clock Adjustment.
6 Select (↑ or ↓) to change hour.
7 Select (↑ or ↓) to change minute, then select OK.

Models with two displays

ENGINE START/STOP Button* (P171)
Press the button to change the vehicle's power mode.

Turn Signals (P174)

Turn Signal Control Lever
Lights  P.174

- Light Control Switches
- High Beam
- Low Beam
- Flashing

Wipers and Washers  P.183

- Wiper/Washer Control Lever
- Adjustment Ring
  - Low Sensitivity*: Lower speed, fewer sweeps*
  - High Sensitivity*: Higher speed, more sweeps*

- MIST
- OFF
- AUTO*: Wiper speed varies automatically
- INT*: Low speed with intermittent
- LO: Low speed wipe
- HI: High speed wipe

*1: Vehicle with auto wiper
*2: Vehicle without auto wiper

Steering Wheel  P.189

- To adjust, pull the adjustment lever towards you, adjust to the desired position, then lock the lever back in place.

Unlocking the Front Doors from the Inside  P.157

- Pull either front door inner handle to unlock and open it at the same time.

* Not available on all models
Tailgate  \(\rightarrow\) P.159

- Press the tailgate release button to unlock and open the tailgate.

Power Door Mirrors*

\(\rightarrow\) P.191

- With the ignition switch in ON \(\text{II}\)\(^*1\), move the selector switch to L or R.
- Push the appropriate edge of the adjustment switch to adjust the mirror.
- Press the folding button\(^*\) to fold in and out the door mirrors.

Power Windows  \(\rightarrow\) P.166

- With the ignition switch in ON \(\text{II}\)\(^*1\), open and close the power windows.
- If the power window lock button is in the off position, each passenger's window can be opened and closed with its own switch.
- If the power window lock button is in the on position (indicator on), each passenger's window switch is disabled.

\*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Climate Control System

- Press the AUTO button to activate the climate control system.
- Press the ON/OFF button to turn the system on or off.
- Press the button to defrost the windscreen.

Press to skip to the beginning of the next song or return to the beginning of the current song.
Press and hold to change a folder.
Driving  \textsuperscript{P.371}

Manual Transmission  \textsuperscript{P.395}

Automatic Transmission  \textsuperscript{P.390}

- Shift to \( P \) and depress the brake pedal when starting the engine.

**Shifting**

- Depress the brake pedal and press the release button to move out of \( P \).
- Move the shift lever without pressing the release button.
- Press the release button to move the shift lever.

**Shift Lever**

- **Park**
  - Turn off or start the engine.
  - Transmission is locked.
- **Reverse**
  - Used when reversing.
- **Neutral**
  - Transmission is not locked.
- **Drive**
  - Normal driving.
  - On models with paddle shifter, D-paddle shift mode can be used.
- **Drive (S)**
  - Sequential shift mode can be used.

**Paddle Shifters**  \textsuperscript{P.392,393}

- Paddle shifters allow you to shift gears much like a manual transmission (1st through 5th). This is useful for engine braking.
- D-paddle shift mode: The transmission will shift back to automatic mode once the system detects that the vehicle is cruising.
- Sequential shift mode: Holds the selected gear, and the \( M \) indicator comes on.

**Paddle Shifters**

- The selected gear position is shown in the instrument panel.

\* Not available on all models
Quick Reference Guide

VSA OFF Button  
- The vehicle stability assist (VSA) system helps to stabilise the vehicle during cornering, and helps to maintain traction while accelerating on loose or slippery road surfaces.
- VSA comes on automatically every time you start the engine.
- To turn VSA on or off, press and hold the button until you hear a beep.

Cruise Control*  
- Cruise control allows you to maintain a set speed without keeping your foot on the accelerator pedal.
- To use cruise control, press the MAIN button. Select cruise control by pressing the LIM button, then press –/SET when your vehicle reaches the desired speed.

Adjustable Speed Limiter*  
- This system enables you to set a maximum speed that cannot be exceeded even if you are depressing the accelerator pedal.
- To use the adjustable speed limiter, press the MAIN button. Select the adjustable speed limiter by pressing the LIM button, then press the –/SET when your vehicle reaches the desired speed.
- The vehicle speed limit can be set from 30 km/h (19 mph) to 250 km/h (155 mph).

Deflation Warning System (DWS)  
The DWS detects a change in tyre revolutions as a decrease in tyre pressure.
Refueling

Fuel recommendation: Premium unleaded petrol with a research octane number 95 or higher required
Fuel tank capacity: 50 L

1. Pull on the fuel fill door release handle under the driver's side lower outside corner of the dashboard.

2. Turn the fuel fill cap slowly to remove the cap.

3. Place the cap in the holder on the fuel fill door.

4. After refueling, screw the cap back on until it clicks at least once.

Petrol models
* Not available on all models
Diesel models

Refueling (P.453)

Fuel recommendation: EN 590 standard diesel fuel
Fuel tank capacity: 50 L

1. Pull on the fuel fill door release handle under the driver's side lower outside corner of the dashboard.

2. After refueling, wait for about 10 seconds before removing the filler nozzle.

Wait for 10 seconds
Maintenance  ➤ P. 459

Under the Bonnet  ➤ P. 490
- Check engine oil, engine coolant, and washer fluid. Add when necessary.
- Check brake fluid and clutch fluid*.
- Check the battery condition monthly.

1 Pull the bonnet release handle under the driver's side lower outside corner of the dashboard.

2 Locate the bonnet latch lever, pull the lever up, and lift up the bonnet.

3 When finished, close the bonnet and make sure it is firmly locked in place.

Wiper Blades  ➤ P. 530
- Replace blades if they leave streaks across the windscreen.

Tyres  ➤ P. 534
- Inspect tyres and wheels regularly.
- Check tyre pressures regularly.
- Install winter tyres for winter driving.

Lights  ➤ P. 514
- Inspect all lights regularly.

* Not available on all models
Handling the Unexpected  ➤P.555

**Flat Tyre** ➤P.557

- **Models with a spare tyre**
  - Park in a safe location and replace the flat tyre with the compact spare tyre in the luggage area.
- **Models with tyre repair kit**
  - Park in a safe location and repair the flat tyre using the tyre repair kit.

**Engine Won't Start** ➤P.574

- If the battery is dead, jump start using a booster battery.

**Indicators Come On** ➤P.587

- Identify the indicator and consult the owner's manual.

**Blown Fuse** ➤P.592

- Check for a blown fuse if an electrical device does not operate.

**Overheating** ➤P.583

- Park in a safe location. If you do not see steam under the bonnet, open the bonnet, and let the engine cool down.

**Emergency Towing** ➤P.599

- Call a professional towing service if you need to tow your vehicle.
What to Do If

**Q** The ignition switch does not turn from 0 to 1*1. Why?

**A** • The steering wheel may be locked.
• Try to turn the steering wheel left and right while turning the ignition key.
• Move the steering wheel left and right after pressing the ENGINE START/STOP button.

**Q** The ignition switch does not turn from 1 to 0*1 and I cannot remove the key. Why?

**A** The shift lever should be moved to P.

**Q** Why does the brake pedal pulsate slightly when applying the brakes?

**A** This can occur when the ABS activates, and does not indicate a problem. Apply firm, steady pressure on the brake pedal. Never pump the brake pedal.

**Q** The rear door cannot be opened from inside the vehicle. Why?

**A** Check if the childproof lock is in the lock position. If so, open the rear door with the outside door handle. To cancel this function, push the lever to the unlock position.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Why do the doors lock after I unlocked the doors using a remote transmitter?</td>
<td>If you do not open a door within 30 seconds, the doors are relocked automatically for security.</td>
</tr>
</tbody>
</table>
| Why does the beeper sound when I open the driver's door?                | The beeper sounds when:  
• The exterior lights are left on.  
• The power mode* is in ACCESSORY.  
• Auto Idle Stop* is in operation.                                           |
| Why does the beeper sound when I start driving?                         | The beeper sounds when:  
• Driver and/or front passenger are not wearing their seat belts.  
• The parking brake lever is not fully released.                             |
| Why do I hear a screeching sound when I apply the brake pedal?          | The brake pads may need to be replaced. Have your vehicle inspected by a dealer.                                                       |
| Is it possible to use unleaded petrol with a Research Octane Number (RON) of 91 or higher on this vehicle? | Petrol models  
Unleaded petrol with a research octane number of 95 or higher is recommended.  
Your vehicle is designed to operate on premium unleaded petrol with a research octane of 95 or higher. If this octane grade is unavailable, regular unleaded petrol with a research octane of 91 or higher may be used temporarily.  
The use of regular unleaded petrol can cause metallic knocking noises in the engine and will result in decreased engine performance. The long-term use of regular-grade petrol can lead to engine damage. |
**Event Data Recorders**

Your vehicle is equipped with several devices commonly referred to as Event Data Recorders. They record various types of real time vehicle data such as SRS airbag deployment and SRS system components failure. This data belongs to the vehicle owner and may not be accessed by anyone else except as legally required or with the permission of the vehicle owner. However, this data may be accessed by Honda, its authorised dealers and authorised repairers, employees, representatives and contractors only for the purpose of the technical diagnosis, research and development of the vehicle.

---

**Service Diagnostic Recorders**

Your vehicle is equipped with service-related devices that record information about powertrain performance and driving conditions. The data can be used to help technicians diagnose, repair and maintain the vehicle. This data may not be accessed by anyone else except as legally required or with the permission of the vehicle owner. However, this data may be accessed by Honda, its authorised dealers and authorised repairers, employees, representatives and contractors only for the purpose of the technical diagnosis, research and development of the vehicle.

* Not available on all models
As you read this manual, you will find information that is preceded by a symbol [NOTICE]. This information is intended to help you avoid damage to your vehicle, other property, or the environment.

Symbols [!] on labels attached to your vehicle are to remind you to read this owner’s manual for proper and safe operation of your vehicle.

[!] is colour-coded to indicate “danger” (red), “warning” (orange), or “caution” (amber).

**A Few Words About Safety**

Your safety, and the safety of others, is very important. And operating this vehicle safely is an important responsibility.

To help you make informed decisions about safety, we have provided operating procedures and other information on labels and in this manual. This information alerts you to potential hazards that could hurt you or others.

Of course, it is not practical or possible to warn you about all the hazards associated with operating or maintaining your vehicle. You must use your own good judgement.

You will find this important safety information in a variety of forms, including:

- **Safety Labels** - on the vehicle.
- **Safety Messages** - preceded by a safety alert symbol [!] and one of three signal words: DANGER, WARNING, or CAUTION. These signal words mean:

  - [!] DANGER You WILL be KILLED or SERIOUSLY HURT if you don’t follow instructions.
  - [!] WARNING You CAN be KILLED or SERIOUSLY HURT if you don’t follow instructions.
  - [!] CAUTION You CAN be HURT if you don’t follow instructions.

- **Safety Headings** - such as Important Safety Precautions.
- **Safety Section** - such as Safe Driving.
- **Instructions** - how to use this vehicle correctly and safely.

This entire book is filled with important safety information - please read it carefully.

For Safe Driving

The following pages explain your vehicle’s safety features and how to use them properly. The safety precautions below are ones that we consider to be among the most important.

**Important Safety Precautions**

- **Always wear your seat belt**
  A seat belt is your best protection in all types of collisions. Airbags are designed to supplement seat belts, not replace them. So even though your vehicle is equipped with airbags, make sure you and your passengers always wear your seat belts, and wear them properly.

- **Restrain all children**
  Children aged 12 and under should ride properly restrained in a back seat, not the front seat. Infants and small children should be restrained in a child restraint system. Larger children should use a booster seat and a lap/shoulder seat belt until they can use the belt properly without a booster seat.

- **Be aware of airbag hazards**
  While airbags can save lives, they can cause serious or fatal injuries to occupants who sit too close to them, or are not properly restrained. Infants, young children, and short adults are at the greatest risk. Be sure to follow all instructions and warnings in this manual.

- **Don’t drink and drive**
  Alcohol and driving don’t mix. Even one drink can reduce your ability to respond to changing conditions, and your reaction time gets worse with every additional drink. So don’t drink and drive, and don’t let your friends drink and drive, either.

Some countries prohibit the use of mobile phones other than hands-free devices by the driver while driving.
For Safe Driving

Important Safety Precautions

Safe Driving

■ Pay appropriate attention to the task of driving safely
Engaging in mobile phone conversation or other activities that keep you from paying close attention to the road, other vehicles, and pedestrians could lead to a crash. Remember, situations can change quickly, and only you can decide when it is safe to divert some attention away from driving.

■ Control your speed
Excessive speed is a major factor in crash injuries and deaths. Generally, the higher the speed, the greater the risk, but serious injuries can also occur at lower speeds. Never drive faster than is safe for current conditions, regardless of the maximum speed posted.

■ Keep your vehicle in safe condition
Having a tyre blowout or a mechanical failure can be extremely hazardous. To reduce the possibility of such problems, check your tyre pressures and condition frequently, and perform all regularly scheduled maintenance.
For Safe Driving

Your Vehicle's Safety Features

The following checklist will help you take an active role in protecting yourself and your passengers.

- Safety Cage
- Crush Zones
- Seats and Seat-Backs
- Head Restraints*
- Collapsible Steering Column
- Seat Belts
- Front Airbags
- Side Airbags
- Side Curtain Airbags
- Seat Belt Tensioners

The following checklist will help you take an active role in protecting yourself and your passengers.

- Safety Cage
- Crush Zones
- Seats and Seat-Backs
- Head Restraints*
- Collapsible Steering Column
- Seat Belts
- Front Airbags
- Side Airbags
- Side Curtain Airbags
- Seat Belt Tensioners

* Not available on all models

Your vehicle is equipped with many features that work together to help to protect you and your passengers during a crash.

Some features do not require any action on your part. These include a strong steel framework that forms a safety cage around the passenger compartment, front and rear crush zones, a collapsible steering column, and tensioners that tighten the front seat belts in a sufficient crash.

However, you and your passengers cannot take full advantage of these features unless you remain seated in the correct position and always wear your seat belts. In fact, some safety features can contribute to injuries if they are not used properly.
For Safe Driving

For the safety of you and your passengers, make a habit of checking these items each time before you drive.

- Adjust your seat to a position suitable for driving. Be sure the front seats are adjusted as far to the rear as possible while allowing the driver to control the vehicle. Sitting too close to a front airbag can result in serious or fatal injury in a crash.
  - Adjusting the Seats P. 193

- Adjust head restraints to the proper position. Head restraints are most effective when the centre of the head restraint aligns with the centre of your head. Taller persons should adjust their head restraint to the highest position.
  - Adjusting the Head Restraints* P. 196

- Always wear your seat belt, and make sure you wear it properly. Confirm that any passengers are properly belted as well.
  - Fastening a Seat Belt P. 42

- Protect children by using seat belts or child restraint systems according to a child’s age, height and weight.
  - Child Safety P. 61

* Not available on all models
About Your Seat Belts

Seat belts are the single most effective safety device because they keep you connected to the vehicle so that you can take advantage of many built-in safety features. They also help to keep you from being thrown against the inside of the vehicle, against other passengers, or out of the vehicle. When worn properly, seat belts also keep your body properly positioned in a crash so that you can take full advantage of the additional protection provided by the airbags.

In addition, seat belts help to protect you in almost every type of crash, including:
- frontal impacts
- side impacts
- rear impacts
- rollovers

WARNING:
- Seat belts are designed to bear upon the bony structure of the body, and should be worn low across the front of the pelvis or the pelvis, chest and shoulders, as applicable; wearing the lap section of the belt across the abdominal area must be avoided.
- Seat belts should be adjusted as firmly as possible, consistent with comfort, to provide the protection for which they have been designed. A slack belt will greatly reduce the protection afforded to the wearer.
- Belts should not be worn with straps twisted.
- Each belt assembly must only be used by one occupant; it is dangerous to put a belt around a child being carried on the occupant’s lap.

Not wearing a seat belt properly increases the chance of serious injury or death in a crash, even though your vehicle has airbags.

Be sure you and your passengers always wear seat belts and wear them properly.
- **Lap/shoulder seat belts**
  All four or five seating positions are equipped with lap/shoulder seat belts with emergency locking retractors. In normal driving the retractor lets you move freely while keeping some tension on the belt. During a collision or sudden stop the retractor locks to restrain your body.

- **About Your Seat Belts**
  Seat belts cannot completely protect you in every crash. But in most cases, seat belts can reduce your risk of serious injury.

  Most countries require you to wear seat belts. Take time to familiarise with the legal requirements of the countries in which you will drive.

  The emergency locking retractor may lock if you lean forward too quickly. Slower movements will allow the belt to extend fully without locking.
Proper use of seat belts

Follow these guidelines for proper use:

- All occupants should sit upright, well back in the seat, and remain in that position for the duration of the trip. Slouching and leaning reduce the effectiveness of the belt and can increase the chance of serious injury in a crash.
- Never place the shoulder part of a lap/shoulder seat belt under your arm or behind your back. This could cause very serious injuries in a crash.
- Two people should never use the same seat belt. If they do, they could be very seriously injured in a crash.
- Do not put any accessories on the seat belts. Devices intended to improve comfort or reposition the shoulder part of a seat belt can reduce the protective capability and increase the chance of serious injury in a crash.
Seat Belt Reminder

Front seats
Your vehicle monitors front seat belt use. If the ignition switch is turned to ON \[\text{II}\] before the driver's seat belt is fastened, the indicator will blink. If the driver does not fasten the belt, the indicator will remain on.

The beeper will also periodically sound and the indicator will blink while driving until the driver's seat belt is fastened.

Seat Belt Reminder

The indicator will also come on if a front passenger does not fasten their seat belt within six seconds after the ignition switch is turned to ON \[\text{II}\].

When no one is sitting in the front passenger's seat, or a child or small adult is riding there, the indicator will not come on.

If the indicator comes on or the beeper sounds with no front passenger, or with a passenger wearing the seat belt, something may be interfering with the occupant detection sensor. Check if:

• Heavy items are on the seat.
• A cushion is placed on the seat.
• The front passenger is not sitting properly.

If none of these conditions exist, have your vehicle checked by a dealer as soon as possible.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Seat Belts

About Your Seat Belts

Safe Driving

■ Rear seats

Your vehicle monitors rear seat belt use. An i-multi-information display notifies you if any of the rear seat belts are used.

To see the display:
1. Press the MENU button.
2. Select Vehicle information with the + / - button, then press the SOURCE button.
3. Select Rear seatbelt information with the + / - button, then press the SOURCE button.
Safe Driving

About Your Seat Belts

The front seats are equipped with automatic seat belt tensioners to enhance safety.

The tensioners automatically tighten the front seat belts during a moderate-to-severe frontal collision, sometimes even if the collision is not severe enough to inflate the front airbags.

Automatic Seat Belt Tensioners

The seat belt tensioners can only operate once. If a tensioner is activated, the SRS indicator will come on. Have a dealer replace the tensioner and thoroughly inspect the seat belt system as it may not offer protection in a subsequent crash.

During a moderate-to-severe side impact, the tensioner on that side of the vehicle also activates.
Fastening a Seat Belt

After adjusting a front seat to the proper position, and while sitting upright and well back in the seat:

1. Pull the seat belt out slowly.

2. Insert the latch plate into the buckle, then tug on the belt to make sure the buckle is secure. Make sure that the belt is not twisted or caught on anything.

No one should sit in a seat with an inoperative seat belt or one that does not appear to be working correctly. Using a seat belt that is not working properly may not protect the occupant in a crash. Have a dealer check the belt as soon as possible.

Never insert any foreign objects into the buckle or retractor mechanism.
3. Position the lap part of the belt as low as possible across your hips, then pull up on the shoulder part of the belt so the lap part fits snugly. This lets your strong pelvic bones take the force of a crash and reduces the chance of internal injuries.

4. If necessary, pull up on the belt again to remove any slack, then check that the belt rests across the centre of your chest and over your shoulder. This spreads the forces of a crash over the strongest bones in your upper body.

**WARNING**

Improperly positioning the seat belts can cause serious injury or death in a crash.

Make sure all seat belts are properly positioned before driving.

To release the belt, push the red PRESS button then guide the belt by hand until it has retracted completely.

When exiting the vehicle, be sure the belt is out of the way and will not get caught by closing the door.

Never insert any foreign objects into the buckle or retractor mechanism.
Safe Driving

Seat Belts

Fastening a Seat Belt

The front seats have adjustable shoulder anchors to accommodate taller and shorter occupants.

1. Move the anchor up and down while holding the release button.
2. Position the anchor so that the belt rests across the centre of your chest and over your shoulder.

Adjusting the Shoulder Anchor

The shoulder anchor height can be adjusted to four levels. If the belt contacts your neck, lower the height one level at a time.

After an adjustment, make sure that the shoulder anchor position is secure.
If you are pregnant, the best way to protect yourself and your unborn child when driving or riding in a vehicle is to always wear a seat belt and keep the lap part of the belt as low as possible across the hips.

**Advice for Pregnant Women**

If you are pregnant, the best way to protect yourself and your unborn child when driving or riding in a vehicle is to always wear a seat belt and keep the lap part of the belt as low as possible across the hips.

- Wear the shoulder belt across the chest avoiding the abdomen.
- Wear the lap part of the belt as low as possible across the hips.

---

To reduce the risk of injuries to both you and your unborn child that can be caused by an inflating front airbag:

- When driving, sit upright and adjust the seat as far back as possible while allowing full control of the vehicle.
- When sitting in the front passenger’s seat, adjust the seat as far back as possible.

Each time you have a checkup, ask your doctor if it is okay for you to drive.
Seat Belt Inspection

Regularly check the condition of your seat belts as follows:

- Pull each belt out fully, and look for frays, cuts, burns, and wear.
- Check that the latches work smoothly and the belts retract easily.
  ► If a belt does not retract easily, cleaning the belt may correct the problem. Only use a mild soap and warm water. Do not use bleach or cleaning solvents. Make sure the belt is completely dry before allowing it to retract.

Any belt that is not in good condition or working properly will not provide proper protection and should be replaced as soon as possible.

A belt that has been worn during a crash may not provide the same level of protection in a subsequent crash. Have your seat belts inspected by a dealer after any collision.

WARNING:

- No modifications or additions should be made by the user which will either prevent the seat belt adjusting devices from operating to remove slack, or prevent the seat belt assembly from being adjusted to remove slack.

- It is essential to replace the entire assembly after it has been worn in a severe impact even if damage to the assembly is not obvious.

- Care should be taken to avoid contamination of the webbing with polishes, oils and chemicals, and particularly battery acid. Cleaning may safely be carried out using mild soap and water. The belt should be replaced if webbing becomes frayed, contaminated or damaged.

WARNING: Not checking or maintaining seat belts can result in serious injury or death if the seat belts do not work properly when needed.

Check your seat belts regularly and have any problem corrected as soon as possible.
■ Anchorage points

Front Seat
When replacing the seat belts, use the anchorage points shown in the images. The front seat has a lap/shoulder belt.

Rear Seat
The rear seat has three lap/shoulder belts.

1.4 L engine, 1.8 L engine, and diesel engine models
The rear seat has two lap/shoulder belts.

2.0 L engine models
Airbags

Airbag System Components

The front, front side, and side curtain airbags are deployed according to the direction and severity of impact. The airbag system includes:

- Two SRS (Supplemental Restraint System) front airbags. The driver’s airbag is stored in the centre of the steering wheel; the front passenger’s airbag is stored in the dashboard. Both are marked SRS AIRBAG.

- Two side airbags, one for the driver and one for a front passenger. The airbags are stored in the outer edges of the seatbacks. Both are marked SIDE AIRBAG.

- Two side curtain airbags, one for each side of the vehicle. The airbags are stored in the ceiling, above the side windows. The front and rear pillars are marked SIDE CURTAIN AIRBAG.

- An electronic control unit that continually monitors and records information about the sensors, the airbag activators, the seat belt tensioners, and driver and front passenger seat belt use when the ignition switch is in ON [II]*1.

- Automatic front seat belt tensioners.

- Impact sensors that can detect a moderate-to-severe front or side impact.

- An indicator on the instrument panel that alerts you to a possible problem with your airbag system or seat belt tensioners.

- An indicator on the dashboard that alerts you that the passenger’s front airbag has been turned off.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Important Facts About Your Airbags

Airbags can pose serious hazards. To do their job, airbags must inflate with tremendous force. So, while airbags help to save lives, they can cause burns, bruises, and other minor injuries, sometimes even fatal ones if occupants are not wearing their seat belts properly and sitting correctly.

What you should do: Always wear your seat belt properly, and sit upright and as far back from the steering wheel as possible while allowing full control of the vehicle. A front passenger should move their seat as far back from the dashboard as possible.

Remember, however, that no safety system can prevent all injuries or deaths that can occur in a severe crash, even when seat belts are properly worn and the airbags deploy.

Do not place hard or sharp objects between yourself and a front airbag. Carrying hard or sharp objects on your lap, or driving with a pipe or other sharp object in your mouth, can result in injuries if your front airbag inflates.

Do not attach or place objects on the front airbag covers. Objects on the covers marked SRS AIRBAG could interfere with the proper operation of the airbags or be propelled inside the vehicle and hurt someone if the airbags inflate.
Types of Airbags

Your vehicle is equipped with three types of airbags:
- **Front airbags**: Airbags in front of the driver’s and front passenger’s seats.
- **Side airbags**: Airbags in the driver’s and front passenger’s seat-backs.
- **Side curtain airbags**: Airbags above the side windows.

Each is discussed in the following pages.

Front Airbags (SRS)

The front SRS airbags inflate in a moderate-to-severe frontal collision to help to protect the head and chest of the driver and/or front passenger.

SRS (Supplemental Restraint System) indicates that the airbags are designed to supplement seat belts, not replace them. Seat belts are the occupant’s primary restraint system.

Housing Locations

The front airbags are housed in the centre of the steering wheel for the driver, and in the dashboard for the front passenger. Both airbags are marked SRS AIRBAG.
Operation
Front airbags are designed to inflate during moderate-to-severe frontal collisions. When the vehicle decelerates suddenly, the sensors send information to the control unit which signals one or both front airbags to inflate.

A frontal collision can be either head-on or angled between two vehicles, or when a vehicle crashes into a stationary object, such as a concrete wall.

How the Front Airbags Work
While your seat belt restrains your torso, the front airbag provides supplemental protection for your head and chest.

The front airbags deflate immediately so that they won’t interfere with the driver’s visibility or the ability to steer or operate other controls.

The total time for inflation and deflation is so fast that most occupants are not aware that the airbags deployed until they see them lying in front of them.

How the Front Airbags Work
Although the driver’s and front passenger’s airbags normally inflate within a split second of each other, it is possible for only one airbag to deploy. This can happen if the severity of a collision is at the margin, or threshold that determines whether or not the airbags will deploy. In such cases, the seat belt will provide sufficient protection, and the supplemental protection offered by the airbag would be minimal.
When front airbags should not deploy

Minor frontal crashes: Front airbags were designed to supplement seat belts and help to save lives, not to prevent minor scrapes, or even broken bones that might occur during a less than moderate-to-severe frontal crash.

Side impacts: Front airbags can provide protection when a sudden deceleration causes a driver or front passenger to move towards the front of the vehicle. Side airbags and side curtain airbags have been specifically designed to help to reduce the severity of injuries that can occur during a moderate-to-severe side impact which can cause the driver or passenger to move towards the side of the vehicle.

Rear impacts: Head restraints and seat belts are your best protection during a rear impact. Front airbags cannot provide any significant protection and are not designed to deploy in such collisions.

Rollovers: Seat belts, side airbags and side curtain airbags offer the best protection in a rollover. Because front airbags could provide little if any protection, they are not designed to deploy during a rollover.

When front airbags deploy with little or no visible damage

Because the airbag system senses sudden deceleration, a strong impact to the vehicle framework or suspension might cause one or more of the airbags to deploy. Examples include running into a curb, the edge of a hole, or other low fixed object that causes a sudden deceleration in the vehicle chassis. Since the impact is underneath the vehicle, damage may not be readily apparent.

When front airbags may not deploy, even though exterior damage appears severe

Since crushable body parts absorb crash energy during an impact, the amount of visible damage does not always indicate proper airbag operation. In fact, some collisions can result in severe damage but no airbag deployment because the airbags would not have been needed or would not have provided protection even if they had deployed.
If it is unavoidable to install a rear-facing child restraint system in the front passenger seat, you must manually deactivate the passenger front airbag system, using the ignition key.

### Passenger Front Airbag Off System

#### Passenger front airbag ON/OFF switch

When the passenger front airbag ON/OFF switch is in:

- **OFF**: The passenger front airbag is deactivated. The passenger front airbag does not inflate during a severe frontal crash that inflates driver front airbag. The passenger front airbag off indicator stays on as a reminder.
- **ON**: The passenger front airbag is activated. The passenger front airbag on indicator comes on and remains on for about 60 seconds.

#### To deactivate the passenger front airbag system

1. Set the parking brake, and turn the ignition switch to LOCK  \[0\] \[^1\]. Remove the key.
2. Open the front passenger’s door.
3. Insert the ignition key to the passenger front airbag ON/OFF switch.
   - The switch is located at the side panel of the front passenger side instrument panel.
4. Turn the key to OFF, and remove it from the switch.

\[^1\]: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

---

**WARNING**

The passenger front airbag system must be turned off, if it is not avoidable to put a rear-facing child restraint system in the front passenger seat.

If the front passenger airbag inflates, it can hit the rear-facing child restraint system with enough force to kill or cause a very serious injury to the infant.

**WARNING**

Make sure to turn on the passenger front airbag system when a rear-facing child restraint system is not used on the front passenger seat.

Leaving the passenger front airbag system deactivated can result in serious injury or death in a crash.
■ Passenger front airbag off indicator
When the passenger front airbag system is activated, the indicator goes off after a few seconds when you turn the ignition switch to ON \[\mathrm{II}\]"1. When the passenger front airbag system is deactivated, the indicator stays on, or goes off momentarily and comes back on.

■ Passenger front airbag off system label
The label is located at the side panel of the front passenger side instrument panel.

![Passenger Airbag Off System Label](image)

Infant in a rear-facing child restraint system: May ride in front if it is unavoidable

Cannot ride in the front

Front passenger front airbag is: Active

Inactive

*1: Models with the keyless access system have an \textbf{ENGINE START/STOP} button instead of an ignition switch.

---

\textbf{Passenger Front Airbag Off System}

\textbf{NOTICE}

- Use your vehicle’s ignition key to turn the passenger front airbag ON/OFF switch. If you use a different key, the switch can be damaged, or the passenger front airbag system may not work properly.
- Do not close the door or apply excessive load on the ignition key while the key is in the passenger front airbag ON/OFF switch. The switch or the key can be damaged.

We strongly recommend that you must not install a rear-facing child restraint system in the front passenger seat.

\textbf{Protecting Infants} P. 64

It is your responsibility to change the setting of the passenger front airbag system to OFF when you put a rear-facing child restraint system on the front passenger seat.

When a rear-facing child restraint system is not in use in the front passenger seat, turn the system back on.
Side Airbags

The side airbags help to protect the upper torso of the driver or a front passenger during a moderate-to-severe side impact.

Your vehicle has the safety label on the front doorjambs to remind you of the side airbag hazards.
The side airbags are especially hazardous if a child is sitting in the front seat.

Housing Locations

The side airbags are housed in the outside edge of the driver's and passenger's seatbacks.

Both are marked SIDE AIRBAG.

WARNING

Leaning over the front door can result in serious injury or death if the side airbag inflates.

Always sit upright with their back against the seat-back.

Do not attach accessories on or near the side airbags. They can interfere with the proper operation of the airbags, or hurt someone if an airbag inflates.

If the impact is on the passenger side, the airbag deploys even if there is no passenger in the passenger’s seat.

Continued
Airbags

When the sensors detect a moderate-to-severe side impact, the control unit signals the side airbag on the impact side to immediately inflate.

When a side airbag deploys with little or no visible damage
Because the airbag system senses sudden acceleration, a strong impact to the side of the vehicle's framework can cause a side airbag to deploy. In such cases, there may be little or no damage, but the side impact sensors detected a severe enough impact to deploy the airbag.

When a side airbag may not deploy, even though visible damage appears severe
It is possible for a side airbag to not deploy during an impact that results in apparently severe damage. This can occur when the point of impact was towards the far front or rear of the vehicle, or when the vehicle's crushable body parts absorbed most of the crash energy. In either case, the side airbag would not have been needed nor provided protection even if it had deployed.

Side Airbags
Do not cover or replace the front seat-back covers without consulting a dealer. Improperly replacing or covering front seat-back covers can prevent your side airbags from properly deploying during a side impact.

Do not let the front passenger lean sideways with their head in the deployment path of the side airbag. An inflating side airbag can strike with strong force and seriously injure the passenger.
Side Curtain Airbags

The side curtain airbags help to protect the heads of the driver and passengers in outer seating positions during a moderate-to-severe side impact.

### Housing Locations

The side curtain airbags are located in the ceiling above the side windows on both sides of the vehicle.

### Operation

The side curtain airbag is designed to deploy in a moderate-to-severe side impact.

#### When side curtain airbags deploy in a frontal collision

One or both side curtain airbags may inflate in a moderate-to-severe angled frontal collision. In this case, the side curtain airbags will deploy slightly after the front airbags.

---

**Side Curtain Airbags**

The side curtain airbags are most effective when an occupant is wearing their seat belt properly and sitting upright, well back in their seat.

Do not attach any objects to the side windows or roof pillars as they can interfere with the proper operation of the side curtain airbags.

Do not put a coat hanger or hard objects on a coat hook. This could result in injuries if your side curtain airbag inflates.
Airbag System Indicators

If a problem occurs in the airbag system, the SRS indicator comes on and a message appears on the i-multi-information display.

SRS (Supplemental Restraint System) Indicator

When the ignition switch is turned to ON [Ⅱ]*1
The indicator comes on for a few seconds, then goes off. This tells you the system is working properly.

If the indicator comes on at any other time, or does not come on at all, have the system checked by a dealer as soon as possible. If you don’t, your airbags and seat belt tensioners may not work properly when they are needed.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

WARNING

Ignoring the SRS indicator can result in serious injury or death if the airbag systems or tensioners do not work properly.

Have your vehicle checked by a dealer as soon as possible if the SRS indicator alerts you to a possible problem.

WARNING

Remove the rear-facing child restraint system immediately from the front passenger seat if the SRS indicator comes on. Even if the passenger front airbag has been deactivated, do not ignore the SRS indicator.

The SRS system may have a fault which could cause the passenger front airbag to be activated, causing serious injury or death.
Passenger Front Airbag Off Indicator

- When the passenger airbag off indicator comes on
  The indicator stays on while the passenger’s front airbag system is deactivated.

  When a rear-facing child restraint system is not in use in the front passenger seat, manually turn the system back on. The indicator should go off.
Airbag Care

You do not need to, and should not, perform any maintenance on or replace any airbag system components yourself. However, you should have your vehicle inspected by a dealer in the following situations:

■ **When the airbags have deployed**
If an airbag has inflated, the control unit and other related parts must be replaced. Similarly, once an automatic seat belt tensioner has been activated, it must be replaced.

■ **When the vehicle has been in a moderate-to-severe collision**
Even if the airbags did not inflate, have your dealer inspect the following: front seat belt tensioners, and each seat belt that was worn during the crash.

Airbag Care

The removal of airbag components from the vehicle is prohibited.

In case of malfunction, or shutdown, or after the airbag inflation/seat belt tensioner operation, ask a qualified personnel for handling.

We recommend against the use of salvaged airbag system components, including the airbag, tensioners, sensors, and control unit.
Child Safety

Protecting Child Passengers

Each year, many children are injured or killed in vehicle crashes because they are either unrestrained or not properly restrained. In fact, vehicle accidents are the number one cause of death of children aged 12 and under.

To reduce the number of child deaths and injuries, infants and children should be properly restrained when they ride in a vehicle.

WARNING

Children who are unrestrained or improperly restrained can be seriously injured or killed in a crash.

Any child too small for a seat belt should be properly restrained in an approved child restraint system. A larger child should be properly restrained with a seat belt, using a booster seat if necessary.

In many countries, the law requires all children aged 12 and under, and whose height are shorter than 150 cm (60 inches) be properly restrained in a rear seat.

In many countries, it is required to use an officially approved and suitable child restraint system for transporting a child on any passenger seat. Check your local legal requirement.

European models
Child restraint systems must meet the UN-ECE R44 or the regulations of the subject countries.

Except European models
We recommend that child restraint systems meet the UN-ECE R44 or the regulations of the subject countries.
Children should sit properly restrained in a rear seat. This is because:

- An inflating front or side airbag can injure or kill a child sitting in the front seat.
- A child in the front seat is more likely to interfere with the driver's ability to safely control the vehicle.
- Statistics show that children of all sizes and ages are safer when they are properly restrained in a rear seat.
• Any child who is too small to wear a seat belt must be properly restrained in an approved child restraint system that is properly secured to the vehicle using the lap belt portion of the lap/shoulder belt.

• Never hold a child on your lap because it is impossible to protect them in the event of a collision.

• Never put a seat belt over yourself and a child. During a crash, the belt would likely press deep into the child and cause serious or fatal injuries.

• Never let two children use the same seat belt. Both children could be very seriously injured in a crash.

• Do not allow children to operate the doors, windows or seat adjustments.

• Do not leave children in the vehicle unattended, especially in hot weather when the inside of the vehicle can get hot enough to kill them. They could also activate vehicle controls causing it to move unexpectedly.

**WARNING:**

**Front Passenger's Sun Visor**

NEVER use a rearward facing child restraint on a seat protected by an ACTIVE AIRBAG in front of it, DEATH or SERIOUS INJURY to the CHILD can occur.

**WARNING:** Use the power window lock button to prevent children from opening the windows. Using this feature will prevent children from playing with the windows, which could expose them to hazards or distract the driver.

**Opening/Closing the Power Windows** P. 166

**WARNING:** Always take the ignition key with you whenever you leave the vehicle alone (with other occupants).
Safety of Infants and Small Children

Protecting Infants

An infant must be properly restrained in a rear-facing, reclining child restraint system until the infant reaches the seat maker’s weight or height limit for the seat, and the infant is at least one year old.

Positioning a rear-facing child restraint system
Child restraint system must be placed and secured in a rear seating position.

WARNING

Placing a rear-facing child restraint system in the front seat can result in serious injury or death if the passenger’s front airbag inflates.

Always place a rear-facing child restraint system in the back seat, not the front.

As required by UN-ECE R94 Regulation:

WARNING

NEVER use a rearward facing child restraint on a seat protected by an ACTIVE AIRBAG in front of it, DEATH or SERIOUS INJURY to the CHILD can occur.
When properly installed, a rear-facing child restraint system may prevent the driver or a front passenger from moving their seat all the way back, or from locking their seat-back in the desired position.

Protecting Infants

If the passenger’s front airbag inflates, it can hit the rear-facing child restraint system with great force, which can dislodge or strike the system, and seriously injure the child.

Rear-facing child restraint systems should never be installed in a front facing position.

Always refer to the child restraint system manufacturer’s instructions before installation.

If it is absolutely unavoidable to install a rear-facing child restraint system in the front passenger seat, manually turn off the passenger front airbag system.

Passenger Front Airbag Off System P. 53
Protecting Smaller Children

If a child is at least one year old and within the weight range indicated by the child restraint system manufacturer, the child should be properly restrained in a firmly secured front facing child restraint system.

Front facing child restraint system placement

We strongly recommend placing a front facing child restraint system in a rear seating position.

Placing a front facing child restraint system in the front seat can be hazardous. A rear seat is the safest place for a child.

WARNING

Placing a front facing child restraint system in the front seat can result in serious injury or death if the front airbag inflates.

If you must place a front facing child restraint system in front, move the vehicle seat as far back as possible, and properly restrain the child.

Educate yourself about the laws and regulations regarding child restraint system use where you are driving, and follow the child restraint system manufacturer’s instructions.

Many experts recommend use of a rear-facing child restraint system for a child up to two years old, if the child’s height and weight are appropriate for a rear-facing child restraint system.
Selecting a Child Restraint System

Some child restraint systems are lower anchorage compatible. Some have a rigid-type connector while others have a flexible-type connector. Both are equally easy to use. Some existing and previously owned child restraint systems can only be installed using the seat belt. Whichever type you choose, follow the child restraint system manufacturer’s use and care instructions as well as the instructions in this manual. Proper installation is key to maximizing your child’s safety.

The flexible type may not be available in your country.

In seating positions not equipped with lower anchorages, install a child restraint system using the seat belt and a top tether for added security. This is because all child restraint systems must be secured with a lap belt or the lap part of a lap/shoulder belt when not using the lower anchorage system. In addition, the child restraint system manufacturer may advise that a seat belt be used to attach an ISO FIX restraint system once a child reaches a specified weight. Please read the child restraint system owner’s manual for proper installation instructions.

Important consideration when selecting a child restraint system
Make sure the child restraint system meets the following three requirements:
- The child restraint system is the correct type and size for the child.
- The child restraint system is the correct type for the seating position.
- Child restraint system is compliant with safety standard. We recommend the child restraint system with the UN-ECE R44 or the regulations of the subject countries. Look for the approval mark on the system and the manufacturer’s statement of compliance on the box.

* Not available on all models

Selecting a Child Restraint System
Installation of a lower anchorage*-compatible child restraint system is simple.

Lower anchorage-compatible child restraint systems have been developed to simplify the installation process and reduce the likelihood of injuries caused by incorrect installation.

* Not available on all models
The Recommended Child Restraint Systems for EU Countries

Various types of child restraint systems are available. Not all types are suitable for your vehicle. Please refer to the table below to select which category of child restraint system can be used on each seating position.
### 1.4 L engine, 1.8 L engine, and diesel engine models

- **IL**: Suitable for particular ISO FIX child restraint system (CRS) given in this list.
- **IUF**: Suitable for forward-facing ISOFIX child restraints system of universal category approved for use in this mass group. For Group I, the front facing genuine Honda ISO FIX child restraint system is available from a dealer.
- **L**: Suitable for particular child restraint systems given in this table. These restraints may be of the “specific vehicle,” “restricted,” or “semi-universal” category.
- **U**: Suitable for “universal” category restraints approved for use in this mass group.
- **UF**: Suitable for front facing “universal” category restraints approved for use in this mass group.
- **X**: Seat position not suitable for children in this mass group.
- *1*: Move the front seat to its rearmost position and adjust the front seat-back angle to the most upright position.

A size class is specified for some child restraint systems. Make sure to check the size class as indicated on the manufacturer’s instructions, package, and labels of the child restraint.

The particular child restraints in the table are Honda Genuine Parts. They are available from your dealer.

For a correct installation, please refer to the Child Restraint Instruction Manual.

IL: Suitable for particular ISOFIX child restraint system (CRS) given in this list.
IUF: Suitable for forward-facing ISOFIX child restraint systems of universal category approved for use in this mass group.
L: Suitable for particular child restraint systems given in this list. These restraints may be of the “specific vehicle,” “restricted,” or “semi-universal” category.
U: Suitable for “universal” category restraints approved for use in this mass group.
UF: Suitable for front facing “universal” category restraints approved for use in this mass group.
X: Seat position not suitable for children in this mass group.
*1: Seat-back angle to the upright position (Front most lock position).
*2: Move the front seat to its slide rail rearmost position.
*3: Honda BABY SAFE is able to equipped for rear facing.

A size class is specified for some child restraint systems. Make sure to check the size class as indicated on the manufacturer’s instructions, package, and labels of the child restraint.
The particular child restraints in the table are Honda Genuine Parts. They are available from your dealer.
For a correct installation, please refer to the Child Restraint Instruction Manual.
Installing a Lower Anchorage-Compatible Child Restraint System

A lower anchorage-compatible child restraint system can be installed in either of the two rear outer seats. A child restraint system is attached to the lower anchorages with either the rigid or flexible type of connectors.

1. Locate the lower anchorages under the marks.

2. Place the child restraint system on the vehicle seat then attach the child restraint system to the lower anchorages according to the instructions that came with the child restraint system.

When installing the child restraint system, make sure that the lower anchorages are not obstructed by the seat belt or any other object.

Installing a Lower Anchorage-Compatible Child Restraint System

Some child restraint systems come with optional guide-cups, which avoid possible damage to the seat surface. Follow the manufacturer’s instructions when using the guide-cups, and attach them to the lower anchorages as shown in the image.
3. Remove the luggage area cover*.  
   * Luggage Area Cover* P. 213

4. Raise the head restraint to its highest position, then route the tether strap between the head restraint legs, and secure the tether strap hook onto the anchorage.
5. Tighten the tether strap as instructed by the child restraint system manufacturer.
6. Make sure the child restraint system is firmly secured by rocking it forward and back and side to side; little movement should be felt.
7. Make sure any unused seat belt that a child can reach is buckled.

Installing a Lower Anchorage-Compatible Child Restraint System

**WARNING:** Never use a hook that does not come with a Top Tether anchor symbol when securing an installed child restraint system.

For your child's safety, when using a child restraint system installed using the lower anchorage system, make sure that the child restraint system is properly secured to the vehicle. A child restraint system that is not properly secured will not adequately protect a child in a crash and may cause injury to the child or other vehicle occupants.

The flexible type may not be available in your country.

* Not available on all models
Installing a Child Restraint System with a Lap/Shoulder Seat Belt

1. Place the child restraint system on the vehicle seat.
2. Route the seat belt through the child restraint system according to the child restraint system manufacturer’s instructions, and insert the latch plate into the buckle.
   ▶ Insert the latch plate fully until it clicks.
3. Push down the tab. Route the shoulder part of the belt into the slit at the side of the restraint.
4. Grab the shoulder part of the belt near the buckle, and pull up to remove any slack from the lap part of the belt.
   ▶ When doing this, place your weight on the child restraint system and push it into the vehicle seat.
5. Position the belt properly and push up the tab. Make sure the belt is not twisted.
   ▶ When pushing up the tab, pull up the upper shoulder part of the belt to remove any slack from the belt.

A child restraint system that is not properly secured will not adequately protect a child in a crash and may cause injury to the child or other vehicle occupants.
6. Make sure the child restraint system is firmly secured by rocking it forward and back and side to side; little movement should be felt.
7. Make sure any unused seat belt that a child can reach is buckled.

Except European models
If your child restraint system does not come with a mechanism that secures the belt, install a locking clip on the seat belt.

After going through the step 1 and 2, pull up the shoulder part of the belt and make sure there is no slack in the lap portion.

3. Tightly grasp the belt near the latch plate. Pinch both parts of the belt together so they do not slip through the latch plate.
4. Install the locking clip as shown in the image. Position the clip as close as possible to the latch plate.
5. Insert the latch plate into the buckle. Go to step 6 and 7.
Adding Security with a Tether

A tether anchorage point is provided behind each rear outer seating position. A child restraint system that is installed with a seat belt and comes with a tether can use the tether for additional security.

1. Locate the appropriate tether anchorage point.
2. Remove the luggage area cover*.
   - Luggage Area Cover* P. 213
3. Raise the head restraint to its highest position, then route the tether strap through the head restraint legs. Make sure the strap is not twisted.
4. Secure the tether strap hook onto the anchorage.
5. Tighten the tether strap as instructed by the child restraint system manufacturer.

**Adding Security with a Tether**

**WARNING:** Child restraint anchorages are designed to withstand only those loads imposed by correctly fitted child restraints. Under no circumstances are they to be used for adult seat belts, harnesses or for attaching other items or equipment to the vehicle.

Since a tether can provide additional security to the lap/shoulder seat belt installation, we recommend using a tether whenever one is available.

* Not available on all models
Safety of Larger Children

Protecting Larger Children
The following pages give instructions on how to check proper seat belt fit, what kind of booster seat to use if one is needed, and important precautions for a child who must sit in front.

Checking Seat Belt Fit
When a child is too big for a child restraint system, secure the child in a rear seat using the lap/shoulder seat belt. Have the child sit upright and all the way back, then answer the following questions.

Checklist
- Do the child’s knees bend comfortably over the edge of the seat?
- Does the shoulder belt cross between the child’s neck and arm?
- Is the lap part of the seat belt as low as possible, touching the child’s thighs?
- Will the child be able to stay seated like this for the whole trip?

If you answer yes to all these questions, the child is ready to wear the lap/shoulder seat belt correctly. If you answer no to any question, the child needs to ride on a booster seat until the seat belt fits properly without a booster seat.

WARNING
Allowing a child age 12 or under to sit in front can result in injury or death if the passenger's front airbag inflates.

If a larger child must ride in front, move the vehicle seat as far to the rear as possible, have the child sit up properly and wear the seat belt properly, using a booster seat if needed.
Booster Seats

If a lap/shoulder seat belt cannot be used properly, position the child in a booster seat in a rear seating position. For the child’s safety, check that the child meets the booster seat manufacturer’s recommendations.

A back-rest is available for a specific booster seat. Install the back-rest to the booster seat and adjust it to the vehicle seat according to the booster seat manufacturer’s instructions. Make sure the seat belt is properly routed through the guide at the shoulder of the back-rest and the belt does not touch and cross the child’s neck.

When installing a booster seat, make sure to read the instructions that came with it, and install the seat accordingly. There are high- and low-type booster seats. Choose a booster seat that allows the child to wear the seat belt correctly.
Child Safety

Safety of Larger Children

Safe Driving

Your vehicle has a rear seat where children can be properly restrained. If you ever have to carry a group of children, and a child must ride in front:

- Make sure you read and fully understand the instructions and safety information in this manual.
- Move the front passenger seat as far back as possible.
- Have the child sit upright and well back in the seat.
- Check that the seat belt is properly positioned so that the child is secure in the seat.

Monitoring child passengers

We strongly recommend that you keep an eye on child passengers. Even older, more mature children sometimes need to be reminded to fasten their seat belts and sit up properly.

Protecting Larger Children - Final Checks
Exhaust Gas Hazard

Carbon Monoxide Gas

The engine exhaust from this vehicle contains carbon monoxide, a colourless, odourless, and highly toxic gas. As long as you properly maintain your vehicle, carbon monoxide gas will not get into the interior.

- **Have the exhaust system inspected for leaks whenever**
  - The exhaust system is making an unusual noise.
  - The exhaust system may have been damaged.
  - The vehicle is raised for an oil change.

When you operate a vehicle with the tailgate open, airflow can pull exhaust gas into the interior and create a hazardous condition. If you must drive with the tailgate open, open all the windows and set the climate control system as shown below.

1. Select the fresh air mode.
2. Select the Fan mode.
3. Set the fan speed to high.
4. Set the temperature control to a comfortable setting.

Adjust the climate control system in the same manner if you sit in your parked vehicle with the engine running.

---

**WARNING**

Carbon monoxide gas is toxic. Breathing it can cause unconsciousness and even kill you.

Avoid any enclosed areas or activities that expose you to carbon monoxide.

An enclosed area such as a garage can quickly fill up with carbon monoxide gas. Do not run the engine with the garage door closed. Even when the garage door is open, drive out of the garage immediately after starting the engine.
Safety Labels

Label Locations

These labels are in the locations shown. They warn you of potential hazards that can cause serious injury or death. Read these labels carefully.

If a label comes off or becomes hard to read, contact a dealer for a replacement.

*1: Left-hand drive models shown. For the right-hand drive models, these labels are located at the symmetrically opposite to the left-hand drive model.
*2: 1.4 L engine and 1.8 L engine models
*3: Diesel models
*4: 2.0 L engine models
Instrument Panel

This chapter describes the buttons, indicators, and gauges that are used while driving.

Gauges and i-Multi-Information Display

Gauges
Gauges include the speedometer, tachometer, fuel gauge, and related indicators. They are displayed when the ignition switch is in ON [1]*1.

■ Speedometer
Displays your driving speed in km/h or mph*.

■ Fuel Gauge
Displays the amount of fuel left in the fuel tank.

■ Tachometer
Shows the number of engine revolutions per minute.

■ Temperature Gauge
Displays the temperature of the engine coolant.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
The i-multi-information display shows the odometer, trip meter, outside temperature indicator, and other gauges. It also displays important messages such as warnings and other helpful information.

### Switching the Display

Press the (display/information) button to change the display.

<table>
<thead>
<tr>
<th>Display/Information Button</th>
</tr>
</thead>

<tr>
<td>Press</td>
</tr>
</tbody>
</table>

#### Switching the Display

To change the item displayed on the fuel consumption screen:
1. Press and hold the button until the item blinks.
2. Press the button to select an item while the item is blinking for about six seconds.

The display is fixed when the time elapses and blinking stops.
Gauges and i-Multi-Information Display

Continued

2.0 L engine models

- Press .
- Press and hold .
- Press and hold +R.

*1: When the screen is displayed by pressing and holding the button, this message is appeared.

* Not available on all models
Gauges and i-Multi-Information Display

■ Trip computer
Press the (Select/Reset) knob to change display.

■ Odometer
Shows the total number of kilometres or miles* that your vehicle has accumulated.

■ Trip Meter
Shows the total number of kilometres or miles* driven since the last reset. Meters A and B can be used to measure two separate trips.

■ Resetting a trip meter
To reset a trip meter, display it, then press and hold the knob. The trip meter is reset to 0.0.

* Not available on all models
Gauges and i-Multi-Information Display

Instant Fuel Economy
Shows the instant fuel economy as a bar graph in l/100 km or mpg.

Average Fuel Economy
Shows the estimated average fuel economy of each trip meter in l/100 km or mpg. The display is updated at set intervals. When a trip meter is reset, the average fuel economy is also reset.

Range
Shows the estimated distance you can travel on the remaining fuel. This distance is estimated from the fuel economy of your previous trips.

Elapsed Time
Shows the time elapsed since Trip A or Trip B was reset.

Average Speed
Shows the average speed in km/h since Trip A or Trip B was reset.

Instant Fuel Economy
You may temporarily find the instant fuel economy higher than in normal driving while the DPF (diesel particulate filter) system is in operation.

Average Fuel Economy
You can choose whether to reset trip A/B and average fuel economy A/B when you refuel.

Customized Features P. 131
Switching the Display P. 120

You can choose an item to be displayed in the fuel consumption screen. Average fuel economy, range, elapsed time, or average speed can be selected.

Customized Features P. 131
Switching the Display P. 120
Outside Temperature

Shows the outside temperature in Celsius.
If the outside temperature has been below 3°C at the time you turn the ignition switch to ON \([\text{II}]*1\), the outside temperature indicator blinks for 10 seconds.

Adjusting the outside temperature display

Adjust the temperature reading up to ±3°C if the temperature reading seems incorrect.

Outside Temperature

The temperature sensor is in the front bumper.
Road heat and exhaust from another vehicle can affect the temperature reading when your vehicle speed is less than 30 km/h (19 mph).

It may take several minutes for the display to be updated after the temperature reading has stabilized.

Use the i-multi-information display’s customized features to correct the temperature.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Gauges and i-Multi-Information Display

Instrument Panel

- **G-Meter***
  Displays the strength (G) and direction of the load that is applied to the vehicle during driving.

- **Braking Pressure Meter***
  Displays the brake pressure in MPa when the brake is applied.

- **Accelerator Position Meter***
  Displays the accelerator position in degrees of %.

- **Boost Pressure Meter***
  Displays the turbo boost pressure in kPa.

- **Water TEMP Meter***
  Displays the engine coolant temperature in °C.

- **Oil Pressure Meter***
  Displays the engine oil pressure in kPa.

- **Oil TEMP Meter***
  Displays the engine oil temperature in °C.
  Since the actual oil temperature is not measured, the temperature displayed here may differ from the actual temperature.

* Not available on all models
Instrument Panel

Measures the LAP Time, and displays the previously measured times and the Fastest LAP time.

### Measuring LAP Time
1. Operate the (display/information) button to display the LAP Time measurement screen.
2. Press the SOURCE button to start measurement.
3. Press the SOURCE button again to stop measurement.
   - To measure the time per lap, press the MENU button at the completion of each lap.

### Checking/Clearing history
- A maximum of 99 histories can be stored. Up to five histories are displayed on the screen at the same time.
- To check the sixth and subsequent histories, operate the + or - button to move the screen while measurement is stopped.
- To clear the history, press and hold the MENU button while measurement is stopped.

LAP Time is displayed from 00:00.00 to 99:59.99. When the time exceeds 99:59.99, the display returns to 00:00.00 and measurement continues.

The measured time is stored in the history when the MENU button is pressed to confirm that the LAP Time or measurement is finished.

The Fastest LAP in the history is displayed with .

While measuring, the numeric value of the current LAP time is highlighted.

When the number of histories exceeds 99, the first history will be overwritten.

While measuring the LAP Time, 0-100 km/h or 0-60 mph"1 Time and 0-400 m or 0-1/4 mile"1 Time will not be displayed, even if the button is pressed.

*1: When you selected the speedometer unit to mph.

* Not available on all models
0-100 km/h or 0-60 mph*1 Time*

Measures 0-100 km/h or 0-60 mph*1, and displays the previously measured times and the Best Time.

**Measuring 0-100 km/h or 0-60 mph*1 Time**

1. Operate the (display/information) button to display the 0-100 km/h or 0-60 mph*1 measurement screen.

2. When the SOURCE button is pressed, REV Indicators start to count down. Measurement starts after the indicators disappear.

   - When the vehicle speed is above 2 km/h or 1 mph*1, the REV Indicators are not illuminated even when the SOURCE button has been pressed.

3. When the vehicle speed reaches 100 km/h or 60 mph*1, or the SOURCE button is pressed, measurement stops.

*1: When you selected the speedometer unit to mph.

* Not available on all models

Be sure to use this measurement function only where and when it is safe to do so.

0-100 km/h or 0-60 mph*1 Time is displayed from 00:00.00 to 99:59.99.
When the time exceeds 99:59.99, the display returns to 00:00.00 and measurement continues.

The Best Time in the history is displayed with . During measurement, the numeric value of the current Attack is highlighted.

The measured time is stored in the history when the finished.

When the number of histories exceeds 99, the first history will be overwritten.

While measuring the 0-100 km/h or 0-60 mph*1 Time, LAP Time and 0-400 m or 0-1/4 mile*1 Time will not be displayed, even if the button is pressed.
- **Checking/Clearing history**
  
  - A maximum of 99 histories can be stored. Up to five histories are displayed on the screen at the same time.
  - To check the sixth and subsequent histories, operate the [+] or [-] button to move the screen while measurement is stopped.
  - To clear the history, press and hold the **MENU** button while measurement is stopped.
0-400 m or 0-1/4 mile*1 Time*

Measures 0-400 m or 0-1/4 mile*1, and displays the previously measured times and the Best Time.

### Measuring 0-400 m or 0-1/4 mile*1 Time

1. Operate the (display/information) button to display the 0-400 m or 0-1/4 mile*1 measurement screen.

2. When the SOURCE button is pressed, REV Indicators start to count down. Measurement starts after the indicators disappear.
   - When the vehicle speed is above 2 km/h or 1 mph*1, the REV Indicators are not illuminated even when the SOURCE button has been pressed.

3. When the vehicle speed reaches 0-400 m or 0-1/4 mile*1, or the SOURCE button is pressed, measurement stops.

*1: When you selected the speedometer unit to mph.

* Not available on all models
Checking/Clearing history

- A maximum of 99 histories can be stored. Up to five histories are displayed on the screen at the same time. To check the sixth and subsequent histories, operate the + or - button to move the screen while measurement is stopped.
- To clear the history, press and hold the MENU button while measurement is stopped.
**Customized Features**

Use the i-multi-information display to customize certain features.

**How to customize**

Select the **Vehicle menu** screen by pressing the **MENU** button while the ignition switch is in ON \(\text{II}\)^*1, and the vehicle is at a complete stop. Select **Customise settings**, then press the **SOURCE** button.

*1: Models with the keyless access system have an **ENGINE START/STOP** button instead of an ignition switch.

Clock

Adjusting the Clock

You can adjust the time in the clock display with the ignition switch in ON \[\text{ON}\] \[1\]^1.

Models with one display

1. Press the \text{MENU} button.
2. Select \text{Adjust clock} with the \text{[+]/[-]} button, then press the \text{SOURCE} button.
3. Press the \text{[+]/[-]} button to change the setting between \text{12 h} and \text{24 h}.
4. Select hour or minute with the \[\text{[<]/[>]}\] button.
5. Press the \text{[+]/[-]} button to adjust the numbers up or down.
6. Select \[\text{[<]/[>]}\] with the \[\text{[<]/[>]}\] button, then press the \text{SOURCE} button to enter your selection.

Models with two displays

1. Press the \text{[H]} button.
2. Select \text{Settings}.
3. Select \text{Info}.
4. Select the \text{Clock} tab.
5. Select \text{Clock Adjustment}.
6. Select \[\text{[<]/[>]}\] to change hour.
7. Select \[\text{[<]/[>]}\] to change minute, then select \text{OK}.

\[\text{ADJUSTING THE CLOCK}\]

Models with one display

You cannot adjust the time while the vehicle is moving.

Models with navigation system

The clock is automatically updated through the navigation system, so the time does not need to be adjusted.

Models with two displays

You can customize the clock display to show the 12 hour clock or 24 hour clock.

\[\text{CUSTOMIZED FEATURES P. 313}\]

The clock display is set to off by factory default. You can turn the clock display on and off.

\[\text{CUSTOMIZED FEATURES P. 313}\]

The clock is automatically updated when your smartphone is connected to the audio system.

*1: Models with the keyless access system have an \text{ENGINE START/STOP} button instead of an ignition switch.
Locking and Unlocking the Doors

Key Types and Functions

This vehicle comes with the following keys:

- **Keys**
  - Retractable Key*
  - Keyless Remote*

* Not available on all models

Use the key to start and stop the engine, and to lock and unlock the doors and tailgate.

- **Immobilizer System** P. 162

All the keys have an immobilizer system. The immobilizer system helps to protect against vehicle theft.

The keys contain precision electronics. Adhere to the following advice to prevent damage to the electronics:
- Do not leave the keys in direct sunlight, or in locations with high temperature or high humidity.
- Do not drop the keys or set heavy objects on them.
- Keep the keys away from liquids.
- Do not take the keys apart except for replacing the battery.

If the circuits in the keys are damaged, the engine may not start, and the remote transmitter may not work.
If the keys do not work properly, have them inspected by a dealer.
Locking and Unlocking the Doors

Key Types and Functions

■ Keyless remote*

The built-in key can be used to lock/unlock the doors and tailgate when the keyless remote battery becomes weak and the power door lock/unlock operation is disabled. To remove the built-in key, pull it out while sliding the release knob. To reinstall the built-in key, push the built-in key into the keyless remote until it clicks.

■ Retractable keys*

The key folds up inside the remote transmitter.

1. Press the release button to release the key out from the transmitter.
   - Make sure to fully extend the key.
2. To close the key, press the release button then push the key inside the transmitter until you hear a click.

* Not available on all models
Key Number Tag

Contains a number that you will need if you purchase a replacement key.

Key Number Tag

Keep the key number tag separate from the key in a safe place outside of your vehicle. If you wish to purchase an additional key, contact a dealer.

If you lose your key and you cannot start the engine, contact a dealer.
Locking/Unlocking the Doors from the Outside

Using the Keyless Access System*

When you carry the keyless remote, you can lock/unlock the doors and open the tailgate.

You can lock/unlock the doors within a radius of about 80 cm (32 inches) of the outside door handle.
You can open the tailgate within about 80 cm (32 inches) radius from the tailgate release button.

Locking the doors and tailgate
Press the door lock button on the front door or the tailgate.

Some exterior lights flash three times; all the doors and tailgate lock and the security system sets.

Models with keyless access system
Right-hand drive type
You cannot lock any doors from the outside when the keyless remote is inside the vehicle, and the beeper sounds. If you want to lock a door while the remote is still in the vehicle, do any of the following four times:
• Press the lock button on the keyless remote.
• Turn the key in the cylinder to lock.
• Press the door lock button on the door handle or the tailgate.

Models with keyless access system
You can lock or unlock doors using the remote transmitter or keyless access system only when the power mode is in VEHICLE OFF.

Using the Keyless Access System*

• Do not leave the keyless remote in the vehicle when you get out. Carry it with you.
• Even if you are not carrying the keyless remote, you can lock/unlock the doors while someone else with the remote is within range.
• If you grip a front door handle wearing gloves, the door sensor may be slow to respond or may not respond by unlocking the doors.
• The door may be unlocked if the door handle is covered with water in heavy rain or in a carwash if the keyless remote is within range.
• You cannot unlock the door by gripping the handle after two seconds of locking it.
• The door may not open if you pull it immediately after gripping the door handle. Grip the handle again and confirm that the door is unlocked before pulling the handle.

* Not available on all models
Locking and Unlocking the Doors

Locking/Unlocking the Doors from the Outside

Controls

■ Unlocking the doors and tailgate
Grab the driver’s door handle:
► The driver’s door unlocks.
► Some exterior lights flash once.
Grab the front passenger’s door handle:
► All the doors and tailgate unlock.
► Some exterior lights flash once.

Press the tailgate release button:
► The tailgate unlocks.
► Some exterior lights flash once.

Using the Keyless Access System *

• Even within the 80 cm (32 inches) radius, you may not be able to lock/unlock the doors with the keyless remote if it is above or below the outside handle.
• The keyless remote may not operate if it is too close to the door and door glass.

If you do not open a door within 30 seconds of unlocking the vehicle, the doors will automatically relock.

You can customize the door unlock mode setting.

Customized Features P. 131

* Not available on all models
■ Locking the doors
Press the lock button.
- Some exterior lights flash three times, all the doors and tailgate lock, and the security system sets.

■ Unlocking the doors
Press the unlock button.
Once:
- Some exterior lights flash once, and the driver’s door unlocks.
Twice:
- The remaining doors and the tailgate unlock.

---

Using the Remote Transmitter

- Using the Remote Transmitter
  If you do not open a door within 30 seconds of unlocking the vehicle with the remote transmitter, the doors will automatically relock.

  If the interior light switch is in the door activated position, the interior lights come on when you press the unlock button.
  No doors opened: The lights fade out after 30 seconds.
  Doors relocked with the remote: The lights go off immediately.
  ➤ Interior Lights P. 202

  The remote transmitter uses low-power signals, so the operating range may vary depending on the surroundings.

  Models without keyless access system
  The remote transmitter will not work when the key is in the ignition switch.

  The remote will not lock the vehicle when a door is open.

  If the distance at which the remote transmitter works varies, the battery is probably low.
  If the LED does not come on when you press a button, the battery is dead.
  ➤ Replacing the Button Battery P. 544

  You can customize the door unlock mode setting.
  ➤ Customized Features P. 131
Locking and Unlocking the Doors

Locking/Unlocking the Doors from the Outside

Controls

Fully insert the key and turn it.

Locking the driver's door
Push the lock tab forward 1 or push the master door lock switch in the lock direction 2, then pull and hold the outside door handle 3. Close the door, then release the handle.

Locking the passenger’s doors
Push the lock tab forward and close the door.

Lockout prevention system
The doors and tailgate cannot be locked when the key is in the ignition switch*1, or the keyless remote is inside the vehicle, and any door or the tailgate is open.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

Models without security system
To unlock the driver’s door, turn the key and release it.

Models with security system
Unlocking the doors with the key causes the security system to alarm. Always unlock the doors and tailgate with the remote transmitter.

Locking/Unlocking the Doors Using a Key

When you lock the driver's door with the key, all the other doors and tailgate lock at the same time.

Locking a Door Without Using a Key

When you lock the driver's door, all the other doors and tailgate lock at the same time. Make sure you have the key in your hand before locking the door to prevent it from being locked in the vehicle.
Locking and Unlocking the Doors

Low Keyless Remote Signal Strength *

The vehicle transmits radio waves to locate the keyless remote when locking/unlocking the doors, opening the tailgate, or to start the engine.

In the following cases, locking/unlocking the doors or opening the tailgate or starting the engine may be inhibited or operation may be unstable:

- Strong radio waves are being transmitted by nearby equipment.
- You are carrying the keyless remote together with telecommunications equipment, notebook computers, mobile phones, or wireless machines.
- A metallic object is touching or covering the keyless remote.

Low Keyless Remote Signal Strength *

Communication between the keyless remote and the vehicle consumes the keyless remote battery. The keyless remote battery lasts about two years. This changes by how often you use the remote. The battery is consumed whenever the keyless remote is receiving strong radio waves. Avoid placing it near electrical appliances such as televisions and personal computers.

* Not available on all models
Locking/Unlocking the Doors from the Inside

bold Using the Lock Tab

- **Locking a door**
  Push the lock tab forward.

- **Unlocking a door**
  Pull the lock tab rearward.

bold Unlocking Using the Front Door Inner Handle

Pull the front door inner handle.
- The door unlocks and opens in one motion.

Using the Lock Tab

When you lock the door using the lock tab on the driver’s door, all the other doors and tailgate lock at the same time.

When you unlock the door using the lock tab on the driver’s door, only the driver’s door will unlock.

Unlocking Using the Front Door Inner Handle

The front door inner handles are designed to allow front seat occupants to open the door in one motion.

However, this feature requires that front seat occupants never pull a front door inner handle while the vehicle is in motion.

Children should always ride in a rear seat where childproof door locks are provided.

- **Childproof Door Locks** P. 158

Continued
Locking and Unlocking the Doors

Childproof Door Locks

The childproof door locks prevent the rear doors from being opened from the inside regardless of the position of the lock tab.

Setting the Childproof Door Locks

Slide the lever in the rear door to the lock position, and close the door.

When opening the door
Open the door using the outside door handle.
Opening and Closing the Tailgate

Precautions for Opening/Closing the Tailgate

Always make sure individuals and objects are clear of the tailgate before opening or closing it.

■ Opening the tailgate
- Open the tailgate all the way.
  - If it is not fully opened, the tailgate may begin to close under its own weight.
  - Be careful when it is windy. The wind may cause the tailgate to close.

■ Closing the tailgate
Keep the tailgate closed while driving to:
- Avoid possible damage.
- Prevent exhaust gas from leaking into the vehicle.
- Carbon Monoxide Gas P. 79

- Precautions for Opening/Closing the Tailgate
  Be careful not to hit your head on the tailgate or to put your hands between the tailgate and the luggage area when closing the tailgate.

  When you are storing or picking up luggage from the luggage area while the engine is idling, do not stand in front of the exhaust pipe. You may get burned.

  Do not allow any passenger in the luggage space. They may get hurt during hard braking, a sudden acceleration, or a crash.
Opening and Closing the Tailgate

Using the Tailgate Release Button

When all the doors are unlocked or the tailgate unlock button on the remote transmitter is pressed, the tailgate is unlocked. Press the tailgate release button and lift open the tailgate.

**Models with keyless access system**
With the tailgate locked, you can still open the tailgate while carrying the keyless remote with you.

To close the tailgate, grab the inner handle, pull the tailgate down, and push it closed from outside.

If you close the tailgate when all the doors are locked, the tailgate locks automatically.

Some exterior lights flash three times.

Using the Tailgate Release Button

Do not leave the key, remote transmitter, or keyless remote in the luggage area before closing the tailgate.

**Models with keyless access system**
Even if you are not carrying the keyless remote, you can unlock the tailgate while someone else with the remote is within range.
Remote Transmitter

Press the tailgate unlock button to unlock the tailgate.

Remote Transmitter

If you have unlocked and opened the tailgate using the remote transmitter, or keyless remote, when closing, the tailgate locks automatically.
Security System

Immobilizer System

The immobilizer system prevents a key that has not been pre-registered from starting the engine. Each key contains electronic transmitters that use electronic signals to verify the key.

Pay attention to the following when inserting the key into the ignition switch or selecting the ACCESSORY mode with the ENGINE START/STOP button*:

- Do not allow objects that emit strong radio waves near the ignition switch.
- Make sure the key is not covered by or touching a metal object.
- Do not bring a key from another vehicle’s immobilizer system near the ignition switch or with the keyless remote.

Security System Alarm*

The security system alarm activates when the tailgate, bonnet, or doors are opened without the remote transmitter or keyless remote.

- When the security system alarm activates
  The horn sounds intermittently, and the turn signal lights flash.

- To deactivate the security system alarm
  Unlock the vehicle using the remote transmitter or keyless remote, or the ignition switch is turned ON [II]*1. The system, along with the horn and flashing lights, is deactivated.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

**NOTICE**

Leaving the ignition key in the vehicle can result in theft or accidental movement of the vehicle. Always take the ignition key with you whenever you leave the vehicle unattended.

If the system repeatedly does not recognize the coding of your key, contact your dealer. If you have lost your key and cannot start your engine, contact a dealer.

Do not alter the system or add other devices to it. Doing so may damage the system and make your vehicle inoperable.

* Not available on all models
■ Setting the security system alarm
The security system alarm automatically sets when the following conditions have been met:
• The ignition switch is in LOCK 0*1, and the key has been removed from the ignition switch.
• The bonnet is closed.
• All doors and the tailgate are locked with the key, remote transmitter, or keyless access system.

■ When the security system alarm sets
The security system alarm indicator in the instrument panel blinks. When the blinking interval changes after about 15 seconds, the security system is set.

■ To cancel the security system alarm
The security system is cancelled when the vehicle is unlocked using the remote transmitter or keyless access system, or the ignition switch is turned to ON 1*1. The security system alarm indicator goes off at the same time.

Unlock the vehicle using the remote transmitter or keyless remote, or the ignition switch is turned ON 1*1. The system, along with the horn and flashing lights, is deactivated.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Security System

Ultrasonic Sensors*

The ultrasonic sensors activate only when the security system alarm sets. The sensors detect if someone intrudes into the passenger compartment through a window or moves in the compartment, and activate the alarm.

■ To set the security system alarm without activating the ultrasonic sensors
You can set the security system alarm without activating the ultrasonic sensor.
To turn off the ultrasonic sensor system, press the ultrasonic sensor OFF button after you remove the key from the ignition switch, or with the key in the ACCESSORY [1] or LOCK [0]*1.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

Ultrasonic Sensor OFF Button

Ultrasonic Sensors*

Do not set the security system alarm while someone is in the vehicle, or if a window is open. The system may accidentally activate when the ultrasonic sensor detects vibrations or loud sounds.

Do not unlock the door using the key. The security system alarm goes off.
Super Locking*

The super locking function disables the lock tabs on all doors.

■ To activate the super locking function
  • Turn the key in the driver's door towards the vehicle front twice within five seconds.
  • Press the lock button on the remote transmitter twice within five seconds.

Models with keyless access system
  • Press the door lock button on the door handle or the tailgate twice within five seconds.

■ To cancel the super locking function
Unlock the driver's door with the remote transmitter or keyless access system.

WARNING
No one must be inside the vehicle with the super locking set. Persons locked in can get seriously sick or die from the heat built inside the vehicle if left in the sun.

Make sure there is no one inside the vehicle before setting the super locking function.

Models with security system
Do not unlock the door using the key. The security system alarm goes off.

* Not available on all models
Opening and Closing the Windows

Opening/Closing the Power Windows

The power windows can be opened and closed when the ignition switch is in ON [II]”, using the switches on the doors. The driver’s side switches can be used to open and close all the windows.

The power window lock button on the driver’s side must be switched off (not pushed in, indicator off) to open and close the windows from anywhere other than the driver’s seat.

When the power window lock button is pushed in, you can only operate the driver’s window. Turn the power window lock button on if a child is in the vehicle.

■ Opening/Closing Windows with Auto-Open/Close Function

Automatic operation

To open: Push the switch down firmly.
To close: Pull the switch up firmly.

The window opens or closes completely. To stop the window at any time, push or pull the switch briefly.

Manual operation

To open: Push the switch down lightly, and hold it until the desired position is reached.
To close: Pull the switch up lightly, and hold it until the desired position is reached.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

WARNING

Closing a power window on someone’s hands or fingers can cause serious injury.

Make sure your passengers are away from the windows before closing them.

WARNING: Always take the ignition key with you whenever you leave the vehicle alone (with other occupants).

The power windows can be operated for up to 10 minutes after you turn the ignition switch off*1.

Auto-open/close function on front windows
Opening either front door cancels this function.

Auto-open/close function on all windows
Closing the driver’s door cancels this function.

Auto Reverse

If a power window senses resistance when closing automatically, it stops closing and reverse direction.

The driver’s window auto reverse function is disabled when you continuously pull up the switch.

The auto reverse function stops sensing when the window is almost closed to ensure that it fully closes.
Opening and Closing the Windows

Opening/Closing the Power Windows

Controls

To open: Push the switch down.
To close: Pull the switch up.

Release the switch when the window reaches the desired position.

Opening/Closing Windows without Auto-Open/Close Function

Opening/Closing Windows with the Remote *

To open: Press the unlock button twice within 10 seconds and hold it down for the second time.
To close: Press the lock button twice within 10 seconds and hold it down for the second time.

If the windows stop midway, repeat the procedure.

* Not available on all models

Continued
Closing the Windows with the Key *

To close: Lock the driver’s door with the key. Within 10 seconds of returning the key to the central position, turn the key in the lock direction and hold it there.

Release the key to stop the windows at the desired position. If you want further adjustment, repeat the same operation.

* Not available on all models
Opening and Closing the Sunshade*

### Opening/Closing the Sunshade

You can operate the sunshade only when the ignition switch is in ON [II]*¹. Use the switch in the front of the ceiling to open and close the sunshade.

#### Automatic operation

**To open:** Push the switch forward firmly.
**To close:** Pull the switch back firmly.

The sunshade automatically opens or closes all the way. To stop the sunshade midway, touch the switch briefly.

#### Manual operation

**To open:** Push the switch forward lightly, and hold it until the desired position is reached.
**To close:** Pull the switch back lightly, and hold it until the desired position is reached.

*¹: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

---

### WARNING

Opening or closing the sunshade on someone's hands or fingers can cause serious injury.

Make sure all hands and fingers are clear of the sunshade before opening or closing it.

**WARNING:** Always take the ignition key with you whenever you leave the vehicle alone (with other occupants).

The power sunshade can be operated for up to 10 minutes after you turn the ignition switch to off*¹. Opening either front door cancels this function.

Auto-open/close function on all windows
Closing the driver's door cancels this function.

When resistance is detected, the auto reverse function causes the sunshade to change directions, then stop. Auto reverse stops sensing when the sunshade is almost closed to ensure that it fully closes.
Operating the Switches Around the Steering Wheel

Ignition Switch *

<table>
<thead>
<tr>
<th>LOCK: Insert and remove the key in this position.</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCESSORY: Operate the audio system and other accessories in this position.</td>
</tr>
<tr>
<td>ON: This is the position when driving.</td>
</tr>
<tr>
<td>START: This position is for starting the engine. The switch returns to ON when you let go of the key.</td>
</tr>
</tbody>
</table>

**WARNING**

Removing the key from the ignition switch while driving locks the steering. This can cause you to lose control of the vehicle.

Remove the key from the ignition switch only when parked.

*Continued*
Operating the Switches Around the Steering Wheel

ENGINE START/STOP Button

Power Mode Reminder

If you open the driver’s door when the power mode is set to ACCESSORY, a warning buzzer sounds.

Keyless Remote Reminder

Warning buzzers may sound from inside or/and outside the vehicle to remind you that the keyless remote is out of the vehicle. If the buzzer continues even after the remote is put back inside, place it to be within its operational range.

When the power mode is in ON
If the keyless remote is taken out of the vehicle, and the driver’s door is closed, warning buzzers sound from both inside and outside the vehicle. A warning message on the i-multi-information display notifies the driver inside that the remote is out.

When the power mode is in ACCESSORY or in VEHICLE OFF (LOCK)
If the keyless remote is taken out of the vehicle, and the driver’s door is closed, a warning buzzer sounds from outside the vehicle.

Keyless Remote Reminder

When the keyless remote is within the system’s operational range, and the driver’s door is closed, the warning function cancels.

If the keyless remote is taken out of the vehicle after the engine has been started, you can no longer change the ENGINE START/STOP button mode or restart the engine. Always make sure if the remote is in your vehicle when you operate the ENGINE START/STOP button.

Removing the keyless remote from the vehicle through a window does not activate the warning buzzer.

Do not put the keyless remote on the dashboard or in the glove box. It may cause the warning buzzer to go off. Under some other conditions that can prevent the vehicle from locating the remote, the warning buzzer may also go off even if the remote is within the system’s operational range.
## Ignition Switch and Power Mode Comparison

</tbody>
</table>
Operating the Switches Around the Steering Wheel

Turn Signals

The turn signals can be used when the ignition switch is in ON [II]*1.

- **One-push turn signal**
  When you lightly push up or down and release the turn signal lever, the exterior turn signals and turn signal indicator blink three times.

  This feature can be used when signaling for a lane change.

Light Switches

- **Manual Operation**

  Rotating the light switch turns the lights on and off, regardless of the position of the ignition switch*1.

  - **High beams**
    Push the lever forward until you hear a click.

  - **Low beams**
    When in high beams, pull the lever back to return to low beams.

  - **Flashing the high beams**
    Pull the lever back, and release it.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

Models with LED headlights

- **High Beams**
  Turns on position, tail, and rear licence plate lights

- **Low Beams**
  Turns on headlights, position, tail, and rear licence plate lights

If you sense that the level of the headlights is abnormal, have your vehicle inspected by a dealer.

Do not leave the lights on when the engine is off because it will cause the battery to discharge.

- **Lights On Indicator** P. 92

If you remove the key from the ignition switch while the lights are on, a chime sounds when the driver's door is opened.

When the lights are on, the lights on indicator in the instrument panel will be on.
Automatic Lighting Control*

Automatic lighting control can be used when the ignition switch is in ON [II]*1.

When you turn the light switch to AUTO, the headlights and other exterior lights will switch on and off automatically depending on the ambient brightness.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

We recommend that you turn on the lights manually when driving at night, in a dense fog, or in dark areas such as long tunnels or parking facilities.

The light sensor is in the location shown below. Do not cover this light sensor with anything; otherwise, the automatic lighting system may not work properly.

Models without lane departure warning

![Light Sensor](image1.jpg)

Models with lane departure warning

![Light Sensor](image2.jpg)
### Automatic Lighting Off Feature

The headlights, all other exterior lights, and the instrument panel lights turn off 15 seconds after you remove the key or set the power mode to VEHICLE OFF (LOCK), take the remote with you, and close the driver’s door. However, when the switch is in [AUTO] the parking lights remain on.

If you turn the ignition switch to LOCK [0] with the headlight switch on, but do not open the door, the lights turn off after 10 minutes (3 minutes, if the switch is in the [AUTO] position).

The lights turn on again when you unlock or open the driver’s door. If you unlock the door, but do not open it within 15 seconds, the lights go off. If you open the driver’s door, you will hear a lights on reminder chime.

---

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Fog Lights

■ Front fog lights*
Can be used when the position lights or the headlights are on.

■ Rear fog light
Can be used when the headlights or the front fog lights are on.

■ Front and Rear Fog Lights

■ To turn the front fog lights on
Rotate the switch up from the OFF position to the 0 position. The 0 indicator comes on.

■ To turn the front and rear fog lights on
Rotate the switch one position up from the 0 position. The 0 and 0 indicators come on.

■ To turn the rear fog light on
Rotate the switch down from the OFF position. The 0 indicator comes on.

* Not available on all models
Operating the Switches Around the Steering Wheel

Rear Fog Light

To turn the rear fog light on
Rotate the switch to ♦. The ♦ indicator comes on.
Headlight Adjuster*

You can adjust the vertical angle of the low beam headlights when the ignition switch is in ON \[\text{II}\]^1. The larger dial number indicates the lower angle.

To select the adjusting dial position
Refer to the below table for the appropriate dial position for your vehicle's riding and loading conditions.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Dial position</th>
</tr>
</thead>
<tbody>
<tr>
<td>A driver</td>
<td>0</td>
</tr>
<tr>
<td>A driver and a front passenger</td>
<td>0</td>
</tr>
<tr>

<td>1</td>
</tr>
<tr>
<td>Five persons in the front and rear seats and luggage in the luggage area, within the limit of maximum permissible axle weight and maximum permissible vehicle weight</td>
<td>2</td>
</tr>
<tr>
<td>A driver and luggage in the luggage area, within the limits of maximum permissible axle weight and maximum permissible vehicle weight</td>
<td>3</td>
</tr>
</tbody>
</table>

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

Headlight Adjuster *
Models with LED headlights
Your vehicle is equipped with the automatic headlight adjusting system that automatically adjusts the vertical angle of the low beam headlights. If you find a significant change in the vertical angle of the headlights, there may be a problem with the system. Have your vehicle checked by a dealer.

All models
The headlights are suitable for left hand drive and right hand drive, without the need to make any adjustments or masking, as per UN-ECE R48 Dover Regulation.
High Beam Support System*

Uses the camera attached, monitors the space ahead of your vehicle, and automatically changes the low beam headlights to high beam headlights when necessary.

The system operates when:

- The headlight switch is in AUTO.
- The lever is in the low beam position.
- The system recognises that you are driving at night and the low beam headlights come on.
- The vehicle speed is above 40 km/h (25 mph).

*1: Models without lane departure warning
*2: Models with lane departure warning

The system changes between high and low beam headlights when:

The camera is not detecting any lights coming from preceding or oncoming vehicles: The headlights change to high beams.

The camera detects lights coming from a preceding or oncoming vehicle: The headlights are returned to low beams.

The camera monitors the range within the 30~38-degree view angle. The distance that the camera can detect lights ahead differs depending on conditions, such as the brightness of the lights and the weather.

* Not available on all models
To Operate the System

Turn the headlight switch in AUTO and pull the headlight lever to low beam.

The high beam support system indicator comes on.

Temporary cancellation

The high beam support system operation is temporarily cancelled while:

- You are continuously driving at a speed below 24 km/h (15 mph).
- The vehicle speed is below 10 km/h (6 mph).
- The windscreen wipers run at high speed for more than a few seconds.

The system operation resumes once the condition that caused it to cancel improves.

To Operate the System

For the high beam support system to work properly:

- Do not place an object that reflects light on the dashboard.
- Keep the windscreen around the camera clean. When cleaning the windscreen, be careful not to apply the windscreen cleanser to the camera lens.
- Do not attach an object, sticker or film in the area around the camera.
- Do not touch the camera lens.

If the camera receives a strong impact, or repairing of the area near the camera is required, consult a dealer.

To help reduce the likelihood that high interior temperatures will cause the camera system to shut off, when parking, find a shady area or face the front of the vehicle away from the sun. If you use a reflective sun shade, do not allow it to cover the camera housing. Covering the camera can concentrate heat on the camera.

Models with lane departure warning

If the Can Not Operate: message appears:

- Use the climate control system to cool down the interior and, if necessary, the demister mode when windows are fogged.
- Start driving the vehicle to lower the windscreen temperature, which cools down the area around the camera.
To manually cancel the temporarily
You can cancel the operation when you manually change the headlights to high beams. Push the lever forward until you hear a click, or lightly pull the lever towards you to flash high beams. The high beam support system indicator goes off.

If you want the high beam support system operation to resume at once, pull and hold the lever towards you for a few seconds.

Daytime Running Lights
The daytime running lights come on when the following conditions have been met:
- The ignition switch is in ON (I)*1.
- The headlight switch is off.

To Operate the System
If the message appears:
- Park your vehicle in a safe place, and clean the windscreen. If the message does not disappear after you have cleaned the windscreen and driven for a while, have your vehicle checked by a dealer.

Models with lane departure warning
If the message appears:
- Park your vehicle in a safe place. Wipe away debris blocking the windscreen, then start driving again. If the message remains on even after driving for a while with the clean windscreen, have your vehicle checked by a dealer.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
Wipers and Washers

Windscreen Wipers/Washers

The windscreen wipers and washers can be used when the ignition switch is in ON $\text{II}^{1}$.

- **MIST**
  The wipers run at high speed until you release the lever.

- **Wiper switch (OFF, INT*, LO, HI)**
  Change the wiper switch setting according to the amount of rain.

- **AUTO**
  Automatic Intermittent Wipers $\star$ P. 184

- **Adjusting wiper operation**
  Turn the adjustment ring to adjust wiper operation.
  - Lower speed, fewer sweeps
  - Higher speed, more sweeps

- **Washer**
  Sprays while you pull the lever towards you. When you release the lever for more than one second, the spray stops, the wipers sweep two or three more times to clear the windscreen, then stop.

---

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

---

**NOTICE**
Do not use the wipers when the windscreen is dry. The windscreen will get scratched, or the rubber blades will get damaged.

**NOTICE**
In cold weather, the blades may freeze to the windscreen, becoming stuck. Operating the wipers in this condition may damage the wipers. Use the demister to warm the windscreen, then turn the wipers on.

If the vehicle speeds up while the wipers are operating intermittently, the length of the wipe interval shortens. When the vehicle starts moving, the wipers make a single sweep. When the vehicle speeds up, the wiper operation’s shortest delay setting (4) and the LO setting become the same.

Turn the washers off if no washer fluid comes out. The pump may get damaged.
Operating the Switches Around the Steering Wheel

Wipers and Washers

Controls

When you push the lever down to AUTO, the windscreen wipers sweep once, and go into the automatic mode.

The wipers operate intermittently, at low speed, or at high speed and stops in accordance with the amount of rainfall the rainfall sensor detects.

**AUTO sensitivity adjustment**

When in AUTO, you can also adjust the rainfall sensor sensitivity using the intermittent time adjustment ring.

**Sensor sensitivity**

- Low sensitivity: Lower speed, fewer sweeps
- High sensitivity: Higher speed, more sweeps

**Automatic Intermittent Wipers**

The rainfall sensor is in the location shown below.

- **Models without lane departure warning**

- **Models with lane departure warning**

Do not put the wiper lever in AUTO when cleaning the windscreen or driving through a car wash. If the wiper lever is in AUTO, and the ignition switch is in ON **1**, the rainfall sensor may respond to your hand or car wash liquids, and the wipers may operate automatically.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
The rear wiper and washer can be used when the ignition switch is in ON \[\text{II}^*1\].

**Wiper switch (OFF, INT, ON)**
The wiper operates intermittently after completing a few sweeps.

**Washer ( )**
Sprays while you rotate the switch to this position.
When you release the lever for more than one second, the spray stops, the wipers sweep two or three more times to clear the windscreen, then stop.

### Operating in reverse
When you shift the transmission to \[\text{R}\] with the windscreen wipers activated, the rear wiper operates automatically as follows even if its switch is off.

<table>
<thead>
<tr>
<th>Front Wiper Position</th>
<th>Rear Wiper Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>INT (Intermittent)</td>

*1: Models with the keyless access system have an \text{ENGINE START/STOP} button instead of an ignition switch.

If the wiper stops operating due to any obstacle such as the build-up of snow, park the vehicle in a safe place.
Rotate the wiper switch to OFF, and turn the ignition switch to ACCESSORY [\text{I}] or LOCK [\text{0}]*1, then remove the obstacle.

The wiper motor is equipped with a breaker that may stop motor operation temporarily to prevent an overload. Wiper operation resumes within a few minutes once the circuit has returned to normal.

*1: Models with the keyless access system have an \text{ENGINE START/STOP} button instead of an ignition switch.

* Not available on all models

* Not available on all models

**Rear Wiper/Washer**
![Rear Wiper/Washer Diagram]

1. INT: Intermittent

Continued
Wipers and Washers

Control

Turn the headlights on and press the headlight washers button to operate. The headlight washers also operate when you turn the windscreen washers for the first time after the ignition switch is turned to ON [II].

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

Headlight Washers*

The headlight washers use the same fluid reservoir as the windscreen washers.
Brightness Control

When the ignition switch is in ON \(\mathord{\text{II}}\)\(^1\), you can use the brightness control knob to adjust instrument panel brightness.

**Brighten:** Turn the knob to the right.

**Dim:** Turn the knob to the left.

The i-multi-information display will return to its original state several seconds after you adjust the brightness.

**Brightness level indicator**

The brightness level is shown on the i-multi-information display while you are adjusting it.

---

\(^1\): Models with the keyless access system have an \textbf{ENGINE START/STOP} button instead of an ignition switch.
Rear Demister/Heated Door Mirror* Button

Press the rear demister and heated door mirror button to defog the rear window and mirrors when the ignition switch is in ON \([\text{II}]^*\).

The rear demister and heated door mirrors automatically switch off after 10-30 minutes depending on the outside temperature. However, if the outside temperature is 0°C or below, they do not automatically switch off.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Adjusting the Steering Wheel

The steering wheel height and distance from your body can be adjusted so that you can comfortably grip the steering wheel in an appropriate driving posture.

1. Pull the steering wheel adjustment lever up.
   ► The steering wheel adjustment lever is under the steering column.
2. Move the steering wheel up or down, and in or out.
   ► Make sure you can see the instrument panel gauges and indicators.
3. Push the steering wheel adjustment lever down to lock the steering wheel in position.
   ► After adjusting the position, make sure you have securely locked the steering wheel in place by trying to move it up, down, in, and out.

**WARNING**

Adjusting the steering wheel position while driving may cause you to lose control of the vehicle and be seriously injured in a crash.

Adjust the steering wheel only when the vehicle is stopped.

Make any steering wheel adjustments before you start driving.
Adjusting the Mirrors

Interior Rearview Mirror
Adjust the angle of the rearview mirror when you are sitting in the correct driving position.

■ Rearview Mirror with Day and Night Positions *

Dimming the rearview mirror
Flip the tab to switch the position. The night position helps to reduce the glare from headlights behind you when driving after dark.

■ Automatic Dimming Rearview Mirror *

Reduces the glare from headlights behind you when driving after dark. Press the auto button to turn this function on and off. When activated, the auto indicator comes on.

* Not available on all models

Automatic Dimming Rearview Mirror *

The auto dimming function cancels when the shift position is in (R).
Power Door Mirrors*

You can adjust the door mirrors when the ignition switch is in ON [II]*1.

■ Mirror position adjustment
L/R selector switch: Select the left or right mirror. After adjusting the mirror, return the switch to the centre position.
Mirror position adjustment switch: Press the switch left, right, up, or down to move the mirror.

■ Folding door mirrors*
Press the folding button to fold in and out the door mirrors.

* Not available on all models

Continued
Adjusting the Mirrors

Power Door Mirrors

- **Folding in the door mirrors**
  Press the LOCK button on the remote transmitter or keyless remote twice within 10 seconds, and hold it.
  - You can release the button once the mirrors start folding in automatically.

  **Models with keyless access system**
  Press the door lock button on either front outside door handle or the tailgate twice within 10 seconds, and hold it.
  - You can release the button once the mirrors start folding in automatically.

- **Folding out the door mirrors**
  Unlock all doors and the tailgate using the remote transmitter. Open the driver’s door.
  - The mirrors start folding out automatically.

  **Models with keyless access system**
  Grab either front outside door handle or press the tailgate release button and unlock all doors and the tailgate. Open the driver’s door.
  - The mirrors start folding out automatically.

---

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Adjusting the Seats

Adjusting the Seat Positions

Adjust the driver's seat as far back as possible while allowing you to maintain full control of the vehicle. You should be able to sit upright, well back in the seat and be able to adequately press the pedals without leaning forward, and grip the steering wheel comfortably. The passenger's seat should be adjusted in a similar manner, so that it is as far back from the front airbag in the dashboard as possible.

**WARNING**

Sitting too close to a front airbag can result in serious injury or death if the front airbags inflate.

Always sit as far back from the front airbags as possible while maintaining control of the vehicle.

Allow at least 25 cm (10 inches) between the centre of the steering wheel and the chest.

Always make seat adjustments before driving.

Once a seat is adjusted correctly, rock it back and forth to make sure it is locked in position.
Adjusting the Seats

Adjusting the Seat Positions

Controls

■ Lumbar support adjustment switch*
- Press the top: To increase the higher part of the lumbar support.
- Press the bottom: To increase the lower part of the lumbar support. (the higher part support is decreased)
- Press the front: To increase the entire lumbar support.
- Press the rear: To decrease the entire lumbar support.

■ Side support adjustment switch*
- Driver's seat only: Adjusts the amount of the side support.

* Not available on all models
Adjusting the Seat-Backs

Adjust the driver's seat-back to a comfortable, upright position, leaving ample space between your chest and the airbag cover in the centre of the steering wheel.

The front seat passenger should also adjust their seat-back to a comfortable, upright position.

Reclining a seat-back so that the shoulder part of the belt no longer rests against the occupant's chest reduces the protective capability of the belt. It also increases the chance of sliding under the belt in a crash and being seriously injured. The farther a seat-back is reclined, the greater the risk of injury.

Adjusting the Seat-Backs

WARNING

Reclining the seat-back too far can result in serious injury or death in a crash.

Adjust the seat-back to an upright position, and sit well back in the seat.

Do not put a cushion, or other object, between the seat-back and your back.

Doing so may interfere with proper seat belt or airbag operation.

If you cannot get far enough away from the steering wheel and still reach the controls, we recommend that you investigate whether some type of adaptive equipment may help.
Adjusting the Head Restraints*

Your vehicle is equipped with head restraints in all seating positions.

Head restraints are most effective for protection against whiplash and other rear-impact crash injuries when the centre of the back of the occupant’s head rests against the centre of the restraint. The tops of the occupant’s ears should be level with the centre height of the restraint.

Adjusting the front head restraint positions

To raise the head restraint:
Pull it upward.

To lower the head restraint:
Push it down while pressing the release button.

WARNING

Improperly positioning head restraints reduces their effectiveness and increases the likelihood of serious injury in a crash.

Make sure head restraints are in place and positioned properly before driving.

In order for the head restraint system to work properly:

• Do not hang any items on the head restraints, or from the restraint legs.
• Do not place any objects between an occupant and the seat-back.
• Install each restraint in its proper location.

* Not available on all models
Adjusting the Seats

Changing the Rear Center* and Rear Outer Seat Head Restraint Positions

A passenger sitting in a back seating position should adjust the height of their head restraint to an appropriate position before the vehicle begins moving.

**To raise the head restraint:**
Pull it upward.

**To lower the head restraint:**
Push it down while pressing the release button.

Removing and Reinstalling the Head Restraints

Head restraints can be removed for cleaning or repair.

**To remove the head restraint:**
Pull the restraint up as far as it will go. Then push the release button, and pull the restraint up and out.

**To reinstall the head restraint:**
Insert the legs back in place, then adjust the head restraint to an appropriate height while pressing the release button. Pull up on the restraint to make sure it is locked in position.

---

* Not available on all models

---

Changing the Rear Center* and Rear Outer Seat Head Restraint Positions

When you use the head restraint in a rear seating position, pull up the head restraint to its highest position. Do not use it in any lower position.

---

**WARNING**

Failure to reinstall, or correctly reinstall, the head restraints can result in severe injury during a crash.

Always replace the head restraints before driving.

---

* Not available on all models
Maintain a Proper Sitting Position

After all occupants have adjusted their seats and head restraints, and put on their seat belts, it is very important that they continue to sit upright, well back in their seats, with their feet on the floor until the vehicle is safely parked and the engine is off.

Sitting improperly can increase the chance of injury during a crash. For example, if an occupant slouches, lies down, turns sideways, sits forward, leans forward or sideways, or puts one or both feet up, the chance of injury during a crash is greatly increased.

In addition, an occupant who is out of position in the front seat can be seriously or fatally injured in a crash by striking interior parts of the vehicle or being struck by an inflating front airbag.

WARNING

Sitting improperly or out of position can result in serious injury or death in a crash.

Always sit upright, well back in the seat, with your feet on the floor.
Rear Seats

Folding Down the Rear Seats

1. Store the armrest* in the seat-back.
2. Put the outer shoulder belt in the clip on each side.
3. Lower the head restraints to their lowest positions.
4. Pull the release lever and fold down the seat-back.

Folding Down the Rear Seats

**WARNING**

Make sure the seat-backs are latched securely before driving.

The rear seat-backs can be folded down to accommodate bulkier items in the luggage area.

Never drive with the seat-back folded down and the tailgate open.

Exhaust Gas Hazard P. 79

To lock a seat-back upright, push it backwards until it locks, so that the red tabs in the release lever go down.

When returning the seat-back to its original position, push it firmly back. Also, make sure all rear shoulder belts are positioned in front of the seat-back.

Make sure all items in the luggage area or items extending through the opening into the rear seats are properly secured. Loose items can fly forward if you have to brake hard.

* Not available on all models
Adjusting the Seats

Rear Seats

Separately lift up the left and right rear seat cushions to make room for luggage.

1. Store the armrest * in the seat-back.
2. Put the outer shoulder belt in the clip on each side.

Folding Down the Rear Seats P. 199
3. Lower each head restraint to its lowest position.
4. Pull up the rear seat cushion.
5. Fold the seat leg down.
6. Push the seat cushion firmly against the seat-back to lock it.

Putting the seat in the original position
1. Hold the seat cushion in the upright position, and pull up the seat leg fully.
   ►The seat cushion can abruptly fall down once you pull up the seat leg.
2. Slowly put down the seat cushion and set the seat leg in the floor guide.
   ►A latch comes out when the leg is set properly.

Folding Up the Rear Seat*

After you fold the seat up, or put it back in the original position, make sure the seat is firmly secured by rocking it forward and back.

Check if there are any items on the seat before you pull the seat cushion up. Check if there are any obstacles around the floor guide before you put the seat back in the original position.

* Not available on all models
Armrest

Using the Front Seat Armrest

The console lid can be used as an armrest.

Using the Rear Seat Armrest*

Pull down the armrest in the centre seat-back.

* Not available on all models
Interior Lights/Interior Convenience Items

Interior Lights

**Interior Light Switches**

**■ ON**
The interior lights come on regardless of whether the doors are open or closed.

**■ Door activated**
The interior lights come on in the following situations:
- When any of the doors are opened.
- You unlock the driver’s door.
- You remove the key from the ignition switch.
- When you turn the **ENGINE START/STOP** button to OFF.

**■ OFF**
The interior lights remain off regardless of whether the doors are open or closed.

*Interior Light Switches*

In the door activated position, the interior lights fade out and go off about 30 seconds after the doors are closed.

The lights go off after 30 seconds in the following situations:
- When you unlock the driver’s door but do not open it.
- When you remove the key from the ignition switch but do not open a door.

The interior lights go off immediately in the following situations:
- When you lock the driver’s door.
- When you close the driver’s door with the key in the ignition switch.
- When you turn the ignition switch to ON [ii] *1.

If you leave any of the doors open without the key in the ignition switch, the interior lights go off after about 15 minutes.

If you leave tailgate open without the key in the ignition switch, the luggage area light goes off after about 30 minutes.

*1: Models with the keyless access system have an **ENGINE START/STOP** button instead of an ignition switch.

* Not available on all models
Map Lights*

The map lights can be turned on and off by pressing the lenses.

* Not available on all models

**Map Lights**

Models with front interior light switch

When the front interior light switch is in the door activated position and any door is open, pressing the lens does not turn off the map light.
Interior Convenience Items

### Glove Box
Pull the handle to open the glove box.

![Glove Box Image]

**WARNING**
An open glove box can cause serious injury to your passenger in a crash, even if the passenger is wearing the seat belt.

Always keep the glove box closed while driving.

You can use the band to hold the owner's manual.

### Console Compartment
Pull the handle to open the console compartment.

![Console Compartment Image]
**Beverage Holders**

- **Front seat beverage holders with lid**
  To open the beverage holder, slide the lid rearward.

- **Models with partition**
  You can remove the partition to get more space.
  1. Push the flaps down to fold them until they latch.
  2. Pushing the top of the partition unlatches the flaps.

---

**NOTICE**
Spilled liquids can damage the upholstery, carpeting, and electrical components in the interior.

Be careful when you are using the beverage holders. Hot liquid can scald you.
2. Pull the partition to remove it. Store the partition as shown.

- Front door beverage holders
■ Rear seat beverage holders*
Fold the armrest down to use the rear seat beverage holders.

■ Rear door beverage holders

* Not available on all models
**Interior Lights/Interior Convenience Items**

**Interior Convenience Items**

208 Controls

The accessory power sockets can be used when the ignition switch is in ACCESSORY 1 or ON 2*1.

- **Accessory power socket on the console panel**
  Open the cover to use it.

- **Accessory power socket in the console compartment**
  Open the console lid and the cover to use it.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

---

**NOTICE**

Do not insert an automotive type cigarette lighter element. This can overheat the power socket.

The accessory power sockets are designed to supply power for 12 volt DC accessories that are rated 180 watts or less (15 amps).

When each socket is being used simultaneously, the combined power rating of the accessories should not exceed 180 watts (15 amps).

To prevent battery drain, only use the power socket with the engine running.
Interior Lights/Interior Convenience Items

Controls

■ Accessory power socket in the luggage area *
Open the cover to use it.

■ Coat Hooks
There are coat hooks on the left and right door pillars.

* Not available on all models

Coat Hooks
The coat hooks are not designed for large or heavy items.
### Interior Lights/Interior Convenience Items

#### Luggage Hooks

The luggage hooks in the luggage area can be used to install a net for securing items.

#### Side Storage Compartment *

Turn and pull the tab to open the compartment cover located on the side of the luggage area.

* Not available on all models
Under-Floor Storage Area*

You can either open or lower the luggage area floor lid to use the under-floor storage area.

**Storing items with the lid open**

1. Open the tailgate.
2. Pull the strap and open the lid.
3. Hook the strap to the anchor as shown.

**Storing items on the lid at the bottom**

This is convenient when storing a tall item.

1. Pull the strap and open the lid.
2. Pull the lid towards you until it disengages from the support rods.

* Not available on all models
3. Push the far end of the lid down to the bottom of the under-floor storage area, then lower the other end.
■ Luggage Area Cover*

■ Removing the luggage area cover
1. Open the tailgate
2. Remove the hooks.
3. Pull the cover towards you until it disengages from the support rods, and lift it up to remove.

* Not available on all models

Do not put any objects on the luggage area cover. It may interfere with the driver’s rear view, and the items on the cover can fly around during a hard braking.
### Seat Heaters

The ignition switch must be in ON (1) to use the seat heaters. The HI setting heats the seats faster than the LO setting.

The indicator for your setting comes on while the seat heater is in use. Briefly press the button on the opposite side to turn the heater off. The indicator goes off. While in HI, the heater cycles on and off. When a comfortable temperature is reached, select LO to keep the seat warm.

---

**WARNING**

Heat induced burns are possible when using seat heaters.

Persons with a diminished ability to sense temperature (e.g., persons with diabetes, lower-limb nerve damage, or paralysis) or with sensitive skin should not use seat heaters.

Do not use the seat heaters even in LO when the engine is off. Under such conditions, the battery may be weakened, making the engine difficult to start.

In the LO setting, the heater runs continuously and does not automatically turn off.

---

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
Climate Control System*

Models with synchronized mode

Using Automatic Climate Control

The automatic climate control system maintains the interior temperature you select. The system also selects the proper mix of heated or cooled air that raises or lowers the interior temperature to your preference as quickly as possible.

Use the system when the engine is running.

1. Press the **AUTO** button.
2. Adjust the interior temperature using the driver’s side or passenger’s side temperature control bar.
3. Press the **ON/OFF** button to cancel.

* Not available on all models

---

Using Automatic Climate Control

If any button is pressed while in **AUTO**, the function of that button takes priority. The **AUTO** indicator goes off, but functions of other buttons pressed are still in auto mode.

To prevent cold air from blowing in from outside, the fan may not start immediately when the **AUTO** button is pressed.

Models with Auto Idle Stop

During Auto Idle Stop, the air conditioning system will be turned off.

Once you have set the desired temperature, do not use the temperature control switches more than necessary. Doing so may delay the time it takes to reach the set temperature.

If the interior is very warm, you can cool it down more rapidly by partially opening the windows, turning the system on **AUTO**. Change the fresh air mode to recirculation mode until the temperature cools down.

When you set the temperature to the lower or upper limit, **Lo** or **Hi** is displayed.
**Switching between the recirculation and fresh air modes**
Press the button and switch the mode depending on environmental conditions.
Recirculation mode (indicator on): Recirculates air from the vehicle's interior through the system.
Fresh air mode (indicator off): Maintains outside ventilation. Keep the system in fresh air mode in normal situations.

**Defrosting the Windscreen and Windows**
Pressing the button turns the air conditioning system on and automatically switches the system to fresh air mode.
Pressing the button again to turn the air conditioning system off. The climate control system returns to the previous settings.

**To rapidly defrost or defog the windows**
1. Press the button.
2. Press the button.

**Using Automatic Climate Control**
Pressing the button switches the climate control system between on and off. When turned on, the system returns to your last selection.

**Models with ECON system**
While in ECON mode, the system has greater temperature fluctuations.

For your safety, make sure you have a clear view through all the windows before driving.

Do not set the temperature near the upper or lower limit.
When cold air hits the windscreen, the outside of the windscreen may fog up.
If the side windows fog up, adjust the vents so that the air hits the side windows.

After defrosting the windows, switch over to fresh air mode. If you keep the system in recirculation mode, the windows may fog up from humidity. This impedes visibility.
**Synchronized Mode**

You can set the temperature synchronously for the driver side and the passenger side in synchronized mode.

1. Press the **SYNC** button.
   - The system switches to synchronized mode.
2. Adjust the temperature using driver's side temperature control bar.

Press the **SYNC** button or change the passenger side temperature setting to return to dual mode.
Climate Control System

**Using Automatic Climate Control**

The automatic climate control system maintains the interior temperature you select.

**Models with synchronized mode**

Using Automatic Climate Control

The automatic climate control system maintains the interior temperature you select. The system also selects the proper mix of heated or cooled air that raises or lowers the interior temperature to your preference as quickly as possible.

**Models without synchronized mode**

The system also selects the proper mix of heated or outside air that raises or lowers the interior temperature to your preference.

Use the system when the engine is running.

1. Press the AUTO button.
2. Adjust the interior temperature using the temperature control bar.
3. Press the button to cancel.

*1: Left-hand drive models shown. For the right-hand drive models, these buttons are located at the symmetrically opposite to the left-hand drive model.

* Not available on all models
Switching between the recirculation and fresh air modes
Press the (Recirculation) button or (Fresh air) button switch the mode depending on environmental conditions.
Recirculation mode: Recirculates air from the vehicle’s interior through the system.
Fresh air mode: Maintains outside ventilation. Keep the system in fresh air mode in normal situations.

Defrosting the Windscreen and Windows
Models with air conditioning system
Pressing the button turns the air conditioning system on and automatically switches the system to fresh air mode. Pressing the button again to turn the air conditioning system off. The climate control system returns to the previous settings.

Models without air conditioning system
Pressing the button automatically switches the system to fresh air mode. Pressing the button again to turn the system off. The climate control system returns to the previous settings.

Using Automatic Climate Control
Models with air conditioning system
If the interior is very warm, you can cool it down more rapidly by partially opening the windows, turning the system on AUTO. Change the fresh air mode to recirculation mode until the temperature cools down.

Defrosting the Windscreen and Windows
For your safety, make sure you have a clear view through all the windows before driving.
Models with air conditioning system
Do not set the temperature near the upper or lower limit. When cold air hits the windscreen, the outside of the windscreen may fog up.
If the side windows fog up, adjust the vents so that the air hits the side windows.
Models without air conditioning system
Your vehicle does not have an air compressor. This may cause inside the windows to fog up.
To rapidly defrost or defog the windows
1. Press the button.
2. Press the button.

Automatic Climate Control Sensors
The automatic climate control system is equipped with sensors. Do not cover or spill any liquid on them.

To rapidly defrost or defog the windows
After defrosting the windows, switch over to fresh air mode. If you keep the system in recirculation mode, the windows may fog up from humidity. This impedes visibility.

Audio System*

About Your Audio System

Models with navigation system
See the Navigation System Manual for operation on the navigation system.

Models without navigation system
The audio system features AM/FM radio. It can also play audio CDs*, WMA*/MP3*/AAC* files, USB flash drives, and iPod, iPhone, and Bluetooth® devices.

You can operate the audio system from the buttons and switches on the panel, or the remote controls on the steering wheel, or on the touch screen interface*.

Video CDs, DVDs, and 8-cm (3-inch) mini CDs are not supported.

iPod, iPhone and iTunes are trademarks of Apple Inc.

Key Off Operation
You can use the audio system for 30 minutes when the ignition switch is in LOCK (0)*1 position, the system will then turn off automatically. However, whether you can continue using the audio system depends on the battery condition. Repeatedly using this feature may drain the battery.

Place your phone where you can get good reception.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
USB Port(s)

1. Open the cover.
2. Install the iPod dock connector or the USB flash drive to the USB port.

- Do not leave the iPod or USB flash drive in the vehicle. Direct sunlight and high temperatures may damage it.
- We recommend using an extension cable with the USB port.
- Do not connect the iPod or USB flash drive using a hub.
- Do not use a device such as a card reader or hard disk drive, as the device or your files may be damaged.
- We recommend keeping your data backed up before using the device in your vehicle.
- Displayed messages may vary depending on the device model and software version.

If the audio system does not recognise the iPod, try reconnecting it a few times or reboot the device. To reboot, follow the manufacturer’s instructions provided with the iPod or visit www.apple.com/ipod.
HDMI™ Port*

1. Open the cover.
2. Install the HDMI™ cable to the HDMI™ port.

Auxiliary Input Jack*

Use the jack to connect a standard audio device.

1. Open the cover.
2. Connect a standard audio device to the input jack using a 3.5 mm (1/8 inch) stereo miniplug.
   ► The audio system automatically switches to the AUX mode.

- Do not leave the HDMI™ connected device in the vehicle. Direct sunlight and high temperatures may damage it.
- We recommend keeping your data backed up before using the device in your vehicle.
- Displayed messages may vary depending on the device model and software version.

The terms HDMI and HDMI High-Definition Multimedia Interface, and the HDMI Logo are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries.

* Not available on all models
Audio System Theft Protection

The audio system is disabled when it is disconnected from the power source, such as when the battery is disconnected or goes dead. In certain conditions, the system may display ENTER CODE\(^1\)/Enter Code\(^2\). If this occurs, reactivate the audio system.

Reactivating the audio system

1. Turn the ignition switch to ON \(^3\).
2. Turn on the audio system.
3. Press and hold the audio system power button for more than two seconds.

The audio system is reactivated when the audio control unit establishes a connection with the vehicle control unit. If the control unit fails to recognise the audio unit, you must go to a dealer and have the audio unit checked.

---

\(^1\): Models with one display
\(^2\): Models with two displays
\(^3\): Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

---

Audio System Theft Protection

Models with one display

Find the audio system’s security code and serial number label in your owner’s manual kit.

We recommend that you write down the serial number in this owner’s manual.

Do not store the label in your vehicle. If you lose the label, you must first retrieve the serial number, and then obtain the code.

You can find out about your serial number and security code from a dealer.
Audio Antenna*

Your vehicle is equipped with a removable antenna at the rear of the roof.

**NOTICE**

Before using a “drive-through” car wash, remove the antenna by unscrewing it by hand. This prevents the antenna from being damaged by the car wash brushes.

* Not available on all models

### Radio Data System (RDS)
Provides convenient automated services related to your selected RDS-capable FM station.

### Playing AM/FM Radio

The ST indicator appears on the display indicating stereo FM broadcasts. Stereo reproduction in AM is not available.

To switch the audio mode, press the SOURCE button on the steering wheel.

Audio Remote Controls P. 227

You can store 12 AM stations and 12 FM stations into the preset button memory. AM has two types of frequencies LW and MW, and each lets you store six stations. FM1 and FM2 let you store six stations each.

### Radio Data System (RDS)

When you select an RDS capable FM station, the RDS automatically turns on, and the frequency display changes to the station name. However, when the signals of that station become weak, the display changes from the station name to the frequency.
Audio System Basic Operation
Playing AM/FM Radio

To find an RDS station from Station List
1. Press 🎧 while listening to an FM station.
2. Rotate 🌴 to select the station, then press 🎧.

Manual Update
Updates your available station list at any time.
1. Press 🎧 while listening to an FM station.
2. Rotate 🌴 to select Update list, then press 🎧.

Available RDS functions
Alternative Frequency (AF):
Automatically changes the frequency of the same programme as you enter different regions.
Regional Programme (REG):
Keeps the same frequency of the stations within that region even if the signal gets weak.
News Programme (NEWS):
Automatically tunes to the news programme.

Radio Data System (RDS)
While listening to an FM station on Station list, pressing [◄] /[►] (Seek/Skip) button changes the station.
If the system cannot find any station on Station list, a confirmation message for updating the list appears. Rotate 🌴 to select Yes, then press 🎧 to update the list.
■ Selecting the RDS functions

1. Press the **SETUP** button with the FM selected.
2. Rotate 🔄 to select **RDS settings** and press 🔄.
3. Each RDS function is displayed every time you rotate 🔄.
4. Press 🔄 to select a function.

---

**Radio Data System (RDS)**

Turning the Alternative Frequency (AF) function on and off turns the RDS on and off.

Pressing 🔄 switches the function between on and off.
■ Traffic announcement (TA) button
TA standby function allows the system to stand by for traffic announcements in any mode. The last tuned station must be an RDS-capable traffic programme station.

To turn the function on: Press the TA button. When a traffic announcement begins on your last tuned station, the system automatically switches to the FM mode. TA-INFO appears on the display. The system returns to your last selected mode after the traffic announcement is finished.

If you want to go back to your last selected mode during the traffic announcement, press the TA button again.

To cancel the function: Press the TA button.
**Programme type (PTY)/News interrupt function**
Allows the system to interrupt with a newscast in any mode. The last tuned station must be the NEWS PTY coded station.

**To activate the function:** Select NEWS from RDS settings and display the NEWS PTY before changing to other modes. When a newscast begins on your last tuned station, the system automatically switches to the FM mode.

[*Selecting the RDS functions* P. 235]

The system returns to your last selected mode if changed to another programme, or signal gets weak.

**PTY alarm**
The PTY code, ALARM is used for emergency announcements, such as natural disasters. When this code is received, ALARM appears on the display and the system interrupts your audio operation.

## Wallpaper Setup

You can change, store, and delete the wallpaper on the audio/information screen.

### Import wallpaper

You can import up to five images, one at a time, for wallpaper from a USB flash drive.

1. Connect the USB flash drive to the USB port.
2. Select **Settings**.
3. Select **Info**.
4. Select **Clock/Wallpaper Type**, then open the **Wallpaper** tab.
5. Select **Add New**.
   - The picture name is displayed on the list.
6. Select a desired picture.
   - The preview is displayed on the left side on the screen.
7. Select **Start Import** to save the data.
   - The display will return to the wallpaper list.

---

### Wallpaper Setup

The wallpaper you set up on **Clock Wallpaper/Type** cannot be displayed on the i-multi information display.

- When importing wallpaper files, the image must be in the USB flash drive’s root directory. Images in a folder cannot be imported.
- The file name must be fewer than 64 characters.
- The file format of the image that can be imported is BMP (bmp) or JPEG (jpg).
- The individual file size limit is 5 MB.
- The maximum image size is 4,096 × 4,096 pixels. If the image size is less than 800 × 480 pixels, the image is displayed in the middle of the screen with the extra area appearing in black.
- If the USB flash drive does not have any pictures, the **No files detected** message appears.
■ Select wallpaper
1. Select Settings.
2. Select Info.
3. Select Clock/Wallpaper Type, then open the Wallpaper tab.
   - The screen changes to the wallpaper list.
4. Select a desired wallpaper.
   - The preview is displayed on the left side on the screen.
   - The pop-up menu appears on the screen.
5. Select Set.
   - The display will return to the wallpaper list.

■ Delete wallpaper
1. Select Settings.
2. Select Info.

   - The screen changes to the wallpaper list.
4. Select a wallpaper that you want to delete.
   - The preview is displayed on the left side on the screen.
   - The pop-up menu appears on the screen.
5. Select Delete.
   - A confirmation message appears on the screen.
6. Select Yes to delete completely.
   - The display will return to the wallpaper list.

Wallpaper Setup
From the pop-up menu, select Preview to see a preview at full-size screen.

To go back to the previous screen, select OK, or press the (Back) button.

When the file size is large, it takes a while to be previewed.

To delete all wallpapers you add, select Delete All, then Yes.
Home Screen

To change to a next screen

Selecting ▶ or ◀, or swiping the screen left or right changes to the next screen.

The home screen has 5 pages (fixed). You cannot add any more pages.
To use apps or widgets

1. Select the App/Widget List screen appears.
2. Select the app or widget you want to use.

Preinstall app list:
- Aha Radio: Starts up Aha Radio app.
- Browser: Displays the web browser utilized by smartphone and Wi-Fi connection.
- Calculator: Displays Calculator.
- Calendar: Displays Calendar.
- Clock: Displays Clock.
- Downloads: Displays the data downloaded from the web browser and so on.
- Gallery: Displays the image list stored in the audio system.
- Garmin Navigator: Starts up navigation app.
- Honda App Center: Displays Honda App Center.
- Install App: Installs and updates app stored in the USB flash drive. However, you can install and update app only through Honda App Center.
- Music: Displays the music list stored in the audio system.
- Search: Displays various retrieval screens.
- Settings: Displays the Android setting screen.

Select and hold a selected app or widget to add that app’s or widget’s shortcut on the home screen.

If preinstall apps do not startup normally, try Factory Data Reset. In case those apps still do not startup normally even after Factory Data Reset, contact your dealer.

If you perform Factory Data Reset, it may reset all the settings to their factory default.
To add app or widget icons on the home screen

App or widget icons can be added on the home screen.

1. Select and hold empty space on the home screen.
   - The pop-up menu appears on the screen.
2. Select Add App or Add Widget.
   - The Add App/Widget screen appears.
3. Select and hold an app or widget icon you want to add.
   - The screen switches to the **Home customize** screen.

4. Drag and drop the icon to where you want it to be.

5. Select **OK**.
   - The screen will return to the home screen.
■ To move icons on the home screen
You can change location on the home screen.

1. Select and hold an icon.
   ▶ The screen switches to the Home customize screen.

3. Select an app for selecting wallpapers.
4. Select the wallpaper you want to change.
5. Select Set wallpaper.
   ▶ The wallpaper is changed, then the screen will return to the home screen.
■ Status Area

Swipe the upper area of the screen.

The status area appears.

Select an item to see the details.

Select 
 or swipe up the 
 icon to close the area.
Changing the Screen Interface

You can change the screen interface design.

1. Press the \[\text{FUNCTION}\] button.
2. Select \textbf{Settings}.
3. Select \textbf{System}.
4. Select the \textbf{Others} tab.
5. Select \textbf{Skin Change}.
6. A confirmation message appears on the screen. Select \textbf{Yes}.

■ Changing the Screen Interface

You need to reboot the system after changing the interface design. Wait a few moments while the system is starting up.

You can change the wallpaper on the audio/information screen.

- \textbf{Wallpaper Setup} P. 262

If you change the screen interface, some of the setting items will change.

- \textbf{Customized Features} P. 313
Closing Apps

You can close apps running in the background on the system.

1. Press and hold the button.
2. Select the Active tab.

If you select the Active/History tab, you can close the apps that are currently running and delete the app activity history simultaneously.
3. Select an app you want to close.
4. Select Clear.

The display will return to the app list.

Closing Apps

If you leave the apps used open in the background, some apps may stop operating properly next time using them. If this happens close unused apps.

To close all apps on the system, select Clear All, then Yes.
Audio System Basic Operation

Adjusting the Sound

1. Press the button.
2. Select Settings.
3. Select Audio.
4. Select Sound.

Select a tab from the following choices: BASS, TREBLE, FADER, BALANCE, Speed Volume Compensation (SVC)

Adjusting the Sound

The SVC has four modes: Off, Low, Mid, and High. SVC adjusts the volume level based on the vehicle speed. As you go faster, audio volume increases. As you slow down, audio volume decreases.
Display Setup

You can change the brightness or colour theme of the audio/information screen.

### Changing the Screen Brightness

1. Press the button.
2. Select Settings.
3. Select System.
4. Select the Display tab.
5. Select Display Settings.
6. Select the setting you want.
7. Select OK.

### Changing the Screen’s Colour Theme

1. Press the button.
2. Select Settings.
3. Select System.
4. Select the Display tab.
5. Select Background Colour.
6. Select the setting you want and select it again.
   - A confirmation message appears on the screen. Select Yes to reboot the system.
Selecting an Audio Source

Select the current source icon, then select an icon on the source list to switch the audio source.

Limitations for Manual Operation

Certain manual functions are disabled or inoperable while the vehicle is in motion. You cannot select a grayed-out option until the vehicle is stopped.

Selecting an Audio Source

If you startup preinstalled audio apps, is displayed on the upper left of the screen. These preinstalled apps cannot be displayed on the source select screen. You can startup those audio apps from App/Widget List.
Playing AM/FM Radio

*1: Some or all of the lists may not be displayed.
Audio System Basic Operation

Playing AM/FM Radio

Preset Memory

To store a station:
1. Tune to the selected station.
2. Press the button.
3. Select Save Preset.
4. Select the preset number for the station you want to store.

Station List

Lists the strongest stations on the selected band.
1. Press the button.
2. Select Station List.
3. Select the station.

Manual update

Updates your available station list at any time.
1. Press the button.
2. Select Station List.
3. Select Update List.

Preset Memory

The ST indicator appears on the display indicating stereo FM broadcasts. Stereo reproduction in AM is not available.

Switching the Audio Mode

Press the SOURCE button on the steering wheel or select SOURCE on the screen.

Audio Remote Controls P. 227

You can also switch the mode by selecting Change Source on the Audio menu screen.

You can store 6 AM stations and 12 FM stations into preset memory.
Audio System Basic Operation

Playing AM/FM Radio

**Features**

**Scan**
Samples each of the strongest stations on the selected band for 10 seconds.

1. Press the \[\text{Scan}\\] button.
2. Select \text{Scan}.
   
   To turn off scan, select \text{Cancel Scan}.

**Radio Data System (RDS)**
Provides text data information related to your selected RDS-capable FM station.

**To find an RDS station from Station List**

1. Press the \[\text{List}\\] button while listening to an FM station.
2. Select \text{Station List}.
3. Select the station.

**Manual update**
Updates your available station list at any time.

1. Press the \[\text{List}\\] button while listening to an FM station.
2. Select \text{Station List}.
3. Select \text{Update List}.

**Radio Data System (RDS)**
When you select an RDS-capable FM station, the RDS automatically turns on, and the frequency display changes to the station name. However, when the signals of that station become weak, the display changes from the station name to the frequency.

* Not available on all models
Radio text
Displays the radio text information of the selected DAB station.
1. Press the [ ] button.
2. Select Radio Text.
Playing a CD

Your audio system supports audio CDs, CD-Rs, and CD-RWs in either MP3 or WMA, or AAC*1 format. With the CD loaded, select the CD mode.

*1: Only AAC format files recorded with iTunes are playable on this unit.

*2: Some or all of the lists may not be displayed.
How to Select a File from the Music Search List (MP3/WMA/AAC)

1. Press the button and select Music Search.

2. Select a folder.

3. Select a track.

Playing a CD

NOTICE
Do not use CDs with adhesive labels. The label can cause the CD to jam in the unit.

WMA files protected by digital rights management (DRM) cannot be played. The audio system displays Unplayable File, then skips to the next file.

Text data appears on the display under the following circumstances:
• When you select a new folder, file, or track.
• When you change the audio mode to CD.
• When you insert a CD.

If you eject the CD but do not remove it from the slot, the system reloads the CD automatically after several seconds.
How to Select a Play Mode

You can select scan, repeat, and random modes when playing a track or file.

1. Press the \( \text{ PLAY MODE} \) button.
2. Select Scan or Random/Repeat.
3. Select a mode.

To turn off a play mode

1. Press the \( \text{ PLAY MODE} \) button.
2. Select the mode you want to turn off.
Playing an iPod

Connect the iPod using your dock connector to the USB port, then select the iPod mode.

USB Port(s) P. 223

(Volume) Buttons
Press to adjust the volume.

(Menu) Button
Press to display the menu items.

(Back) Button
Press to go back to the previous display.

Cover Art

*1: Some or all of the lists may not be displayed.
Audio System Basic Operation

How to Select a Song from the Music Search List

1. Press the button and select **Music Search**.

2. Select the items on that menu.

Playing an iPod

Available operating functions vary on models or versions. Some functions may not be available on the vehicle’s audio system.

If there is a problem, you may see an error message on the audio/information screen.

**iPod/USB Flash Drive** P. 305

If you operate the music app on your iPhone/iPod while the phone is connected to the audio system, you may no longer be able to operate the same app on the audio/information screen. Reconnect the device if necessary.

Select **USB device change** in the Audio menu screen to switch to another USB device.
How to Select a Play Mode

You can select repeat and shuffle modes when playing a file.

1. Press the [ ] button.
2. Select Shuffle/Repeat.
3. Select a mode.

To turn off a play mode

1. Press the [ ] button.
2. Select the mode you want to turn off.

Features

How to Select a Play Mode

Play Mode Menu Items

- **Shuffle Albums**: Plays all available albums in a selected list (playlists, artists, albums, songs, podcasts, genres, composers, or audiobooks) in random order.

- **Shuffle All Songs**: Plays all available files in a selected list (playlists, artists, albums, songs, podcasts, genres, composers, or audiobooks) in random order.

- **Repeat Song**: Repeats the current track.
Audio System Basic Operation

Playing a USB Flash Drive

Your audio system reads and plays sound and video files on a USB flash drive in either MP3, WMA, AAC*1, or WAV format.

Connect your USB flash drive to the USB port, then select the USB mode.

* USB Port(s) P. 223

---

*1: Only AAC format files recorded with iTunes are playable on this unit.

*2: Some or all of the lists may not be displayed.
How to Select a File from the Music Search List

1. Press the button and select Music Search.
2. Select Music or Movie.
3. Select a folder.
4. Select a track.

Playing a USB Flash Drive

Use the recommended USB flash drives.

General Information on the Audio System

P. 308

WMA files protected by digital rights management (DRM) cannot be played. The audio system displays Unplayable File, then skips to the next file.

If there is a problem, you may see an error message on the audio/information screen.

iPod/USB Flash Drive P. 305

Select USB device change in the Audio menu screen to switch to another USB device.
Audio System Basic Operation

Playing a USB Flash Drive

You can select scan, repeat, and random modes when playing a file.

1. Press the \[ \] button.
2. Select Scan or Random/Repeat.
3. Select a mode.

To turn off a play mode

1. Press the \[ \] button.
2. Select the mode you want to turn off.

How to Select a Play Mode

Scan
Scan Folder: Provides 10-second sampling of the first file in each of the main folders.
Scan Track (Scan Movies*1): Provides 10-second sampling of all files in the current folder.

Random/Repeat
Repeat Folder: Repeats all files in the current folder.
Repeat Tracks (Repeat Movies*1): Repeats the current file.
Random in Folder: Plays all files in the current folder in random order.
Random All Tracks (Random All Movies*1): Plays all files in random order.

When playing a video file:
Play/Pause: Select to resume or play a file.
Stop: Select to stop a file.

*1: When playing a video file
Playing Bluetooth® Audio

Your audio system allows you to listen to music from your Bluetooth-compatible phone. This function is available when the phone is paired and connected to the vehicle's Hands-Free Telephone (HFT) System.

Phone Setup P. 359

*1:Depending on the Bluetooth® device you connect, some or all of the lists may not be displayed.

Not all Bluetooth-enabled phones with streaming audio capabilities are compatible. To check if your phone is compatible, ask a dealer.

It may be illegal to perform some data device functions while driving.

Only one phone can be used with HFT at a time. When there are more than two paired phones in the vehicle, the first paired phone the system finds is automatically connected.

If more than one phone is paired to the HFT system, there may be a delay before the system begins to play.

In some cases, the name of the artist, album, or track may not appear correctly.

Some functions may not be available on some devices.
Audio System Basic Operation

Playing Bluetooth® Audio

To Play Bluetooth® Audio Files

1. Make sure that your phone is paired and connected to the system.
2. Phone Setup P. 359
3. Select the Bluetooth® Audio mode.

If the phone is not recognised, another HFT-compatible phone, which is not compatible for Bluetooth® Audio, may already be connected.

To pause or resume a file
Select the play icon or pause icon.

Searching for Music

1. Press the button.
2. Select Music Search.
3. Select a search category (e.g., Albums).
4. Select an item.
   - The selection begins playing.

To play the audio files, you may need to operate your phone. If so, follow the phone maker’s operating instructions.

Switching to another mode pauses the music playing from your phone.

Searching for Music

Depending on the Bluetooth® device you connect, some or all of the lists may not be displayed.
Playing a Video Using the HDMI™

Your audio system allows you to play videos from an HDMI-compatible device. Connect the device, using an HDMI™ cable, then select the HDMI™ mode.

* HDMI™ Port* P. 224

---

* Not available on all models
## Changing the Screen Aspect

1. Press the \(\text{DTV}^{\text{TM}}\) button.
2. Select **Settings**.
3. Select **Audio**.
4. Select **Aspect Adjustment**.
5. Select the setting you want.
6. Select **OK**.

This feature is limited while driving. To play videos, stop your vehicle and apply the parking brake.
On Board Apps

Honda Connect has the capability of On Board Apps which may be created by Honda or by 3rd parties. Apps may be already installed or can be downloaded through Honda App Center. Some Apps require internet access which can be established by Wi-Fi Connection.

Wi-Fi Connection P. 301

Please visit the below web address for further information:
https://ivhs.os.ixonos.com/honda/help

- Using the Display Audio system while driving can take your attention away from the road, causing a crash in which you could be seriously injured or killed. Only operate system controls when the conditions permit you to safely do so. Please always adhere to the laws of the territory when operating this device.
- Applications on the head unit are subject to change at anytime. This may mean that they are not available or operate differently. Honda shall not be liable to you in such instances.
- Applications available on the device may be provided by parties other than Honda to which 3rd party software licences and charges may apply.
- Data usage and roaming charges may result in using applications on the device in conjunction with your mobile phone and Honda is not liable for any costs you might incur from such use. Honda recommends you consult your mobile phone network provider in advance.
- Downloading applications from the Honda App Center will be subject to Terms and Conditions which can be found at: https://ivhs.os.ixonos.com/honda/help, and may also incur charges.

Honda App Center icon

Honda App Center provides access to a variety of App related services.
Smartphone Connection

Some of your smartphone apps can be displayed and operated on the audio/information screen when the phone is connected to the audio system. You can connect your phone using a cable, or wirelessly.

- **Connecting Your iPhone** P. 300
- **Wi-Fi mode (setting for the first time)** P. 301

You need to switch the Bluetooth® connection to your smartphone if another electronic device is connected.

- **To change the currently paired phone** P. 360

The following may vary by phone type:
- How to connect a smartphone to the system.
- Apps that can be operated on the screen.
- Display response time/update time

We do not support every app operation on the audio system.

Ask the app provider for any queries on the app’s features.

Do not get drawn into the display while operating a vehicle.
To use smartphone connection, you need to first pair your smartphone to the audio system via Bluetooth®.

Phone Setup P. 359

Features

Audio System Basic Operation

Smartphone Connection

Continued
Connecting Your iPhone

1. Connect your phone to the audio system via Bluetooth®.
   - Phone Setup P. 359
2. Plug in the digital AV adapter to the HDMI™ jack.
3. Connect the digital AV adapter to your iPhone.
   - Wait until an arrow appears on the home screen.
4. Select the arrow to display the available smartphone apps on the audio/information screen.
   - You may need to operate from the phone.
5. Select an app you want to operate from the audio/information screen.
   - To go back to the previous screen, press the button.

Connecting Your iPhone

Make sure to plug in the digital AV adapter to the HDMI™ jack first. If not, smartphone connection may not work properly.

To recharge your phone, connect it to the USB jack, too.

Contact a dealer for the digital AV adapter or HDMI™ cable purchasing information.
Wi-Fi Connection

You can connect the display audio system to the Internet using Wi-Fi and browse websites or use online services on the audio/information screen. If your phone has mobile hotspot capabilities, the system can be tethered to the phone. Go through the following steps for a setup.

Wi-Fi mode (setting for the first time)

1. Press the button.
2. Select Settings.
3. Select Bluetooth / Wi-Fi.
4. Select the Wi-Fi tab.
5. Select Wi-Fi On/Off Status, then On.
6. Select Wi-Fi Device List.
   - Make sure your phone's Wi-Fi setting is in access point (tethering) mode.
   - Select the phone you want to connect to the system.
   - If you do not find the phone you want to connect in the list, select Scan.

Wi-Fi mode (setting for the first time)

You cannot go through the setting procedure while a vehicle is moving. Park in a safe place to set the audio system in Wi-Fi mode.

Some telecom carriers charge for tethering. Check your phone's subscribed package.

Check your phone manual to find out if the phone has Wi-Fi connectivity.

You can confirm whether Wi-Fi connection is on or off with the icon on Wi-Fi Device list. Transmission speed and others will not be displayed on this screen.
7. Select **Connect**.
   - Enter a password for your phone, and select **Done**.
   - When the connection is successful, the icon is displayed on the list.
8. Press the button to go back to the home screen.

### Wi-Fi mode (after the initial setting has been made)

Make sure your phone’s Wi-Fi setting is in access point (tethering) mode.

#### Wi-Fi mode (setting for the first time)

If you cannot enter the password on the displayed keyboard, change the keyboard to the one in which you can enter from the following order:

- **Settings** → **Android** → **Language & input** → select next to **Android keyboard** → **Input language** → uncheck the box next to **Use system language** → select the keyboard languages that you can enter.

#### Wi-Fi mode (after the initial setting has been made)

**iPhone users**

You may need to go through an initial setup for Wi-Fi connection again after you boot your phone.
Siri Eyes Free

You can talk to Siri using the (Talk) button on the steering wheel when your iPhone is paired to the Hands-Free Telephone (HFT) System.

Phone Setup P. 359

Using Siri Eyes Free

(Talk) Button
Press and hold until the display changes as shown.

(Talk) Button
Press to deactivate Siri.

Appears when Siri is activated in Siri Eyes Free

While in Siri Eyes Free:
The display remains the same. No feedback or commands appears.

Siri Eyes Free

Siri is a trademark of Apple Inc.

Check Apple Inc. website for features available for Siri.

We recommend against using Siri other than in Siri Eyes Free while operating a vehicle.

Using Siri Eyes Free

Some commands work only on specific phone features or apps.
## Audio Error Messages*

## Android/Apps

If an error occurs while using the audio system or apps, you may see the following error messages. If you cannot clear the error message, contact a dealer.

<table>
<thead>
<tr>
<th>Error Message</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unfortunately, **** has stopped.</td>
<td>Error has occurred within app, select OK on the screen to close the app. Unless it is a fatal error, it would return to normal if you startup the app. If it does not return to normal even after starting up the app, press and hold the (power) button to perform the forced reset. If it still does not get back to normal, you need <strong>Factory Data Reset</strong>. <a href="#">Defaulting All the Settings</a> P. 328</td>
</tr>
<tr>
<td>**** is not responding. Would you like to close it?</td>
<td>App is in a busy state. Select <strong>Wait</strong> if you can wait for a response from app a little longer. If it does not respond even if you keep waiting, select <strong>OK</strong> to close the app and start it up. When it does not return to normal, press and hold the (power) button to perform the forced reset. You also need <strong>Factory Data Reset</strong>. <a href="#">Defaulting All the Settings</a> P. 328</td>
</tr>
<tr>
<td>Security warning</td>
<td>Occurs if you open the browser when the system date is older than the certificate date information. It also occurs when you are in the area where GPS reception is unavailable or GPS setting of the Android setting is turned off.  * Turn on GPS setting of the Android setting.  * Move to the area where GPS reception is available. <a href="#">Customized Features</a> P. 313</td>
</tr>
</tbody>
</table>

*1:**** part is variable characters, and will change depending upon where an error occurs.
Recommended CDs*

- Use only high-quality CD-R or CD-RW discs labelled for audio use.
- Use only CD-R or CD-RW discs on which the recordings are closed.
- Play only standard round-shaped CDs.

*Software files may not allow for audio play or text data display.
*Some versions of MP3, WMA, or AAC* formats may be unsupported.

A Dual-disc cannot play on this audio unit. If recorded under certain conditions, a CD-R or CD-RW may not play either.

* Not available on all models
■ Protecting CDs
Follow these precautions when handling or storing CDs:
• Store a CD in its case when it is not being played.
• When wiping a CD, use a soft clean cloth from the centre to the outside edge.
• Handle a CD by its edge. Never touch either surface.
• Never insert foreign objects into the CD player.
• Keep CDs out of direct sunlight and extreme heat.
• Do not place stabilizer rings or labels on the CD.
• Avoid fingerprints, liquids, and felt-tip pens on the CD.

* Protecting CDs

**NOTICE**
Do not insert a damaged CD. It may get stuck inside and damage the audio unit.

**Examples:**
- Bubbled, wrinkled, labelled, and excessively thick CDs
- Damaged CDs
- Poor quality CDs
- Small CDs
- 8-cm (3-inch) CD

About Open Source Licences

To see the open source licence information, follow these steps.

1. Select [Home].
2. Select Settings.
3. Select Android.
4. Select About device.
5. Select Legal information.
6. Select Open source licences.

You can also go to step 4 when you:
• Swipe down from the top.
• Select ☰ appears on the screen.
• Select ☰, then select Settings on the App tab.
Customized Features

Models with two displays
Use the audio/information screen to customize certain features.

■ How to customize
With the ignition switch in ON [II]*1, select Settings, then select a setting item.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

Customized Features
When you customize settings, make sure that the vehicle is at a complete stop and shift to [P].

To customize other features, select Settings.

List of customizable options P. 318

If you press and hold the (power) button when resetting the system, it may restore the customized value to its default value depending on the setting items.
Customization flow

Press the button.
Select Settings.

*1: Does not appear when you change the screen interface design.
*2: Appears only when you change the screen interface design.

Customized Features

Defaulting All the Settings

Reset all the menu and customized settings as the factory defaults.

1. Press the \[ Menu \] button.
2. Select Settings.
3. Select System.
4. Select the Others tab.
5. Select Factory Data Reset.
   - A confirmation message appears on the screen.
6. Select Yes to reset the settings.
7. Select Yes again to reset the settings.
   - A confirmation message appears on the screen. Select OK.

When you transfer the vehicle to a third party, reset all settings to default and delete all personal data.

If you perform Factory Data Reset, it will reset the preinstalled apps to their factory default.
Hands-Free Telephone System*

The Hands-Free Telephone (HFT) System allows you to place and receive phone calls using your vehicle’s audio system, without handling your mobile phone.

Using HFT

**HFT Buttons**

- **(Pick-up) button**: Press to go directly to the Phone screen or to answer an incoming call.
- **(Hang-up/back) button**: Press to end a call or cancel a command.
- **(Talk) button**: Press to call a number with a stored voice tag.
- **TEL button**: Press to go directly to the Phone screen.
- **Selector knob**: Rotate to select an item on the screen, then press .

* Not available on all models

To use HFT, you need a Bluetooth-compatible mobile phone. For a list of compatible phones, pairing procedures, and special feature capabilities:

Voice control tips

- Aim the vents away from the ceiling and close the windows, as noise coming from them may interfere with the microphone.
- Press and release the **(Talk) button** when you want to call a number using a stored voice tag. Speak clearly and naturally after a beep.
- If the microphone picks up voices other than yours, the command may be misinterpreted.
- To change the volume level, use the audio system's volume knob or the remote audio controls on the steering wheel.

If you receive a call while using the audio system, the system resumes its operation after ending the call.
Hands-Free Telephone System

Using HFT

330 Features

The i-multi-information display notifies you when there is an incoming call.

Limitations for Manual Operation

Certain manual functions are disabled or inoperable while the vehicle is in motion. You cannot select a grayed-out option until the vehicle is stopped.

Only previously stored speed dial entries with voice tags, phonebook names, or numbers can be called using voice commands while the vehicle is in motion.

Speed Dial P. 344

Bluetooth® Wireless Technology

The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc., and any use of such marks by Honda Motor Co., Ltd., is under licence. Other trademarks and trade names are those of their respective owners.

HFT Limitations

An incoming call on HFT will interrupt the audio system when it is playing. It will resume when the call is ended.

European models

For information of DoC (Declaration of Conformance)

Hereby, Johnson Controls Automotive, declares that this Hands-Free Telephone System is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

www.jciblueconnect.com/faq/EU_Doc.pdf

Except European models

For additional conformance information:

www.jciblueconnect.com/faq

HFT Status Display

The information that appears on the i-multi-information display varies between phone models.

You can change the system language from English to other available one.

Customized Features P. 131

* Not available on all models
HFT Menus

The ignition switch must be in ACCESSORY [I] or ON [II] to use HFT.

- **TEL** or **Phone**

  - **Speed dial**
    Display your speed dial entry lists. (up to 15 entries per paired phone)

  - **Call history**
    - **Dial**
      Display the last 20 outgoing calls.

  - **Received calls**
    Display the last 20 incoming calls.

  - **Missed calls**
    Display the last 20 missed calls.

  - **Phonebook**
    Display the paired phone’s phonebook.

  - **Dial**
    Enter a phone number to dial.

*1: Appears only when a phone is connected to HFT.

**HFT Menus**

To use HFT, you must first pair your Bluetooth-compatible mobile phone to the system while the vehicle is parked.
Hands-Free Telephone System

Hands-Free Telephone System

HFT Menus

Features

- **Auto transfer**
  - Set calls to automatically transfer from your phone to HFT when you enter the vehicle.

- **Caller ID info**
  - Name priority
    - Prioritize the caller’s name as the caller ID.
  - Number priority
    - Prioritize the caller’s phone number as the caller ID.

- **Passcode**
  - Create a security PIN for a paired phone.

- **System clear**
  - Clear the system of all paired phones, phonebook entries, and security codes.

*1: Appears only when a phone is connected to HFT.
Hands-Free Telephone System

HFT Menus

Features

To pair a mobile phone (No phone has been paired to the system)

1. Press the TEL button or the button.
2. Rotate to select Yes, then press .
3. Make sure your phone is in search or discoverable mode, then press .
   HFT automatically searches for a Bluetooth® device.

4. When your phone appears on the list, select it by pressing .
   If your phone doesn’t appear, select Phone not found? and search for Bluetooth® devices using your phone.
   From your phone, select HONDA HFT.

5. HFT gives you a four-digit pairing code to input on your phone.
   When your phone prompts you, input the four-digit pairing code.
6. A notification appears on the screen if pairing is successful.

Phone Setup

Your Bluetooth-compatible phone must be paired to HFT before you can make and receive hands-free calls.

Phone Pairing Tips:
• You cannot pair your phone while the vehicle is moving.
• Up to six phones can be paired.
• Your phone’s battery may drain faster when it is connected to HFT.
• If your phone is not ready for pairing or not found by the system within three minutes, the system will time out and return to idle.

Once you have paired a phone, you can see it displayed on the screen with one or two icons on the right side.
These icons indicate the following:
• : The phone can be used with HFT.
• : The phone is compatible with Bluetooth® Audio.
### Hands-Free Telephone System

#### HFT Menus

#### Features

- **To pair a mobile phone (when a phone has already been paired to the system)**

  1. Press the **TEL** button or the **button**.
     - If a prompt appears asking to connect to a phone, select **No** and proceed with step 2.
  2. Rotate **** to select **Phone setup**, then press ****.
  3. Rotate **** to select **Connection**, then press ****.
  4. Rotate **** to select **Add a new phone**, then press ****.
     - The screen changes to **Select location**.
  5. Rotate **** to select **Empty**, then press ****.
6. Make sure your phone is in search or discoverable mode, then press \( \text{Bluetooth} \). HFT automatically searches for a Bluetooth® device.

7. When your phone appears on the list, select it by pressing \( \text{Bluetooth} \). If your phone doesn’t appear, select Phone not found? and search for Bluetooth® devices using your phone. From your phone, select HONDA HFT.

8. HFT gives you a four-digit pairing code to input on your phone. When your phone prompts you, input the four-digit pairing code.

9. A notification appears on the screen if pairing is successful.
To change the pairing code setting

1. Press the TEL button or the button. Rotate to select Phone setup, then press.

2. Rotate to select Connection, then press.

3. Rotate to select Pairing code, then press.

4. Rotate to select Fixed or Random, then press.

The default pairing code is 0000 until you change the setting.
To create your own, select Fixed, and delete the current code, then enter a new one.

For a randomly generated pairing code each time you pair a phone, select Random.
To delete a paired phone

1. Press the TEL button or the button.
2. Rotate to select Phone setup, then press.
   - Repeat the procedure to select Connection, then Delete a phone.

3. Rotate to select a phone you want to delete, then press.

4. A confirmation message appears on the screen. Rotate to select Yes, then press.
   - A notification appears if the deletion is successful.

Continued
To Create a Security PIN
You can protect each of the six mobile phones with a security PIN.

1. Press the TEL button or the button.
2. Rotate to select Phone setup, then press .
   ▶ Repeat the procedure to select Passcode.
3. Select a phone you want to add a security PIN to.
   ▶ Rotate to select a phone you want to add a security PIN to, then press .
4. A confirmation message appears on the screen.
   ▶ Rotate to select Yes, then press .
5. Enter a new four-digit number.
   ▶ Rotate to select, then press . Press to delete. Press to enter the security PIN.
6. Re-enter the four-digit number.
   ▶ The screen returns to the screen in step 2.

To Create a Security PIN
If the phone is already security PIN protected, you need to enter the current security PIN before clearing the PIN or creating a new one.
Automatic Transferring
If you get into the vehicle while you are on the phone, the call can be automatically transferred to HFT.

1. Press the TEL button or the button.
2. Rotate to select Phone setup, then press .
   ▶ Repeat the procedure to select Auto transfer.
3. Rotate to select On, then press .
4. A notification appears on the screen if the change is successful.

Caller’s ID Information
You can select a caller’s information to be displayed when you have an incoming call.

1. Press the TEL button or the button.
2. Rotate to select Phone setup, then press .
   ▶ Repeat the procedure to select Caller ID info.
3. Rotate to select a mode you want, then press .
4. A notification appears on the screen if the change is successful.

Name priority mode: A caller’s name is displayed if it is stored in the phonebook.
Number priority mode: A caller’s phone number is displayed.
To Clear the System

Security codes, paired phones, all stored voice tag, all speed dial entries, and all imported phonebook data are erased.

1. Press the TEL button or the 📞 button.
2. Rotate 🔄 to select Phone setup, then press 📲.  ▶ Repeat the procedure to select System clear.
3. Rotate 🔄 to select Yes, then press 📲.
4. A confirmation message appears on the screen. Rotate 🔄 to select Yes, then press 📲.
5. A confirmation message appears on the screen. Press 📲 to finish.
Automatic Import of Mobile Phonebook and Call History

When your phone is paired, the contents of its phonebook and call history are automatically imported to HFT.

When you select a person from the list in the mobile phonebook, you can see up to three category icons. The icons indicate what types of numbers are stored for that name.

If a name has four or more numbers, ... appears instead of category icons.

On some phones, it may not be possible to import the category icons to HFT.

The phonebook is updated after every connection.

Call history is updated after every connection or call.
**Speed Dial**

Up to 15 speed dial numbers can be stored per phone.

To store a speed dial number:
1. Press the TEL button or the ☎ button.
2. Rotate 🔄 to select **Phone setup**, then press ✍.
   - Repeat the procedure to select **Speed dial**, then **Add new**.
3. Rotate 🔄 to select a place to choose a number from, then press ✍.
   - **By Phonebook**: Select a number from the connected mobile phone’s imported phonebook.
   - **By Call history**: Select a number from the call history.
   - **By Phone number**: Input the number manually.
4. When the speed dial is successfully stored, you are asked to create a voice tag for the number. Rotate 🔄 to select **Yes** or **No**, then press ✍.
5. Using the ✪ button, follow the prompts to say the name for the speed dial entry.

You can use the audio preset buttons during a call to store a speed dial number:
1. Press and hold the desired audio preset button during a call.
2. The contact information for the active call will be stored for the corresponding speed dial.

When a voice tag is stored, press the ✪ button to call the number using the voice tag.
To add a voice tag to a stored speed dial number

1. Press the TEL button or the \( \) button.
2. Rotate \( \) to select **Phone setup**, then press \( \).
   - Repeat the procedure to select **Speed dial**.
3. Select an existing speed dial entry.
4. Rotate \( \) to select **Store voice tag**, then press \( \).
5. Using the \( \) button, follow the prompts to complete the voice tag.

### Speed Dial

Avoid using duplicate voice tags.
Avoid using “home” as a voice tag.
It is easier for HFT to recognise a longer name. For example, use “John Smith” instead of “John.”
Hands-Free Telephone System

Options During a Call

The following options are available during a call.

**Mute**: Mute your voice.

**Transfer call**: Transfer a call from HFT to your phone.

**Touch tones**: Send numbers during a call. This is useful when you call an automated phone system.

1. To view the available options, press the TEL button.

2. Rotate to select the option, then press  
   - The check box is checked when **Mute** is selected. Select **Mute** again to turn it off.

**Touch tones**: Available on some phones.
Hands-Free Telephone System

The Hands-Free Telephone (HFT) System allows you to place and receive phone calls using your vehicle’s audio system, without handling your mobile phone.

Using HFT

HFT Buttons

To use HFT, you need a Bluetooth-compatible mobile phone. For a list of compatible phones, pairing procedures, and special feature capabilities, ask a dealer or your local Honda.

To use the system, the Bluetooth On/Off Status setting must be On.

Customized Features P. 313

Voice control tips
- Aim the vents away from the ceiling and close the windows, as noise coming from them may interfere with the microphones.
- Press the button when you want to call a number using a stored voice tag. Speak clearly and naturally after a beep.
- If the microphones pick up voices other than yours, the command may be misinterpreted.
- To change the volume level, select the audio system’s VOL (Volume) or use the remote audio controls on the steering wheel.

Up to five speed dial entries can be displayed among a total of 20 that can be entered. If there is no entry in the system, Speed Dial is disabled.

Speed Dial P. 365

Up to five call histories can be displayed among a total of 20 that can be entered. If there is no call history, Call History is disabled.
Hands-Free Telephone System

Using HFT

Features

(Pick-up) button: Press to go directly to the phone screen, or to answer an incoming call.

(Hang-up/back) button: Press to end a call, go back to the previous command, or cancel a command.

(Talk) button: Press to call a number with a stored voice tag.

MENU button: Press and hold to display Speed Dial, Call History, or Redial on the phone screen.

button: Press to select an item displayed on the phone screen.

SOURCE button: Press to call a number listed in the selected item on the phone screen.

To go to the Phone Menu screen:

1. Press the button.
2. Select Phone to switch the display to the phone screen.
3. Press the button.

■ To pair a mobile phone (when there is no phone paired to the system)
1. Select Phone.
2. Select Yes.
3. Make sure your phone is in search or discoverable mode, then select Continue. HFT automatically searches for a Bluetooth® device.
4. Select your phone when it appears on the list.
   ▶ If your phone does not appear, you can select Refresh to search again.
   ▶ If your phone still does not appear, select Phone not Found and search for Bluetooth® devices using your phone. From your phone, search for Honda HFT.
5. The system gives you a pairing code on the audio/information screen.
   ▶ Confirm if the pairing code on the screen and your phone match. This may vary by phone.

Phone Setup

Your Bluetooth-compatible phone must be paired to the system before you can make and receive hands-free calls.

Phone Pairing Tips:
- You cannot pair your phone while the vehicle is moving.
- Up to six phones can be paired.
- Your phone’s battery may drain faster when it is paired to the system.
- If your phone is not ready for pairing or not found by the system within three minutes, the system will time out and return to idle.
Hands-Free Telephone System

HFT Menus

Features

- To change the currently paired phone
  1. Go to the phone settings screen.
     ➡ Phone settings screen P. 356
  2. Select Connect Phone.
  3. Select a phone to connect.
     - HFT disconnects the connected phone and starts searching for another paired phone.

- To change the pairing code setting
  1. Press the button.
  2. Select Settings.
  3. Select Bluetooth / Wi-Fi.
  4. Select the Bluetooth tab.
  5. Select Edit Pairing Code.
  6. Select Random or Fixed.

To change the currently paired phone
If no other phones are found or paired when trying to switch to another phone, HFT will inform you that the original phone is connected again.

To pair other phones, select Add Bluetooth Device from the Connect Phone screen.

To change the pairing code setting
The default pairing code is 0000 until you change the setting.

To create your own, select Fixed, and delete the current code, then enter a new one.

For a randomly generated pairing code each time you pair a phone, select Random.
To edit an already-paired phone name
1. Go to the phone settings screen.
   - Phone settings screen P. 356
2. Select Bluetooth Device List.
3. Select a paired phone you want to edit.
4. Select Edit Device Name.
5. Edit the name and select OK.
- To delete a paired phone
  1. Go to the phone settings screen.
     - Phone settings screen P. 356
  2. Select Bluetooth device list.
  3. Select a phone you want to delete.
  4. Select Delete This Device.
  5. A confirmation message appears on the screen. Select Yes.
### Ring Tone

You can change the ring tone setting.

1. Go to the phone settings screen.  
   - **Phone settings screen** P. 356
2. Select **Ring Tone**.
3. Select **Fixed** or **Mobile phone**.

- **Ring Tone**
  - **Fixed**: The fixed ring tone sounds from the speakers.
  - **Mobile phone**: The ring tone stored in the connected mobile phone sounds from the speakers.
Automatic Import of Cellular Phonebook and Call History

■ When Automatic Phone Sync is set to On:
When your phone is paired, the contents of its phonebook and call history are automatically imported to the system.

■ Changing the Automatic Phone Sync setting
1. Go to the phone settings screen.
2. Select Automatic Phone Sync.
3. Select On or Off.

Automatic Import of Cellular Phonebook and Call History
When you select a name from the list in the cellular phonebook, you can see up to three category icons. The icons indicate what types of numbers are stored for that name.

- Pref
- Fax
- Home
- Car
- Mobile
- Other
- Work
- Voice
- Pager

On some phones, it may not be possible to import the category icons to the system.

The phonebook is updated after every connection. Call history is updated after every connection or call.
Speed Dial

Up to 20 speed dial numbers can be stored per phone.

To store a speed dial number:
1. Go to the Phone Menu screen.
   - Phone Menu screen P. 358
2. Select Speed Dial.
3. Select New Entry.
4. Select a place to choose a number.
   - From Import from Call History:
     - Select a number from the call history.
   - From Manual Input:
     - Input the number manually.
   - From Import from Phonebook:
     - Select a number from the connected mobile phone’s imported phonebook.
5. When the speed dial is successfully stored, you are asked to create a voice tag for the number. Select Yes or No.

6. Select Record to store a voice tag for the speed dial entry.
   - Using the button, follow the prompts to store a voice tag for the speed dial entry.

When a voice tag is stored, press the button to call the number using the voice tag. Say the voice tag name.
To add a voice tag to a stored speed dial number
1. Go to the phone settings screen.
   - Phone settings screen P. 356
2. Select Edit Speed Dial.
3. Select an existing speed dial entry.
   - From the pop-up menu, select Edit.
4. Select Voice Tag.
   - From the pop-up menu, select Record.
5. Select Record to store the voice tag.
6. Using the button, follow the prompts to complete the voice tag.

To delete a voice tag
1. Go to the phone settings screen.
   - Phone settings screen P. 356
2. Select Edit Speed Dial.
3. Select an existing speed dial entry.
   - From the pop-up menu, select Edit.
4. Select Voice Tag.
   - From the pop-up menu, select Clear.
5. A confirmation message appears on the screen. Select Yes.

Speed Dial
Avoid using duplicate voice tags.
Avoid using “home” as a voice tag.
It is easier for the system to recognise a longer name.
For example, use “John Smith” instead of “John.”
To edit a speed dial
1. Go to the phone settings screen.
   Phone settings screen P. 356
2. Select Edit Speed Dial.
3. Select an existing speed dial entry.
   From the pop-up menu, select Edit.
4. Select a setting you want.

To delete a speed dial
1. Go to the phone settings screen.
   Phone settings screen P. 356
2. Select Edit Speed Dial.
3. Select an existing speed dial entry.
   From the pop-up menu, select Delete.
4. A confirmation message appears on the screen. Select Yes.

Making a Call
You can make calls by inputting any phone number, or by using the imported phonebook, call history, speed dial entries, or redial.

Making a Call
Any voice-tagged speed dial entry can be dialed by voice from most screens.
Press the button and say the voice tag name.
Once a call is connected, you can hear the voice of the person you are calling through the audio speakers.

* Not available on all models
Before Driving

Driving Preparation

Check the following items before you start driving.

- Exterior Checks

  • Make sure there are no obstructions on the windows, door mirrors, exterior lights, or other parts of the vehicle.
  ▶ Remove any frost, snow, or ice.
  ▶ Remove any snow on the roof, as this can slip down and obstruct your field of vision while driving. If frozen solid, remove ice once it has softened.
  ▶ When removing ice from around the wheels, be sure not to damage the wheel or wheel components.

  • Make sure the bonnet is securely closed.
  ▶ If the bonnet opens while driving, your front view will be blocked.

  • Make sure the tyres are in good condition.
  ▶ Check air pressures, and check for damage and excessive wear. 
    - Checking and Maintaining Tyres P. 534

  • Make sure there are no people or objects behind or around the vehicle.
  ▶ There are blind spots from the inside.

- Exterior Checks

  NOTICE
  When doors are frozen shut, use warm water around the door edges to melt any ice. Do not try to force them open, as this can damage the rubber trim around the doors. When done, wipe dry to avoid further freezing.

  Do not pour warm water into the key cylinder. You will be unable to insert the key if the water freezes in the hole.

  Heat from the engine and exhaust can ignite flammable materials left under the bonnet, causing a fire. If you’ve parked your vehicle for an extended period, inspect and remove any debris that may have collected, such as dried grass and leaves that have fallen or have been carried in for use as a nest by a small animal. Also check under the bonnet for leftover flammable materials after you or someone else has performed maintenance on your vehicle.
Before Driving

Driving Preparation

• Store or secure all items on board properly.
  ▶ Carrying too much luggage, or improperly storing it, can affect your vehicle’s handling, stability, stopping distance, and tyres, and make it unsafe.
  
  Load Limit P. 375

• Do not pile items higher than the seat height.
  ▶ They can block your view and may be thrown forward in the event of sudden braking.

• Do not place anything in the front seat footwells. Make sure to secure the floor mat*.
  ▶ An object or unsecured floor mat can interfere with your brake and accelerator pedal operation while driving.

• If you have any animals on board, do not let them move around in the vehicle.
  ▶ They may interfere with driving and a crash could occur.

• Securely close and lock all doors and the tailgate.

• Adjust your seating position properly.
  ▶ Adjust the head restraint, too.
    
  Adjusting the Seats P. 193
  Adjusting the Head Restraints* P. 196

• Adjust the mirrors and steering wheel properly for your driving.
  ▶ Adjust them while sitting in the proper driving position.
    
  Adjusting the Mirrors P. 190
  Adjusting the Steering Wheel P. 189

Interior Checks

The headlight aim is set by the factory, and does not need to be adjusted. However, if you regularly carry heavy items in the luggage area or tow a trailer, have the aiming readjusted at a dealer or by a qualified technician.

Models with headlight adjuster
You can adjust the low beam headlight angle by yourself.

Headlight Adjuster* P. 179

Models with high voltage discharge tube bulbs
Your vehicle is equipped with the automatic headlight adjusting system that automatically adjusts the vertical angle of the low beam headlights.

* Not available on all models

Continued
• Be sure items placed on the floor behind the front seats cannot roll under the seats.
  ► They can interfere with the driver's ability to operate the pedals, or the operation of the seats.
• Everyone in the vehicle must fasten their seat belt.
  ◊ Fastening a Seat Belt P. 42
• Make sure that the indicators in the instrument panel come on when you start the vehicle, and go off soon after.
  ► Always have a dealer check the vehicle if a problem is indicated.
  ◊ Indicators P. 82
Load Limit

When you load luggage, the total weight of the vehicle, all passengers, and luggage must not exceed the maximum permissible weight.

> Specifications P. 608, 611, 616

The load for the front and rear axles also must not exceed the maximum permissible axle weight.

> Specifications P. 608, 611, 616

**WARNING**

Overloading or improper loading can affect handling and stability and cause a crash in which you can be hurt or killed.

Follow all load limits and other loading guidelines in this manual.
Towing a Trailer*

“S” grade petrol and 2.0 L engine models

Your vehicle is not designed to tow a trailer. Attempting to do so can void your warranties.

Except “S” grade petrol and 2.0 L engine models

Towing Preparation

**Towing Load Limits**

Your vehicle can tow a trailer if you carefully observe the load limits, use the proper equipment, and follow the towing guidelines. Check the load limits before driving.

- **Total trailer weight**
  Do not exceed the maximum towing weight of the trailer and towbar (with/without brakes), luggage and everything in or on it.

  Towing loads in excess of the maximum towing weight can seriously affect vehicle handling and performance and can damage the engine and drivetrain.

*1: If you are not sure whether your vehicle is capable of towing a trailer, consult an authorised Honda dealer.

* Not available on all models

**WARNING**

Exceeding any load limit or improperly loading your vehicle and trailer can cause a crash in which you can be seriously hurt or killed.

Check the loading of your vehicle and trailer carefully before starting to drive.

Check if all loads are within limits at a public scale. If a public scale is not available, add the estimated weight of your luggage load to the weight of your trailer (as quoted by the manufacturer), and the towbar down load.

Break-in Period

Avoid towing a trailer during your vehicle’s first 1,000 km (625 miles).

If you tow a trailer in mountainous conditions, remember to reduce 10% of the combined vehicle and trailer weights from the maximum towing weight for every 1,000 metres of elevation.

Never exceed the maximum towing weight and any specified load limit.

**Specifications** P. 610, 613, 618
**Towbar down load**

The towbar down load should never exceed 75 kg (165 lbs). This is the amount of weight the trailer puts on the towbar when it is fully-loaded. As a rule of thumb for trailer weights of less than 750 kg (1,653 lbs), the towbar down load should be 10 percent of the total trailer package.

- Excessive towbar down load reduces front tyre traction and steering control. Too little towbar down load can make the trailer unstable and cause it to sway.
- To achieve a proper towbar down load, start by loading 60% of the load towards the front of the trailer and 40% towards the rear. Readjust the load as needed.
**Towing Equipment and Accessories**

Towing equipment varies by the size of your trailer, how much load you are towing, and where you are towing.

**■ Towbars**
The towbar must be of an approved type and properly bolted to the underbody.

**■ Safety chains**
Always use safety chains when you tow a trailer. Leave enough slack to allow the trailer to turn corners easily, but do not allow the chains to drag on the ground.

**■ Trailer brakes**
If you are thinking of getting a trailer that has brakes, be sure they are electronically actuated. Do not attempt to tap into your vehicle’s hydraulic system. No matter how successful it may seem, any attempt to attach trailer brakes to your vehicle’s hydraulic system will lower braking effectiveness and create a potential hazard.

**■ Additional towing equipment**
There may be laws requiring special outside mirrors when towing a trailer. Even if mirrors are not required in your locale, you should install special mirrors if visibility is restricted in any way.

**■ Trailer light**
Trailer lights and equipment must comply with the regulations of the country where you are driving. Check with your local trailer sales or rental agency for the requirements in the area where you plan to tow.

**Towing Equipment and Accessories**

Make sure that all equipment is properly installed and maintained, and that it meets the country’s regulations where you are driving.

Consult your trailer sales or rental agency if any other items are recommended or required for your towing situation.

The lighting and wiring of trailers can vary by type and brand. If a connector is required, it should only be installed by a qualified technician.
Driving Safely with a Trailer

**Things You Need To Know Before Towing a Trailer**

- Have the trailer properly serviced and keep it in good condition.
- Make sure that all the weights and load in the vehicle and trailer are within limits.
  - **Towing Load Limits** P. 376
- Securely attach the tow bar, safety chains, and other necessary parts to the trailer.
- Securely store all the items in and on the trailer so that they do not shift while driving.
- Check if the lights and brakes on the trailer are working properly.
- Check the pressures of the trailer tyres, including the spare.
- Check regulations concerning the maximum speed or driving restrictions for vehicles towing trailers. If you are driving across several countries, check each country’s requirements before leaving home, because regulations may vary.

**Models with Auto Idle Stop**

- Turn off the Auto Idle Stop system using the Auto Idle Stop system OFF button. The trailer weight can affect your vehicle’s brake effectiveness if Auto Idle Stop is activated on a hill while towing a trailer.

**Driving Safely with a Trailer**

- Operating speed when towing a trailer is restricted up to 100 km/h (62 mph).
- **Parking**
  - In addition to the normal precautions, place wheel chocks at each of the trailer’s tyres.
  - We recommend you drive uphill of less than 12% slope. Follow the trailer association’s recommendations for suitable roads.
  - Winds caused by passing large vehicles can sway your trailer, keep a constant speed and steer straight ahead.
  - Always drive slowly and have someone guide you when reversing.
Towing a Trailer

Driving Safely with a Trailer

Towing Speeds and Gears

- Drive slower than normal.
- Obey posted speed limits for vehicles with trailers.

**Automatic transmission models**
- Use the D position when towing a trailer on level roads.

**Manual transmission models**
Either shift up or shift down indicator will come on at the best time to shift to a higher or lower gear for the better fuel economy.

Towing Speeds and Gears

The shift down indicator will not prompt to downshift to 1st gear. It is up to you to downshift to 1st gear to increase engine braking. Avoid sudden engine braking.

Road and traffic conditions may require you to shift at times other than those indicated.
Towing a Trailer * Driving Safely with a Trailer

**Turning and Braking**
- Turn more slowly and with a wider turning arc than normal.
- Allow more time and distance for braking.
- Do not brake or turn suddenly.

**Driving in Hilly Terrain**
- Monitor your temperature gauge. If it nears the red (Hot) mark, turn off the climate control system and reduce speed. Pull to the side of the road safely to cool down the engine if necessary.

*Automatic transmission models*
- Shift to the **S** position if the transmission shifts frequently.
When Driving

Models without keyless access system

Starting the Engine

1. Make sure the parking brake is applied.

2. Check that the shift lever is in [P], then depress the brake pedal.
   ▶ Although it is possible to start the vehicle in [N], it is safer to start it in [P].

Automatic transmission models

Manual transmission models

Petrol models
The engine is harder to start in cold weather and in thinner air found at altitudes above 2,400 metres (8,000 feet).

When starting the engine in cold weather, turn off all electrical accessories such as the lights, climate control system, and rear defroster in order to reduce battery drain.

If the exhaust system sounds abnormal or you can smell exhaust gas inside the vehicle, have your vehicle checked by a dealer. There may be a problem with the engine or exhaust system.

The immobilizer system protects your vehicle from theft. If an improperly coded key (or other device) is used, the engine’s fuel system is disabled.

Immobilizer System P. 162
3. Turn the ignition switch to START (III) without depressing the accelerator pedal.

Starting the Engine

Do not hold the key in START (III) for more than 10 seconds.

**Petrol models**
- If the engine does not start right away, wait for at least 30 seconds before trying again.
- If the engine starts, but then immediately stops, wait at least 30 seconds before repeating step 3 while gently depressing the accelerator pedal. Release the accelerator pedal once the engine starts.

**Diesel models**
- If the engine does not start right away, wait for at least 30 seconds before trying again.
- If the engine starts, but then immediately stops, wait at least 30 seconds before repeating step 3 while gently depressing the accelerator pedal. Release the accelerator pedal once the engine starts.

**Diesel models**

When the ambient temperature is extremely low, the engine peak power may be restricted at starting the engine. This is to help the fuel flow for the normal engine operation.

**Diesel models**

**NOTICE**

For proper lubrication, the engine must not be run above fast idle speed until the low oil pressure indicator goes off. Avoid harsh acceleration or labouring the engine before the normal operating temperature has been reached.
Starting to Drive

Automatic transmission models
1. Keeping your right foot on the brake pedal, release the parking brake. Check that the parking brake indicator has gone off.
   - Parking Brake P. 430
2. Put the shift lever in D. Select R when reversing.
3. Gradually release the brake pedal and gently depress the accelerator pedal to pull away.

Hill start assist system
Hill start assist keeps the brake engaged briefly to help to prevent the vehicle from rolling on inclines as you move your foot from the brake pedal to the accelerator.

Manual transmission models
Depress the clutch pedal, and shift to one of the forward gears when facing uphill, or R when facing downhill, then release the brake pedal.

Automatic transmission models
Move the shift lever to D or S when facing uphill, or R when facing downhill, then release the brake pedal.

Starting to Drive

Manual transmission models
If the engine stalls, fully depress the clutch pedal within three seconds. The engine may automatically restart under certain conditions. Otherwise, follow the standard procedure.

Hill start assist system
Hill start assist may not prevent the vehicle from rolling downhill on a very steep or slippery slope, and does not operate on small inclines.

Hill start assist is not a replacement for the parking brake.
Starting the Engine

1. Make sure the parking brake is applied.

2. Check that the shift lever is in [P], then depress the brake pedal.
   - Although it is possible to start the vehicle in [N], it is safer to start it in [P].

**Models with keyless access system**

**Starting the Engine**

Keep your foot firmly on the brake pedal when starting the engine.

**Petrol models**

The engine is harder to start in cold weather and in thinner air found at altitudes above 2,400 metres (8,000 feet).

When starting the engine in cold weather, turn off all electrical accessories such as the lights, climate control system, and rear demister in order to reduce battery drain.

If exhaust system sounds abnormal or you can smell exhaust gas inside the vehicle, have your vehicle checked by a dealer. There may be a problem with the engine or exhaust system.

The immobilizer system protects your vehicle from theft. If an improperly coded key (or other device) is used, the engine’s fuel system is disabled.

**Immobilizer System** P. 162

---

Continued
Starting the Engine

Bring the keyless remote close to the ENGINE START/STOP button if the battery in the keyless remote is weak.

If the Keyless Remote Battery is Weak  P. 576

The engine may not start if the keyless remote is subjected to strong radio waves.

Do not hold the ENGINE START/STOP button to start the engine.

Petrol models
If the engine does not start, wait at least 30 seconds before trying again.

Diesel models
If the engine does not start, wait at least 30 seconds before trying again.

When the ambient temperature is extremely low, the engine peak power may be restricted at starting the engine. This is to help the fuel flow for the normal engine operation.

Petrol models
For proper lubrication, the engine must not be run above fast idle speed until the oil pressure warning indicator goes off.

Avoid harsh acceleration or labouring the engine before the normal operating temperature has been reached.

All models
3. Press the ENGINE START/STOP button without depressing the accelerator pedal.

Stopping the Engine
You can turn the engine off when the vehicle is completely stopped.

Diesel models
Idle the engine for 10 seconds before turning off the engine.

Automatic transmission models
1. Shift to [P].
2. Press the ENGINE START/STOP button.

Manual transmission models
• If the shift lever is in [N], press the ENGINE START/STOP button.
• If the shift lever is in any gear other than [N], depress the clutch pedal, then press the ENGINE START/STOP button.
When Driving
Starting the Engine
Driving

1. Keeping your right foot on the brake pedal, release the parking brake. Check that the parking brake indicator has gone off.

   Parking Brake P. 430

2. Put the shift lever in [D]. Select [R] when reversing.

3. Gradually release the brake pedal and gently depress the accelerator pedal to pull away.

Hill start assist system
Hill start assist keeps the brake engaged briefly to help to prevent the vehicle from rolling on inclines as you move your foot from the brake pedal to the accelerator.

Manual transmission models
Depress the clutch pedal, and shift to one of the forward gears when facing uphill, or [R] when facing downhill, then release the brake pedal.

Automatic transmission models
Move the shift lever to [D] or [S] when facing uphill, or [R] when facing downhill, then release the brake pedal.

Starting to Drive
Automatic transmission models
If the engine stalls, fully depress the clutch pedal within three seconds. The engine may automatically restart under certain conditions. Otherwise, follow the standard procedure.

Manual transmission models
Hill start assist may not prevent the vehicle from rolling downhill on a very steep or slippery slope, and does not operate on small inclines.

Hill start assist is not a replacement for the parking brake.
Precautions While Driving

■ In Rain

Avoid driving in deep water and on flooded roads. This can damage the engine or driveline, or cause electrical component failure.

CAUTION: Do not drive on the road where water is deep. Driving through deep water will cause damage to the engine and electrical equipment and the vehicle will break down.

NOTICE
Do not operate the shift lever while pressing the accelerator pedal. You could damage the transmission.

NOTICE
If you repeatedly turn the steering wheel at an extremely low speed, or hold the steering wheel on the full left or right position for a while, the electric power steering (EPS) system heats up. The system goes into a protective mode, and limits its performance. The steering wheel becomes harder and harder to operate. Once the system cools down, the EPS system is restored. Repeated operation under these conditions can eventually damage the system.
Other Precautions

If there is a strong impact with something under the vehicle, stop in a safe location. Check the underside of the vehicle for damage or any fluid leaks.

Automatic Transmission *

Creeping

The engine runs at a higher idle speed and creeping increases. Keep the brake pedal firmly depressed when stopped.

Kickdown

Quickly depressing the accelerator pedal while driving uphill may cause the transmission to drop to a lower gear, unexpectedly increasing vehicle speed. Depress the accelerator pedal carefully, especially on slippery roads and curves.

Precautions While Driving

If the ignition switch is turned to ACCESSORY [ ] or LOCK [ ] while driving, the engine will shut down and all steering and brake power assist functions will stop, making it difficult to control the vehicle.

Do not put the shift lever in [ ] as you will lose engine braking (and acceleration) performance.

During the first 1,000 km (625 miles) of operation, avoid sudden acceleration or full throttle operation so as not to damage the engine or powertrain.

Avoid hard braking for the first 300 km (200 miles). You should also follow this when the brake pads are replaced.

* 1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models
When Driving
Shifting

Automatic transmission models

Shifting
Change the shift position in accordance with your driving needs.

■ Shift lever positions

- **P** Park
  - Used when parking or starting the engine
- **R** Reverse
  - Used when reversing
- **N** Neutral
  - Used when idling
- **D** Drive
  - For normal driving (gears change between 1st and 5th automatically)
  - When temporarily driving in the sequential mode
- **S** Drive (S)
  - Automatically changing gears between 1st and 4th (4th gear is used only at high speed)
  - Driving in the sequential mode

**Shifting**

You cannot turn the ignition switch to LOCK [0]*1 and remove the key unless the shift lever is in [P].

The vehicle may move forward very slightly even in [N] while the engine is cold. Depress the brake pedal firmly and, when necessary, apply the parking brake.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
When you change the shift lever from (D) to (R) and vice versa, come to a complete stop and keep the brake pedal depressed. Operating the shift lever before the vehicle has come to a complete standstill can damage the transmission.

Use the shift lever position indicator to check the lever position before pulling away.

Whichever position the shift lever is in when driving, a blinking (D) indicator indicates a transmission problem. Avoid sudden acceleration and have the transmission checked by a dealer as soon as possible.

The fuel supply may be cut off if you drive at engine speeds in or over the tachometer’s red zone (engine speed limit). If this happens, you may experience a slight jolt.

It may not be possible to operate the shift lever if the brake pedal is applied while the shift lever release button is held down. Depress the brake pedal first.

Depress the brake pedal and press the shift lever release button to shift.

Shift without pressing the shift lever release button.

Press the shift lever release button and shift.

(M (Sequential Shift Mode) Indicator/Gear position Indicator

Tachometer’s red zone

PRNDS

PRNDS

Continued
When Driving

**Shifting**

- **Sequential Shift Mode**
  Use the paddle shifters to change between 1st and 5th gears without removing your hands from the steering wheel. The transmission switches to the sequential shift mode.

  - **When the shift lever is in [D]:**
    The vehicle goes into the sequential shift mode momentarily, and the gear position indicator comes on.

    Once you start travelling at a constant speed, the sequential shift mode automatically switches off, and the gear position indicator goes off.

    Hold the + paddle shifter for two seconds to return to normal drive.

  - **When the shift lever is in [S]:**
    The vehicle goes into the sequential shift mode, and the [M] (sequential shift mode) indicator and gear position indicator comes on. At speeds of 10 km/h (6 mph) or less, the vehicle automatically shifts down into 1st gear. It does not automatically shift up, even if vehicle speed increases.

    You can only pull away in 1st or 2nd gear.

    When switching out of the sequential shift mode, move the shift lever from [S] to [D]. When the sequential shift mode is cancelled, the [M] indicator and gear position indicator go off.
■ Second gear lock mode
If you pull the (+) paddle shifter while stopped or driving at 10 km/h (6 mph) or less, the gear position will be locked in 2nd gear. This makes it easier to pull away on slippery surfaces such as snow covered roads.

To cancel the 2nd gear lock mode, pull the (−) paddle shifter, or move the shift lever from [S] to [D].

■ Sequential Shift Mode Operation

Each paddle shift operation makes a single gear change. To change gears continuously, release the paddle shifter before pulling it again for the next gear.

If your vehicle speed is not in its allowable gear shifting range, the gear position indicator blinks while trying to shift up or down. Slightly accelerate to shift up and decelerate to shift down while the indicator is blinking.
When Driving

Shift Up/Down Indicators

Come on while the vehicle is in the sequential shift mode to indicate when a gear change is appropriate to maintain the most fuel efficient driving style.

The shift up indicator: Comes on when shifting up is recommended.

The shift down indicator: Comes on when shifting down is recommended.

WARNING

The shift indicator is only a guide to help you achieve better fuel economy. Never refer to the Shift Indicators when road and traffic conditions are unsuitable or when it may distract you.

This indicator will not prompt you to downshift to increase engine braking. It is up to you to downshift to increase engine braking when driving downhill.

Always shift down at the appropriate vehicle speed.

Models with ECON system

When the ECON mode is on, ambient meter colour may change if you do not change gears when a shift indicator illuminates. This can result in a change in fuel economy.

Road and traffic conditions may require you to shift at times other than those indicated.
When Driving

Shifting

Full depress the clutch pedal to operate the shift lever and change gears, then slowly release the pedal.

Depress the clutch pedal, and pause for a few seconds before shifting into [R], or shift into one of the forward gears for a moment. This stops the gears so they do not “grind.”

When you are not shifting, do not rest your foot on the clutch pedal. This can cause your clutch to wear out faster.

6-speed manual transmission

- NOTICE
  Do not shift to [R] before the vehicle comes to a complete stop. Shifting to [R] before stopping can damage the transmission.

- NOTICE
  Before downshifting, make sure the engine will not go into the tachometer’s red zone. Should this occur, it can severely damage your engine.

There is a metallic part on the shift lever. If you leave the vehicle parked outside for a long time on a hot day, be careful before moving the shift lever. Because of heat, the shift lever may be extremely hot. If the outside temperature is low, the shift lever may feel cold.

If you exceed the maximum speed for the gear you are in, the engine speed will enter into the tachometer’s red zone. When this happens, you may experience a slight jolt.
When Driving

Shift Up/Down Indicators

Come on to indicate when a gear change is appropriate to maintain the most fuel efficient driving style.

The shift up indicator: Comes on when shifting up is recommended.

The shift down indicator: Comes on when shifting down is recommended.

WARNING

The shift indicator is only a guide to help you achieve better fuel economy. Never refer to the Shift Indicators when road and traffic conditions are unsuitable or when it may distract you.

The shift down indicator will not prompt you to downshift to increase engine braking. It is up to you to downshift to increase engine braking when driving downhill.

Always shift down at the appropriate vehicle speed.

The shift down indicator does not come on when downshifting from 2 to 1.

Models with ECON system

When the ECON mode is on, ambient meter colour may change if you do not change gears when a shift indicator illuminates. This can result in a change in fuel economy.

Road and traffic conditions may require you to shift at times other than those indicated.
Reverse Lockout

The manual transmission has a lockout mechanism that stops you from accidentally shifting into R from a forward gear while the vehicle is moving above a certain speed.

If you cannot shift to R when the vehicle is stopped, do the following:

1. Depress the clutch pedal, move the shift lever all the way to the left, and shift to R.
2. If you still cannot shift into R, apply the parking brake, and turn the ignition switch to ACCESSORY 1 or LOCK 0.*1
3. Depress the clutch pedal and shift into R.
4. Keep depressing the clutch pedal and start the engine.

Have your vehicle checked by a dealer if you have to go through this procedure repeatedly.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
When Driving ➤ Auto Idle Stop

Auto Idle Stop

To help to maximise fuel economy, the engine automatically stops when the vehicle comes to a stop, depending on environmental and vehicle operating conditions. The indicator (green) comes on.

The engine then restarts once the vehicle is about to move again when you depress the clutch pedal, and the indicator goes off. A message associated with Auto Idle Stop appears on the i-multi-information display.

Indicators P. 82
Customized Features P. 131

If the driver’s door is opened while the indicator (green) is on, a buzzer sounds to notify you that the Auto Idle Stop function is in operation.

Auto Idle Stop System On and Off

To turn the Auto Idle Stop system off, press this button. The Auto Idle Stop system stops.

Auto Idle Stop system will stop and the indicator will come on.

When the +R mode is on, the Auto Idle Stop system cannot be operated.

The Auto Idle Stop system is turned on every time you start the engine, even if you turned it off the last time you drove the vehicle.

Auto Idle Stop System On and Off

Pressing the Auto Idle Stop system OFF button restarts the engine during the Auto Idle Stop activated.

Auto Idle Stop

The battery installed in this vehicle is specifically designed for a model with Auto Idle Stop. Using a battery other than this specified type may shorten the battery life, and prevent Auto Idle Stop from activating. If you need to replace the battery, make sure to select the specified type. Ask a dealer for more details.

Specifications P. 608

The duration of the Auto Idle Stop operation increases in the ECON mode*, compared to when the ECON mode is off, with climate control in use.

* Not available on all models

Manual transmission models

Auto Idle Stop

To help to maximise fuel economy, the engine automatically stops when the vehicle comes to a stop, depending on environmental and vehicle operating conditions. The indicator (green) comes on.

The engine then restarts once the vehicle is about to move again when you depress the clutch pedal, and the indicator goes off. A message associated with Auto Idle Stop appears on the i-multi-information display.

* Not available on all models
**Auto Idle Stop Activates When:**

The Auto Idle Stop is activated after the vehicle has come to a stop and the shift lever is in \[N\] with the clutch released.

- To restart the engine automatically, depress the clutch pedal.

**Auto Idle Stop does not activate when:**

- The engine coolant temperature is low or high.
- The vehicle comes to a stop again before the vehicle speed reaches 3 km/h (2 mph) after the engine starts.
- The shift lever is in any position except \[N\].
- The climate control system is in use with the driver side temperature set to the lower or upper limit, displaying \(\text{Lo}\) or \(\text{Hi}\).
- The climate control system is in use, and the ambient temperature is -20°C or lower, or 40°C or higher.
- \(\text{Lo}\) is on (indicator on).
- You are not wearing a seat belt.
- The engine is started with the bonnet open.
  - Turn off the engine. Close the bonnet before you restart the engine to activate auto idle stop.
- The battery charge is low.

*Not available on all models*
Auto Idle Stop may not activate when:
• The climate control system is in use, and the fan speed is selected to high.
• The climate control system is in use, and the ambient conditions may be different from the climate control settings you have selected.
• When humidity in the interior is high.
• The steering wheel is operated.

Petrol models
• Altitude is high.

The Engine Automatically Restarts When:
The clutch pedal is depressed.

The engine automatically restarts even if the clutch pedal is not depressed with the shift lever in N When:
• The Auto Idle Stop system OFF button is pressed.
• Your vehicle is moved.
• The pressure on the brake pedal is repeatedly applied and released slightly during a stop.
• The battery charge becomes low.
• The steering wheel is operated.

2.0 L engine models
• The +R mode is on.

The engine does not restart automatically when:
• The driver’s seat belt is unlatched. Fasten the driver’s seat belt to keep the Auto Idle Stop activated.
• The shift lever is moved from N to any other position. Shift to N.

i-Multi-Information Display Warning and Information Messages P. 103

When the system stops operating, follow the normal procedure to start the engine.

Starting the Engine P. 382, 385
When Driving

Auto Idle Stop

Driving

Fully depress the clutch pedal.

The engine automatically restarts.

When the Auto Idle Stop Indicator (Green) Starts Blinking Rapidly

The indicator starts blinking rapidly under the following conditions:

- (Windscreen demister) is touched.
- When the climate control system is in use and moisture builds up inside the vehicle.
- When the climate control system is in use and the difference between the set temperature and the actual temperature inside the vehicle becomes significant.
When Driving ECON Button*

ECON Button*

The **ECON** button turns the ECON mode on and off.

**Petrol models**
The ECON mode helps you to improve your fuel economy by adjusting the performance of the engine, transmission, climate control system and cruise control.

**Diesel models**
The ECON mode helps you to improve your fuel economy by adjusting the performance of the transmission, climate control system and cruise control.

* Not available on all models
When Driving

**+R Button**

The +R button turns the +R mode on and off. When you press the +R button, engine, suspension, EPS, and VSA are adjusted, enabling sporty driving.

- **i-Multi-Information Display** P. 120

* Not available on all models
Cruise Control*

Maintains a constant vehicle speed without having to keep your foot on the accelerator pedal. Use cruise control on motorways or open roads where you can travel at a constant speed with little acceleration or deceleration.

**When to use**

- **Vehicle speed for cruise control:** Desired speed in a range from about 30 km/h (18 mph) to about 200 km/h (125 mph)
- **Shift positions for cruise control:** In D or S
- **Automatic transmission models**
- **When the engine speed slows down, try to downshift. You can maintain the set speed if you change gear within five seconds.**

**Manual transmission models**

When driving uphill or downhill, it may not be possible to maintain a constant speed. Try to downshift. You can maintain the set speed if you change gear within five seconds.

When not using cruise control:

- Turn off cruise control by pressing the MAIN button.
- If a different indicator comes on, press the LIM button to switch the cruise control.

**WARNING**

Improper use of the cruise control can lead to a crash.

Use the cruise control only when travelling on open motorways in good weather.

It may not be possible to maintain a constant speed when driving uphill or downhill.

- **Shift positions for cruise control:**
  - In D or S

**How to use**

- **Press the MAIN button on the steering wheel**
- **The indicator is on in the instrument panel:** Cruise control is ready to use.

If a different indicator comes on, press the LIM button to switch the cruise control.

**Models with ECON system**

- **It may take more time to accelerate in ECON mode.**
- **You cannot use cruise control and the adjustable speed limiter at the same time.**
To Set the Vehicle Speed

Take your foot off the accelerator pedal and press the –/SET button when you reach the desired speed.

The moment you release the –/SET button, the set speed is fixed, and cruise control begins. The set speed is displayed.
When Driving

Cruise Control

To Adjust the Vehicle Speed

Increase or decrease the vehicle speed using the RES/+ or –/SET buttons on the steering wheel.

- Each time you press the button, the vehicle speed is increased or decreased by about 1 km/h or 1 mph accordingly.
- If you keep the button pressed, the vehicle speed increases or decreases by about 10 km/h or 10 mph accordingly.

To Cancel

To cancel cruise control, do any of the following:
- Press the CANCEL button.
- Press the MAIN button.
- Press the LIM button.
- Depress the brake pedal.
- Depress the clutch pedal for five seconds or more.

The displayed set speed goes off.

To Cancel

Resuming the prior set speed:
After cruise control has been cancelled, you can still resume the prior set speed by pressing the RES/+ button while driving at a speed of at least 30 km/h (18 mph) or more.

You cannot set or resume in the following situations:
- When vehicle speed is less than 30 km/h (18 mph)
- When the MAIN button is turned off

At vehicle speeds of 25 km/h (16 mph) or less, cruise control is cancelled automatically.
**Adjustable Speed Limiter**

This system enables you to set a maximum speed that cannot be exceeded even if you are depressing the accelerator pedal.

*1.4 L engine, 1.8 L engine, and diesel engine models*

The vehicle speed limit can be set from about 30 km/h (18 mph) to about 250 km/h (156 mph).

*2.0 L engine models*

The vehicle speed limit can be set from about 30 km/h (18 mph) to about 320 km/h (200 mph).

**How to use**

- Press the **MAIN** button on the steering wheel

If a different indicator comes on, press the **LIM** button to switch to the adjustable speed limiter.

*Not available on all models*
When Driving

Adjustable Speed Limiter

To Set the Vehicle Speed

- Take your foot off the pedal and press the \( -/\text{SET} \) button when you reach the desired speed. The moment you release the \( -/\text{SET} \) button, the set speed is fixed, and the adjustable speed limiter is set. The set speed is displayed.
- You can set the previously set speed limit by pressing the \( \text{RES}/+ \) button.

To Set the Vehicle Speed

If you set the speed limit while travelling at less than 30 km/h (18 mph), the speed limit is set to 30 km/h (18 mph).

The beeper sounds and the displayed speed limit blinks if the vehicle speed exceeds the limit by 3 km/h (2 mph) or more on a steep descent.

The adjustable speed limiter is set to the current speed if it is higher than the previously set speed limit when you press the \( \text{RES}/+ \) button.
To Adjust the Speed Limit

Increase or decrease the speed limit by using the **RES/+** or **–/SET** buttons on the steering wheel.

- Each time you press the button, the speed limit is increased or decreased by about 1 km/h or 1 mph accordingly.
- If you keep the button pressed, the speed limit is increased or decreased by about 10 km/h or 10 mph accordingly.

Exceeding the Speed Limit Temporarily

The speed limit can be exceeded by depressing the accelerator pedal fully.

- The displayed limit speed blinks.

Exceeding the Speed Limit Temporarily

The beeper sounds when the accelerator pedal is depressed fully.

The adjustable speed limiter resumes working once the vehicle speed goes lower than the set speed limit.
When Driving  Adjustable Speed Limiter

To Cancel

To cancel the adjustable speed limiter, do any of the following:
- Press the CANCEL button.
- Press the MAIN button.
- Press the LIM button.

The adjustable speed limiter changes into cruise control if the LIM button is pressed.

If there is a problem with the system when you are using the adjustable speed limiter, the beeper sounds and OFF comes on. The adjustable speed limiter will be turned off.
Forward Collision Warning*

Alerts you when it detects the possibility of your vehicle colliding with the vehicle in front of yours.

If the system determines a collision is possible, it gives both visual and audible alerts. Take appropriate action to prevent a collision (apply the brakes, change lanes, etc.).

How the system works
The system may give warnings of potential collisions when your vehicle speed is above 15 km/h (9 mph).

You can set Far, Normal or Near for when warnings start:

* Not available on all models

Important Safety Reminder
Forward Collision Warning cannot detect all objects ahead and may not detect a given object; accuracy of the system will vary based on weather, speed and other factors. Forward Collision Warning does not include a braking function. It is always your responsibility to safely operate the vehicle and avoid collisions.

You can change the Forward Collision Warning Distance setting or turn the system on and off.

Customized Features P. 131

The camera is shared with Lane Departure Warning, Traffic Sign Recognition System and High beam Support System.

For the system’s proper operation:
• Do not impact the camera or the area around the camera when you clean the windscreen.
• Keep the upper windscreen clean. Wipe away any debris including ice and frost.

Consult a dealer in the following cases.
• The camera or the area around the camera is severely impacted.
• The area around the windscreen needs repair.
When Driving
Forward Collision Warning *

Never apply a film or attach any objects to the windscreen that could obstruct the Forward Collision Warning camera’s field of vision. Scratches, nicks, and other damage to the windscreen within the Forward Collision Warning camera’s field of vision can cause the system to operate abnormally. If this occurs, we recommend that you replace the windscreen with a genuine Honda replacement windscreen. Making even minor repairs within the camera’s field of vision or installing an aftermarket replacement windscreen may also cause the system to operate abnormally.

After replacing the windscreen, have a dealer recalibrate the camera. Proper calibration of the Forward Collision Warning camera is necessary for the system to operate properly.

* Not available on all models
Automatic shutoff

Forward Collision Warning may automatically shut itself off and the indicator comes and stays on when:

- The temperature inside the system is high.
- The windshield is blocked by dirt, mud, leaves, wet snow, etc.

Once the conditions that caused Forward Collision Warning to shut off improve or are addressed (e.g., cleaning), the system comes back on.

Automatic shutoff

To help reduce the likelihood that high interior temperatures will cause the camera system to shut off, when parking, find a shady area or face the front of the vehicle away from the sun. If you use a reflective sun shade, do not allow it to cover the camera housing. Covering the camera can concentrate heat on the camera.

If the **Can Not Operate:** message appears:

- Use the climate control system to cool down the interior and, if necessary, the demister mode when windows are fogged.
- Start driving the vehicle to lower the windshield temperature, which cools down the area around the Forward Collision Warning camera.

If the **Can Not Operate:** message appears:

Park your vehicle in a safe place. Wipe away debris blocking the windshield, then start driving again. If the message remains on even after driving for a while with the clean windshield, have your vehicle checked by a dealer.

Continued
When Driving

Forward Collision Warning Limitations

Forward Collision Warning may not activate or may not detect a vehicle in front of your vehicle, and may activate even when you are aware of a vehicle ahead of you, or when there is no vehicle ahead, under the following conditions.

<table>
<thead>
<tr>
<th>Condition</th>
</tr>
</thead>
<tbody>
<tr>
<td>The distance between your vehicle and the vehicle ahead of you is too short.</td>
</tr>
<tr>
<td>A vehicle cuts in front of you at a slow speed, and it brakes suddenly.</td>
</tr>
<tr>
<td>A vehicle suddenly crosses in front of you.</td>
</tr>
<tr>
<td>When either your vehicle or the vehicle ahead of you accelerates rapidly.</td>
</tr>
<tr>
<td>The vehicle ahead of you is a motorcycle, a small vehicle, or a unique vehicle such as a tractor.</td>
</tr>
<tr>
<td>When you drive off-road or on a mountain road, or curved and winding road for an extended period that makes it difficult for the camera to properly detect a vehicle in front of you.</td>
</tr>
<tr>
<td>When there are pedestrians or animals in front of your vehicle.</td>
</tr>
<tr>
<td>When you drive in bad weather (rain, fog, etc.).</td>
</tr>
<tr>
<td>A heavy load in the rear or modifications to the suspension tilts your vehicle.</td>
</tr>
<tr>
<td>An abnormal tyre condition is detected (wrong tyre size, flat tyre, etc.).</td>
</tr>
<tr>
<td>When the windscreen is blocked by dirt, mud, leaves, wet snow, etc.</td>
</tr>
<tr>
<td>When the temperature inside the system is high.</td>
</tr>
<tr>
<td>A sudden change between light and dark such as an entrance or exit of a tunnel.</td>
</tr>
<tr>
<td>You drive into the sunlight (e.g. at dawn or dusk).</td>
</tr>
<tr>
<td>When the windscreen is dirty or cloudy.</td>
</tr>
<tr>
<td>When streetlights are perceived as the taillight of a vehicle in front of yours.</td>
</tr>
<tr>
<td>When driving at night, the vehicle ahead of you is running with either taillight bulb burned out.</td>
</tr>
<tr>
<td>When you drive in the shadows of trees, buildings, etc.</td>
</tr>
<tr>
<td>When your vehicle is towing a trailer*.</td>
</tr>
</tbody>
</table>

* Not available on all models
Lane Departure Warning*

Alerts you when the system detects a possibility of your vehicle unintentionally crossing over left or right side lane markings.

How the System Works

If your vehicle is getting too close to detected left or right side lane markings without a turn signal activated, Lane Departure Warning will give audible and visual alerts.

The beeper sounds and the message appears on the i-multi-information display, letting you know that you need to take appropriate action.

How the System Activates

The system begins to search for lane markings when all the following conditions are met:

- The vehicle is travelling above 64 km/h (40 mph).
- The vehicle is on a straight or slightly curved road.
- The turn signals are off.
- The brake pedal is not depressed.

* Not available on all models

Important Safety Reminder

Like all assistance systems, Lane Departure Warning has limitations. Over-reliance on Lane Departure Warning may result in a collision. It is always your responsibility to keep the vehicle within your driving lane.

Lane Departure Warning only alerts you when lane drift is detected without a turn signal in use. Lane Departure Warning may not detect all lane markings or lane departures; accuracy will vary based on weather, speed and lane marker condition. It is always your responsibility to safely operate the vehicle and avoid collisions.

How the System Activates

Lane Departure Warning may automatically shut off and the indicator comes and stays on.

Indicators P. 97
When Driving

Lane Departure Warning Camera

The camera is located behind the rearview mirror.

Lane Departure Warning On and Off

Press the Lane Departure Warning button to turn the system on and off.

The indicator in the button comes on when the system is on.

Lane Departure Warning Camera

Never apply a film or attach any objects to the windscreen that could obstruct the Lane Departure Warning camera’s field of vision. Scratches, nicks, and other damage to the windscreen within the Lane Departure Warning camera’s field of vision can cause the system to operate abnormally. If this occurs, we recommend that you replace the windscreen with a genuine Honda replacement windscreen. Making even minor repairs within the camera’s field of vision or installing an aftermarket replacement windscreen may also cause the system to operate abnormally. After replacing the windscreen, have a dealer recalibrate the camera. Proper calibration of the Lane Departure Warning camera is necessary for the system to operate properly.

Do not place an object on the top of the instrument panel. It may reflect onto the windscreen and prevent the system from detecting lane lines properly.

To help reduce the likelihood that high interior temperatures will cause the camera system to shut off, when parking, find a shady area or face the front of the vehicle away from the sun. If you use a reflective sun shade, do not allow it to cover the camera housing. Covering the camera can concentrate heat on the camera.
Lane Departure Warning Limitations

Lane Departure Warning may not activate or may not recognize lanes, and may activate even when keeping in the middle of a lane, under the following conditions.

**Condition**

- When you drive in bad weather (rain, fog, etc.).
- A heavy load in the rear or modifications to the suspension tilts your vehicle.
- An abnormal tyre condition is detected (wrong tyre size, flat tyre, etc.).
- When the windscreen is blocked by dirt, mud, leaves, wet snow, etc.
- When the temperature inside the system is high.
- A sudden change between light and dark such as an entrance or exit of a tunnel.
- You drive into the sunlight (e.g. at dawn or dusk).
- When the windscreen is dirty or cloudy.
- When you drive in the shadows of trees, buildings, etc.
- When your vehicle is towing a trailer*.
- When you drive on a wet road surface following another vehicle. The camera may perceive the tyre tracks in the water as lane lines.
- When there is snow or wheel tracks on the side of the road.
- When the road has many repaired area or an erased lane line.
- When the vehicle is running over painted signs or crosswalk markings.
- When you drive in a lane with worn-out lane markings.

---

* Not available on all models

Lane Departure Warning Camera

If the Can Not Operate: message appears:
- Use the climate control system to cool down the interior and, if necessary, the demister mode when windows are fogged.
- Start driving the vehicle to lower the windscreen temperature, which cools down the area around the Lane Departure Warning camera.

If the Can Not Operate: message appears: Park your vehicle in a safe place. Wipe away debris blocking the windscreen, then start driving again. If the message remains on even after driving for a while with the clean windscreen, have your vehicle checked by a dealer.

* Not available on all models
When Driving
Traffic Sign Recognition System

Traffic Sign Recognition System

Reminds you of road sign information, such as the current speed limit and that overtaking is prohibited, your vehicle has just passed through, showing it on the i-multi-information display.

How the System Works

When the camera located behind the rearview mirror captures traffic signs while driving, the system displays the ones that are recognised as designated for your vehicle. The sign icon will be displayed for a while, then until the vehicle reaches a predetermined time and distance.

The sign icon also may switch to another one, or disappear when:

- The end of speed limit or other designated limit is detected.
- Your vehicle enters/exits motorway or highway.
- You make a turn with a turn signal to change direction at an intersection.

The system is designed to detect signs that follow the Vienna Convention standards. Not all signs may be displayed, but any signs posted on roadsides should not be ignored. The Traffic Sign Recognition System is designed to merely provide driving assistance. The driver must still be aware of the road conditions and comply with all road regulations. Certain conditions, such as below, may disrupt the system's proper operations.

- The upper part of the windscreen is fogged or frosted, or is blocked by dirt, mud, leaves, wet snow, etc.
- Dew condensation is formed on the windscreen.

* Not available on all models
When Driving

Traffic Sign Recognition System

Driving

While driving, in addition to when there is no detected sign, you may also see the below screen when:

<table>
<thead>
<tr>
<th>Condition</th>
</tr>
</thead>
<tbody>
<tr>
<td>• The sign is covered with dirt, snow, or frost.</td>
</tr>
<tr>
<td>• The ambient brightness is too dark.</td>
</tr>
<tr>
<td>• In bad weather (heavy rain, fog, snow, etc.)</td>
</tr>
<tr>
<td>• Faded signs</td>
</tr>
<tr>
<td>• Signs positioned on bends</td>
</tr>
<tr>
<td>• Rotated or damaged signs</td>
</tr>
<tr>
<td>• Concealed or poorly positioned signs</td>
</tr>
<tr>
<td>• When the windscreen is blocked by dirt, mud, leaves, wet snow, etc.</td>
</tr>
<tr>
<td>• When the temperature inside the system is high.</td>
</tr>
<tr>
<td>• A sudden change between light and dark such as an entrance or exit of a tunnel.</td>
</tr>
<tr>
<td>• You drive into the sunlight (e.g. at dawn or dusk).</td>
</tr>
<tr>
<td>• When the windscreen is dirty or cloudy.</td>
</tr>
<tr>
<td>• When you drive in the shadows of trees, buildings, etc.</td>
</tr>
</tbody>
</table>

* Not available on all models

* Traffic Sign Recognition System *

If the Can Not Operate: message appears:
• Use the climate control system to cool down the interior and, if necessary, the demister mode when windows are fogged.
• Start driving the vehicle to lower the windscreen temperature, which cools down the area around the system camera.

If the Can Not Operate: message appears:
Park your vehicle in a safe place. Wipe away debris blocking the windscreen, then start driving again. If the message remains on even after driving for a while with the clean windscreen, have your vehicle checked by a dealer.

If the appears in amber on the i-multi-information display while driving, the system may have malfunctioned.
Have your vehicle checked by a dealer.

In a situation above, you may also see this icon. The system is temporarily cancelled.
When Driving

Traffic Sign Recognition System

Signs Displayed on the i-Multi-Information Display

Two traffic signs can be simultaneously displayed next to each other when detected. The speed limit sign icon is displayed on the right half of the screen. The overtaking prohibition sign icon appears on the left. Any additional sign that indicates speed limit based on weather (rain, snow, etc.) or specific period of time can appear on either side.

■ Signs Displayed on the i-Multi-Information Display

When main mode is selected

When main mode is not selected

Depending on situation, *1 can be replaced with *2, or *2 can appear on the right side.
■ Selecting to display traffic signs when main mode is off
You can continue displaying reduced-size traffic sign icon on the i-multi-information display even while the main mode is not selected.

➡ Customized Features P. 131
Vehicle Stability Assist (VSA) System

Helps to stabilise the vehicle during cornering if the vehicle turns more or less than what was intended. It also assists in maintaining traction on slippery surfaces. It does so by regulating engine output and selectively applying the brakes.

VSA Operation

When VSA activates, you may notice that the engine does not respond to the accelerator. You may also notice some noise from the hydraulic system. You will also see the indicator blink.

VSA System Indicator

The VSA may not function properly if tyre types and sizes are mixed. Make sure to use the same size and type of tyre, and the air pressures are as specified.

When the VSA indicator comes on and stays on while driving, there may be a problem with the system. While this may not interfere with normal driving, have your vehicle checked by a dealer immediately.

VSA cannot enhance stability in all driving situations and does not control the entire braking system. You still need to drive and corner at speeds appropriate for the conditions and always leave a sufficient margin of safety.
When Driving
Vehicle Stability Assist (VSA) System

This button is on the driver side control panel. To turn the VSA system on and off, press and hold it until you hear a beep.

VSA stops and the indicator comes on.

To turn it on again, press the \( \text{VSA OFF} \) button until you hear a beep.

VSA is turned on every time you start the engine, even if you turned it off the last time you drove the vehicle.

Vehicle Stability Assist (VSA) System

Without VSA, your vehicle will have normal braking and cornering ability, but it will not have VSA traction and stability enhancement.

In certain unusual conditions when your vehicle gets stuck in shallow mud or fresh snow, it may be easier to free it with VSA temporarily switched off.

When the VSA system is off, the traction control system is also off. You should only attempt to free your vehicle with VSA off if you are not able to free it when the system is on.

Immediately after freeing your vehicle, be sure to switch VSA on again. We do not recommend driving your vehicle with the VSA and traction control systems switched off.

You may hear a motor sound coming from the engine compartment while system checks are being performed immediately after starting the engine or while driving. This is normal.
Agile Handling Assist System

Lightly brakes the front wheels, as needed, when you turn the steering wheel, and helps support the vehicle's stability and performance during cornering.

When the VSA system indicator comes on and stays on while driving, the agile handling assist system does not activate.

You may hear a sound coming from the engine compartment while the system is activated. This is normal.

The agile handling assist system cannot enhance stability in all driving situations. You still need to drive and corner at speeds appropriate for the conditions and always leave a sufficient margin of safety.
Blind Spot Information System*

Is designed to detect vehicles in specified alert zones adjacent to your vehicle, particularly in harder to see areas commonly known as “blind spots.”

WARNING
Failure to visually confirm that it is safe to change lanes before doing so may result in a crash and serious injury or death.

Do not rely only on the blind spot information system when changing lanes.

Always look in your mirrors, to either side of your vehicle, and behind you for other vehicles before changing lanes.

Important Safety Reminder
Like all assistance systems, blind spot information system has limitations. Over reliance on blind spot information system may result in a collision.

* Not available on all models

Continued
When Driving

Blind Spot Information System *

■ How the system works

- Radar sensors detect a vehicle in the alert zone when your vehicle is moving forward at 20 km/h (12 mph) or faster.

Alert zone range
A: Approx. 0.5 m (1.6 ft.)
B: Approx. 3 m (10 ft.)
C: Approx. 3 m (10 ft.)

You can change the setting for blind spot information system.

Customized Features P. 131

Turn the system off when towing a trailer*. The system may not work properly for the following reasons:

- The added mass tilts the vehicle and changes the radar coverage.
- The trailer itself can be detected by the radar sensors, causing the blind spot information system alert indicators to come on.

The system is for your convenience only. Even if an object is within the alert zone, the following situations may occur.

- The blind spot information system alert indicator may not come on due to obstruction (splashes, etc.) even without the MID appearing.
- The blind spot information system alert indicator may come on even with the message appearing.

The blind spot information system alert indicator may not come on under the following conditions:

- A vehicle does not stay in the alert zone for more than two seconds.
- A vehicle is parked in a side lane.
- The speed difference between your vehicle and the vehicle you are passing is greater than 10 km/h (6 mph).
- An object not detected by the radar sensors approaches or passes your vehicle.
- A vehicle running in the adjacent lane is a motorcycle or other small vehicle.

The system does not operate when in [R].

* Not available on all models
When Driving

Blind Spot Information System

When the system detects a vehicle

- **Blind Spot Information Alert Indicator:** Located near the outside rearview mirror on both sides.

  - **Comes on when**
    - A vehicle enters the alert zone from behind to overtake you with a speed difference of no more than 50 km/h (31 mph) from your vehicle.
    - You pass a vehicle with a speed difference of no more than 20 km/h (12 mph).

  - **Blinks and the beeper sounds when**
    You move the turn signal lever in the direction of the detected vehicle. The beeper sounds three times.

* Not available on all models
Deflation Warning System

Instead of directly measuring the pressure in each tyre, the deflation warning system on this vehicle monitors and compares the rolling radius and rotational characteristics of each wheel and tyre while you are driving to determine if one or more tyres are significantly under-inflated. This will cause the low tyre pressure/deflation warning system indicator to come on and a message to appear on the i-multi-information display.

Deflation Warning System Calibration

You must start deflation warning system calibration every time you:
• Adjust the pressure in one or more tyres.
• Rotate the tyres.
• Replace one or more tyres.

Before calibrating the deflation warning system:
• Set the cold tyre pressure in all four tyres.

Make sure:
• The vehicle is at a complete stop.

Manual transmission models
• The parking brake is applied.

Automatic transmission models
• The shift lever is in P.

All models
• The ignition switch is in ON II]*1.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

Deflation Warning System

The system does not monitor the tyres when driving at low speed.

Conditions such as low ambient temperature and altitude change directly affect tyre pressure and can trigger the low tyre pressure/deflation warning system indicator to come on.

Tyre pressure checked and inflated in:
• Warm weather can become under-inflated in colder weather.
• Cold weather can become over-inflated in warmer weather.

The low tyre pressure indicator will not come on as a result of over inflation.

The deflation warning system may not function properly if tyre type and size are mixed. Make sure to use the same size and type of tyre.

Checking and Maintaining Tyres P. 534

The low tyre pressure/deflation warning system indicator may come on with a delay or may not come on at all when:
• You rapidly accelerate, decelerate, or turn the steering wheel.
• You drive on snowy or slippery roads.
• Snow chains are used.

The low tyre pressure/deflation warning system indicator may come on under the following conditions:
• A compact spare tyre* is used.
• There is a heavier and uneven load on the tyres, such as when towing a trailer, than the condition at calibration.
• Snow chains are used.
You can calibrate the system from the customized features on the i-multi-information display.

1. Press the **MENU** button.
2. Press the + or - button to select **Customise settings**.
3. Press the + or - button to select **Deflation warning system**.
4. Press the + or - button and select **Initialise**.
   - The display returns to the normal screen.
   - The calibration process finishes automatically.

**Deflation Warning System Calibration**

- **Deflation Warning System** cannot be calibrated if a compact spare tyre* is installed.
- The calibration process requires approximately 30 minutes of cumulative driving at speeds between 40–100 km/h (25–62 mph).
- During this period, if the ignition is turned on and the vehicle is not moved within 45 seconds, you may notice the low tyre pressure indicator comes on briefly. This is normal and indicates that the calibration process is not yet complete.

If the snow chains are installed, remove them before calibrating the deflation warning system.

If the low tyre pressure/deflation warning system indicator comes on even when the properly inflated specified regular tyres are installed, have your vehicle checked by a dealer.

We recommend that the tyres be replaced with the same brand, model, and size as the originals. Ask a dealer for details.

* Not available on all models
Braking

Brake System

Parking Brake

Use the parking brake to keep the vehicle stationary when parking.

**To apply:**
Pull the lever fully up without pressing the release button.

**To release:**
1. Pull the lever slightly, and press and hold the release button.
2. Lower the lever down all the way, then release the button.

**NOTICE**
Release the parking brake fully before driving. The rear brakes and axle can be damaged if you drive with the parking brake applied.

If you start driving without fully releasing the parking brake, a buzzer sounds as a warning, and 🚨 appears on the i-multi-information display.

Always apply the parking brake when parking.
**Foot Brake**

Your vehicle is equipped with disc brakes at all four wheels. A vacuum power assist helps to reduce the effort needed on the brake pedal. The brake assist system increases the stopping force when you depress the brake pedal hard in an emergency situation. The anti-lock brake system (ABS) helps you retain steering control when braking very hard.

- **Brake Assist System** P. 433
- **Anti-lock Brake System (ABS)** P. 432

**Foot Brake**

Check the brakes after driving through deep water, or if there is a buildup of road surface water. If necessary, dry the brakes by lightly depressing the pedal several times.

If you hear a continuous metallic friction sound when applying the brakes, the brake pads need to be replaced. Have your vehicle checked by a dealer.

Constantly using the brake pedal while going down a long hill builds up heat, which reduces the brake effectiveness. Apply engine braking by taking your foot off the accelerator pedal and downshifting to a lower gear. With manual transmission use a lower gear for greater engine braking.

Do not rest your foot on the brake pedal while driving, as it will lightly apply the brakes and cause them to lose effectiveness over time and reduce pad life. It will also confuse drivers behind you.

**Brake squeal**

To satisfy the performance under a wide range of driving conditions, a high-performance braking system is equipped on your vehicle. You may hear the brake squeal under certain conditions, such as vehicle speed, deceleration, humidity, and so on. This is not a malfunction.
Braking

Anti-lock Brake System (ABS)

ABS

Helps to prevent the wheels from locking up, and helps you retain steering control by pumping the brakes rapidly, much faster than you.

The electronic brake distribution (EBD) system, which is part of the ABS, also balances the front-to-rear braking distribution according to vehicle loading.

You should never pump the brake pedal. Let the ABS work for you by always keeping firm, steady pressure on the brake pedal. This is sometimes referred to as “stomp and steer.”

ABS operation

The brake pedal may pulsate slightly when the ABS is working. Keep holding the pedal firmly down. On dry pavement, you will need to press on the brake pedal very hard before the ABS activates. However, you may feel the ABS activate immediately if you are trying to stop on snow or ice.

When the vehicle speed goes under 10 km/h (6 mph), the ABS stops.

NOTICE

The ABS may not function correctly if you use an incorrect tyre type and size.

When the ABS indicator comes on while driving, there may be a problem with the system. While normal braking is not affected, there is a possibility of the ABS not operating. Have your vehicle checked by a dealer immediately.

The ABS does not reduce the time or distance it takes to stop the vehicle. It only helps with steering control during hard braking.

In the following cases, your vehicle may need more stopping distance than a vehicle without the ABS:

- When driving on rough road surfaces, including when driving on uneven surfaces, such as gravel or snow.
- When tyre chains are installed.

You may hear a motor sound coming from the engine compartment while system checks are being performed immediately after starting the engine or while driving. This is normal.
Brake Assist System

■ Brake Assist System
Designed to assist the driver by generating greater braking force when you depress the brake pedal hard during emergency braking.

■ Brake assist system operation
Depress the brake pedal firmly for more powerful braking.

When brake assist operates, the pedal may wiggle slightly and an operating noise may be heard. This is normal. Keep holding the brake pedal firmly down.
Braking

City-Brake Active system*

Can assist you when driving at a low speed, and there is a possibility of your vehicle colliding with a vehicle detected right in front of yours. The City-Brake Active system is designed to alert you when a potential collision is determined, as well as to reduce your vehicle speed when a collision is deemed unavoidable to help to minimise collision severity.

How the System Works

A laser sensor starts to monitor if there is a vehicle in front of you when your vehicle speed is between about 5 km/h (3 mph) and about 32 km/h (20 mph).

The system activates when the speed difference between your vehicle and a vehicle detected in front of you is about 5 km/h (3 mph) to 32 km/h (20 mph) with a high chance of collision.

The system don't activate when shift position is (R).

* Not available on all models

**WARNING**

Do not rely on the city-brake active system to avoid every possible frontal collision.

Failure to pay close attention to a vehicle ahead of you, and to operate the brake pedal appropriately according to the situation can cause serious injury or death.

For the system to work properly:
- Always keep the upper part of the windscreen clean. Wipe away any dirt, ice, frost, etc.
- Do not impact the area around the laser sensor when cleaning the windscreen.
- Do not remove the laser sensor form the unit.

Manual transmission models

When the vehicle comes to a stop with the system’s automatic braking, the engine may stop. To start the engine again, follow the standard procedure.

Starting the Engine  P. 382, 385
Collision Alert Stages

The beeper sounds, and a CTBA warning blinks on the i-multi-information display, and hard braking is applied when a possible collision becomes likely unavoidable. This automatic braking with the system activated is cancelled after the vehicle comes to a complete stop. Apply the brakes accordingly. A message indicating that the system has activated appears on the i-multi-information display after the vehicle is stopped.

**i-Multi-Information Display Warning and Information Messages** P. 103
The system may be cancelled if you operate the brake pedal, the accelerator pedal, or the steering wheel to avoid the collision.

* City-Brake Active system*

The system may not activate or may not detect a vehicle in front of your vehicle under the following conditions:
- A vehicle in front of you is diagonally, horizontally, or frontally positioned.
- The distance between your vehicle and the vehicle ahead of you is too short.
- The speed difference between your vehicle and a vehicle ahead of you is large.
- A vehicle cuts in front of you, and brakes suddenly.
- You rapidly accelerate your vehicle, getting closer to a vehicle ahead.
- An oncoming vehicle suddenly drifts in front of you.
- Your vehicle suddenly drifts into the oncoming lane.
- A vehicle suddenly crosses in front of you at intersections.
- When driving in bad weather (heavy rain, fog, snow, etc.).
- When driving on a curved or winding road.
- A vehicle in front of you is extremely dirty, making it difficult to reflect radio waves well.
- You depress the brake pedal or turn the steering wheel to avoid a collision.
- A vehicle ahead of you is a motorcycle or other small vehicle the sensor cannot detect properly.
- The upper part of the windscreen around the laser sensor is covered with dirt, ice frost, etc.

The system may not activate while you are fully depressing the accelerator pedal.

* Not available on all models

Continued
Braking

City-Brake Active system*

### The System On and Off

You can turn the system on and off using the i-multi-information display.

*Customized Features* P. 131

When the system is off, the **CTBA** indicator in the instrument panel comes on.

City-Brake Active system is turned on every time you turn the ignition switch to **ON** [II]*1*, even if you turned it off the last time you drove the vehicle.

*1: Models with the keyless access system have an **ENGINE START/STOP** button instead of an ignition switch.

**City-Brake Active system**

The system may automatically shut off, and the **CTBA** indicator can come on and the message can appear on the i-multi-information display when:

- The temperature around the laser sensor on the upper part of the windscreen becomes high.
- The area around the laser sensor, which is located in the upper part of the windscreen, is covered with obstacles, such as dirt, ice and frost.
- The bonnet is covered with obstacles such as snow.

Stop your vehicle in a safe place, and
- Use the air conditioning system to cool down the interior if the laser sensor temperature is high.
- Remove any obstacles such as dirt and snow from the windscreen and bonnet.

*Indicators* P. 82

Once the conditions that caused the system to shut off improve, the system comes back on.

Turn off the system when:

- You use a dynamometer or put the wheels on a roller.
- Driving off road or on a mountainous road obstructed with branches and leaves.

* Not available on all models
With Little Chance of a Collision

The system may activate even when you are aware of a vehicle ahead of you, or when there is no vehicle ahead. Some examples of this are:

- **When passing**
  Your vehicle approaches another vehicle ahead of you and you change lanes to pass.

- **At an intersection**
  Your vehicle approaches or passes another vehicle that is making a left or right turn.

- **Through a low bridge**
  You drive under a low or narrow bridge.

- **Speed bumps, road work sites, train tracks, roadside objects, etc.**
  You drive over speed bumps, steel road plates, etc., or your vehicle approaches train tracks or roadside objects, such as a traffic sign and guard rail, on a curve.

- **When parking**
  Your vehicle approaches a stationary vehicle or wall.

City-Brake Active system *

Take your vehicle to a dealer if you need the laser sensor or area around it to be repaired, or removed, or the area around the laser sensor is strongly impacted.

Do not alter your vehicle’s suspension. Changing the vehicle height prevents the system to work properly.

Make sure to use the same size and type of tyre for all four wheels. Use the tyres that are all in about the same condition with adequate tread. If not, the system may operate abnormally.

The system may not work properly if:
- Your vehicle has heavy load in the rear.
- Tyres are over- or underinflated.

* Not available on all models

Continued
About the Laser Equipped in the System

The City-Brake Active system unit, including the laser sensor, is located behind the rearview mirror.

Following lists the classified specifications of the laser used in this system according to the IEC requirements. The same information can be found in the IEC60825-1 standard labels.

<table>
<thead>
<tr>
<th>Laser classification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Max average power: 45 mW</td>
</tr>
<tr>
<td>Pulse duration: 33 ns</td>
</tr>
<tr>
<td>Wavelength: 905 nm</td>
</tr>
<tr>
<td>Average power angle (horizontal × vertical): 28 × 12</td>
</tr>
</tbody>
</table>

![Laser Sensor Image]

WARNING

Handling the laser sensor improperly can lead to eye injury.

To avoid eye injury, keep the following:
- Do not take the sensor apart from the unit.
- Never look at the sensor within a 100 mm distance using an optical device, such as a magnified glass, microscopes, and an object lens.

* Not available on all models
1.4 L engine, 1.8 L engine, and diesel engine models

Emergency Stop Signal

Activates when you brake hard while driving at 60 km/h or above to alert drivers behind you about sudden braking by rapidly flashing hazard warning lights. This may help to alert drivers behind you to take appropriate means to avoid a possible collision with your vehicle.

■ When the system activates:

1. Hard Braking
2. Brake Lights Comes On
3. Hazard Warning Lights Flash
4. Hazard Warning Indicators Blink

The hazard warning lights stop flashing when:
- You release the brake pedal.
- The ABS is deactivated.
- Your vehicle’s decelerating speed becomes moderate.
- You press the hazard warning button.
Parking Your Vehicle

When Stopped

**Automatic transmission models**

1. Depress the brake pedal firmly with the shift lever in \textbf{D}.
2. Apply the parking brake while holding the brake pedal down.
3. Move the shift lever to \textbf{P}.
4. Turn off the engine.

**Manual transmission models**

1. Stop the vehicle completely.
2. Apply the parking brake while holding the brake pedal down.
3. Change the shift lever to \textbf{N}.
4. Keep idling the engine for about 10 seconds.

**Diesel models**

5. Turn off the engine.
6. Change the shift lever to \textbf{1} or \textbf{R} for locking the gear.

**All models**

Always set the parking brake firmly, in particular if you are parked on an incline.

---

**Parking Your Vehicle**

Do not park your vehicle near flammable objects, such as dry grass, oil, or timber. Heat from the exhaust can cause a fire.

**When Stopped**

**NOTICE**

The following can damage the transmission:

- Depressing the accelerator and brake pedals simultaneously.
- Holding the vehicle in place when facing uphill by depressing the accelerator pedal.
- Moving the shift lever into \textbf{P} before the vehicle stops completely.

**Diesel models**

Keep idling the engine for a few minutes if your vehicle has towed a trailer. The engine idling may be prohibited in some countries. Check and follow your local legal requirements.

**All models**

In extremely cold temperatures, the parking brake may freeze up if applied. If such temperatures are expected, do not apply the parking brake but, if parking on a slope, either turn the front wheels so they will contact the curb if the vehicle rolls down the slope or block the wheels to keep the vehicle from moving. If you do not take either precaution, the vehicle may roll unexpectedly, leading to a crash.
Parking Sensor System*

The corner and centre sensors monitor obstacles behind your vehicle, and the beeper and i-multi-information display let you know the approximate distance between your vehicle and the obstacle.

■ The sensor location and range

* Not available on all models

---

Driving

Parking Sensor System*

Even when the system is on, always confirm if there is no obstacle near your vehicle before parking.

The system may not work properly when:
- The sensors are covered with snow, ice, mud or dirt.
- The vehicle is on uneven surface, such as grass, bumps, or a hill.
- The vehicle has been out in hot or cold weather.
- The system is affected by devices that emit ultrasonic waves.
- Driving in bad weather.

The system may not sense:
- Thin or low objects.
- Sonic-absorptive materials, such as snow, cotton, or sponge.
- Objects directly under the bumper.

Do not put any accessories on or around the sensors.

Continued
Parking Your Vehicle ▶ Parking Sensor System

■ Parking sensor system on and off

With the ignition switch in ON [II]*, press the parking sensor system button to turn on or off the system. The indicator in the button comes on when the system is on.

The front corner and front centre sensors start to detect an obstacle when the shift lever is in any position other than [P] or [R], and the vehicle speed is less than 8 km/h (5 mph).

The front corner, rear corner and rear centre sensors start to detect an obstacle when the shift lever is in [R], and the vehicle speed is less than 8 km/h (5 mph).

Manual transmission models
You also need to release the parking brake.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

When you turn the ignition switch to ON [II]*, the system will be in the previously selected condition.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
### Models without navigation system

</tbody>
</table>

*1: At this stage, only the centre sensors detect obstacles.
Rearview screen with parking sensor
When the distance between your vehicle and obstacle behind becomes shorter, the navigation system’s rearview screen displays the parking sensor indicators simultaneously.

The indicators on the navigation screen change colour, and blink the same as the indicators on the i-multi-information display.

Turning off All Rear Sensors

1. Make sure that the parking sensor system is not activated. Turn the ignition switch to LOCK 0.”
2. Press and hold the parking sensor system button, and turn the ignition switch to ON 1.”
3. Keep pressing the button for 10 seconds. Release the button when the indicator in the button blinks.
4. Press the button again. The indicator in the button goes off.

The beeper sounds twice. The rear sensors are now turned off.

To turn the rear sensors on again, follow the above procedure. The beeper sounds three times when the rear sensors come back on.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

Turning off All Rear Sensors

When you shift to R, the indicator in the parking sensor system button blinks as a reminder that the rear sensors have been turned off.
Cross Traffic Monitor*

Monitors the rear corner areas using the radar sensors when reversing, and alerts you if a vehicle approaching from a rear corner is detected.

The system is convenient especially when you are getting out of a parking space backwards.

CAUTION

Cross traffic monitor is for your convenience only. The system cannot detect all approaching vehicles or avoid all possible collisions.

Failure to visually confirm that it is safe to reverse the vehicle before doing so may result in a collision. Do not rely only on the system's audible and visual alerts when reversing.

Do not solely rely on the system when reversing; always also use your mirrors, and look behind and to the sides of your vehicle before reversing.

The backup sensor system's alerting buzzer overrides the cross traffic monitor buzzer when the sensors are detecting obstacles at the closest range.

* Not available on all models
How the System Works

The system activates when:
- Turn the ignition switch to ON [II]°1.
- The Cross Traffic Monitor is turned on.
  - Cross Traffic Monitor On and Off P. 450
  - Customized Features P. 131, 313
- The shift lever is in [R].

When a vehicle approaches from a rear corner, cross traffic monitor alerts you with a buzzer and a displayed warning.

°1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
* Not available on all models

Cross Traffic Monitor°

Cross traffic monitor may not detect or may delay detecting an approaching vehicle, or may alert detection without an approaching vehicle under the following conditions:
- An obstacle, such as another vehicle and a wall, near your vehicle's rear bumper, is blocking the radar sensor's scope.
- Your vehicle is moving at the speed of about 5 km/h (3 mph) or higher.
- A vehicle is approaching at the speed other than between about 10 km/h (6 mph) and 25 km/h (16 mph).
- The system picks up external interference such as other radar sensors from another vehicle or strong radio wave transmitted from a facility nearby.
- Either corner of the rear bumper is covered with snow, ice, mud or dirt.
- When there is bad weather.
- Your vehicle is on an incline.
- Your vehicle is tilted due to a heavy load in the rear.
- Your vehicle is reversing towards a wall, a poll, a vehicle, and so on.
- The rear bumper or the sensors have been improperly repaired or the rear bumper has been deformed.
  - Have a vehicle checked by a dealer.
Parking Your Vehicle

The system will not detect a vehicle that approaches from directly behind your vehicle, nor will it provide alerts about a detected vehicle when it moves directly behind your vehicle.

The system does not detect or provide alerts for a vehicle that is moving away from your vehicle, and it may detect or alert for pedestrians, bicycles, or stationary objects.

Cross Traffic Monitor *

For proper operation, always keep the rear bumper corner area clean. Do not cover the rear bumper corner area with labels or stickers of any kind.

* Not available on all models
When the System Detects a Vehicle

Models without rearview camera

![i-Multi-Information Display](image)

![Audio/Information Screen*](image)

A warning icon appears on the i-multi-information display or the audio/information screen*.

Models with rearview camera

![i-Multi-Information Display](image)

![Check Your Surroundings](image)

An arrow icon appears on the side a vehicle is approaching on the i-multi-information display or the audio/information screen*.

Cross Traffic Monitor *

You may see the following icon on the i-multi-information display under certain circumstances:

Indicates in amber that the rear bumper corners are covered with snow, mud, etc. The system is temporarily cancelled. Remove debris from the rear bumper corners.

Indicates in amber that there is a problem with the system. Have your vehicle checked by a dealer.

* Not available on all models
Cross Traffic Monitor On and Off

You can switch on and off the system using the i-multi-information display or the audio/information screen.  

Customized Features P. 131, 313

About Your Rearview Camera

The i-multi-information display or the audio/information screen* can display your vehicle's rear view. The display automatically changes to a rear view when the shift lever is moved to R.

Rearview Camera Display Area

You can also change the rear camera setting by pressing the MENU button on the rear camera screen. When you press the MENU button and select Display, the following items are available in additional:

- **Display** tab: Adjusts Brightness, Contrast, and Black Level of the rear camera screen.
- **Colour** tab: Adjusts Colour and Tint of the rear camera screen.

* Not available on all models
Fuel Information

■ Fuel recommendation

**Premium unleaded petrol, research octane number 95 or higher**

Your vehicle is designed to operate on premium unleaded petrol with a research octane of 95 or higher. If this octane grade is unavailable, regular unleaded petrol with a research octane of 91 or higher may be used temporarily.

Use of regular unleaded petrol can cause metallic knocking noises in the engine and will result in decreased engine performance. The long-term use of regular-grade petrol can lead to engine damage.

■ Fuel tank capacity: 50 litres

---

**NOTICE**

Use of petrol that contains lead presents the following risks:

• Damage to the exhaust system including the catalytic converter
• Damage to the engine and fuel system
• Detrimental effects on the engine and other systems

**Oxygenated Fuels**

Oxygenated fuels are blended with petrol and ethanol or ether compound. Your vehicle is also designed to operate on oxygenated fuels containing up to 10% ethanol by volume and up to 22% ETBE by volume, based on the EN 228 standards. Consult a dealer for more information.
### Diesel models

**Fuel Information**

- **Fuel recommendation**
  
  **EN 590 standard diesel fuel**

  Select the proper clean fuel of good quality according to the regional and climate condition. Use of improper fuel can reduce engine power.

- **Fuel tank capacity:** 50 litres

---

**NOTICE**

Serious damage may occur if petrol is used in diesel engines.

Your vehicle is not designed to use Biodiesel (pure or high concentration more than specified by EN590). Consult a dealer for more information.
Petrol models

How to Refuel

1. Stop your vehicle with the service station pump on the left side of the vehicle in the rear.
2. Turn off the engine.
3. Pull on the fuel fill door release handle under the driver’s side lower outside corner of the dashboard. The fuel fill door opens.

4. Remove the fuel fill cap slowly. If you hear a release of air, wait until this stops, then turn the knob slowly to open the fuel fill cap.

5. Place the fuel fill cap in the holder.
6. Insert the fuel filler nozzle fully.
   - When the tank is full, the filler nozzle will click off automatically. This leaves space in the fuel tank in case the fuel expands with a change in the temperature.
7. After filling, replace the fuel fill cap, tightening it until you hear it click at least once.
   - Shut the fuel fill door by hand.

Petrol is highly flammable and explosive. You can be burned or seriously injured when handling fuel.

- Stop the engine, and keep heat, sparks, and flame away.
- Handle fuel only outdoors.
- Wipe up spills immediately.

Do not continue to add fuel after the filler nozzle has automatically stopped. Additional fuel can exceed the full tank capacity.

The filler nozzle automatically stops to leave space in the fuel tank so that fuel does not overflow as a result of changes in air temperature.

WARNING

Driving

How to Refuel
Diesel models

How to Refuel

Your fuel tank is not equipped with a fuel filler cap. You can insert the diesel fuel filler nozzle directly into the fuel filler neck. The tank seals itself again when you pull out the filler nozzle.

1. Stop your vehicle with the service station pump on the left side of the vehicle in the rear.
2. Turn off the engine.
3. Pull on the fuel fill door release handle under the driver's side lower outside corner of the dashboard. The fuel fill door opens.
4. Insert the filler nozzle fully. Keep the filler nozzle level. When the tank is full, the filler nozzle will click off automatically. After filling, wait about 10 seconds before removing the filler nozzle.
5. Shut the fuel fill door by hand.

Only a service station diesel fuel filler nozzle can be used.
The filler nozzle automatically stops to leave space in the fuel tank so that fuel does not overflow as a result of changes in air temperature.
Do not continue to add fuel after the filler nozzle has automatically stopped. Additional fuel can exceed the full tank capacity.

If you have to refuel your vehicle from a portable container, use the funnel provided with the vehicle.

Refueling From a Portable Fuel Container
P. 602
Fuel Economy and CO₂ Emissions

Improving Fuel Economy and Reducing CO₂ Emissions

Achieving fuel economy and reducing CO₂ emissions is dependent on several factors, including driving conditions, load weight, idling time, driving habits, and vehicle condition. Depending on these and other factors, you may not achieve the rated fuel economy of this vehicle.

### Maintenance and Fuel Economy

You can optimize your fuel economy with proper maintenance of your vehicle. Always maintain your vehicle according to the service reminder symbols displayed on the i-multi-information display. On vehicles without service reminder system, follow the maintenance schedule in the service book that came with your vehicle. On vehicles without the service book, follow the maintenance schedule in this owner’s manual. If necessary, consult your warranty booklet.

- **Maintenance Schedule**

  * Not available on all models

  - Use engine oil with the viscosity recommended by the ACEA or API Certification Seal.
  - Maintain the specified tyre pressure.
  - Do not load the vehicle with excess luggage.
  - Keep your vehicle clean. A buildup of snow or mud on your vehicle’s underside adds weight and increases wind resistance.

### Improving Fuel Economy and Reducing CO₂ Emissions

Direct calculation is the recommended method to determine actual fuel consumed while driving.

\[
\text{L per 100 km} = \frac{\text{Litres of fuel}}{\text{Kilometres driven}} \times \frac{100}{\text{Miles driven}}
\]

\[
\text{Miles per Gallon} = \frac{\text{Gallons of fuel}}{\text{Miles driven}}
\]
Accessories and Modifications

Accessories

When installing accessories, check the following:

- Do not install accessories on the windscreen. They can obstruct your view and delay your reaction to driving conditions.
- Do not install any accessories over areas marked SRS Airbag, on the sides or backs of the front seats, on front or side pillars, or near the side windows. Accessories installed in these areas may interfere with proper operation of the vehicle’s airbags or may be propelled into you or another occupant if the airbags deploy.
- Be sure electronic accessories do not overload electrical circuits or interfere with proper operation of your vehicle.
  - Fuses P. 592
- Before installing any electronic accessory, have the installer contact a dealer for assistance. If possible, have a dealer inspect the final installation.

Modifications

Do not modify your vehicle or use non-Honda components that can affect its handling, stability, and reliability.

Overall vehicle performance can be affected. Always make sure all equipment is properly installed and maintained, and that it meets your country’s and local regulations.

WARNING

Improper accessories or modifications can affect your vehicle’s handling, stability, and performance, and cause a crash in which you can be seriously hurt or killed.

Follow all instructions in this owner's manual regarding accessories and modifications.

When properly installed, mobile phones, alarms, two-way radios, radio antennas, and low-powered audio systems should not interfere with your vehicle’s computer controlled systems, such as your airbags and anti-lock brakes.

Honda Genuine accessories are recommended to ensure proper operation on your vehicle.

Inspection and Maintenance

For your safety, perform all listed inspections and maintenance to keep your vehicle in good condition. If you become aware of any abnormality (noise, smell, insufficient brake fluid, oil residue on the ground, etc.), have your vehicle inspected by a dealer. (Note, however, that service at a dealer is not mandatory to keep your warranties in effect.) Refer to the maintenance schedule in this owner's manual for detailed maintenance and inspection information.

- Maintenance Schedule * P. 473

- Types of Inspection and Maintenance

- Daily inspections
  Perform inspections before long distance trips, when washing the vehicle, or when refueling.

- Periodic inspections
  - Check the automatic transmission fluid level monthly.
    - Automatic Transmission Fluid P. 508
  - Check the brake fluid level monthly.
    - Brake/Clutch Fluid P. 510
  - Check the tyre pressure monthly. Examine the tread for wear and foreign objects.
    - Checking and Maintaining Tyres P. 534
  - Check the operation of the exterior lights monthly.
    - Replacing Light Bulbs P. 514
  - Check the condition of the wiper blades at least every six months.
    - Checking and Maintaining Wiper Blades P. 530

* Not available on all models
Safety When Performing Maintenance

Some of the most important safety precautions are given here. However, we cannot warn you of every conceivable hazard that can arise in performing maintenance. Only you can decide whether or not you should perform a given task.

Maintenance Safety

- To reduce the possibility of fire or explosion, keep cigarettes, sparks, and flames away from the battery and all fuel related parts.
- Never leave rags, towels, or other flammable objects under the bonnet.
  - Heat from the engine and exhaust can ignite them causing a fire.
- To clean parts, use a commercially available degreaser or parts cleaner, not petrol.
- Wear eye protection and protective clothing when working with the battery or compressed air.
- Engine exhaust contains carbon monoxide, which is poisonous and can kill you.
  - Operate the engine only when there is sufficient ventilation.

Vehicle Safety

- The vehicle must be in a stationary condition.
  - Make sure your vehicle is parked on level ground, the parking brake is set, and the engine is off.
- Be aware that hot parts can burn you.
  - Make sure to let the engine and exhaust system cool thoroughly before touching vehicle parts.
- Be aware that moving parts can injure you.
  - Do not start the engine unless instructed, and keep your hands and limbs away from moving parts.

Models with Auto Idle Stop
- Do not open the bonnet while the Auto Idle Stop function is activated.

WARNING

Improperly maintaining this vehicle or failing to correct a problem before driving can cause a crash in which you can be seriously hurt or killed.

Always follow the inspection and maintenance recommendations and schedules in this owner’s manual/Service Book.

WARNING

Failure to properly follow maintenance instructions and precautions can cause you to be seriously hurt or killed.

Always follow the procedures and precautions in this owner’s manual.
Parts and Fluids Used in Maintenance Service

The use of Honda genuine parts and fluids is recommended when maintaining and servicing your vehicle. Honda genuine parts are manufactured according to the same high quality standards used in Honda vehicles.

About Your Maintenance Service

If the service reminder system is available in your vehicle, you are informed by the i-multi-information display when your vehicle's maintenance services are due. Refer to the service book that came with your vehicle for an explanation of the service item codes that appear on the display.

Service Reminder System* P. 463

If your vehicle is without the service book, follow the maintenance schedule in this owner's manual.

Maintenance Schedule* P. 473
Oil Monitor System* P. 468

NOTICE

Do not press the engine cover forcibly. This may damage the engine cover and component parts.

About Your Maintenance Service

If you are planning to take your vehicle outside the service reminder system applied countries, consult a dealer for how to record your service reminder information and schedule your maintenance service under the conditions of that country.

* Not available on all models
Service Reminder System*  

Provides information of which service items are to be performed. Service items are represented by a code and icon. The system tells you when to take your vehicle to a dealer by distance or days remaining.

When the next maintenance service timing is near, coming or passed, a warning icon will also appear on the i-multi-information display every time you turn the ignition switch to ON [**]1.

*Service Reminder System*  
You can choose to have a corresponding warning message displayed with the warning icon on the i-multi-information display.

The maintenance schedule may not display correct information if you disconnect or remove the battery for an extended period. If this occurs, see a dealer.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models  

Continued
Displaying the Service Reminder Information

1. Turn the ignition switch to ON [Ⅰ]*1.
2. Press the MENU button to go to the Vehicle menu screen.
3. Select Vehicle information with the [+] button, then press the SOURCE button.
4. Press the SOURCE button again to go to the Maintenance info screen. The maintenance item(s) appears on the i-multi-information display.

The system message indicator (1) comes on along with the service reminder Information.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

Displaying the Service Reminder Information

Based on engine operating conditions and engine oil conditions, the system calculates the remaining distance or days before the next service is to be performed.

If the system calculates that the indicated time for the next maintenance service comes earlier than the indicated distance, the service reminder information display changes to show the remaining days.
### Warning Icons and Service Reminder Information on the i-Multi-Information Display

<table>
<thead>
<tr>
<th>Warning Icon (Amber)</th>
<th>Service Reminder Information</th>
<th>Explanation</th>
<th>Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>SERVICE DUE SOON</td>
<td><img src="image1" alt="Maintenance info" /></td>
<td>One or more of the service items are required in less than 30 days. The remaining distance is estimated based on your driving conditions.</td>
<td>The remaining distance will be counted down per 10 kilometres/miles.</td>
</tr>
<tr>
<td></td>
<td><img src="image2" alt="Maintenance info" /></td>
<td></td>
<td>The remaining days will be counted down per day.</td>
</tr>
<tr>
<td>SERVICE DUE NOW</td>
<td><img src="image3" alt="Maintenance info" /></td>
<td>One or more of the service items are required in less than 10 days. The remaining distance is estimated based on your driving conditions.</td>
<td>Have the indicated service performed as soon as possible.</td>
</tr>
<tr>
<td>SERVICE OVER DUE</td>
<td><img src="image4" alt="Maintenance info" /></td>
<td>The indicated maintenance service is still not done after the remaining distance or time reaches 0.</td>
<td>Your vehicle has passed the service required point. Immediately have the service performed and make sure to reset the service reminder system.</td>
</tr>
</tbody>
</table>
Service Reminder Items

Service items displayed on the i-multi-information display are in code and icon. For an explanation of the service reminder codes and icons, refer to the service book that came with your vehicle.

Availability of the Service Reminder System

Even if the service reminder information appears on the i-multi-information display while pressing the \( \text{display/information} \) button, this system is not available in some countries. Refer to the service book that came with your vehicle, or ask a dealer if you can use the service reminder system.

Availability of the Service Reminder System

If you are planning to take your vehicle outside the service reminder system applied countries, consult a dealer for how to record your service reminder information and schedule your maintenance service under the conditions of that country.
Resetting the Display

Reset the service reminder information display if you have performed the maintenance service.

1. Turn the ignition switch to ON [II]*1.
2. Go to the Maintenance info screen.
   - Displaying the Service Reminder Information  P. 464
3. Press the SOURCE button.
   - The service reminder information reset mode is displayed on the i-multi-information display.
4. Select Yes with the [-] button, then press the SOURCE button.
   - The service code will disappear.
To cancel the service reminder information reset mode, select No, then press the SOURCE button.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

NOTICE
Failure to reset the service reminder information after a maintenance service results in the system showing incorrect maintenance intervals, which can lead to serious mechanical problems.

The dealer will reset the service reminder information display after completing the required maintenance service. If someone other than a dealer performs maintenance service, reset the service reminder information display yourself.
Oil Monitor System*

Provides information of which service items are to be performed. Service items are represented by a code and icon. The system tells you when to take your vehicle to a dealer by distance remaining.

When the next maintenance service timing is near, coming or passed, a warning icon will also appear on the i-multi-information display every time you set the power mode to ON.

You can choose to have a corresponding warning message displayed with the warning icon on the i-multi-information display.

* Not available on all models
### Displaying the Oil Monitor System Information

1. Set the power mode to ON.
2. Press the **MENU** button to go to the **Vehicle menu** screen.
3. Select **Vehicle information** with the [+] button, then press the **SOURCE** button.
4. Press the **SOURCE** button again to go to the **Maintenance info** screen. The maintenance item(s) appears on the i-multi-information display.

The system message indicator (●) comes on along with the oil monitor system Information.

*Based on engine operating conditions and engine oil conditions, the system calculates the remaining distance before the next service is to be performed.*
### Warning Icons and Oil Monitor System Information on the i-Multi-Information Display

</tr>
</tbody>
</table>
Service Items

Service items displayed on the i-multi-information display are in code and icon. For an explanation of the service reminder codes and icons, refer to the service book that came with your vehicle.
Resetting the Display

Reset the oil monitor system information display if you have performed the maintenance service.

1. Set the power mode to ON.
2. Go to the Maintenance info screen. 

Displaying the Oil Monitor System Information P. 469
3. Press the SOURCE button.
   - The oil monitor system information reset mode is displayed on the i-multi-information display.
4. Select Yes with the button, then press the SOURCE button.
   - The service code will disappear.
To cancel the oil monitor system information reset mode, select No, then press the SOURCE button.

NOTICE
Failure to reset the oil monitor system information after a maintenance service results in the system showing incorrect maintenance intervals, which can lead to serious mechanical problems.

The dealer will reset the oil monitor system information display after completing the required maintenance service. If someone other than a dealer performs maintenance service, reset the oil monitor system information display yourself.
Maintenance Schedule*

If your vehicle comes with the service book, the maintenance schedule for your vehicle is available in the book. For vehicles without the service book, refer to the following maintenance schedule.

The maintenance schedule outlines the minimum required maintenance that you should perform to ensure the troublefree operation of your vehicle. Due to regional and climatic differences, some additional servicing may be required. Please consult your warranty booklet for a more detailed description.

Maintenance work should be performed by properly trained and equipped technicians. Your authorised dealer meets all of these requirements.

* Not available on all models

Replace transmission fluid

- **MT Normal**
  - Every 120,000 km (75,000 miles) or 6 years

- **Severe**

- **AT Normal**
  - At 120,000 km (75,000 miles) or 6 years, thereafter every 80,000 km (50,000 miles) or 4 years

- **Severe**

Inspect front and rear brakes

- Every 10,000 km (6,250 miles) or 6 months

Replace brake fluid

- Every 3 years

Check parking brake adjustment

- Every 3 years

Replace dust and pollen filter

- Every 3 years

Check expiry date for TRK bottle

- Every 3 years

Rotate tyres (Check tyre inflation and condition at least once per month)

- Every 10,000 km (6,250 miles)

Visually inspect the following items:

- Tie rod ends, steering gearbox, and boots
  - Every 10,000 km (6,250 miles) or 6 months

- Suspension components

- Driveshaft boots

- Brake hoses and lines (including ABS)

- All fluid levels and condition of fluid

- Exhaust system

- Fuel lines and connections

* Not available on all models

Continued
If you drive your vehicle under severe conditions, you must have the following items served to the maintenance schedule indicated as Severe.

<table>
<thead>
<tr>
<th>Items</th>
<th>Condition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Engine oil and filter</td>
<td>A, B, C, D and E</td>
</tr>
<tr>
<td>Transmission fluid</td>
<td>B, D</td>
</tr>
</tbody>

The condition is considered as severe when you drive:
A. Driving less than 8 km (5 miles), or less than 16 km (10 miles) in freezing temperatures per trip.
B. Driving in extremely hot temperature above 35°C.
C. With extensive idling or long periods of stop-and-go.
D. With a trailer towing, or loaded roof rack, or in mountains.
E. Driving on muddy, dusty or de-iced roads.

</tbody>
</table>

The condition is considered as severe when you drive:
A. Driving less than 8 km (5 miles) per trip or, in freezing temperatures, driving less than 16 km (10 miles) per trip.
B. Driving in extremely hot, over 35°C (over 95°F) condition.
C. Extensive idling or long periods of stop-and-go driving.
D. Towing trailer, driving with a loaded roof rack, or driving in mountainous conditions.
E. On muddy, dusty or de-iced roads.
## Maintenance Schedule

*1: When you drive primarily in urban areas that have high concentrations of soot in the air, under dusty conditions or the air flow from the heating and cooling system/climate control system becomes less than usual.
If you drive your vehicle under severe conditions, you must use the severe maintenance schedule.

The condition is considered as severe when you drive:
- Driving less than 8km (5 miles) per trip or, in freezing temperatures, driving less than 16km (10 miles) per trip.
- Driving in extremely hot, over 35°C (over 95°F) condition.
- Extensive idling or long periods of stop-and-go driving.
- Towing trailer, driving with a loaded car-top carrier, or driving in mountainous conditions.
- Driving on muddy, dusty, or de-iced roads.

NOTE: If you only OCCASIONALLY drive under “severe” conditions, you should follow the Normal Conditions Maintenance Schedule on page 480.

<td></td>
</tr>
</tbody>
</table>

* Not available on all models
If you drive your vehicle under severe conditions, you must have the following items served to the maintenance schedule indicated as Severe.

<table>
<thead>
<tr>
<th>Items</th>
<th>Condition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Engine oil and filter</td>
<td>A, B, C, D and E</td>
</tr>
<tr>
<td>Manual transmission fluid</td>
<td>B, D</td>
</tr>
</tbody>
</table>

The condition is considered as severe when you drive:
A. Less than 8 km (5 miles), or less than 16 km (10 miles) in freezing temperatures per trip.
B. In extremely hot temperature above 35°C.
C. With extensive idling or long periods of stop-and-go.
D. With a trailer towing, or loaded roof rack, or in mountains.
E. On muddy, dusty or de-iced roads.
## Maintenance Record (On Vehicles without Service Book)

Have your servicing dealer record all required maintenance below. Keep receipts for all work done on your vehicle.

*Except 2.0 L Petrol engine models*

*Except European models*

Battery
Opening the Bonnet

1. Park the vehicle on level ground, and set the parking brake.
2. Pull on the bonnet release handle under the driver’s side lower outside corner of the dashboard.
   The bonnet will pop up slightly.
3. Push up the bonnet latch lever in the centre of the bonnet to release the lock mechanism, and open the bonnet.
4. Remove the support rod from the clamp using the grip. Mount the support rod in the bonnet.
   When closing, remove the support rod, and stow it in the clamp, then gently lower the bonnet. Remove your hand at a height of approximately 30 cm (12 inches) and let the bonnet close.

---

**NOTICE**

Do not open the bonnet when the wiper arms are raised.
The bonnet will strike the wipers, and may damage either the bonnet or the wipers.

**Diesel models**

**NOTICE**

Do not press the engine cover forcibly. This may damage the engine cover and component parts.

When closing the bonnet, check that the bonnet is securely latched.

If the bonnet latch lever moves stiffly, or if you can open the bonnet without lifting the lever, the latch mechanism should be cleaned and lubricated.

**Models with Auto Idle Stop**

Do not open the bonnet while the Auto Idle Stop function is activated.
Petrol models

Recommended Engine Oil

Oil is a major contributor to your engine's performance and longevity. If you drive the vehicle with insufficient or deteriorated oil, the engine may fail or be damaged.

European models

- Genuine Honda Motor Oil*1
- ACEA A3/B3
- ACEA A5/B5

1.4 L and 1.8 L engine models without service reminder system

- Genuine Honda Motor Oil*1
- ACEA A1/B1
- ACEA A3/B3
- ACEA A5/B5

*1: If you use 0W-20, you should use “Honda Engine Oil Type 2.0”.

Use a commercial engine oil of suitable viscosity for the ambient temperature as shown.

0W-20 oil is formulated to improve fuel economy.

If 0W-20 is not available, use 5W-30 or 0W-30.

Recommended Engine Oil

Engine Oil Additives

Your vehicle does not require oil additives. In fact, they may adversely affect the engine performance and durability.

ACEA viscosity oil is available for European models only.
Maintenance Under the Bonnet

Recommended Engine Oil

Use a Genuine Honda Motor oil or another commercial engine oil of suitable SAE viscosity for the ambient temperature as shown.

0W-20 oil is formulated to improve fuel economy.

Except European models

- **Genuine Honda Motor Oil**<sup>1</sup>
- **API service SM or higher grade fuel-efficient oil**

<sup>1</sup>: If you use 0W-20, you should use “Honda Engine Oil Type 2.0” or genuine oil which has API service grade mark.
**Recommended Engine Oil**

Oil is a major contributor to your engine's performance and longevity. If you drive the vehicle with insufficient or deteriorated oil, the engine may fail or be damaged.

- **Honda Diesel Oil #1.0**
- **ACEA C2/C3**

**European models**

![Graph showing recommended oil for different ambient temperatures]

Use a commercial engine oil of suitable viscosity for the ambient temperature as shown.

- Honda Diesel Oil #1.0 oil is formulated to improve fuel economy.
- If Honda Diesel Oil #1.0 or 0W-30 is not available, use 5W-30.

**Except European models**

![Graph showing recommended oil for different ambient temperatures]

Use a commercial engine oil of suitable viscosity for the ambient temperature as shown.

- Honda Diesel Oil #1.0 oil is formulated to improve fuel economy.

**Engine Oil Additives**

Your vehicle does not require oil additives. In fact, they may adversely affect the engine performance and durability.
Oil Check

We recommend that you check the engine oil level every time you refuel. Park the vehicle on level ground. Wait approximately three minutes after turning the engine off before you check the oil.

1. Remove the dipstick (orange or black).
2. Wipe the dipstick with a clean cloth or paper towel.
3. Insert the dipstick back all the way into its hole.

If the oil level is near or below the lower mark, slowly add oil being careful not to overfill.

The amount of oil consumed depends on how the vehicle is driven and the climatic and road conditions encountered. The rate of oil consumption can be up to 1 litre per 1,000 km/625 miles. Consumption is likely to be higher when the engine is new.
Maintenance Under the Bonnet

Petrol models (2.0 L engine models)

Diesel models

Continued

Oil Check

Maintenance
4. Remove the dipstick again, and check the level. It should be between the upper and lower marks. Add oil if necessary.
Maintenance Under the Bonnet

Oil Check

Upper Mark

Lower Mark

Diesel models
Adding Engine Oil

1. Unscrew and remove the engine oil fill cap.
2. Add oil slowly.
3. Reinstall the engine oil fill cap, and tighten it securely.
4. Wait for three minutes and recheck the engine oil dipstick.

**NOTICE**
Do not fill the engine oil above the upper limit mark. Overfilling the engine oil can result in leaks and engine damage.

If any oil spills, wipe it away immediately. Spilled oil may damage the engine compartment components.
Maintenance Under the Bonnet

Engine Coolant

This coolant is premixed with 50% antifreeze and 50% water. Do not add any straight antifreeze or water.

We recommend you check the engine coolant level every time you refuel. Check the reserve tank first. If it is completely empty, also check the coolant level in the radiator. Add the engine coolant accordingly.

Petrol models (Except 2.0 L engine models)

Engine Coolant

Specified coolant: Honda All Season Antifreeze/Coolant Type 2

If Honda antifreeze/coolant is not available, you may use another major brand non-silicate coolant as a temporary replacement. Check that it is a high quality coolant recommended for aluminium engines. Continued use of any non-Honda coolant can result in corrosion, causing the cooling system to malfunction or fail. Have the cooling system flushed and refilled with Honda antifreeze/coolant as soon as possible.

Do not add rust inhibitors or other additives to your vehicle’s cooling system. They may not be compatible with the coolant or with the engine components.
1. Check the amount of coolant in the reserve tank.

2. If the coolant level is below the MIN mark, add the specified coolant until it reaches the MAX mark.

3. Inspect the cooling system for leaks.
1. Make sure the engine and radiator are cool.
2. Turn the radiator cap anticlockwise and relieve any pressure in the coolant system. Do not push the cap down when turning.
3. Push down and turn the radiator cap anticlockwise to remove it.
4. The coolant level should be up to the base of the filler neck. Add coolant if it is low.
5. Put the radiator cap back on, and tighten it fully.
6. Pour coolant into the reserve tank until it reaches the MAX mark. Put the cap back on the reserve tank.

**WARNING**
Removing the radiator cap while the engine is hot can cause the coolant to spray out, seriously scalding you.
Always let the engine and radiator cool down before removing the radiator cap.

**NOTICE**
Pour the fluid slowly and carefully so you do not spill any. Clean up any spills immediately; they can damage components in the engine compartment.
Diesel models and Petrol models (2.0 L engine models)

**Engine Coolant**

**Specified coolant: Honda All Season Antifreeze/Coolant Type 2**

This coolant is premixed with 50% antifreeze and 50% water. Do not add any straight antifreeze or water.

We recommend you check the engine coolant level every time you refuel. Check the expansion tank. Add the engine coolant accordingly.

**Checking the Coolant**

1. Check the amount of coolant in the expansion tank.
2. If the coolant level is below the **MIN** mark, add the specified coolant until it reaches the **MAX** mark.
3. Inspect the cooling system for leaks.

**Engine Coolant**

If Honda antifreeze/coolant is not available, you may use another major brand non-silicate coolant as a temporary replacement. Check that it is a high quality coolant recommended for aluminium engines. Continued use of any non-Honda coolant can result in corrosion, causing the cooling system to malfunction or fail. Have the cooling system flushed and refilled with Honda antifreeze/coolant as soon as possible.

Do not add rust inhibitors or other additives to your vehicle's cooling system. They may not be compatible with the coolant or with the engine components.
Adding the Coolant

1. Make sure the engine and radiator are cool.
2. Turn the expansion tank cap 1/8 turn anticlockwise and relieve any pressure in the coolant system.
3. Push down and turn the expansion tank cap anticlockwise to remove it.
4. Pour coolant into the expansion tank until it reaches the MAX mark.
5. Put the expansion tank cap back on, and tighten it fully.

WARNING
Removing the expansion tank cap while the engine is hot can cause the coolant to spray out, seriously scalding you.
Always let the engine and radiator cool down before removing the expansion tank cap.

NOTICE
Pour the fluid slowly and carefully so you do not spill any. Clean up any spills immediately; they can damage components in the engine compartment.
Transmission Fluid

Automatic Transmission Fluid

Specified fluid: Honda ATF DW-1 (automatic transmission fluid)

Check the fluid level when the engine is at normal operating temperature.

1. Park on level ground, and start the engine.
2. Wait until the radiator fan starts and then turn off the engine.
   ▶ Perform step 3 after waiting for about 60 seconds (less than 90 seconds).
3. Remove the dipstick (yellow loop) from the transmission and wipe it with a clean cloth.
4. Insert the dipstick all the way back into the transmission securely, as shown in the image.
5. Remove the dipstick and check the fluid level.
   ▶ It should be between the upper and lower marks in the HOT range.
6. If the level is below the lower mark, add fluid into the dipstick hole to bring it to the level between the upper and lower marks, and have your vehicle checked by a dealer immediately.

NOTICE
Pour the fluid slowly and carefully so you do not spill any. Clean up any spills immediately; they can damage components in the engine compartment.

NOTICE
Do not mix Honda ATF DW-1 with other transmission fluids.
Using a transmission fluid other than Honda ATF DW-1 may adversely affect the operation and durability of your vehicle’s transmission, and damage the transmission.
Any damage caused by using a transmission fluid that is not equivalent to Honda ATF DW-1 is not covered by Honda’s new vehicle warranty.
Manual Transmission Fluid

Specified fluid: Honda Manual Transmission Fluid (MTF)

Have a dealer check the fluid level and replace if necessary.

About Your Maintenance Service P. 462

Manual Transmission Fluid

If Honda MTF is not available, you may use the API certificated SAE 0W-20 or 5W-20 viscosity motor oil as a temporary measure. Replace with MTF as soon as possible. Motor oil does not contain the proper additives for the transmission and continued use can cause decreased shifting performance and lead to transmission damage.
Brake/Clutch Fluid

Use the same fluid for both the brakes and clutch.

Checking the Brake Fluid

The fluid level should be between the MIN and MAX marks on the side of the reservoir.

NOTICE

Brake fluid marked DOT 5 is not compatible with your vehicle’s braking system and can cause extensive damage.

We recommend using a genuine product.

If the brake fluid level is at or below the MIN mark, have a dealer inspect the vehicle for leaks or worn brake pads as soon as possible.

Checking the Clutch Fluid

The fluid level should be between the MIN and MAX marks on the side of the reservoir.

If the clutch fluid level is at or below the MIN mark, have a dealer inspect the vehicle for leaks or an excessively worn clutch plate as soon as possible.
Refilling Window Washer Fluid

If the level is low, fill the washer reservoir.

Models with washer level sensor
If the washer fluid is low, a message appears on the i-multi-information display. Pour the washer fluid carefully. Do not overflow the reservoir.

Fuel Filter

Replace the fuel filter according to the time and distance recommendations in the maintenance schedule.

Petrol models
Except European models
It is recommended to replace the fuel filter every 40,000 km (25,000 miles), or two years, if you suspect the fuel you are using is contaminated. In a dusty environment, the filter may become clogged sooner.

Have a qualified technician change the fuel filter. Fuel in the system can spray out and create a hazard if all fuel line connections are not handled correctly.

NOTICE
Do not use engine antifreeze or a vinegar/water solution in the windscreen washer reservoir. Antifreeze can damage your vehicle's paint. A vinegar/water solution can damage the windscreen washer pump.

Use only commercially available windscreen washer fluid. Avoid prolonged use of hard water to prevent lime scale build up.

The fuel filter should be replaced according to the service reminder indication.
Diesel Particulate Filter (DPF)

Collects PM (particulate matter) from the exhaust gas. The DPF is installed in the catalytic converter.

How the DPF Works

The DPF periodically burns off the collected PM while driving at a high temperature of catalytic converter.
When PM is burned off, you may notice white smoke in the exhaust gas, and the increase in the average fuel consumption. This is temporary, and normal.

* Not available on all models
**Regenerating DPF**

If you see 🚨 on the i-multi-information display, you need to regenerate the DPF:
- Drive your vehicle at a speed of 60 km/h (37 mph) or over until the symbol disappears.
- It takes about 20 minutes to increase the catalytic converter temperature to burn out and remove PM.

---

**NOTICE**

If you ignore the symbol and do not regenerate the DPF, the i-multi-information display changes to the DPF warning symbol. If this happens, take your vehicle to a dealer as soon as possible. Continuously ignoring the i-multi-information display warning symbol causes the DPF to be clogged with PM, seriously damaging the DPF and emission control systems.

To minimize the accumulation of PM, always use the recommended diesel fuel.

- Fuel Information P. 453

PM is accumulated in the catalytic converter when you drive at a low speed for a long period of time or by frequent short journeys.
Replacing Light Bulbs

Headlight Bulbs

When replacing, use the following bulbs.

<table>
<thead>
<tr>
<th>Headlight Type</th>
<th>Bulb Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>High Beam Headlight</td>
<td>55 W (H7 for halogen bulb type)</td>
</tr>
<tr>
<td>Low Beam Headlight</td>
<td>55 W (H7 for halogen bulb type)*</td>
</tr>
<tr>
<td></td>
<td>LED type*</td>
</tr>
</tbody>
</table>

High Beam Headlight

1. Rotate the cover to the left and remove it.
2. Unhook the hook, and pull out the connector.
3. Remove the old bulb and insert the new bulb.
4. Put the connector back into the headlight assembly.

NOTICE

Halogen bulbs get very hot when lit. Oil, perspiration, or a scratch on the glass can cause the bulb to overheat and shatter.

The headlight aim is set by the factory, and does not need to be adjusted. However, if you regularly carry heavy items in the luggage area or tow a trailer, have the aiming readjusted at a dealer or by a qualified technician.

When replacing a halogen bulb, handle it by its base, and protect the glass from contact with your skin or hard objects. If you touch the glass, clean it with denatured alcohol and a clean cloth.

* Not available on all models
Low Beam Headlights

Models with halogen headlights

Right side

1. Remove the holding clip using a flat-tip screwdriver, then remove the upper part of the windscreen washer reservoir.

Low Beam Headlights

Holding clip

Insert a flat-tip screwdriver, lift and remove the centre pin to remove the clip.

Centre pin

Insert the clip with the central pin raised, and push until it is flat.

Push until the pin is flat.
Replacing Light Bulbs

Headlight Bulbs

1. Low Beam Headlights

Low beam headlights are LED type. Have an authorized Honda dealer inspect and replace the light assembly.

2. All models

2. Rotate the cover to the left and remove it.
3. Unhook the hook, and pull out the connector.
4. Remove the old bulb and insert the new bulb.
5. Put the connector back into the headlight assembly.
Front Fog Light Bulbs*

When replacing, use the following bulbs.

Front Fog Light: 55 W (H11)

Petrol models (2.0 L engine models)
1. Remove the bolt.

All models
2. Remove the clips using a flat-tip screwdriver, then lower the under cover.

Petrol models (2.0 L engine models)

Front Fog Light Bulbs*

NOTICE
Halogen bulbs get very hot when lit. Oil, perspiration, or a scratch on the glass can cause the bulb to overheat and shatter.

When replacing a halogen bulb, handle it by its plastic case, and protect the glass from contact with your skin or hard objects. If you touch the glass, clean it with denatured alcohol and a clean cloth.

* Not available on all models

Continued
Replacing Light Bulbs

1. Push the tab to remove the coupler.
2. Rotate the old bulb to the left to remove.
3. Insert a new bulb into the fog light assembly and turn it to the right.
4. Insert the coupler into the connector of the bulb.

Position Lights

Position lights are LED type. Have an authorized Honda dealer inspect and replace the light assembly.

Daytime Running Lights

Daytime running lights are LED type. Have an authorized Honda dealer inspect and replace the light assembly.
Front Turn Signal Light Bulbs

When replacing, use the following bulbs.

**Front Turn Signal Light: 21 W (Amber)**

1. Turn the steering wheel all the way to the opposite side from the light being replaced.
   - **Right side:** Turn the steering wheel to the left.
   - **Left side:** Turn the steering wheel to the right.

2. Remove the holding clips and screw, then pull the inner fender back.

*Petrol models (2.0 L engine models)*

2. Remove the holding clips and screw, then pull the inner fender back.

*Except 2.0 L engine models*

2. Remove the holding clips, and pull the inner fender back.

- **Low Beam Headlights** P. 515
Replacing Light Bulbs

Side Turn Signal Lights

3. Turn the socket to the left and remove it. If you do not remove the socket by the hand, use the bulb replacement tool.

4. Push in the old bulb, rotate to the left until it unlocks, and remove it.

5. Insert a new bulb.

Side Turn Signal Lights

Side turn signal lights are LED type. Have an authorized Honda dealer inspect and replace the light assembly.
Rear Turn Signal Light Bulbs

When replacing, use the following bulbs.

**Rear Turn Signal Light: 16 W (Amber)**

- **Except 2.0 L engine models**

1. Open the tailgate.
2. Remove the cover.
3. Remove the bolts.
4. Pull the light assembly towards the back of the vehicle to remove it.
5. Turn the socket to the left and remove it.
6. Push in the old bulb, rotate to the left until it unlocks, and remove it.
7. Insert a new bulb.

Continued
Replacing Light Bulbs

Rear Turn Signal Light Bulbs

1. Open the tailgate.
2. Remove the cover.
3. Turn the socket to the left and remove it.
4. Push in the old bulb, rotate to the left until it unlocks, and remove it.
5. Insert a new bulb.

Petrol models (2.0 L engine models)
Back-Up Light Bulbs

When replacing, use the following bulbs.

**Back-Up Light: 16 W**

1. Pry on the edge of the cover using a flat-tip screwdriver to remove it.
   ▶ Wrap the flat-tip screwdriver with a cloth to prevent scratches.

2. Turn the socket to the left and remove it.

3. Remove the old bulb and insert a new bulb.

Brake/Taillights

Brake/taillights are LED type. Have an authorized Honda dealer inspect and replace the light assembly.
Rear Licence Plate Light Bulbs

When replacing, use the following bulbs.

**Rear Licence Plate Light: 5 W**

1. Remove the licence plate light assembly by pushing the left edge of the lens towards the right and pulling the assembly out.

2. Remove the lens by pushing the tabs.

3. Remove the old bulb and insert a new bulb.

High-Mount Brake Light

High-mount brake light is LED type. Have an authorized Honda dealer inspect and replace the light assembly.
Rear Fog Light Bulb

When replacing, use the following bulb.

**Rear Fog Light: 21 W**

*Except 2.0 L engine models*

1. Remove the holding clips using a flat-tip screwdriver, then lower the under cover.

   - **Low Beam Headlights** P. 515

   **Left side**

   **Right side**

1. Remove the holding clips and screw, then remove the under cover.

3. Remove the old bulb and insert a new bulb.

---

**All models**
2. Turn the socket to the left and remove it.
3. Remove the old bulb and insert a new bulb.

---

**Petrol models (2.0 L engine models)**

1. Remove the bolts, then remove the under cover.

2. Turn the socket to the left and remove it.
3. Remove the old bulb and insert a new bulb.
Other Light Bulbs

Ceiling Light Bulb
When replacing, use the following bulb.

Ceiling Light: 8 W

1. Pry on the edge of the cover using a flat-tip screwdriver to remove the cover.
   Wrap the flat-tip screwdriver with a cloth to prevent scratches.

2. Remove the old bulb and insert a new bulb.

* Not available on all models

Map Light Bulbs*
When replacing, use the following bulbs.

Map Light: 8 W

1. Push on the lens of the opposite side you are replacing.

2. Pry on the edge of the cover using a flat-tip screwdriver to remove the cover.
   Wrap the flat-tip screwdriver with a cloth to prevent scratches.

3. Remove the old bulb and insert a new bulb.

Map Light Bulbs*
When replacing, use the following bulbs.

Map Light: 8 W

1. Push on the lens of the opposite side you are replacing.

2. Pry on the edge between the lenses using a flat-tip screwdriver to remove the cover.
   Wrap the flat-tip screwdriver with a cloth to prevent scratches.

3. Remove the old bulb and insert a new bulb.

* Not available on all models
Replacing Light Bulbs

Other Light Bulbs

Maintenance

When replacing, use the following bulbs.

**Vanity Mirror Light Bulbs**

- **Vanity Mirror Light: 2 W**

1. Pry on the edge of the cover using a flat-tip screwdriver to remove the cover.
   - Wrap the flat-tip screwdriver with a cloth to prevent scratches.

2. Remove the old bulb and insert a new bulb.

**Luggage Area Light Bulb**

- **Luggage Area Light: 5 W**

1. Pry on the edge of the cover using a flat-tip screwdriver to remove the cover.
   - Wrap the flat-tip screwdriver with a cloth to prevent scratches.

2. Push the tab to remove the coupler.

3. Remove the plastic cover by pivoting it upward.

4. Remove the old bulb and insert a new bulb.

5. Insert the coupler into the connector of the light assembly.

* Not available on all models
Replacing Light Bulbs

Glove Box Light Bulb*

When replacing, use the following bulb.

Glove Box Light: 3.4 W

1. Open the glove box.

2. Remove the old bulb and insert a new bulb.

* Not available on all models
Checking and Maintaining Wiper Blades

Checking Wiper Blades
If the wiper blade rubber has deteriorated, it will leave streaks and the hard surfaces of the blade may scratch the window glass.

Changing the Front Wiper Blade Rubber

1. Lift the driver side wiper arm first, then the passenger side.

2. Place a cloth on the edge of the lock tab. Push the lock tab up with a flat-tip screw driver.

3. Slide the blade from the wiper arm.

**NOTICE**
Avoid dropping the wiper arm; it may damage the windscreen.
4. Slide the wiper blade out from its holder by pulling the tabbed end out.

5. Remove the retainers from the rubber blade that has been removed, and mount to a new rubber blade.
   ▶ Correctly align the rubber protrusion and the retainer grooves.

6. Slide the new wiper blade onto the holder from the bottom end.
   ▶ The tab on the holder should fit in the indent of the wiper blade.

7. Slide the wiper blade onto the wiper arm, then push down the lock tab.

8. Lower the passenger side wiper arm first, then the driver side.
Changing the Rear Wiper Blade Rubber*

1. Lift the wiper arm.

2. Place a cloth on the edge of the lock tab. Push the lock tab up with a flat-tip screwdriver.

3. Slide the blade from the wiper arm.

4. Slide the wiper blade out from its holder by pulling the tabbed end out.

* Not available on all models

NOTICE
Avoid dropping the wiper arm; it may damage the rear window.
5. Remove the retainers from the rubber blade that has been removed, and mount to a new rubber blade.
   - Correctly align the rubber protrusion and the retainer grooves.

6. Slide the new wiper blade onto the holder from the bottom end.
   - The tab on the holder should fit in the indent of the wiper blade.

7. Slide the wiper blade onto the wiper arm, then push down the lock tab.

8. Lower the wiper arm.
Checking and Maintaining Tyres

Checking Tyres

To safely operate your vehicle, your tyres must be of the proper type and size, in good condition with adequate tread, and properly inflated.

■ Inflation guidelines
Properly inflated tyres provide the best combination of handling, tread life, and comfort. Refer to the driver’s doorjamb label for the specified pressure.

Underinflated tyres wear unevenly, adversely affect handling and fuel economy, and are more likely to fail from overheating.

Overinflated tyres make your vehicle ride harshly, are more prone to road hazards, and wear unevenly.

Every day before you drive, look at each of the tyres. If one looks lower than the others, check the pressure with a tyre gauge.

At least once a month or before long trips, use a gauge to measure the pressure in all tyres, including the spare*. Even tyres in good condition can lose 10 to 20 kPa (0.1 to 0.2 bar, 1 to 2 psi) per month.

■ Inspection guidelines
Every time you check inflation, also examine the tyres and valve stems. Look for:
• Bumps or bulges on the side or in the tread. Replace the tyre if you find any cuts, splits, or cracks in the side of the tyre. Replace it if you see fabric or cord.
• Remove any foreign objects and inspect for air leaks.
• Uneven tread wear. Have a dealer check the wheel alignment.
• Excessive tread wear.
  ➤ Wear Indicators P. 535
• Cracks or other damage around valve stem.

* Not available on all models

WARNING

Using tyres that are excessively worn or improperly inflated can cause a crash in which you can be seriously hurt or killed.

Follow all instructions in this owner’s manual regarding tyre inflation and maintenance.

Measure the air pressure when tyres are cold. They are considered as cold when the vehicle has been parked for at least three hours, or driven less than 1.6 km (1 mile). If necessary, add or release air until the specified pressure is reached.

If checked when hot, tyre pressure can be as much as 30–40 kPa (0.3–0.4 bar, 4–6 psi) higher than if checked when cold.

Have a dealer check the tyres if you feel a consistent vibration while driving. New tyres and any that have been removed and reinstalled should be properly balanced.
Wear Indicators

The groove where the wear indicator is located is 1.6 mm (1/16 inch) shallower than elsewhere on the tyre. If the tread has worn so that the indicator is exposed, replace the tyre. **Worn out tyres have poor traction on wet roads.**

Tyre Service Life

The life of your tyres is dependent on many factors, including driving habits, road conditions, vehicle loading, inflation pressure, maintenance history, speed, and environmental conditions (even when the tyres are not in use).

In addition to regular inspections and inflation pressure maintenance, it is recommended that you have annual inspections performed once the tyres reach five years old. All tyres, including the spare*, should be removed from service after 10 years from the date of manufacture, regardless of their condition or state of wear.

* Not available on all models
Tyre and Wheel Replacement

Replace your tyres with radials of the same size, load range, speed rating, and maximum cold tyre pressure rating (as shown on the tyre’s sidewall). Using tyres of a different size or construction can cause the ABS (anti-lock brake system) and VSA (vehicle stability assist) system to work incorrectly.

It is best to replace all four tyres at the same time. If that isn’t possible, replace the front or rear tyres in pairs.

Make sure that the wheel’s specifications match those of the original wheels.

---

**WARNING**

Installing improper tyres on your vehicle can affect handling and stability. This can cause a crash in which you can be seriously hurt or killed.

Always use the size and type of tyres recommended in the tyre information label on your vehicle.
Checking and Maintaining Tyres

Tyre Rotation

Rotating tyres according to the maintenance schedule helps to distribute wear more evenly and increase tyre life.

Your Vehicle’s Tyre Rotation Pattern

Rotate the tyres as shown here.

<table>
<thead>
<tr>
<th>Tyres without rotation mark</th>
<th>Tyres with rotation mark</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Tyre Rotation Diagram" /></td>
<td><img src="image" alt="Tyre Rotation Diagram" /></td>
</tr>
</tbody>
</table>

Tyres without rotation mark

Tyres with rotation mark

- Tyres without rotation mark
  - Specify the rotation pattern for these tyres.

- Tyres with rotation mark
  - Specify the rotation pattern for these tyres.

When the tyres are rotated, make sure the air pressures are checked.

Tyre Rotation

Tyres with directional tread patterns should only be rotated front to back (not from one side to the other). Directional tyres should be mounted with the rotation mark facing forward, as shown below.

**Snow Traction Devices**

If driving on snowy or frozen roads, mount winter tyres, or tyre chains; reduce speed; and maintain sufficient distance between vehicles when driving.

Be particularly careful when operating the steering wheel or brakes to prevent skidding.

Use tyre chains, winter tyres, or all season tyres when necessary or according to the law.

When mounting, refer to the following points.

For winter tyres:
- Select the size and load ranges that are the same as the original tyres.
- Mount the tyres to all four wheels.

For tyre chains:
- Consult a dealer before purchasing any type of chains for your vehicle.
- Install them on the front tyres only.
- Because your vehicle has limited tyre clearance, we strongly recommend using the chains listed below:

<table>
<thead>
<tr>
<th>Original Tyre Size</th>
<th>Chain Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>235/35ZR19 91Y</td>
<td>(Not Available)</td>
</tr>
<tr>
<td>225/40R18 92Y</td>
<td>RUD-matic classic 48489</td>
</tr>
<tr>
<td>225/45R17 91 W</td>
<td>(Not Available)</td>
</tr>
<tr>
<td>205/55R16 91 V</td>
<td>RUD-matic classic 48484</td>
</tr>
<tr>
<td>195/65R15 91 T</td>
<td>RUD-matic classic 48482</td>
</tr>
</tbody>
</table>

*1: Original tyre size is mentioned on the tyre information label on the driver’s doorjamb.
*2: You cannot mount chains on this tyre. If you have to use tyre chains, replace the tyres with the original 205/55R16 size tyres.
*3: You cannot mount chains on this tyre. If you have to use tyre chains, replace the tyres with the original 225/40R18 size tyres.

**NOTICE**

Traction devices that are the wrong size or improperly installed can damage your vehicle’s brake lines, suspension, body, and wheels. Stop driving if they are hitting any part of the vehicle.

According to the EEC Directive for tyres, when winter tyres are used, it is necessary to affix a sticker with the allowable max. speed of the winter tyres clearly in the field of view of the driver, if the designed max. speed of vehicle is higher than the allowed max. speed of winter tyre. A sticker is obtainable from your tyre dealer. If you have any question, consult a dealer.

When tyre chains are mounted, follow the chain manufacturer’s instructions regarding vehicle operational limits.

Use tyre chains only in an emergency or when they are legally required for driving through a certain area.

Use greater caution when driving with tyre chains on snow or ice. They may have less-predictable handling than good winter tyres without chains.
• Follow the chain manufacturer's instruction when installing. Mount them as tightly as you can.
• Check that the chains do not touch the brake lines or suspension.
• Drive slowly.

**Snow Traction Devices**

We recommend that you do not use the original high performance tyre at temperatures below -20°C. You may experience reduced performance and tyres can become brittle and suffer surface cracking.
Battery

Checking the Battery

Check the battery terminals for corrosion monthly.

If your vehicle's battery is disconnected or goes dead:
- The audio system is disabled. [Reactivating the audio system P. 225]
- The clock resets. [Clock P. 148]
- The navigation system is disabled. A PIN code will be required. [Refer to the navigation system manual]*

**WARNING**

The battery gives off explosive hydrogen gas during normal operation.

A spark or open flame can cause the battery to explode with enough force to kill or seriously hurt you.

Keep all sparks, open flames, and smoking materials away from the battery.

Wear protective clothing and a face shield, or have a skilled technician do any battery maintenance.

**WARNING**

The battery contains sulfuric acid (electrolyte) which is highly corrosive and poisonous.

Getting electrolyte in your eyes or your skin can cause serious burns. Wear protective clothing and eye protection when working on or near the battery.

Swallowing electrolyte can cause fatal poisoning if immediate action is not taken.

KEEP OUT OF THE REACH OF CHILDREN

* Not available on all models
Charging the Battery

Disconnect both battery cables to prevent damaging your vehicle’s electrical system. Always disconnect the negative \(-\) cable first, and reconnect it last.

Replacing the Battery

When you remove and replace the battery, always follow the maintenance safety and the warnings for when checking the battery to prevent potential hazards.

1. Turn the ignition switch to LOCK [0]*1. Open the bonnet.
2. Loosen the plastic nut and remove the clip on the negative battery cable.
3. Loosen the nut on the negative battery cable, then disconnect the cable from the \(-\) terminal.
4. Open the positive battery terminal cover. Loosen the nut on the positive battery cable, then disconnect the cable from the \(+\) terminal.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

Emergency Procedures

Eyes: Flush with water from a cup or other container for at least 15 minutes. (Water under pressure can damage the eye.) Call a physician immediately.

Skin: Remove contaminated clothing. Flush the skin with large quantities of water. Call a physician immediately.

Swallowing: Drink water or milk. Call a physician immediately.

When you find corrosion, clean the battery terminals by applying a baking powder and water solution. Clean the terminals with a damp towel. Cloth/towel dry the battery. Coat the terminals with grease to help to prevent future corrosion.

Replacing the Battery

**NOTICE**

An improperly disposed of battery can be harmful to the environment and human health. Always confirm local regulations for battery disposal.

This symbol on the battery means that this product must not be treated as household waste.
5. Loosen the nut on each side of the battery bracket with a wrench.
6. Pull the bottom end of each battery stay out of the hole on the battery base, and remove the combination of the battery bracket and the stays.

7. Remove the battery cover.
8. Take out the battery carefully.

Replacing the Battery

Always disconnect the - cable first, and reconnect it last.

To install a new battery, reverse this procedure.

Models with Auto Idle Stop

The battery installed in this vehicle is specifically designed for a models with Auto Idle Stop. Using a battery other than this specified type may shorten the battery life, and prevent Auto Idle Stop from activating. If you need to replace the battery, make sure to select the specified type. Ask a dealer for more details.

Specifications P. 608, 611, 614, 616

* Not available on all models
Battery Label

Example

DANGER
- Keep flames and sparks away from the battery. The battery produces explosive gas that can cause an explosion.
- Wear eye protection and rubber gloves when handling the battery to avoid risk of burns or loss of eyesight if exposed to battery electrolyte.
- Do not allow children to handle the battery, under any circumstance. Ensure that anyone handling the battery has a proper understanding of the hazards and correct handling procedures involved.
- Handle battery electrolyte with extreme care, as it contains dilute sulfuric acid. Exposure to eyes or skin can cause burns or loss of eyesight.
- Read this manual carefully, and understand it before handling the battery. Failure to do so can cause personal injury and damage to the vehicle.
- Do not use the battery if the level of electrolyte is at or below the recommended level. Using the battery with low electrolyte can cause it to explode, causing serious injury.
Remote Transmitter Care

Replacing the Button Battery

If the indicator does not come on when the button is pressed, replace the battery.

Retractable Key*

Battery type: CR2032

1. Remove the upper half of the cover by carefully prying on the edge with a coin. Wrap a coin with a cloth to prevent scratching the retractable key.

2. Remove the button battery with the small flat-tip screwdriver.

3. Make sure to replace the battery with the correct polarity.

NOTICE

An improperly disposed of battery can damage the environment. Always confirm local regulations for battery disposal.

This symbol on the battery means that this product must not be treated as household waste.

Replacement batteries are commercially available or at a dealer.

* Not available on all models
Remote Transmitter Care
Replacing the Button Battery

**Keyless Remote**

**Battery type: CR2032**

1. Remove the built-in key.

2. Remove the upper half of the cover by carefully prying on the edge with a coin. ▶ Remove carefully to avoid losing the buttons. ▶ Wrap a coin with a cloth to prevent scratching the keyless remote.

3. Make sure to replace the battery with the correct polarity.

* Not available on all models
Climate Control System Maintenance

Air Conditioning

For proper and safe operation of the climate control system, the refrigerant system should only be served by a qualified technician.

Never repair or replace the air conditioning evaporator (cooling coil) with one removed from a used or salvaged vehicle.

NOTICE

Vented refrigerant is harmful to the environment. To avoid refrigerant from venting, never replace the evaporator with one removed from a used or salvaged vehicle.

Refrigerant in your vehicle's air conditioning system is flammable and can be ignited during servicing if proper procedures are not followed.

Air Conditioner label is found under the bonnet:

- Caution
- Flammable Refrigerant
- Requires Registered Technician to Service
- Air Conditioning System
Dust and Pollen Filter

When to Replace the Dust and Pollen Filter

Replace the dust and pollen filter according to your vehicle’s recommended maintenance schedule. It is recommended to replace the filter even sooner if the vehicle has been driven in a dusty environment.

How to Replace the Dust and Pollen Filter

1. Open the glove box.
2. Push the stop on the passenger’s side of the glove box to detach it from the glove box.
3. Disengage the two tabs by pushing on each side panel.
4. Pivot the glove box out of the way.

* Not available on all models

Dust and Pollen Filter

Using an air freshener may reduce the deodorizing effect of the dust and pollen filter, and may reduce its life.

If the airflow from the climate control system deteriorates noticeably, and the windows fog up easily, the filter may need to be replaced.

The dust and pollen filter collects pollen, dust, and other debris in the air.

* Not available on all models

Continued
Climate Control System Maintenance

Dust and Pollen Filter

5. Push in the tabs on the corners of the filter case cover, and remove it.

6. Remove the filter from the case.

7. Install a new filter in the case.
   ▶ Put the AIR FLOW arrow directed side down.

Dust and Pollen Filter

If you are not sure how to replace the dust and pollen filter, have it replaced by a dealer.
Cleaning

Interior Care

Use a vacuum cleaner to remove dust before using a cloth.
Use a damp cloth with a mixture of mild detergent and warm water to remove dirt.
Use a clean cloth to remove detergent residue.

Cleaning Seat Belts

Use a soft brush with a mixture of mild soap and warm water to clean the seat belts.
Let the belts air dry. Wipe the openings of the seat belt anchors using a clean cloth.

Cleaning the Windows

Wipe using a glass cleaner.

Maintenance

Cleaning

Interior Care

Do not spill liquids inside the vehicle.
Electrical devices and systems may malfunction if liquids are splashed on them.

Do not use silicone based sprays on electrical devices such as audio devices and switches.
Doing so may cause the items to malfunction or a fire inside the vehicle.
If a silicone based spray is inadvertently used on electrical devices, consult a dealer.

Depending on their composition, chemicals and liquid aromatics may cause discoloration, wrinkles, and cracking to resin-based parts and textiles.
Do not use alkali solvents or organic solvents such as benzene or petrol.

After using chemicals, make sure to gently wipe them away using a dry cloth.
Do not place used cloths on top of resin based parts or textiles for long periods of time without washing.

Be careful not to spill a liquid type air freshener.

Cleaning the Windows

Wires are mounted to the inside of the rear window.
Wipe along the same direction as the wires with a soft cloth so as not to damage them.
Cleaning

Floor Mats*

The front floor mats hook over the floor anchors, which keep the mats from sliding forward. To remove a mat for cleaning, turn the anchor knobs to the unlock position. When reinstalling the mat after cleaning, turn the knobs to the lock position.

Do not put additional floor mats on top of the anchored mats.

Maintaining Genuine Leather*

Vacuum dirt and dust from the leather frequently. Pay close attention to the pleats and seams. Clean the leather with a soft cloth dampened with a 90% water and 10% neutral soap solution. Then buff it with a clean, dry cloth. Remove any dust or dirt on leather surfaces immediately.

* Not available on all models

Tank Mats* 

If you use any floor mats that were not originally provided with your vehicle, make sure they are designed for your specific vehicle, fit correctly, and are securely anchored by the floor anchors. Position the rear seat floor mats properly. If they are not properly positioned, the floor mats can interfere with the front seat functions.
Exterior Care

Dust off the vehicle body after you drive. Regularly inspect your vehicle for scratches on painted surfaces. A scratch on a painted surface can result in body rust. If you find a scratch, promptly repair it.

Washing the Vehicle

Wash the vehicle frequently. Further, make sure to wash the vehicle in the following circumstances:

- If driving on roads with road salt.
- If driving in coastal areas.
- If tar, soot, bird droppings, insects, or tree sap are stuck to painted surfaces.

Using an Automated Car Wash

- Make sure to follow the instructions indicated on the automated car wash.
- Remove the audio antenna.
- Fold in the door mirrors.
- Turn off the automatic intermittent wipers*.

* Not available on all models  

Continued
Cleaning
Exterior Care

**Using High Pressure Cleaners**
- Keep sufficient distance between the cleaning nozzle and the vehicle body.
- Take particular care around the windows. Standing too close may cause water to enter the vehicle interior.

**Except 2.0 L Petrol engine models**
- Do not spray high pressure water directly into the engine compartment. Instead, use low pressure water and a mild detergent.

**Petrol models (2.0 L engine models)**
- Do not spray high pressure water directly into the engine compartment.

**Applying Wax**
A good coat of automotive body wax helps to protect your vehicle’s paint from the elements. Wax will wear off over time and expose your vehicle’s paint to the elements, so reapply as necessary.

**Maintaining the Bumpers and Other Resin Coated Parts**
If you get petrol, oil, engine coolant, or battery fluid on resin coated parts, they may be stained or the coating may peel. Promptly wipe it away using a soft cloth and water.

**Cleaning the Windows**
Wipe using a glass cleaner.
### Maintaining Aluminium Wheels

Aluminium is susceptible to deterioration caused by salt and other road contaminants. Use a sponge and mild detergent to wipe away promptly. Be careful not to use harsh chemicals (including some commercial wheel cleaners) or a stiff brush. They can damage the clear coat of the aluminium alloy wheels that helps to keep the aluminium from corroding and tarnishing.

### Fogged Exterior Light Lenses

The inside lenses of exterior lights (headlights, brake lights, etc.) may fog temporarily if you have driven in the rain, or after the vehicle has been run through a car wash. Dew condensation also may build up inside the lenses when there is a significant enough difference between the ambient and inside lens temperatures (similar to vehicle windows fogging up in rainy conditions). These conditions are natural processes, not structural design problems in the exterior lights.

Lens design characteristics may result in moisture developing on the light lens frame surfaces. This also is not a malfunction. However, if you see large amounts water accumulation, or large water drops building up inside the lenses, have your vehicle inspected by a dealer.
Handling the Unexpected

Handling the Unexpected

If a Tyre Goes Flat

Changing a Flat Tyre*

If a tyre goes flat while driving, grasp the steering wheel firmly, and brake gradually to reduce speed. Then, stop in a safe place. Replace the flat tyre with a compact spare tyre. Go to a dealer as soon as possible to have the full-size tyre repaired or replaced.

1. Park the vehicle on firm, level, and non-slippery surface and apply the parking brake.

2. Move the shift lever to [P].

3. Turn on the hazard warning lights and turn the ignition switch to LOCK [0]*

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

Following compact spare precautions:
Periodically check the tyre pressure of the compact spare*. It should be set to the specified pressure.
Specified Pressure: 420 kPa (4.2 bar, 60 psi)

When driving with the compact spare tyre, keep the vehicle speed under 80 km/h (50 mph). Replace with a full-size tyre as soon as possible.

The compact spare tyre and wheel in your vehicle are specifically for this model. Do not use them with another vehicle. Do not use another type of compact spare tyre or wheel with your vehicle.

Do not mount tyre chains on a compact spare tyre. If a chain-mounted front tyre goes flat, remove one of the full-size rear tyres and replace it with the compact spare tyre. Remove the flat front tyre and replace it with the full-size tyre that was removed from the rear. Mount the tyre chains on the front tyre.

A compact spare tyre gives a harsher ride and less traction on some road surfaces. Use greater caution while driving.

Do not use more than one compact spare tyre at the same time.

The compact spare tyre is smaller than the regular tyre. Your vehicle’s ground clearance reduces when the compact spare tyre is installed. Driving over road debris or bumps could possibly damage the underside of your vehicle.
## Getting Ready to Replace the Flat Tyre

1. Open the tailgate.
2. Pull the strap and open the under-floor lid.
3. Hook the strap to the anchor as shown.
4. Turn and pull the tab to open the compartment cover located on the left side of the luggage area.
5. Take the tool bag out of the compartment.
6. Turn the jack’s end bracket to loosen it, then remove it.

### WARNING
The jack can only be used for helping an emergency vehicle breakdown, not for changing the regular seasonal tyre or any other normal maintenance or repair operation.

### NOTICE
Do not use the jack if it doesn’t work properly. Call your dealer or a professional towing service.

* Not available on all models
If a Tyre Goes Flat

Changing a Flat Tyre

Continued

Handling the Unexpected

7. Remove the under-floor box, then take the tyre net out.

8. Unscrew the wing bolt, and remove the spacer cone. Remove the spare tyre.

9. Place a wheel block or rock in front and rear of the wheel diagonal to the flat tyre.

10. Place the spare tyre (wheel side up) under the vehicle body, near the tyre that needs to be replaced.
11. Loosen each wheel nut about one turn using the wheel nut wrench.
How to Set Up the Jack

1. Place the jack under the jacking point closest to the tyre to be changed.

2. Turn the end bracket clockwise as shown in the image until the top of the jack contacts the jacking point. Make sure that the jacking point tab is resting in the jack notch.

WARNING: The jack shall be placed on a flat and stable surface on the same level as the vehicle is parked.

The jack that came with your vehicle has the following label.

2. Never get under vehicle when supported by jack.
3. Place jack underneath reinforced area.
3. Raise the vehicle, using the jack handle bar and the jack handle, until the tyre is off the ground.

### Handling the Unexpected

#### If a Tyre Goes Flat

**Changing a Flat Tyre**

1. Remove the wheel nuts and flat tyre.
2. Wipe the mounting surfaces of the wheel with a clean cloth.
3. Mount the spare tyre.
4. Screw the wheel nuts until they touch the lips around the mounting holes, then stop rotating.

### How to Set Up the Jack

Do not use the jack with people or luggage in the vehicle.

Use the jack provided in your vehicle. Other jacks may not support the weight (“load”) or may not fit the jacking point.

The following instructions must be followed to use the jack safely:
- Do not use while the engine is running.
- Use only where the ground is firm and level.
- Use only at the jacking points.
- Do not get in the vehicle while using the jack.
- Do not put anything on top of or underneath the jack.

### Replacing the Flat Tyre

Do not over tighten the wheel nuts by applying extra torque using your foot or a pipe.
5. Lower the vehicle and remove the jack. Tighten the wheel nuts in the order indicated in the image. Go around, tightening the nuts, two to three times in this order.

**Wheel nut torque:**
108 N·m (11kgf·m, 80 lbf·ft)

---

**Storing the Flat Tyre**

**Models with under-floor lid**

1. Close the under-floor lid. Do not lower it.

**All models**

2. Place the tyre net on the luggage area, then attach the two hooks to the luggage hooks on the tailgate opening.

3. Place the flat tyre on the net.

**Models without under-floor lid**

Make sure to place the tyre as rear as possible. The bottom side of the tyre should touch the rear inside wall.

---

**WARNING**

Loose items can fly around the interior in a crash and can seriously injure the occupants.

Store the wheel, jack, and tools securely before driving.
If a Tyre Goes Flat
Changing a Flat Tyre

Handling the Unexpected

4. Wrap the flat tyre with the net, then attach the other two hooks to the same luggage hooks as shown.
5. Store the jack in the compartment on the left side. Turn the jack’s end bracket to lock it in place.
6. Store the tool kit in the compartment.

Deflation Warning System and the Spare Tyre

If you replace a flat tyre with the spare tyre, [ ] indicator comes on while you are driving. After driving for a few kilometres (miles), the indicator will start blinking for a short time and then stay on, but this is normal.

Calibrate the deflation warning system when you replace the tyre with a specified regular tyre.

Deflation Warning System Calibration P. 428
Temporarily Repairing a Flat Tyre*

If the tyre has a large cut or is otherwise severely damaged, you will need to have the vehicle towed. If the tyre only has a small puncture, from a nail for instance, you can use the temporary tyre repair kit so that you can drive to the nearest service station for a more permanent repair.

If a tyre goes flat while driving, grasp the steering wheel firmly, and brake gradually to reduce speed. Then stop in a safe place.

1. Park the vehicle on firm, level, and non-slippery ground and apply the parking brake.

   Automatic transmission models
2. Move the shift lever to P.

   Manual transmission models
2. Move the shift lever to R.

   All models
3. Turn on the hazard warning lights and turn the ignition switch to LOCK [0]*1.

   When towing a trailer, unhitch the trailer.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

* Not available on all models

The kit should not be used in the following situations. Instead, contact a dealer or roadside assistant to have the vehicle towed.

- The tyre sealant has expired.
- More than one tyre is punctured.
- The puncture or cut is greater than 4 mm (3/16 inch).
- The tyre side wall is damaged or the puncture is outside the tyre tread.

Contact Area

<table>

</tr>
<tr>
<td>Larger than 4 mm (3/16 inch)</td>
<td>No</td>
</tr>
</tbody>
</table>

- Damage has been caused by driving with the tyres extremely under inflated.
- The tyre bead is no longer seated.
- The rim is damaged.

Do not remove a nail or screw that punctured the tyre. If you remove it from the tyre, you may not be able to repair the puncture using the kit.

If a Tyre Goes Flat - Temporarily Repairing a Flat Tyre

Handling the Unexpected

1. Open the tailgate.
2. Turn and pull the tab to open the compartment cover located on the right side of the luggage area.
3. Take the TRK out of the rear right side compartment.

**Models without premium audio**

1. Open the tailgate.
2. Remove the TRK bag attached to the left side of the luggage area.

**Models with premium audio**

1. Open the tailgate.
2. Turn and pull the tab to open the compartment cover located on the right side of the luggage area.

Continued
If a Tyre Goes Flat
Temporarily Repairing a Flat Tyre

Injecting the Sealant

1. Shake the bottle well.

2. Screw the filler tube onto the bottle. It pierces the sealed aluminium on top of the bottle.

3. Unscrew the valve cap.

4. Deflate the tyre completely, using the flat end of the valve remover pushing on the valve core.

WARNING

Tyre sealant contains substances that are harmful and can be fatal if swallowed.

If accidentally swallowed, do not induce vomiting. Drink plenty of water and get medical attention immediately.

For skin or eye contact, flush with cool water and get medical attention if necessary.

CAUTION

A valve core can jump out if air remains in tyre.

Extract the air of a tyre completely.

Keep the sealant bottle out of the reach of children. Do not shake the bottle after the filler tube is installed. If you shake the bottle after connecting the tube with the bottle, it may spill sealant.
5. Unscrew the valve core using the valve remover. Do not place the valve core in sand or dirt.

6. Screw the filler tube onto the tyre valve.

7. Hold the bottle upside down, and inject the sealant completely.
   - Squeeze the bottle until the sealant is injected completely.

8. Pull off the filler tube.

Injecting the Sealant

The sealant can permanently stain clothing and other materials. Be careful during handling and wipe away any spills immediately.
If a Tyre Goes Flat
Temporarily Repairing a Flat Tyre

9. Firmly screw the valve core into the tyre stem using the valve remover.

10. Apply the tyre sealant in the tyre sticker to the flat surface of the wheel. The wheel surface must be clean to ensure the sticker adheres properly.

11. Apply the maximum speed sticker to the location shown.

Injecting the Sealant

After injection, insert the valve remover into the filler tube. This prevents the remaining sealant from spilling out.

Use the valve remover as a seal for the empty bottle.

Keep the empty bottle after the sealant is injected. The sealant bottle will be used to collect the injected sealant by a professional.

See a Honda dealer for a replacement sealant bottle and proper disposal of an empty bottle.
If a Tyre Goes Flat

Temporarily Repairing a Flat Tyre

Handling the Unexpected

1. Attach the inflation hose to the valve. Screw it until it is tight.

2. Plug in the air compressor to the accessory power socket.
   - Be careful not to pinch the cord in a door or window.

3. Turn the ignition switch to ACCESSORY [1].
   - In freezing temperatures, start the engine on and leave it running while the flat tyre is being serviced.

**WARNING**

Running the engine with the vehicle in an enclosed or even partly enclosed area can cause a rapid build-up of toxic carbon monoxide. Breathing this colourless, odourless gas can cause unconsciousness and even death. Only run the engine to power the air compressor with the vehicle outdoors.

**NOTICE**

Do not operate the temporary tyre repair kit compressor for more than 15 minutes. The compressor can overheat and become permanently damaged.

See the driver’s doorjamb for the required air pressure.

If you want to measure the air pressure using a gauge, turn the air compressor off first.

The power supply of the air compressor is limited to your vehicle’s 12-volt DC accessory socket.

---

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.
If a Tyre Goes Flat

Temporarily Repairing a Flat Tyre

4. Turn on the air compressor and inflate the tyre to the required air pressure.
   - Check the air pressure gauge on the air compressor.
   - If overinflated, press the pressure deflate button.
5. Turn off the air compressor. Reinstall the valve cap.
6. Unplug the kit from the accessory power socket.
7. Unscrew the inflation hose from the tyre valve. Reinstall the valve cap.

Inflating the Tyre

See the driver’s doorjamb for the required air pressure.

If the required air pressure is not reached within 10 minutes, the tyre may be severely damaged for the kit to provide the necessary seal and your vehicle will need to be towed.
If a Tyre Goes Flat  
Temporarily Repairing a Flat Tyre

Handling the Unexpected

1. Drive the vehicle for about 10 minutes or five kilometres (three miles).
   ▶ Do not exceed 80 km/h (50 mph).
2. Stop the vehicle at a safe place.
3. Check the air pressure using the gauge on the air compressor.
   ▶ Do not turn the air compressor on to check the pressure.
4. If the air pressure is
   • Less than 130 kPa (19 psi): Do not add air and continue driving. The leak is too severe. Call for help and have your vehicle towed.  
     ♻ Emergency Towing P. 599
   • Required air pressure or more: Continue driving until you reach the nearest service station. Do not exceed 80 km/h (50 mph).
   • Greater than 130 kPa (19 psi), but less than required air pressure: Inflate the tyre to the required air pressure.  
     ♻ Inflating the Tyre P. 571
     And repeat steps 1 to 3 until you reach the nearest service station. Do not exceed 80 km/h (50 mph).
5. Repackage and properly stow the kit.

■ Distributing the Sealant in the Tyre

1. Drive the vehicle for about 10 minutes or five kilometres (three miles).
2. Stop the vehicle at a safe place.
3. Check the air pressure using the gauge on the air compressor.
4. If the air pressure is
   • Less than 130 kPa (19 psi): Do not add air and continue driving. The leak is too severe. Call for help and have your vehicle towed.  
     ♻ Emergency Towing P. 599
   • Required air pressure or more: Continue driving until you reach the nearest service station. Do not exceed 80 km/h (50 mph).
   • Greater than 130 kPa (19 psi), but less than required air pressure: Inflate the tyre to the required air pressure.  
     ♻ Inflating the Tyre P. 571
     And repeat steps 1 to 3 until you reach the nearest service station. Do not exceed 80 km/h (50 mph).
5. Repackage and properly stow the kit.
# Engine Does Not Start

If the Keyless Remote Battery is Weak

If the beeper sounds, a symbol appears on the i-multi-information display, and the indicator on the ENGINE START/STOP button blinks, the engine does not start. Start the engine as follows.

1. Touch the centre of the ENGINE START/STOP button with the H logo on the keyless remote while the indicator on the ENGINE START/STOP button is blinking. The buttons on the keyless remote should be facing you. The indicator blinks for about 30 seconds.

2. Depress the brake pedal (automatic transmission) or clutch pedal (manual transmission) and press the ENGINE START/STOP button within 10 seconds after the beeper sounds and the indicator stays on. If you do not depress the pedal, the mode changes to ACCESSORY.
Emergency Engine Stop

The ENGINE START/STOP button may be used to stop the engine due to an emergency situation even while driving. If you must stop the engine, do either of the following operations:

- Press and hold the ENGINE START/STOP button for about two seconds.
- Firmly press the ENGINE START/STOP button twice.

The steering wheel will not lock.

Automatic transmission models

The power mode is in ACCESSORY when the engine is stopped. To change the mode to VEHICLE OFF, move the shift lever to P after the vehicle comes to a complete stop. Then press the ENGINE START/STOP button twice without depressing the brake pedal.

Manual transmission models

The power mode changes to VEHICLE OFF. The vehicle comes to a complete stop. After press the ENGINE START/STOP button three times without depressing the clutch pedal.

The steering wheel will lock.

Model with keyless access system

Emergency Engine Stop

Do not press the button while driving unless it is absolutely necessary for the engine to be switched off.
Jump Starting

Jump Starting Procedure

Turn off the power to electric devices, such as audio and lights. Turn off the engine, then open the bonnet.

1. Connect the first jumper cable to your vehicle’s battery + terminal.
2. Connect the other end of the first jumper cable to the booster battery + terminal.
   - Use a 12 volt booster battery only.
   - When using an automotive battery charger to boost your 12 volt battery, select a lower charging voltage than 15 volt. Check the charger manual for the proper setting.
3. Connect the second jumper cable to the booster battery - terminal.

Petrol models

Booster Battery

Diesel models

Booster Battery

WARNING

A battery can explode if you do not follow the correct procedure, seriously injuring anyone nearby.

Keep all sparks, open flames, and smoking materials away from the battery.

NOTICE

If a battery sits in extreme cold, the electrolyte inside can freeze. Attempting to jump start with a frozen battery can cause it to rupture.

Securely attach the jumper cables clips so that they do not come off when the engine vibrates. Also be careful not to tangle the jumper cables or allow the cable ends to touch each other while attaching or detaching the jumper cables.

Battery performance degrades in cold conditions and may prevent the engine from starting.
4. Connect the other end of the second jumper cable to:

- **Petrol models**
  The engine mounting bolt as shown.

- **Diesel models**
  The grounding point as shown.
  Do not connect this jumper cable to any other part.

5. If the jumper cable is connected to another vehicle, start the assisting vehicle's engine and increase engine's revolution slightly.

6. Attempt to start your vehicle's engine. If it turns over slowly, check that the jumper cables have good metal-to-metal contact.
Jump Starting

Handling the Unexpected

Petrol models (2.0 L engine models)

Diesel models
What to Do After the Engine Starts

Once your vehicle's engine has started, remove the jumper cables in the following order.

1. Disconnect the jumper cable from your vehicle's ground.
2. Disconnect the other end of the jumper cable from the booster battery \( - \) terminal.
3. Disconnect the jumper cable from your vehicle's battery \( + \) terminal.
4. Disconnect the other end of the jumper cable from the booster battery \( + \) terminal.

Have your vehicle inspected by a nearby service station or a dealer.
Shift Lever Does Not Move

Automatic transmission models
Follow the procedure below if you cannot move the shift lever out of the $P$ position.

Releasing the Lock

1. Set the parking brake.

2. Remove the key from the ignition switch.

3. Wrap a cloth around the tip of a small flat-tip screwdriver. Put it into the shift lock release slot as shown in the image, and remove the cover.

4. Insert the key into the shift lock release slot.

5. While pushing the key down, press the shift lever release button and place the shift lever into $N$.

$\Rightarrow$ The lock is now released. Have the shift lever checked by a dealer as soon as possible.
Overheating

How to Handle Overheating

Overheating symptoms are as follows:
• The temperature gauge needle is at the red (Hot) mark or the engine suddenly loses power.
• Steam or spray comes out of the engine compartment.

First thing to do
1. Immediately park the vehicle in a safe place.
2. Turn off all accessories and turn on the hazard warning lights.
   ▶ No steam or spray present: Keep the engine running and open the bonnet.
   ▶ Steam or spray present: Turn off the engine and wait until it subsides. Then, open the bonnet.

Petrol models except 2.0 L engine models

WARNING
Steam and spray from an overheated engine can seriously scald you.
Do not open the bonnet if steam is coming out.

NOTICE
Continuing to drive with the temperature gauge needle at the red (Hot) mark on may damage the engine.
Overheating

How to Handle Overheating

■ Next thing to do

1. Check that the cooling fan is operating and stop the engine once the temperature gauge needle goes down.
   - If the cooling fan is not operating, immediately stop the engine.
2. Once the engine has cooled down, inspect the coolant level and check the cooling system components for leaks.
   - If the coolant level in the reserve tank is low, add coolant until it reaches the MAX mark.
   - If there is no coolant in the reserve tank, check that the radiator is cool. Cover the radiator cap with a heavy cloth and open the cap. If necessary, add coolant up to the base of the filler neck, and put the cap back on.

■ Last thing to do

Once the engine has cooled sufficiently, restart it and check the temperature gauge. If the temperature gauge needle has gone down, resume driving. If it has not gone down, contact a dealer for repairs.

WARNING

Removing the radiator cap while the engine is hot can cause the coolant to spray out, seriously scalding you.

Always let the engine and radiator cool down before removing the radiator cap.

If the coolant is leaking, contact a dealer for repairs.

Use water as an emergency/temporary measure only. Have a dealer flush the system with proper antifreeze as soon as possible.
Diesel models and Petrol models (2.0 L engine models)

How to Handle Overheating

Overheating symptoms are as follows:
- The temperature gauge needle is at the red (Hot) mark or the engine suddenly loses power.
- Steam or spray comes out of the engine compartment.

First thing to do
1. Immediately park the vehicle in a safe place.
2. Turn off all accessories and turn on the hazard warning lights.
   - No steam or spray present: Keep the engine running and open the bonnet.
   - Steam or spray present: Turn off the engine and wait until it subsides.
     Then, open the bonnet.

NOTICE
Continuing to drive with the temperature gauge needle at the red (Hot) mark on may damage the engine.

WARNING
Steam and spray from an overheated engine can seriously scald you.
Do not open the bonnet if steam is coming out.
How to Handle Overheating

■ Next thing to do

1. Check that the cooling fan is operating and stop the engine once the temperature gauge needle goes down.
   - If the cooling fan is not operating, immediately stop the engine.
2. Once the engine has cooled down, inspect the coolant level and check the cooling system components for leaks.
   - If the coolant level in the expansion tank is low, add coolant until it reaches the MAX mark. Cover the expansion tank cap with a heavy cloth. Loosen the cap by turning it 1/8 turn anticlockwise. Stop and wait for any pressure in the expansion tank to escape. Then remove the cap by turning it anticlockwise. Put the cap back on tightly filling the coolant.

■ Last thing to do

Once the engine has cooled sufficiently, restart it and check the temperature gauge. If the temperature gauge needle has gone down, resume driving. If it has not gone down, contact a dealer for repairs.

---

**WARNING**

Removing the expansion tank cap while the engine is hot can cause the coolant to spray out, seriously scalding you.

Always let the engine and radiator cool down before removing the expansion tank cap.

If the coolant is leaking, contact a dealer for repairs.

Use water as an emergency/temporary measure only. Have a dealer flush the system with proper antifreeze as soon as possible.
Indicator, Coming On/Blinking

If the Low Oil Pressure Indicator Comes On

- **Reasons for the indicator to come on**
  Comes on when the engine oil pressure is low.
- **What to do as soon as the indicator comes on**
  1. Immediately park the vehicle on level ground in a safe place.
  2. If necessary, turn the hazard warning lights on.
- **What to do after parking the vehicle**
  1. Stop the engine and let it sit for about three minutes.
  2. Open the bonnet and check the oil level.
  
  ![Oil Check P. 498](image)
  3. Start the engine and check the low oil pressure indicator.
    - The indicator goes off: Start driving again.
    - The indicator does not go off within 10 seconds: Stop the engine and contact a dealer for repairs immediately.

**NOTICE**
Running the engine with low oil pressure can cause serious mechanical damage almost immediately.

If the Charging System Indicator Comes On

- **Reasons for the indicator to come on**
  Comes on when the battery is not being charged.
- **What to do when the indicator comes on**
  Turn off the climate control system, rear demister, and other electrical systems, and immediately contact a dealer for repairs.

**If you need to stop temporarily, do not turn off the engine. Restarting the engine may rapidly discharge the battery.**
If the Malfunction Indicator Lamp Comes On or Blinks

Reasons for the indicator lamp to come on or blink
- Comes on if there is a problem with the engine emissions control system.
- Blinks when engine misfiring is detected.

Diesel models
- Comes on when air may have entered the fuel system.

What to do when the indicator lamp comes on
Avoid high speeds and immediately get your vehicle inspected at a dealer.

Diesel models with fuel system primer
Prime the fuel system. If it stays on, avoid high speeds and immediately get your vehicle inspected at a dealer.

What to do when the indicator lamp blinks
Park the vehicle in a safe place with no flammable items and wait at least 10 minutes or more with the engine stopped until it cools.

If the Brake System Indicator (Red) Comes On

Reasons for the indicator to come on
- The brake fluid is low.
- There is a malfunction in the brake system.

What to do when the indicator comes on while driving
Press the brake pedal lightly to check pedal pressure.
- If normal, check the brake fluid level the next time you stop.
- If abnormal, take immediate action. If necessary, downshift the transmission to slow the vehicle using engine braking.

Notices
- If you drive with the malfunction indicator lamp on, the emissions control system and the engine could be damaged.
- If the malfunction indicator lamp blinks again when restarting the engine, drive to the nearest dealer at 50 km/h (30 mph) or less. Have your vehicle inspected.

Diesel models
If the brake system indicator and ABS indicator come on simultaneously, the electronic brake distribution system is not working. This can result in vehicle instability under sudden braking. Have your vehicle inspected by a dealer immediately.
If the Electric Power Steering (EPS) System Indicator Comes On

- **Reasons for the indicator to come on**
  - Comes on if there is a problem with the EPS system.
  - If you depress the accelerator pedal repeatedly to increase the engine speed while the engine is idling, the indicator comes on, and sometimes the steering wheel becomes harder to operate.

- **What to do when the indicator comes on**
  Stop the vehicle in a safe place and restart the engine.
  If the indicator comes on and stays on, immediately have your vehicle inspected by a dealer.
If the Low Tyre Pressure/Deflation Warning System Indicator Comes On or Blinks

■ Reasons for the indicator to come on/blink
A tyre pressure is significantly low, or the deflation warning system has not been calibrated. If there is a problem with the deflation warning system or the compact spare tyre* is installed, the indicator blinks for about one minute, and then stays on.

■ What to do when the indicator comes on
Drive carefully and avoid abrupt cornering and hard braking. Stop your vehicle in a safe place. Check the tyre pressure and adjust the pressure to the specified level. The specified tyre pressure is on a label on the driver side doorjamb.

- Calibrate the deflation warning system after the tyre pressure is adjusted.

Deflation Warning System Calibration P. 428

■ What to do when the indicator blinks, then remains on
Have the tyre inspected by a dealer as soon as possible. If the compact spare tyre* causes the indicator to blink, change the tyre to a full-size tyre.

The indicator goes off after driving for a few kilometres (miles).

- Calibrate the deflation warning system after a full-size tyre is reinstalled.

Deflation Warning System Calibration P. 428

NOTICE
Driving on an extremely underinflated tyre can cause it to overheat. An overheated tyre can fail. Always inflate your tyres to the prescribed level.
If the Low Oil Level Symbol Appears

■ Reasons for the symbol to appear
Appears when the engine oil level is low.

■ What to do as soon as the symbol appears
1. Immediately park the vehicle on level ground in a safe place.
2. If necessary, turn the hazard warning lights on.

■ What to do after parking the vehicle
1. Stop the engine and let it sit for about three minutes.
2. Open the bonnet and check the oil level.

Oil Check P. 498

Diesel models

If the PGM-FI Symbol Appears

■ Reasons for the symbol to appear while the engine is running
There is a problem with the engine control system.

■ What to do when the symbol appears repeatedly
Avoid full-throttle acceleration and high speed driving. Have your vehicle checked by a dealer.

If the Low Oil Level Symbol Appears

Notice
Running the engine with low oil level can cause serious mechanical damage almost immediately.

This system activates after the engine warms up. If the outside temperature is extremely low, you may have to drive for a long time until the system senses the engine oil level.

If the indicator appears again, stop the engine and contact a dealer for repairs immediately.

If the PGM-FI Symbol Appears

Notice
Continuously driving with this symbol on can damage the emissions controls and engine. Those repairs may not be covered by your vehicle’s warranties.
Fuse Locations

If any electrical devices are not working, turn the ignition switch to LOCK [0]*1 and check to see if any applicable fuse is blown.

Primary Engine Compartment Fuse Box

Located near the battery. Push the tabs to open the box. Fuse locations are shown on the image below. Locate the fuse in question by the fuse number in the image and chart.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

Inspecting and Changing Fuses

1. Turn the ignition switch to LOCK 0*1. Turn headlights and all accessories off.  
2. Remove the fuse box cover.  
3. Check the large fuse in the engine compartment.  
   ▶ If the fuse is blown, use a Phillips-head screwdriver to remove the screw and replace it with a new one.  
4. Inspect the small fuses in the engine compartment and the vehicle interior.  
   ▶ If there is a burned out fuse, remove it and replace it with a new one.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

**NOTICE**
Replacing a fuse with one that has a higher rating greatly increases the chances of damaging the electrical system.

Replace fuse with a new one of the same specified amperage. Use the charts to locate the fuse in question and confirm the specified amperage.

**Fuse Locations** P. 592
Emergency Towing

Call a professional towing service if you need to tow your vehicle.

■ Flat bed equipment
The operator loads your vehicle on the back of a truck. This is the best way to transport your vehicle.

■ Wheel lift equipment
The tow truck uses two pivoting arms that go under the front tyres and lift them off the ground. The rear tyres remain on the ground. This is an acceptable way to tow your vehicle.

Emergency Towing

2.0 L engine models

NOTICE
Improper towing such as towing behind a motorhome or other motor vehicle can damage the front bumper.

All models

NOTICE
Trying to lift or tow your vehicle by the bumpers will cause serious damage. The bumpers are not designed to support the vehicle's weight.

Never tow your vehicle with just a rope or chain. It is very dangerous since ropes or chains may shift from side to side or break.

Continued
Emergency Towing

If your vehicle must be towed with the front wheels on the ground:

1. Check the transmission fluid level. *(Automatic Transmission Fluid)* P. 508
2. Hook the towing device to the towing hook.
3. Start the engine.
   - If it is difficult to turn on the engine, put the ignition switch in ACCESSORY \([\text{I}]\) or ON \([\text{II}]\)^*1*.
4. Depress the brake pedal.
5. Shift to \([\text{D}]\) and hold for five seconds, then to \([\text{N}]\).
6. Release the parking brake.

*1: Models with the keyless access system have an ENGINE START/STOP button instead of an ignition switch.

If you cannot turn on the engine, you may experience the following while your vehicle is being towed.
- Braking may become difficult since the brake system’s power assist is disabled.
- Steering wheel becomes heavy as the power steering system is disabled.

Going down a long slope heats up the brakes. This may prevent the brakes from working properly. If your vehicle needs to be towed on an incline, call a professional towing service.

With the front wheels on the ground, it is best to tow the vehicle no farther than 80 km (50 miles), and keep the speed below 55 km/h (34 mph).

*If your vehicle must be towed with the front wheels on the ground:*

- If you cannot follow the exact procedure, do not tow your vehicle with the front wheels on the ground.

- If you cannot turn on the engine, you may experience the following while your vehicle is being towed.
  - Braking may become difficult since the brake system’s power assist is disabled.
  - Steering wheel becomes heavy as the power steering system is disabled.

- Turning the ignition switch to LOCK \([\text{0}]\)^*1* locks the steering wheel.

Manual transmission models

- Going down a long slope heats up the brakes. This may prevent the brakes from working properly. If your vehicle needs to be towed on an incline, call a professional towing service.

With the front wheels on the ground, it is best to tow the vehicle no farther than 80 km (50 miles), and keep the speed below 55 km/h (34 mph).

*Except 2.0 L engine models*
When You Cannot Open the Tailgate

If you cannot open the tailgate, use the following procedure.

1. Use a flat-tip screwdriver and remove the cover on the back of the tailgate.

2. To open the tailgate, push the tailgate while pushing down the lever with the flat-tip screw driver.

What to do-following up

After taking these steps, contact a dealer to have your vehicle checked.

When you open the tailgate from inside, make sure there is enough space around the tailgate, and it does not hit anyone or any object.
Refueling

**Refueling From a Portable Fuel Container**

If you have run out of fuel and need to refuel your vehicle from a portable fuel container, use the funnel provided with your vehicle.

1. Turn off the engine.
2. Pull on the fuel fill door release handle under the driver’s side lower outside corner of the dashboard.
   - The fuel fill door opens.
3. Take the funnel out of the compartment located on the left side in the luggage area.
   - **Types of Tools** P. 556
4. Remove the extension from the funnel.
5. Insert the funnel into the filler neck fully and slowly.
6. Fill the tank with fuel from the portable fuel container.
   - Pour fuel carefully so you do not spill any.
7. Remove the funnel from the filler neck.
   - Wipe up any fuel from the funnel before storing it.
8. Shut the fuel fill door by hand.

---

**Diesel models**

**Refueling From a Portable Fuel Container**

**WARNING**

Fuel is highly flammable and explosive. You can be burned or seriously injured when handling fuel.
- Stop the engine, and keep heat, sparks, and flame away.
- Handle fuel only outdoors.
- Wipe up spills immediately.

**NOTICE**

Do not insert the nozzle of a portable fuel container or any funnel other than the one provided with your vehicle. Doing so can damage the fuel system. Do not try to pry open or push open the sealed fuel tank with foreign objects. This can damage the fuel system and its seal.

Make sure the fuel in the portable fuel container is diesel fuel before you refuel.
**Priming the Fuel System**

**How to Bleed Air from the Fuel System**

If the fuel tank has been run dry, air may enter the fuel system. This prevents the engine from restarting even after you refuel the vehicle.

Bleed the air from the fuel system as follows:

1. Pour at least 5 litres of fuel in the fuel tank.
2. Open the tailgate.
3. Turn and pull the tab to open the compartment cover located on the left side of the luggage area.
4. Take the funnel out of the compartment.
5. Remove the extension from the funnel.

**Diesel models with fuel system primer**

If you are not sure how to bleed the air, consult a dealer.
6. Open the left side of the front door.
7. Move the seat to the rear.

8. Open the cover in the floor.

Models with floor mat

- Remove the floor mat.

Floor Mats* P. 550
- You can open the cover by prying it off with a flat-tip screwdriver.

9. Put the cover on the extension.
10. Place the extension on the rod, which is located in the floor where the cover has been removed.
11. Using your hand, apply pressure on the cover to push down the rod.
   - Repeatedly press the cover until it becomes hard to press it down.

How to Bleed Air from the Fuel System

When reinstalling the floor mat, turn the knobs to the lock position.

If the engine fails to restart after priming the fuel system, there is a problem in the fuel system. Have your vehicle inspected by a dealer.

* Not available on all models
12. Start the engine.
   - Starting the Engine P. 382, 385
   - Do not hold the ignition switch for more than 10 seconds at a time. This will
time damage the fuel pump and the engine starter.
   - If the engine does not start, go back to step 10.
13. Depress the accelerator pedal slightly and hold it at approximately 1,500 rpm for
   about 30 seconds.
   - Air bleeding of the fuel system is complete.
14. Turn off the engine, then restart it again. Repeat this at least three times at
   intervals of approximately 45 seconds.
   - The malfunction indicator lamp or [ ] goes off.
Information

This chapter includes your vehicle’s specifications, locations of identification numbers, and other information required by regulation.

Specifications

Information

■ Brake/Clutch Fluid

Specified: Brake Fluid with DOT 3 or DOT 4

■ Manual Transmission Fluid

Specified: Honda Manual Transmission Fluid
Capacity: Change 1.4 ℓ

■ Engine Oil

European models
Genuine Honda Motor Oil\(^1\)
ACEA A3/B3, A5/B5 or higher grade 0W-20

European models without service reminder system
Genuine Honda Motor Oil\(^1\)
ACEA A1/B1, A3/B3, A5/B5 or higher grade 0W-20

Except European models
Genuine Honda Motor Oil\(^2\)
API service SM or higher grade fuel-efficient oil 0W-20, 0W-30, 5W-30, 10W-30

Recommended

Capacity
Change 3.4 ℓ
Change including filter 3.6 ℓ

*1: If you use 0W-20, you should use "Honda Engine Oil Type 2.0".
*2: If you use 0W-20, you should use "Honda Engine Oil Type 2.0" or genuine oil which has API service grade mark.

■ Engine Coolant

Specified: Honda All Season Antifreeze/Coolant Type2
Ratio: 50/50 with distilled water
Capacity
- 4.72 ℓ (change including the remaining 0.46 ℓ in the reserve tank)\(^{1, *1}\)
- 4.61 ℓ (change including the remaining 0.46 ℓ in the reserve tank)\(^{1, *2}\)
- 4.61 ℓ (change including the remaining 0.46 ℓ in the reserve tank)\(^{1, *3}\)
- 4.49 ℓ (change including the remaining 0.46 ℓ in the reserve tank)\(^{2, *4}\)

*1: Left-hand drive type
*2: Right-hand drive type
*3: Vehicle with auxiliary electric water pump
*4: Vehicle without auxiliary electric water pump

■ Tyre

Regular
Size: 195/65R15 91T
205/55R16 91V
225/45R17 91W
Pressure: See the label on driver's doorjamb

Compact Spare
Size: T135/80D16 101M
Pressure: kPa (bar [psi]) 420 (4.2 [60])

Wheel Size
Regular
- 15 x 6\(^2\)
- 16 x 6.1/2\(^3\)
- 17 x 7\(^4\)
Compact Spare
- 16 x 4T\(^1\)

*1: Vehicle with compact spare tyre
*2: Vehicle with 195/65R15 tyres
*3: Vehicle with 205/55R16 tyres
*4: Vehicle with 225/45R17 tyres

■ Honda TRK Air Compressor\(^1\)

A weighted emission sound pressure level 80 ± 5 dB (A)
A weighted sound power level 91.5 ± 5 dB (A)

*1: Vehicle with tyre repair kit

■ Brake

Type
Power assisted
Front Ventilated disc
Rear Solid disc
Parking Mechanical

■ Air Conditioning

LHD models
Refrigerant Type: HFO-1234yf (R-1234yf)
Charge Quantity: 360 – 400 g

RHD models
Refrigerant Type: HFO-1234yf (R-1234yf)
Charge Quantity: 400 – 440 g

Refrigerant Type: HFO-1234yf (R-1234yf)
Charge Quantity: 360 – 400 g

Refrigerant Type: HFO-1234yf (R-1234yf)
Charge Quantity: 400 – 440 g

A weighted emission sound pressure level 80 ± 5 dB (A)
A weighted sound power level 91.5 ± 5 dB (A)

Change including 5.4 ℓ

*1: If you use 0W-20, you should use "Honda Engine Oil Type 2.0".
*2: If you use 0W-20, you should use "Honda Engine Oil Type 2.0" or genuine oil which has API service grade mark.

■ Engine Coolant
Specified Honda All Season Antifreeze/Coolant Type2
Ratio 50/50 with distilled water
Capacity 6.69 ℓ (change including the remaining 0.475 ℓ in the reserve tank)*1
6.52 ℓ (change including the remaining 0.475 ℓ in the reserve tank)*2
*1: Left-hand drive type
*2: Right-hand drive type

■ Tyre
Recommended
Size 235/35ZR19 91Y
Pressure See the label on driver’s doorjamb
Wheel Size Regular 19 x 8 1/2J

■ Honda TRK Air Compressor
A weighted emission sound pressure level 80 ± 5 dB (A)
A weighted sound power level 91.5 ± 5 dB (A)

■ Air Conditioning
LHD models
Refrigerant Type HFO-1234yf (R-1234yf)
Charge Quantity 360 – 400 g
RHD models
Refrigerant Type HFO-1234yf (R-1234yf)
Charge Quantity 400 – 440 g

■ Vehicle Dimensions
Length 4,390 mm (172.8 in)
Width 1,878 mm (73.9 in)
Height Shark fin antenna 1,459 mm (57.4 in)
Wheelbase 2,594mm (102.1 in)
Track Front 1,605 mm (63.2 in)*1
1,615 mm (63.6 in)*2
Rear 1,528 mm (60.2 in)*1
1,538 mm (60.6 in)*2
*1: Offset 60 mm (2.4 in)
*2: Offset 55 mm (2.2 in)

Engine Specifications

Type: Water cooled 4-stroke DOHC i-DTEC diesel engine with turbo charger, intercooler
Bore x Stroke: 76.0 x 88.0 mm (2.99 x 3.46 in)
Displacement: 1,597 cm³ (97 cu-in)
Compression Ratio: 16.0 : 1

Fuel

Type: EN590 standard diesel fuel
Fuel Tank Capacity: 50 ℓ

Battery

Capacity/Type: 70AH(20)/L3

Idle Stop:
The battery installed in this vehicle is specifically designed for a model with Auto Idle Stop. If you need to replace the battery, make sure to select the specified type. Ask a dealer for more details.

Washer Fluid

Tank Capacity:

- 2.0 ℓ¹
- 2.5 ℓ², ³
- 4.5 ℓ⁴

Specifications

### Brake/Clutch Fluid
- Specified: Brake Fluid with DOT 3 or DOT 4

### Manual Transmission Fluid
- Specified: Honda Manual Transmission Fluid
- Capacity: 1.9 ℓ

### Engine Oil
- European models
  - Honda Diesel Oil #1.0
  - ACEA C2/C3 0W-30
- Except European models
  - Honda Diesel Oil #1.0
  - ACEA C2/C3 0W-30, 0W-40, 5W-30, 5W-40, 10W-30, 10W-40
- Recommended
  - Capacity: 4.3 ℓ
  - Capacity including filter: 4.7 ℓ

### Engine Coolant
- Specified: Honda All Season Antifreeze/Coolant Type 2
- Ratio: 50/50 with distilled water
- Capacity: 5.66 ℓ (change including the remaining 0.56 ℓ in the expansion tank)

### Tyre
- Regular
  - Size: 205/55R16 91V
  - 225/45R17 91W
- Pressure
  - See the label on driver's doorjamb
- Compact Spare
  - Size: T135/80D16 101M
  - Pressure
    - kPa (bar [psi]): 420 (4.2 [60])
- Wheel Size
  - Regular
    - 16 x 6 1/2J
    - 17 x 7J
  - Compact Spare

Identification Numbers

Vehicle Identification Number (VIN), Engine Number and Transmission Number

Your vehicle has a 17-digit vehicle identification number (VIN) used to register your vehicle for warranty purposes, and for licensing and insuring your vehicle. The locations of your vehicle's VIN, engine number and transmission number are shown as follows.

**Petrol models (1.4 L engine models)**

- **Vehicle Identification Number**
- **Engine Number**
- **Manual Transmission Number**
- **Certification Plate or Label**

EC Declaration of Conformity

1. The undersigned, Mr. Ryuchi Hiraki, representing the manufacturers, herewith declares that the machinery described below fulfills all the relevant provisions of:
   - The EC directive 2006/42/EC on machinery

2. Description of the machinery
   a) Generic denomination:
   b) Function:
      Pantograph jack
      Lifting motor vehicle
